STANDING COMMITTEE'S "REVIEW" OF THE REPORT		i-xxvi
COMMISSIONER'S REPORT		1-64
	ACCOMPANIMENTS.	
1. FINANCIAL	Report of the Chief Accountant with Tabular Statements	65-201
2. REVENUE	Report of the Assessor and Collector	203-230
	Report of the Revenue and Refund Audit Officer	231-251
3. PUBLIC WORKS	Report of the Special Drainage Engineer	253-265
	Report of the Executive Engineer on Drainage and Water Works	267-382
	Report of the Executive Engineer on Municipal Buildings, Regulation of Streets, &c., Roads and Lighting, and Workshops	383-536
	Report of the Chief Officer of the Fire Brigade	537-569
	Public Gardens Report	570-572
	Victoria and Albert Museum Report	573-576
4. PUBLIC HEALTH	Health Officer's Report and Vital Statistics	577-790
	License Department Report	791-798
	Market Report and Statements.	799-814
	Return of Street Accidents	815-817
	Report of Medical Officer, Infectious Diseases Hospitals	818-821
5. EDUCATIONAL	Report of the Joint Schools Committee	823-856
6. SURVIVING AUDITOR'S REPORT		857-887

Review by the Standing Committee of the Administration Report of the Municipal Commissioner for the year 1895-96.

1. There were 59 meetings of the Corporation during the year and 52 meetings of Committees thereof; 2 other meetings of Committee were convened, but, on account of want of quorum, were not held.

2. The Standing Committee held 54 meetings, and there were 32 meetings of Sub-Committees, with 114 attendances for cheque signing and 51 for the audit of the weekly statement of accounts; one meeting of a Sub-Committee was convened, but not held for want of a quorum; on two occasions members attending to audit the accounts were unable to make the audit as the accounts were not ready owing to the closing of accounts for the year and the Easter holidays supervened.

3. *Drainage.*—The unfinished works in progress and the new works sanctioned or commenced during the year in connection with the special drainage operations were as follows :— Colaba sewerage, Umarkhari sewerage, Connaught and Sussex Roads drainage and sewerage, Parel sewerage, Mazagon sewerage, Malabar and Khamballa Hills sewerage, Fergusson Road and Chinchpokli sewerage (gravitation portion), Old Race Course or Agripada sewerage (gravitation). The total sanctioned grant for the Colaba sewerage was Rs. 7,59,608, of which Rs. 7,53,198 had been expended at the close of the year. These works are being constructed on the Shone system. The contract for that portion of the sewerage, which consists of pipe sewers, was let to Messrs. Bulkley and Co., but on 25th February 1895, they were required to withdraw from the whole of the work, and the remaining work was carried out departmentally. But, as the most difficult parts were let

undone by the contractors, considerable delay resulted in the completion which, however, was practically accomplished in the middle of February last. Messrs. Bulkley and Co. filed a suit in the High Court against the Corporation, but early in August last, the Hon'ble Mr. Justice Badrudin Tyabji delivered judgment dismissing the plaintiffs' suit with costs. The contractors for the works in air-compressing machinery, &c., were Messrs. Hughes and Lancaster, who practically completed their contract within the contract period, 1st May. The total amounts payable to them were £13,651 for machinery, &c., and Rs. 14,276 for the erection thereof, making a total of Rs. 2,60,007, but the final instalment of Rs. 1,551 had not been paid to the contractors at the end of the year because the machinery and mains had not been finally tested. The official trials of the air-compressing machinery made by the Assistant Executive Engineer, Mechanical Branch, on behalf of the Municipality were reported by that officer to the Executive Engineer as being satisfactory. The contractors for the remaining portions of the Colaba sewerage, namely, works in engine-house, boiler-house, coal-store, chimney, and engineer and firemen's quarters at the air-compressing station, and works in the ejector chamber, excavations, and masonry for air and sewage mains were Messrs. Mistri, Bhedwar, Vachhaghandi and Co. Their work was not completed even within the extended contract time, but was practically finished on 1st October last. The bill of these contractors is under the consideration of the Standing Committee.

The Standing Committee concur with the Municipal Commissioner in considering that at present it would be premature to express an opinion as to the efficient working of the Shone system as applied to Colaba.

Messrs. Bulkley and Co. were also the contractors for the Umarkhadi portion of the general scheme of drainage, but, on their withdrawal from the work under notice, the same was carried on departmentally until the south-west monsoon of 1895. Subsequently, the work was let by contract to Mr. Sitaram Luxoman. The total expenditure on the Umarkhadi work to the end of the year was Rs. 2,14,682 as against the sanctioned amount of Rs. 3,84,498.

The drainage and sewerage work of the Connaught and Sussex Roads, so far as the contractors were concerned, was finished and paid for ; but some works cannot be completed until houses along the line of roads—which buildings have not yet been commenced—have been fitted with vent shafts and water can be laid on to the flushing tanks by a main. The grant for the drainage and sewerage of these two roads was Rs. 51,916, of which Rs. 35,923-15-9 had been expended to 31st March last. The gravitation portion of the Parel sewerage works was entrusted to Messrs. Mistri, Bhedwar, Vachaghandi and Co,, who did not carry out their contract within the specified time, six months ending on 31st May 1895. The work was practically completed by the end of December last although the Drainage Engineer on Special Duty reported that the final bill could not be passed until certain defects were remedied. As against the estimated cost of Rs. 70,974, the total expenditure at the close of the year amounted to Rs. 58,127. For the gravitation portion of the Mazagon sewerage the contractors were Messrs. Sulemanji Mulla Abdulali and Co., the contract period for completion being two years from 23rd November 1895. The sanctioned grant for this work was Rs. 3,32,661, of which Rs. 46,479 had been expended up to the close of the year. The contract for the construction of the Malabar and Khamballa Hills sewerage by gravitation was entrusted to Mr. Sayaji Naguji at Rs. 1,17,978 as against the sanctioned grant of Rs. 1,57,026. The contract time for the completion of these works is eighteen months from November 1895. The expenditure at the end of the year amounted to Rs. 34,219. For the Fergusson Road and Chinchpokli sewerage by gravitation the sanctioned grant is Rs. 93,572, but these works have not yet been proceeded with. In the same way nothing has yet been done with regard to commencing the sewerage (gravitation portion) of the Old Race Course or Agripada district, the grant for which was sanctioned by the Corporation at Rs. 40,815.

The contracts for the supply of the stoneware pipes and fittings for the gravitating portions of the Mazagon, Malabar and Khamballa Hills districts were undertaken by Messrs. Richardson and Cruddas, but there was delay in delivering in some cases owing, it is stated, to unforeseen difficulties in regard to shipment from England, consequent on the chartering by Government of P. and O. Company's

steamers for the conveyance of troops to India and Africa. The Standing Committee note that, in the case of the Mazagon sewerage, the experiment has been made of using Indian-made stoneware pipes manufactured by Messrs. Burn and Co. of Jabalpur and Raniganj.

4. Turning to the questions of the existing drainage and sewerage system, the Standing Committee are glad to observe that the Worthington triple expansion pumping engines used in the Love Grove Pumping Station continued to work satisfactorily notwithstanding the large amount of wear and tear caused by the passage of silt through them, the average efficiency being 94 per cent. Slight breakages of the plant continue to occur, but the Executive Engineer reports that these are not more frequent or serious than must be expected with large pumps of this description. The breakages that occur do not in any way interfere with the efficiency of the station as three of the engines are the maximum number required to keep the sewage down, the fourth being always available to replace one stopped for repairs. The average number of gallons of sewage pumped during the twenty-four hours from 1st June to 30th September 1895 was 34,570,720, with a coal consumption per 1,000,000 gallons, of 5 cwts. 1 qr. 42 lbs.; ditto during dry weather from 1st March 1895 to 31st May 1895, 26,912,330 gallons with coal consumption of 5 cwts. 0 qr. 86 lbs.; ditto from 1st March 1895 to 29th February 1896, 29,465,127 gallons, with coal consumption of 5 cwts. 1qr. 08 lbs. The cost of working these engines—an average of 60 pies per 1,000,000 gallons lifted one foot high, compared favourably with the cost of pumping at similar stations in England, namely, 51 pies at Abbey mills (Worthington's engines), 90 pies at Western Pumping Station (beam engines and centrifugals) 84 pies at Crossness (beam engines and centrifugals) and 69 pies Deptford (beam engines and centrifugals). The average daily consumption of coal was 7 tons 15 cwts. 15 lbs., as compared with 8 tons 3 cwts. 3 qr. 20 lbs. in the preceding year; but, on the other hand, the price of coal was nearly one rupee per ton higher than in 1894-95. The experiment of using valve faces made of "celleuvert" instead of dermatine did not answer, for after thirty-two days' work the "celleuvert" was worn completely away, whilst the dermatine faces

were still quite good. The whole of the plant of the engines was taken over from the makers, Messrs. James Simpson and Co. in May 1895. All claims were finally adjusted, and the last instalment of £2,396 paid. There was a serious obstruction at the mouth of the out-fall sewer, one of the pipes being completely blocked at times, apparently by stones or concrete, a matter which, the Standing Committee are glad to observe, will receive the attention of the Executive. The Executive Engineer reports that arrangements must sooner or later be made for removing the bar below low-water mark in the storm-water channel as it results in the accumulation of foul mud which increases year by year and causes much of the offensive stench complained of. He also states that it is found necessary to enlarge the shred lifters as the smallness of their area causes the sewage to be retarded in its flow.

The work at the Colaba Central Compressor Station (Shone System) was practically completed early in July 1895, and on 22nd August following it was formally opened by the Commissioner, but as the line and connection to the various ejector stations was not complete, the station was not at regular work until 12th December, when the Tramway Company's drain was connected with No. 2 Station. Since then the Compressor Station has been in regular work night and day, and though sufficient time has not elapsed to ascertain the cost of raising sewage by this system, the Executive Engineer states that the working has been in every way satisfactory.

As yet only a very few connections have been made with the new system, namely, the open drain in rear of the Apollo Hotel, godown of Gymkhana boat-house, Tramway Company's stable drain, the Night-soil Depôt, Fort Press Company's godowns, Arthur Bunder, old premises of the Hemp and Jute Mills Company, premises at the junction of Bohra Cross Lane and Colaba Road, new station of the B. B. & C. I. R. Company, and chawls and stables, Victoria Bunder. The air-compressing machinery of the station consists of three compound non-condensing horizontal steam engines, with air-compressing cylinders and a suitable receiver for containing the compressed air, steam being

supplied by two boilers of the marine type working up to a pressure of 120 lbs. per square inch. Below the ground, in different parts of Colaba, there are five ejector stations, in each of which are two ejectors, which being actuated by the compressed air conveyed from the compressor station through pipes, cause the sewage to be propelled along suitable closed channels to its destination. The ejectors are automatic in action. Up to the close of the year the quantity of sewage lifted had not been ascertained as the necessary counters had not been fixed.

Regarding the question of house-connections, the Corporation, by their Resolution No. 13193 of 10th February last, sanctioned the payment of an advance of Rs. 1,00,000 for the cost of providing drain connections for new houses and the repairs of some connections already laid down, and for defraying the cost of certain establishments for preparing estimates of the cost of connections in the Colaba and Parel sewerage districts, ditto of the cost of connections between sewers and new buildings in course of construction. The resolution also directed that the work of providing connections should be proceeded with in the following order :—Parel, comprising in its area Government House Road, Parel village, Lalwadi, Kala Chauki Road, and Parel Tank Road ; the second district, known as districts Nos. 1 and 2, Colaba—No. 1 district being bounded on the east by the Sailors' Home and the Apollo Bunder, and on the south and west by the Colaba Causeway as far as the First Cross Street, No. 2 district being the whole of Lower Colaba from the South end of the Causeway to the railway crossing on Colaba Road ; the third district to complete the remaining portion of the first drainage section.

These various establishments were accordingly employed and the connection of new houses completed was taken in hand from 1st March following, as also the work of repairing house-connections already constructed. The cost was debited to the advance of Rs. 1,00,000, sanctioned out of the provision of Rs. 3,43,797 for house-connections.

The miscellaneous minor drainage works in hand were as follow :—(1) Storm water drain with manholes and water gullies, Cruikshank Road, completed at a cost of

Rs. 17,358-5-7. (2) Storm-water drain, Dadar Road and Portuguese Church Road, at a cost of Rs. 3,988; (3) Open drain in the line of the existing water-course near Elphinstone Road through sewage-logged land, thickly populated, between Supari Bagh and DeLisle Roads, at a sanctioned cost of Rs. 18,000. Although the work was not finished on 31st March last, great improvement has already been effected by it; (4) The cleaning of the open old main drain from the Municipal depôt for drainage pipes, Bellasis Road to Love Grove sluice gates, at an estimated cost of Rs. 2,469. By the setting in of the rains in 1895, the work of removing the silt was stopped after an expenditure of Rs. 1,089, the balance being reserved for the completion of the work during the ensuing dry season; (5) Works in pipe sewers, manholes, automatic flush tanks and metal vent-shafts in Kala Chauki Road at a cost of Rs. 9,597—these works were considerably delayed by the contractors, Messrs. Heeraji Nanabhoy, Spencer & Co.; (6) Construction of catchpits on pipe sewers and branch drains, of the 16 large and 60 small catchpits, the construction of which has been sanctioned by the Corporation at a cost of Rs. 37,016; 15 large and 34 small pits were constructed during the year at an outlay of Rs. 31,264. In some cases, there were serious difficulties to overcome from the accumulation of surface water, especially at the junction of Queen's Road and First Marine Street added to which there was trouble from fine sand, &c., at varying depths along the Queen's Road sewer. Large quantities of silt were prevented by the action of the pits from finding its way to Love Grove, but more experience is required to allow of a reliable opinion being formed of the success or otherwise of the pits; (7) Arrangement in pipe sewer manholes for discharge of sewage at a higher level to a lower level without splash, at a cost of Rs. 5,471. Owing to delay on the part of contractors this work had not been completed at the end of the year; (8) Construction of tidal flap at the mouth of the Sonapore drain at a sanctioned cost of Rs. 4,400. This work was only partly completed, also owing to delay on the part of the contractors; (9) Automatic sewage height recorders at a sanctioned cost of Rs. 3,000. The contractors, Messrs. John Fleming & Co., were unable to complete their contract until the close of the year; (10) Vent-shafts on main sewers at a sanctioned cost of Rs. 3,500. This work was en-

trusted to the petty works contractors ; (11) Latrines and urinals.—Some progress was made in the provision of these much-needed places of accommodation. Latrines at Koliwada, Mazagon, Mahim, Warli Middle Pakhadi and Warli Moti Pakhadi, and Parel Back Road were completed. One at Dharavi and one at Parel village were nearly completed, but the construction of one at Parbhadevi was deferred. The following urinals were also provided, at Paltan Road, Carnac Road, junction of Hornby Road and Carnac Road, Bazar Gate Garden, junction of Chinch Bunder Road, and Dongri Street, Musjid Bridge (two), at junction of Northbrook Street and Grant Road, and near the shipping office ; the existing place at Dalal Street was thoroughly remodelled.

The sluices and penstocks at Dharavi, Warli, Love Grove, The Flats (Clerk Road), Bellasis Bridge, Queen's Road, Carnac Road, and Mint Road worked satisfactorily.

The number of summonses issued on house-owners under different sections of the Act relating to drainage was 1,183, of which 391 were withdrawn, 792 complied with. The amount of fines inflicted was Rs. 644 ; of notices issued there were 2,231, of which 1,497 were complied with.

Water Supply.

5. *Tansa.*—The rainfall was 92·37 inches as compared with 114·64 inches in the previous year. The heaviest falls in twenty-four hours were on 20th June 1895, 5·34 inches ; on 17th July 4·15 ; on 7th August 4·34 ; on 8th August 3·01 ; on 7th September 4·12. The lowest water level was on 18th June 934·85 on Town Hall Datum. The lake overflowed on 18th July after 31·59 inches had been registered and continued to overflow until 3rd October. The quantity of surplus water that ran over the waste weir was estimated at 18,735,000,000 gallons. The highest flood over the weir, on 8th September was 0·80. The storage above lowest inlet on 31st October 1894 was 18,434,000,000 gallons ; on 31st May 1895, 10,302,000,000 and on 31st October last, 18,348,000,000. The loss during the dry season from 1st November 1895 to 31st March last was 5,523,000,000 gallons as against 5,548,000,000 in the preceding year. The approximate quantity drawn off into the duct during the year was 8,780,844,233 gallons, of which about

88,000,000 gallons were passed into Vehar lake. The heaviest draw-off in any one month was in January, namely, 868,299,115 gallons, whilst the smallest draw-off was in August, namely, 597,505,331. To allow of the annual general inspection and repair of the duct, the whole of the supply from Tansa was cut off from 4 a.m. on 30th November to 12 noon on 7th of December. The supply was also cut off to allow of repairs of bursts of the 48-inch main in Supari Bagh Road and at Balcomb, respectively, from 6-30 a.m. on 16th April to 1-30 p.m. on 18th idem, and for 24 hours on the 30th May. On 6th December 1894 the Corporation sanctioned the grant of Rs. 30,000 for repairing and strenghtening the bank of the water main on syphon No. 6 (Kasheli). The work was commenced on 2nd May 1895 by the contractors, Messrs. Littlewood and Pallonjee, and was in progress during the year. The construction of Inspector's quarters at Khaling and of quarters for Sub-Inspector and watchmen at Tansa were also proceeded with.*

Vehar.—The rainfall was 82·81 inches, or 2·75 less than in 1894 and 1·09 less than the average, 83·90. The lake overflowed on 12th August and continued to do so until 26th September. The heaviest rainfall was on 8th September, 8·30 inches. The lowest level of water was on the 14th June, 253·70 T.H.D. The storage was as follows :—31st October 1894, 11,335,000,000 gallons ; 31st May 1895, 8,305,000,000 gallons; 31st October 11,010,000,000 gallons. The daily loss during the dry season, 31st October 1894 to 31st May 1895, was 14,000,300 in addition to, or irrespective of, the quantity received from Tansa which was estimated at 82,000,500 gallons between 31st October 1894 and 31st May 1895. From 8th August to 17th September 1895, 581,000,000 gallons flowed into the lake from the overflow of Tulsi. It was estimated that between 12th August and 26th September 4,191,000,000 gallons passed over the waste weir.

---

* As the Corporation are aware, the rainfall at Tansa between 25th and 31st July 1896 was gauged at 26·74 inches, and the floods sweeping down the Uhlas river from the ghats beyond Kalian breached the pipe line on the 30th and disjointed the main for a length of 450 feet. Thanks, however, to the energetic action of the Engineer's Department, the Tansa supply was restored within eighteen days from the time of the accident.

Tulsi.—The rainfall was heavier than at Tansa and Vehar, namely, 100·40 inches, the greatest fall in one day being 8·08 on the 8th September. The lake overflowed on 8th August, and the overflow did not cease until the 17th September. The lowest water level was on 14th June, 439·50 T.H.D. On 31st October 1894 the storage was 2,243,000,000 gallons ; on 31st May 1895, 1,079,000,000 ; and on 31st October last, 2,136,000,000. The loss from 1st November to 31st March last was 880,000,000 gallons, and it was estimated that 581,000,000 gallons passed over the waste weir.

Pawai.—No water was drawn from this lake. The pumping plant was transferred from the water branch to the charge of the Assistant Engineer, mechanical branch. After protracted proceedings the purchase money for the land acquired for this lake, Rs. 1,67,904-11-3, was paid into court.

Filter-beds, Reservoirs, &c.—The Corporation having on 30th January 1896 sanctioned the grant of Rs. 14,400 for certain structural alterations to the Malabar Hill Reservoir Filters, the work was in progress during the latter part of the year under review ; but the question of increasing the area of the filter beds of this reservoir awaits the decision of the Corporation. The Bhandarwada (John Hay Grant) Reservoir worked satisfactorily as shown by the analysis of the water at pages 342—345. The covering of the clear water channel has answered its purpose, and with the object of preventing the water in the filters and channel from being fouled by washings from the garden over the distributing basin, a parapet wall was raised. The covering in of the Storage Basin, at a sanctioned cost of Rs. 1,60,097, had not been completed at the end of the year, but it is probable there will be a considerable saving on the grant. The foundations for this structure were finished, one half of the covering arches were completed, and the filling in of Filter No. 9 with filtering materials commenced.

As stated above, the analysis of the lake water will be found at page 342. Table No. 6 at page 346 gives

some interesting details regarding the temperature of the water, which, in one instance in June at Tulsi, was as high as 91. No progress was made with the work of connecting the Tansa and Vehar mains at Chinchpokli owing to the dispute with the G. I. P. Railway Company remaining unsettled, but sanction was given in April last by the Standing Committee to the filing of a suit against the Company. The work of laying a 6-inch main in Ballard Road with new pattern hydrants at a cost of Rs. 4,696—the extension along the pier being made at the cost of the Port Trust—was completed, as was the relaying of the 24-inch main in Gibbs Road. The laying of a 12-inch main in Parbhadevi Road was sanctioned by the Corporation at a cost of Rs. 25,870. There were 255 bursts of mains as compared with 313 in the previous year. Of new connections there were 522, whilst 243 services were disconnected on account of buildings being demolished, non-payment of rates, or for infringements of the provisions of the Municipal Act. The net increase in the number was 279, making the total number of service connections 19,445, a net increase of 1·4 per cent. On 31st March the number of meters in use was 1,854, an increase of 180 over the number in the previous year. The consumption registered through meters was 1,290,500,000 gallons as against 1,277,700,000 in 1894. Table No. 13 (pages 351—381) shows the monthly average consumption of water during the night, in reference to which it is stated that the work of the Waste Prevention Establishment has increased consequent on the breaking up of roads for the new drainage works. The total number of notices issued on consumers on account of faulty taps, service pipes, &c., was 8,920, but only 151 connections were severed.

During the year there were seven claims for the rewards offered for the destruction of crocodiles in the lakes, and claims for the taking of 91 crocodiles' eggs. In reference to a complaint of leeches being found in the service tap of a house in the Fort, the Executive Engineer remarks that it is most probable that they found their way into a broken service pipe near a drain in which many of them were found during a temporary stoppage of the water-supply.

6. It is worthy of remark that, although the revenue from water for the year realized Rs. 14,73,282-11-10, including interest on investments and premia on the loan raised during the year, the charges on account of interest and sinking fund on loans for the construction of the lakes and on account of yearly maintenance are so heavy that the expenditure under the head of Water Works exceeded the income therefrom by Rs. 1,82,374-10-2, which large excess was defrayed from the general fund.

7. *Buildings and Roads.*—The Committee note with satisfaction that, in compliance with the terms of the Corporation's Resolution No. 4030 of 18th July 1895, the Commissioner has included in this report an inventory prepared by the Executive Engineer of the properties belonging to the Municipality. This list furnishes particulars which will doubtless be found of great use, but its value would be increased if the blanks which occur in many instances as to the original cost and present value of properties could be filled in, and, further, if the Commissioner would have the inventory compared with the list of assets of the Corporation shown on pages 116, 182—194.

Several Municipal buildings and works were completed during the year, including Fire Brigade Stations at Chinchpokli, Dadar and Colaba; approaches to Falkland Roads Overbridge; Kerosine Oil Godown, Bellasis Road; Chawl for Bigaries at Arthur Crawford Markets and Bori Bunder (Health Department); Ward Office, Null Bazaar; New Market at Colaba; Market for Sheep and Goats, DeLisle Road; extension of retaining wall, Walkeshwar Road; paving Health Department's Stables, Bori Bunder; Stables for Health Departments, F and G Wards; filling portion of Naigaon Tank; improvement of Mahatar Pakhadi Road; numerous drainage works, &c. The works under construction included Fire Brigade Stations at Sankli Tank and Babula Tank, Bhuleshwar Market and Schools, and many other works detailed at pages 389—391. It may be noted that eight stations for the Fire Brigade have already been completed and occupied, namely, in Colaba, the Fort, Bhuleshwar, Mazagon, Chinchpokli, DeLisle Road, Mahim and Dadar.

Regarding applications for permission to build or rebuild, it would appear from the increase in these that building operations last year were more extensive than usual, the total applications numbering 1,222, or 182 more than in the previous year. Of these, 1,172 were passed wholly or partly, 50 were unconditionally disapproved on sanitary or other grounds. 4,278 notices were served on house-owners (or 665 more than in 1894), and 328 summonses issued. In 133 of these the persons complied with the notice before the service of summonses, in 39 the persons were warned and discharged by the Magistrate, and in 24 they were fined and convicted, whilst 48 cases were postponed. During the year 31 buildings or parts thereof fell down, and in 6 of these cases 6 persons were injured and 10 were killed. For the summary removal of dangerous or objectionable structures 2,847 notices were issued.

The negotiations for the acquisition of land for the proposed road from Dongri Street to Elphinstone Bridge by way of Nowroji Hill proceeded, but it was found necessary to refer one case for the decision of the High Court. The new road from the north end of Frere Road to Kalachauki Road has been named by the Corporation "Reay Road" after the noble Lord who was Governor of Bombay from 1885 to 1890. That part of the road which will run from Warree Bunder Road to Gunpowder Road has to be constructed by the Municipality who have pushed on vigorously with the work of acquiring the land for the site of the same. The spacious road from Dadar to Matunga over the Tansa main was opened for traffic in May 1895. In what is called the Agripada district, the Souter Road and extension of Gilder Street are as yet incompleted, and as large areas of surplus Municipal land thereat and along the sides of the Connaught and Sussex Roads still remain undisposed of, the accounts relating to the loan for road extension cannot be closed.

The total area of road repaired was 8,820,997 square feet, costing Rs. 2,47,595, or an average of 5½ pies per foot. This area was exclusive of the surface repaired on account of openings for drainage and water and for the Health Department, the Tramway Company and the Gas Com-

pany. Although twenty-two steam rollers of from six to eight tons each are in daily use, they are insufficient for the work. The number of brushing and scraping machines is likewise insufficient, and it is proposed to increase the stock. The plan of watering the roads as far as practicable by hose from hydrants instead of by water-carts continues to work well, but in order to perfect the system, a very large outlay would have to be incurred on additional appliances.

The serious defects in the tramways along the streets have, to some extent, been remedied, the Company replacing the worn-out and wide-grooved rails by narrow-grooved ones.

8. *Lighting.*—The contract for lighting the streets was renewed with the Gas Company for ten years from 1st July 1895, and the thoroughfares are now illuminated on the incandescent principle. Up to 31st March last 2,735 of the street lamps had been so converted. When properly looked after, the lighting on this principle is much superior to the old method of utilizing gas. The pressure of the gas has much to do with the efficiency of incandescent lighting, but there is no provision in the contract authorizing municipal officers to ascertain the actual pressure at which the gas issues from the burner. In addition to gas lamps, an average of 1,644 kerosine oil lights was in use at a cost of Rs. 34,421. The working of the plant for the lighting by electricity of the Arthur Crawford Markets and the Municipal Offices was not altogether satisfactory, although, on the whole, this mode of lighting has answered in the markets, where it is much appreciated by the stall-holders. The defects were principally on account of breakage of wires in the armature which was thereupon sent to England and replaced (free of charge) by the makers who, being of opinion that climatic influence was the cause of the defect, decided to make the new armature of special construction. This new armature, although a great improvement on the old pattern, is by no means perfect, as the breakages of wires continues; and, consequently, a more flexible wire is being tried.

Street accidents.

9. *Street Accidents.*—During the year 28 persons were killed and 551 injured by accidents in the streets.

10. *Financial.*—The opening balance, *including* recoverable advances, reserve stock, &c., and *excluding* deposits, unexpended loan balances, and minor adjustment items (*vide* pages 12 and 95 of the Report for 1894-95) was Rs. 37,13,123-9-7, or Rs. 18,88,123-9-7 in excess of the Budget Estimate. Of this Rs. 18,88,123-9-7, however, Rs. 4,84,217-8-8 was on account of unexpended balances of the grants for 1894-95 and previous years required for expenditure in 1895-96, and Rs. 9,14,283-10-7 was the value of reserve stock. The net surplus therefore was only Rs. 4,89,622, which has already been appropriated in the Budget for 1896-97. The revenue amounted to Rs. 67,61,710-4-5, or Rs. 5,27,410-4-5 more than the estimate, and Rs. 2,22,337-8-3 over the revenue of the preceding year. Financial.

Of this amount of Rs. 5,27,410-4-5, the increases were as per margin. Of this excess revenue, Rs. 98,368-2-8 was invested on account of the Premia and Sinking Fund Investment, leaving a net surplus of Rs. 4,29,042-1-9, of which Rs. 1,25,000 was anticipated in October 1895, when the budget for 1896-97 was framed, and Rs. 1,35,000 was anticipated when the revised estimates for 1895-96 were framed. Of this total of Rs. 2,60,000, Rs. 2,25,000 only were actually appropriated in the budget for the current year. Thus the available balance for further appropriation is Rs. 2,04,042-1-9.

	Rs. a. p.
Property Taxes—	
General tax	11,437 12 7
Water tax and other miscellaneous water works revenue	1,07,895 4 7

Town duties	1,23,850 15 10
Receipts from Government for liquor licenses and tobacco duties	30,474 14 5
Market receipts	13,543 2 4
Returns from other property and miscellaneous..	1,98,971 4 8
Total Rs. ..	5,27,410 4 5

The total grants for expenditure during the year aggregated Rs. 73,70,530-12-11 as per details given in pages 72—75. Of this Rs. 63,55,166 was on account of the original budget sanction, Rs. 3,86,246-9-0 for lapsed grants for 1894-95 renewed, Rs. 97,970-15-8 for lapsed grants for 1893-94 and previous years, and Rs. 5,31,147-4-3 for additional grants. Of the total of Rs. 73,70,530-12-11, Rs. 6,68,014-13-6 remained unexpended, but as out of this saving Rs. 30,000 anticipated while preparing the budget for 1896-97 have already been appropriated in that budget, and as Rs. 4,80,048-3-4 are required for payment on the same account for the current year, the unexpended balance available

for future appropriation is reduced to Rs. 1,57,966-10-2. The details regarding the unexpended balances are shown at pages 82—89.

The balance actually available for further requirements, exclusive of the book value of reserve stock on hand, is as under : workable closing balance (*including* recoverable advances for works, reserve stock, &c., and *excluding* deposits, unexpended loan balances, and minor adjustment items, *vide* page 93) is Rs. 37,72,317-14-7, *less* (1) unexpended balances of grants for 1895-96 and previous years required for payment in 1896-97 (*see* page 89), Rs. 4,80,048-3-4 ; (2) amount appropriated in the budget for 1896-97, Rs. 19,90,000 ; total to be deducted Rs. 24,70,048-3-4, or a balance of Rs. 13,02,269-11-3, and deducting therefrom Rs. 8,76,659-9-8, value of reserve stock, the balance actually available is Rs. 4,25,610-1-7.

The following tables show the main heads of revenue and expenditure as compared with the budget estimate for 1895-96 and the actuals of the preceding year.

Rs.	75,85,653 11 11		77,87,395 4 10				

As regards the revenue there were increases of Rs. 18,727-1-0 in the general tax and Rs. 54,630-8-4 from water works revenue owing to the erection of new and enlargement of old buildings, increased valuations of properties and larger consumption of water through meter. There was an apparent falling off of the halalkhor cess of Rs. 23,744-11-10, the decrease being due to the fact that the outstandings which had to be collected were much less than in the previous year. Actually, there was an increase in the receipts from this tax. The wheel tax yielded Rs. 9,442-12-11 more than in the year before, and this increase would have been still larger had it been practicable to recover all the tax due on bicycles; town duties showed an increase of Rs. 22,308-10-0. The considerable increase of Rs. 12,126-10-2 from tobacco duty is attributed to the better arrangements at the Railway stations for the prevention of smuggling. Market receipts were Rs. 7,137-3-4 better than in 1894-95, whilst the returns from other property and miscellaneous items were larger by Rs. 1,21,709-6-4 chiefly owing to the net premia received on the issue of the second instalment of Rs. 10,25,000, of the Rs. 23,25,000 loan, and the sale proceeds of surplus land; &c. With regard to decreases and increases in expenditure described at pages 13 to 15, it will be observed that the principal items of increase were on account of the enhanced charges for police, Municipal debt, and new works.

11. The expenditure from loan funds on works in progress amounted to Rs. 10,84,879-5-5, as per margin. The invested balances at the close of the year amounted to Rs. 59,58,288-11-7, as per details printed at page 114.

12. *Registration of Property and Valuation.*—On 31st March the number of properties on the Assessment Book was 52,499, an increase of 351 during the year. Of the total 35,083 were buildings, 175 salt pans, 17,241 vacant lands, including tanks. Of the total, 40,318 were assessed to the general tax, 4,493 were exempted or compounded for on special terms, and 7,688 were small plots of unproductive land for which no bills were issued. During the twelve months 320 buildings were demolished, 815 new buildings erected and

Registration, valuation, assessment, &c.

323 existing properties were enlarged. The recorded gross valuation was Rs. 2,82,56,881, an increase of Rs. 6,43,140, of which Rs. 2,58,447 was on account of the erection of new buildings, Rs. 2,35,166 on account of enlargements, and Rs. 1,49,527 owing to rise in rents and correction of under-assessments. The enhancements of assessments amounted to Rs. 7,81,590, while the reductions were Rs. 5,73,179. The property taxes levied amounted to Rs. 40,18,361-15-0 as compared with Rs. 39,32,124-11-3 in the previous year.

Outstandings.—On 31st March last these amounted to Rs. 74,135-7-10, which, by 25th July, were reduced to Rs. 32,725-11-7.

13. *Assessment Appeals.*—The number of complaints against valuation was 2,642, and there were only 16 appeals to the Chief Judge of the Court of Small Causes (as against 24 in the previous year), of which one was dismissed, one allowed, two withdrawn by the appellants, and twelve were settled by consent.

14. *Revenue Audit.*—The work performed by the Revenue Audit branch is referred to in paras. 62-65 of the Commissioner's remarks.

15. *The Assets and Liabilities* of the Corporation on 31st March 1896, as inserted on page 116, include the estimated value of overbridges, roads, drainage, lakes and other works and buildings, as per margin. The total assets are set down at Rs. 5,50,11,965-13-3, or Rs. 13,77,676-8-6 more than those of the previous year and as exceeding the liabilities by nearly Rs. 1,70,00,000.

Assets in excess of liabilities .. .. Rs.	1,69,89,101	0	6

16. With reference to surplus stores, or those the value of which has deteriorated, the Chief Accountant draws the Commissioner's attention to the desirability of measures being adopted for disposing, at such rates as can be obtained, of a large quantity of old stoneware drain pipes which are not considered suitable for modern drainage.

17. *Fire Brigade.*—Paras. 136-147 (page 50) relate to the equipment and work of the Brigade which rendered efficient service throughout the year. There were 130 fires, of which 26 were serious. Several firemen received injuries in the discharge of their duties, and as one of them was permanently incapacitated he was granted pension. The estimated damage by fire and water was Rs. 20,41,571, of which Rs. 20,12,617 was insured. The water supply was satisfactory in all cases of conflagration at which the Brigade was on duty. Fire Brigade

18. *Public Gardens.*—The Victoria Gardens were visited by 1,438,595 persons, as compared with 1,298,264 in the previous year. Gardens.

19. *Public Health and Vital Statistics.*—The Health Officer states that although there was a great improvement in the public health, the mortality having been 2,249 less than in the previous year, he cannot hope for further reduction in the mortality until the local insanitary causes he has so frequently described are removed. The deaths from all causes (exclusive of still-born) were 25,081, equal to a death-rate of 30·52 per 1,000 calculated on a population of 821,764 (census of 1891), the average during the five years 1891-95 having been 30·64. Of the reductions in causes of mortality, 820 were under diseases of the respiratory system, 594 diseases of the digestive system, 336 from cholera, 261 from small-pox, 243 from measles and 54 from fevers. The greatest number of deaths in any one month was 2,619 in May and the lowest number 1,799 in November. The highest rate of mortality as amongst races and castes was, as usual, among the small community of Negro-Africans who are liable to great fluctuations of residence. The rates of their deaths per 1,000 was 541·09. The next on the list were the Lingaets, 65·05; then Hindu low-castes, 47·22; Jains, 45·15; Mussalmans, 39·30; Bhatias, 38·27; Eurasians, 35·56; Budhists, 31·57; Hindus of other castes, 26·42; Brahmins, 25·72; Native Christians, 25·51; Jews, 23·70; Parsees, 22·94; Europeans 20·81. The causes of mortality and numbers of death were: fever, 6,404; diseases of the respiratory system, 4,565; phthisis, 3,610; diseases of the nervous system, 2,044; diarrhœa, 1,188; dysentery, 625; measles, 544; accidents, 488; small-pox, 270; cholera, 90; other Public Health and Vital Statistics.

causes, 5,253. The general death-rate was unevenly distributed, for while the mortality in the water division was 3·02, in Fort, south, 8·60, Esplanade 12·51, Chaupati 14·76, the ratio in Khara Talao was 39·24, Tardeo 40·51, Kamathipura 44·85, Second Nagpada 50·61. The ratio in Umarkhadi was lower than in the previous year, and as a sewerage system has been sanctioned for Khara Talao, the condition of that district will, it is hoped, improve, though the Health Officer observes that a system of sub-soil drainage will also have to be carried out there. At pages 596 and 601 he discusses the question of the high death-rate among women, and at pages 619—622 shows that the mortality from phthisis was a little higher than in 1894. As to cholera, notwithstanding the importation of cases from Pandharpur, the mortality from this disease, as shown above, was very small and the disease could not be considered to be epidemic. Indeed, most of the cases might have been registered as those of choleraic diarrhœa. The deaths from cholera were 336 less than in 1895 and 112 below the average. In the same way the deaths from small-pox were 261 less than in 1894 and 36 less than the average. Measles, too, were 243 less than in 1894, although 28 more than the average. Out of the 544 deaths during 1895, 423 cases occurred in the first three years of life. The number of fevers was 54 less than in 1894 and 272 less than the average. From leprosy there were 42 deaths or 17 below the average. In briefly discussing the local causes unfavorably influencing public health, the Health Officer again refers to the want of drainage, the presence of sewage and subsoil water, the absence of proper connections between dwellings and the sewers, the overcrowding of the population, and the obstruction of the sea currents around the Island by the embankments at Bandora and Kurla. He also cites the imperfect provision in the Municipal Act in regard to rebuilding of houses on old foundations without space for ventilation and drainage being left; likewise the exclusion of the evidence of Municipal Officers in regard to prosecutions for nuisances. He does not look forward to the continuance of the improved health of the inhabitants unless there are more effective means for carrying away the refuse water, and he quotes the fact that the highest mortality from fever in 1894 and in 1895 was in the month of May, when there were the highest subsoil fluctuations. In this respect a great im-

provement is being effected in the thickly inhabited quarters adjacent to the Elphinstone Road Railway Station. Hitherto this place has been quite undrained, and the ground round about has become a sewage marsh. The Corporation having sanctioned a grant for the purpose, however, an open water channel running from Supari Bagh Road to DeLisle Road has been converted into a masonry conduit for carrying off the sewage. Probably, similar intercepting drains might be constructed with advantage in Parel and elsewhere to carry off sewage until such time as the general sewerage system can be completed. The Health Officer expresses his regret that, practically, no progress has been made with the work of connecting houses with the sewers, but he admits the extreme importance of the work being properly supervised. With regard to the question of the improvement of the water supply, he refers to the correspondence that has taken place on his proposal that the scrub and long grass in Tansa, Vehar and Tulsi lakes should be cut down and burned yearly, and contends that his proposal should be acted on. As to the arrangements for filtering water he considers that further improvements should be made in the matter of ventilation of the service reservoirs with a view to reducing the temperature of the water stored therein.

20. The returns of primary vaccinations and re-vaccinations is printed at page 607, from which it appears that there were 18,960 primary vaccinations (namely, 9,498 males and 9,462 females). This was a slight increase over the numbers in 1894 (18,627), though a good deal below the average of the five years 1889-94, namely, 19,912. Of re-vaccinations there were 4,477.

21. *Birth Registration.*—The number of births registered were 15,684 living and 1,470 still-born, as compared with 15,058 and 1,521 respectively in 1894. Of the living 8,150 were males and 7,534 females. The births, registered for last year, were higher in number than in any year since 1889 and gave the average of 19·08 per 1,000 of population.

The highest ratio was among the small community of 146 Negro-Africans, namely, 61·64 per 1,000. The next highest was among Hindu low castes, 34·93. The lowest ratio was among Brahmins, 10·37.

22. *Work of the Health Department.*—The average number of work-people employed daily was 4,419, with 1,092 scavengering and drain carts and 205 night-soil and cess-pool carts. The garbage collected and disposed of was 322,656·69 tons, or 883·99 tons per diem, as against 321,991·91 in 1894, or an increase of nearly two tons per day. Of this total 23,344 cart-loads were burned in the Garlick Incinerator. Of night-soil 149,670·62 tons were collected and removed as compared with 150,004·24 in 1894. More than 179 miles of covered drains were opened and cleaned as against a little over 182 miles in the previous year. The numbers of notices and summonses issued were 3,925 and 2,206 as against 4,079 and 3,105 in 1894. Building plans to the number of 1,036 were received and disposed of as compared with 928 in the previous year. The live stock included 2,231 bullocks and five horses, of which 199 bullocks died and 40 were sent to Pinjrapol; these figures gave a percentage of loss on bullocks of 10·7. The number of carcases of dead animals conveyed to Kurla was 11,391.

The total expenditure on the department, including conservancy, registration, cemeteries, dhobiwada, infectious diseases, milch cattle stables, tank conservancy, vaccination, &c., but excluding markets and slaughter houses, was Rs. 12,16,555-1-1, while the total earnings were Rs. 7,41,861-0-7, including receipts from vaccination but deducting proportionate cost of the Assessment and Collection Department in respect of Halalkhor Tax. Thus the net cost to the Municipality of the Health Department was Rs. 4,74,694-0-6, or Rs. 7,900-10-1 more than that in the preceding year.

23. *Licenses.*—The working of the License Branch is reported as continuing satisfactory. The revenue collected was Rs. 65,048-8-0, showing an increase of Rs. 1,134, the number of licenses issued being 5,880 as against 5,701 in the previous year. There were 3,931 prosecutions as against 3,162 in 1894.

24. *Markets and Slaughter Houses.*—The total revenue under this head was Rs. 4,03,356-12-8, or an increase of

Rs. 11,094-15-8. The supply of fruit, vegetables, beef and mutton was fair both as to quantity and quality although the number of mangoes and apples was considerably less than in 1894. The supply of pomegranates was plentiful. About 57 tons of unwholesome food were condemned and destroyed, or about double the quantity in 1894. The new market at Colaba was opened on 16th May 1895. It is intended for the sale of fruit, vegetables, mutton and fish and appears to supply a long-felt want. The rebuilding of the Bhuleshwar markets is being steadily proceeded with, the stall-holders being accommodated in the meantime in a building rented from the Pinjrapol Committee.

25. *Education.*—The grant for education was Rs. 89,435, namely, Rs. 1,800, school for Deaf Mutes, Rs. 2,500, Veterinary College, Rs. 11,200, Victoria and Albert Museum, Rs. 10,000, Victoria Jubilee Technical Institute, Rs. 59,135, Primary Education, and Rs. 4,800 for Joint Schools Committee's Establishment. The receipts of the Joint Schools Committee were Rs. 1,67,865-3-5, and at the close of the year the Committee held a balance to credit of Rs. 56,795-6-10. The cost per pupil was Rs. 12-4-0. The number of children on the rolls of the schools working under the Joint Committee was 7,314, of whom 4,064 were receiving instructions in Marathi schools, 2,840 in Gujarathi schools, and 410 in Urdu schools. The number of scholars in the schools aided by the Committee were 8,019, grand total 15,333 ; of whom 11,539 were boys and 3,794 were girls.

Report of the Municipal Auditor.

26. Owing to the regretted deaths of Mr. Ardasir Framji Moos and his successor Mr. Adam Smith, the Auditors' yearly report was prepared by the surviving Auditor, Mr. Nanabhai R. Ranina, who has furnished a good deal of useful detail relating to income and expenditure. Mr. Ranina also submits his report on the audit of the accounts of the Joint Schools Committee in which he states that with the view to those accounts being kept in a more methodical manner the attention of the book-keeper has been directed to the opening of some new heads of account and the omission of such as have been found unnecessary.

In accordance with the terms of Section 124 (3) of the Municipal Act III of 1888, the Standing Committee direct that all the printed appendices attached to the reports of the several heads of departments as received from the Commissioner be circulated with his report for the information of the Corporation.

The foregoing Review and the Compilation referred to therein are circulated to Municipal Councillors as directed by Section 124 (3) *of the Municipal Act as above.*

BHALCHANDRA K. BHATAWADEKAR,

Chairman of the Standing Committee.

18*th September* 1896.

ADMINISTRATION REPORT

OF THE

MUNICIPAL COMMISSIONER

Annual Administration Report of the Municipal Commissioner for the City of Bombay for the Year 1895-96.

Introductory.

DURING the year under report Mr. H. A. Acworth, I.C.S., having proceeded on one year's furlough from the 6th April 1895, Mr. P. C. H. Snow, I.C.S., was appointed to act as Municipal Commissioner.

2. The works in connection with the sewerage of Colaba on the Shone system were practically completed about the end of the year.

3. The Oomercarry sewerage works, withdrawn from the control of the Contractors, Messrs. Bulkley and Co., were carried on departmentally until the beginning of the S.-W. Monsoon of 1895, after which they were continued under contract.

4. The gravitation portion of the Parel sewerage works was practically finished at the end of December 1895.

5. The gravitation portion of the Mazagaon, Malabar Hill and Khambala Hill sewerage works was commenced on 23rd and 30th November 1895, respectively, and the work was in progress at the end of the year.

6. The Committee appointed to consider and report on the question of the adoption of the Shone system of drainage throughout Bombay submitted their report to the Corporation during the year, but it is too early to express an opinion as to the merits of the system.

7. The Worthington Triple Expansion Engines at Love Grove Pumping Station continued to give satisfaction.

8. Some new pattern hydrants have been adopted for road watering and are expected to give satisfactory results.

9. During the year there were a few extensions of the Tramway. A new double tramcar track of 710 feet in length was laid from the Tramway Co.'s Stable on Falkland Road to the junction of that road with Gilder Street and the single track from Pydowni to Bhuleswar along Coppersmith Bazaar was doubled.

10. The contract with the Gas Company was renewed for another term of 10 years from 1st July 1895.

11. The City is now being lighted on the incandescent principle, which has met with general approbation from the public.

12. Up to the close of the year no definite conclusion had been arrived at on the question of the Police charges payable by the Municipality to Government, though certain minor concessions have been granted.

13. The state of the public health showed an improvement on that of the previous year.

14. No circumstances have arisen in any Department of the Municipality which necessitated putting into operation the provisions of the Municipal Servants' Act.

I. Corporation and Standing Committee.

THE CORPORATION.

15. Mr. G. W. Roughton was elected President of the Corporation at the meeting of the 4th April 1895, and held that appointment until the 31st March 1896.

16. Fifty-nine meetings of the Corporation were held. Fifty-two Committee meetings were also held, and two more were convened, but not held for want of a quorum.

17. The changes in the *personnel* of the Corporation were as follows :—

Mr. S. Rebsch resigned on 23rd May 1895, and in his place Mr. P. J. FitzGibbon was appointed by Government.

Mr. W. C. Hughes' last attendance before leaving for England was on 23rd May 1895. His next attendance was on 19th August 1895.

Haji Yoosuf Haji Esmail's last attendance before leaving for England, without vacating his seat, was on 23rd May 1895. His next attendance was on 24th October 1895.

Mr. George Cotton's last attendance before leaving for England, without vacating his seat, was on 8th July 1895. His next attendance was on 14th November 1895.

Major B. Scott's last attendance before leaving for England, without vacating his seat, was on 8th August 1895. His next attendance was on 2nd December 1895. He resigned on 24th February 1896.

Mr. R. H. Vincent's last attendance before leaving for England was on 22nd August 1895. His next attendance was on 21st November 1895.

Captain W. P. Walshe, having left for Europe on 9th November 1895, resigned his seat on the Corporation. In his place Mr. H. G. Gell was appointed by Government on 4th December 1895.

Mr. P. J. FitzGibbon resigned on 20th November 1895, and in his place Mr. S. Rebsch was re-appointed by Government on 26th November 1895.

THE STANDING COMMITTEE.

18. Mr. Bhalchandra K. Bhatawadekar was appointed Chairman of the Standing Committee at the meeting held on the 10th April 1895, and held that appointment throughout the year.

19. The Committee held fifty-four meetings. Thirty-two Sub-Committee meetings were also held, and one more was convened, but not held for want of a quorum.

20. There were one hundred and fourteen attendances for cheque signing and fifty-one for the audit of the weekly statement of accounts, and two more attendances for audit were convened but not held, the accounts not being ready.

21. The changes in the *personnel* of the Committee were as follows :—

Mr. S. Rebsch resigned on 22nd May 1895, and in his place Mr. P. J. FitzGibbon was appointed by Government.

Mr. R. H. Vincent resigned on 22nd August 1895, and in his place Mr. T. W. Cuffe was appointed by Government on the 24th idem.

Captain W. P. Walshe resigned on 9th November 1895, and in his place Mr. R. H. Vincent was re-appointed by Government on 13th idem.

Mr. P. J. FitzGibbon resigned on 20th November 1895, and in his place Mr. S. Rebsch was re-appointed by Government on 26th idem.

22. The following is a list of the Municipal Councillors who held office on 31st March 1896 :—

EUROPEANS.	By whom elected or appointed.*	Ward in which elected by Rate-payers.	PARSIS.	By whom elected or appointed.*	Ward in which elected by Rate-payers.	HINDUS. II. Heads of Departments.

23. Mr. James W. Smith, Special Drainage Engineer, was on privilege leave from 10th September to 3rd November 1895, during which period Mr. C. C. James, Drainage Engineer, was in charge of his duties in addition to his own.

24. Mr. Sorabji Navroji Cooper, Chief Accountant, who was granted 16 months' furlough from the 28th April 1894, returned from leave on 28th August 1895 and resumed charge of his duties on that date, up to which Mr. W. Pearson continued to act for him.

25. Mr. S. Tomlinson, the Water Engineer, was on privilege leave from 6th May 1895 to the 27th July 1895. Mr. C. C. James, the Drainage Engineer, was in charge of his duties during the period.

26. The office of Revenue and Refund Audit Officer having fallen vacant owing to the death of Rao Bahadur Virprasad Tapiprasad on the 10th February 1895, Mr. W. Pearson was appointed to it.

27. Mr. Douglas Bennett, the Superintendent of Markets, was on privilege leave from 19th May to 12th August 1895, during which period Mr. T. Glover acted for him.

28. Mr. C. D. Mahaluxumiwala, the Superintendent of Gardens, was granted privilege leave from 15th July to 14th August 1895, during which period Mr. J. D. Pinto officiated for him.

III. Financial.

29. The income and expenditure of the year were as under :—

	Rs.	a.	p
Opening balance including recoverable advances, reserve stock, &c., and excluding deposits, unexpended loan balances and minor adjustment items (*vide* pages 12 and 95 of the Report for 1894-95)	37,13,123	9	7
Revenue (*vide* pages 10 and 67)	67,61,710	4	5
Total available for expenditure	1,04,74,833	14	0
Spent during the year (*vide* pages 11 and 81) ...	67,02,515	15	5
Balance Rs...	37,72,317	14	7

30. The above opening balance was in excess of the Budget estimate by Rs. 18,88,123-9-7. Deducting from this amount the sum of Rs. 4,84,217-8-8 on account of unexpended balances of the grants for 1894-95 and previous years required for expenditure in 1895-96, and Rs. 9,14,283-10-7 on account of value of reserve stock, there remained a net surplus of Rs. 4,89,622 which, not having been appropriated during the year under report, formed part of the opening balance of 1896-97.

31. The total revenue of the year amounted to Rs. 67,61,710-4-5, showing an excess of Rs. 5,27,410-4-5 over the estimate and of Rs. 2,22,337-8-3 over the revenue for the preceding year. The yield under every head was in excess of the estimate. As compared with the actuals of the preceding year, there were increases under all heads except Halalkhor Tax.

32. Of the above excess revenue of Rs. 5,27,410-4-5 over the estimate, Rs. 1,25,000 anticipated in October 1895 while framing the Budget for 1896-97 and Rs. 1,00,000 out of Rs. 1,35,000 anticipated while preparing in December 1895 the revised estimates for 1895-96 have already been appropriated in the current year's budget; Rs. 98,368-2-8 on account of Premia and Sinking, &c., Funds interest realisations have been invested, and the balance of Rs. 2,04,042-1-9 is available for further appropriation.

33. The total grants sanctioned for expenditure during the year aggregated Rs. 73,70,530-12-11 as shown below:—

	Rs.	a.	p.
Originally sanctioned in the budget	63,55,166	0	0
Lapsed grants for 1894-95 renewed in 1895-96 ...	3,86,246	9	0
Lapsed grants for 1893-94 and previous years re-sanctioned by the Corporation in 1895-96 ...	97,970	15	8
Additional grants sanctioned (Rs. 4,32,779-1-7 + Rs. 98,368 2-8)	5,31,147	4	3
Total sanctioned (*vide* page 75)	73,70,530	12	11
Deduct—Spent (*vide* pages 11 and 81)	67,02,515	15	5
Balance (expenditure less than sanctions—*vide* page 89)	6,68,014	13	6

34 Of the above balance, Rs. 30,000, being the amount of savings anticipated while framing the current year's budget, have already been appropriated in that budget; Rs.

Rs. 3,70,265-8-3 on account of lapsed grants for 1895-96, and Rs. 1,09,782-11-1 on account of unexpended balances of the grants for 1894-95 and previous years, or Rs. 4,80,048-3-4 in all, are required for payment in the current year, and the balance of Rs. 1,57,966-10-2 is available for future appropriation.

35. The amount actually available for further requirements (exclusive of the value of reserve stock on hand) is as under:—

	Rs.	a.	p.	Rs.	a.	p.
Workable closing balance (including recoverable advances for works, reserve stock, &c., and excluding deposits, unexpended loan balances and minor adjustment items—*vide* page 93) ...				37,72,317	14	7
Deduct—						
Amount of unexpended balances of grants for 1895-96 and previous years required for payment in 1896-97 (*vide* page 89)	4,80,048	3	4			
Amount appropriated in the budget for 1896-97... ...	19,90,000	0	0			
				24,70,048	3	4
				13,02,269	11	3
Deduct—						
Value of Reserve Stock (*vide* page 93)				8,76,659	9	8
Balance actually available (*vide* page 93)				4,25,610	1	7

36. It should be noted that, against the above net available surplus, additional grants aggregating Rs. 1,21,693-14-1 have been sanctioned up to August 1896. It is satisfactory to observe that there is such a substantial balance as over 3 lakhs which will prove very useful in meeting the sum ultimately settled by the Corporation for payment to Government in final settlement of their claim for arrears of Police charges, also for making good the damage caused to the Tansa Pipe line by floods arising from the recent heavy rainfall and for putting up such protective works as may be considered requisite.

37. The following tables **A** and **B** show the main heads of Revenue and Expenditure as compared with the Budget Estimate for 1895-96 and the actuals for the preceding year :—

38. The causes of the increases and decreases over the estimates of the different items of Revenue and Expenditure have been fully explained in the Chief Accountant's Report.

39. The reasons of the increases and decreases under the different items of Revenue shown in Statement **A**, as compared with the preceding year's actuals, are briefly explained below :—

Property Taxes.—The yield under General Tax and Water Tax, including Miscellaneous Water Works Revenue, was larger by Rs. 18,727-1-0 and Rs. 54,630-8-4 respectively, owing to erection of new and enlargement of old buildings and increased valuations of various properties in the city and larger consumption of water through meter.

For similar reasons and for increased ordinary and special service, the receipts from Halalkhor Tax were larger; but owing to the previous year's outstandings recovered in 1895-96 being Rs. 47,623-7-1 less than similar outstandings recovered in the preceding year, there was a net decrease of Rs. 23,744-11-10.

Wheel Tax and Tolls.—The increase of Rs. 9,442-12-11 under this head was derived from the Tax on Private Conveyances and from Toll Fees.

Under *Town Duties*, there was an increase of Rs. 22,308-10-0 owing to larger imports of all the articles on which the duties were levied.

Receipts from Government for Liquor Licenses and Tobacco Duty.—The increase of Rs. 12,126-10-2 was solely from Tobacco Duty chiefly owing to better preventive arrangements effected at the Railway stations since the employment of 26 additional peons sanctioned in 1895.

Market Receipts produced Rs. 7,137-3-4 more, principally under stall rents, slaughter fees and fees for verifying weights and measures.

Returns from other Property and Miscellaneous gave an increase of Rs. 1,21,709-6-4 solely on account of the net premia realized on the second instalment of Rs. 10¼ lakhs of the 23¼ lakhs Loan raised in July 1895, the sale-proceeds of surplus land in Jijibhai Dadabhai Street, rent of Tramway extensions and the arrears contributions for pensions

recovered from several employés specially admitted to the Fund by the Standing Committee during the year under report.

40. Turning to Statement **B**, Expenditure, it will be observed that the past year's actuals under certain heads were more than those of the preceding year by Rs. 4,00,563-14-0, while under others they were less by Rs. 71,533-8-4. There was thus a net increase of Rs. 3,29,030-5-8 in the expenditure for the past year over that of the preceding year. The causes of the principal increases and decreases are given below :—

General Superintendence.—Decrease, Rs. 12,303-8-4, due to the late Commissioner having drawn in 1894-95 the maximum salary allowed by the Municipal Act, and to the payment of the Acting Commissioner's salary in the same year, during the absence of Mr. Acworth on privilege leave, from 18th August to 18th November 1894.

Assessment and Collection Department.—Decrease, Rs. 6,781-4-10, due to the bills for Commission charges payable to the Port Trust and the G. I. P. Railway Co. for collection of Town Duties during January and February 1896, having remained unpaid in 1895-96, principally owing to an excess on the Budget provision for Commission for Collection of Town Duties, which could not be sanctioned by the Corporation until 9th April 1896.

Fire Brigade.—Increase, Rs. 1,846-14-8, due almost entirely to a larger amount of interest on debentures of the 4½ lakhs Loan having been paid in the past year on the application of the Debenture-holders than that in the preceding year.

Public Gardens.—Decrease, Rs. 29,940-10-0, due principally to the payment made in 1894-95 on account of compensation for land taken up from Mr. Vasta Kallian and others for the improvement and extension of the Victoria Gardens.

Public Works (Ordinary).—Decrease Rs. 17,312-8-1, due chiefly to the purchase in 1894-95 of new Steam and Hand Rollers, &c., for Road Repairs ; similar purchase not being necessary during the past year.

Public Works (New).—Increase, Rs. 81,294-6-11, due to the cost of conversion of 2,326 gas lamps in the city into Incandescent lights.

Public Health Department.—Increase, Rs. 5,065-9-8, chiefly under Markets and Slaughter Houses Establishment, Repairs, &c.

Municipal Debt.—Increase, Rs. 93,080-10-1, due partly to the payment of interest on the second instalment of Rs. 10¼ lakhs of the 23¼ lakhs Loan raised in July 1895 and to a larger amount of interest on debentures of the different Loans having been paid in 1895-96 on the application of the holders than was the case in the preceding year and partly to all the debentures of the Drainage Loan of 1878 redeemable on 1st January 1896 together with all the unpaid debentures (except 3 for Rs. 500 each) of the Loan which were redeemable in the preceding years, having been surrendered by the holders for repayment in the past year.

Police.—Increase, Rs. 1,27,073-12-0, due to the Police contribution which was paid in 1894-95, at the rate of Rs. 30,000 per mensem, plus adjustment of rent charges having been increased from the past year under Corporation's Resolution No. 7455, dated 14th October 1895, to Rs. 41,666-10-8 per mensem including rent charges.

Education.—Increase, Rs. 1,191-6-1, partly owing to a larger expenditure having been incurred during the past year on the collection of artware, &c., for the Victoria and Albert Museum, and partly to the Curator having drawn in 1894-95 only the usual leave allowances while on furlough from 5th May to 25th October 1894.

Hospitals and Dispensaries.—Decrease, Rs. 5,195-9-1, due principally to the unexpended balances of the grants from 1890-91 to 1893-94 for the maintenance of the Homeless Leper Asylum at Matunga having been paid to the credit of the Leper Fund in 1894-95.

Pensions, Gratuities and Compassionate Allowances.—Increase, Rs. 1,884-5-6, due to a larger amount of Compassionate Allowance having been paid to the widows and children of Municipal officers and servants who died in Municipal service.

Miscellaneous.—Increase, Rs. 89,126-13-1, due entirely to the investment of the net premia realized on the second instalment of Rs. 10¼ lakhs of the 23¼ lakhs Loan raised in July 1895.

41. The following statement shows the net Revenue and net Expenditure for 1895-96 and the preceding year as required in Standing Committee's Resolution No. 12212, dated 2nd February 1892:—

	1894-95.			1895-96.

44. The statement given below shows the financial position at the beginning and end of the year, respectively, with regard to the various loans raised from the public and Government :—

| | | |

45. The revenue, expenditure and balances of the last five years have been contrasted in the following table :—

	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.
	Rs.	Rs.	Rs.	Rs.	Rs.
Revenue	60,84,704	66,65,187	67,62,695 *a*	65,89,373	67,61,719
Expenditure	56,70,686	65,45,512	69,63,928 *b*	63,73,486	67,02,516
Closing balance (including recoverable advances to Loan Works, Reserve Stock, etc., and excluding minor deposits, &c.) ...	29,05,655	29,84,806	35,47,236 *c*	37,13,124 *e*	37,72,318 *g*
Add—Recoverable Revenue Outstanding	3,50,000	1,15,000	1,05,000	65,000	50,000
	32,55,655	30,99,806	36,52,236	37,78,124	38,22,318
Deduct—Uncompleted Works, &c., the unexpended balances of the grants for which were required for payment in following year...	5,44,728	3,55,296	5,12,460	4,84,218	4,80,048
Net workable balance available for requirements of the following year	27,10,927	27,44,510	31,39,776 *d*	32,93,906 *f*	33,42,270 *h*

a Includes Rs. 4,55,699 on account of net premia received on different Municipal Loans raised between 1888-89 and 1893-94 which was credited to current revenue as per Corporation's Resolution No. 9222, dated 11th December 1893.

b Includes Rs. 2,93,849 on account of adjustment of excesses on different Loan Works sanctioned to be met out of premia, which was shown as a charge against current revenue and the sum of Rs. 1,64,850 on account of the investment of the net balance of the premia.

c & d Excluding the sum of Rs. 9,03,991 on account of the value of Reserve Stock on hand on 31st March 1894, the net closing balances amounted to Rs. 26,43,245 and Rs. 22,35,785, respectively.

e & f Excluding Rs. 9,14,284 on account of the value of Reserve Stock on hand on 31st March 1895 the net closing balances amounted to Rs. 27,98,840 and Rs. 23,79,022 respectively.

g & h Excluding Rs. 8,76,660 on account of the value of Reserve Stock on hand on 31st March 1896, the net closing balances amounted to Rs. 28,95,658 and Rs. 24,65,610.

IV.—Assessment and Collection of Revenue.

Registration of Properties.

46. The number of properties on the assessment book at the close of 1895-96 was 52,499 against 52,148 in the previous

year, or an increase of 351. The details are contrasted in the following table :—

Years.	Classification of properties according to description.				Classification of properties according to liability to pay General Tax			
	Buildings.	Salt-pans.	Vacant lands, including tanks, &c.	Total.	Number assessed to General Tax.	Number exempted or compounded for on special terms.	Small plots of unproductive land for which no bills are issued.	Total.
1	2	3	4	5	6	7	8	9
1894-95.....	34,265	175	17,708	52,148	40,032	4,446	7,670	52,148
1895-96.....	35,083	175	17,241	52,499	40,318	4,493	7,688	52,499

47. In the year under report 320 buildings were demolished, while 815 new buildings were erected and 323 existing properties were enlarged.

Valuation.

48. The recorded gross value of these properties for the year under report is shown in the following table in contrast with that of the preceding year :—

Closing valuation of 1894-95.	Opening valuation for 1895-96.	Valuation after complaint.		Subsequent amendments.		Closing valuation of 1895-96.				Increase.
		Number of complaints.	Amount after disposal of complaints.	Reductions.	Enhancements.	Valuation chargeable with General Tax.	Valuation exempt from General Tax.	Valuation for which no General Tax bills issued.	Total.	
1	2	3	4	5	6	7	8	9	10	11
Rs. 2,76,13,741	Rs. 2,81,55,936	2,642	Rs. 2,80,48,470	Rs. 5,73,179	Rs. 7,81,590	Rs. 2,55,79,337	Rs. 26,59,320	Rs. 17,724	Rs. 2,82,56,381	Rs. 6,43,140

49. The increase is in the valuation of private properties and is made up as under :—

	Rs.
Erection of new buildings	2,58,447
Enlargements	2,35,166
Rise in rents and correction of under assessment	1,49,527
Total...Rs.	6,43,140

Property Taxes.

50. The following comparative tables show the increase and decrease in property taxes :—

(1) GENERAL TAX.

1894-95.				1895-96.				
8½ per cent. on rateable value.	Compounded sum payable by Government.	Compounded sum payable by the Port Trust.	Total.	8½ per cent. on rateable value.	Compounded sum payable by Government.	Compounded sum payable by the Port Trust.	Total.	Increase.
1	2	3	4	5	6	7	8	9
Rs. a. p. 16,54,251 5 1	Rs. a. p. 1,02,815 0 0	Rs. a. p. 1,63,523 0 0	Rs. a. p. 19,20,589 5 1	Rs. a. p. 17,06,848 0 1	Rs. a. p 98,374 0 0	Rs. a. p. 1,52,482 0 0	Rs. a. p. 19,57,704 0 1	Rs. a. p. 37,114 11 0

51. The amount of general tax on properties exempt under Section 143 of the Act does not appear in the above table. This amount, as contrasted with that of the previous year, is as under :—

	Rs.	a.	p.
1894-95	1,91,363	11	9
1895-96	2,04,832	2	6

(2) WATER TAX.

1894-95.				1895-96.				Increase.
On Value.	Compounded.	On Meter Measurement.	Total.	On Value.	Compounded.	On Meter Measurement.	Total.	
1	2	3	4	5	6	7	8	9
Rs. a. p. 6,01,753 10 0	Rs. a. p. 20,852 11 6	Rs. a. p. 7,46,335 12 1	Rs. a. p. 13,69,942 1 6	Rs. a. p. 6,12,233 6 5	Rs. a. p. 26,526 14 7	Rs. a. p. 7,58,336 6 10	Rs. a. p. 13,97,095 11 10	Rs. a. p. 28,143 10 4

(3) HALALKHORE TAX.

1894-95.			1895-96.			Increase.
On Value.	Special Service.	Total.	On Value.	Special Service.	Total.	
1	2	3	4	5	6	7
Rs. a. p. 5,17,615 2 9	Rs. a. p. 1,24,978 1 11	Rs. a. p. 6,42,593 4 8	Rs. a. p. 5,35,770 12 2	Rs. a. p. 1,27,801 6 11	Rs. a. p. 6,63,572 3 1	Rs. a. p. 20,978 14 5

52. The total demand on account of property taxes for 1895-96 amounted to Rs. 40,18,361-15-0, to which must be added Rs. 10,392-4-11 demands on account of previous years, making a total demand of Rs. 40,28,754-3-11.

Collection.

53. From the total demand for the year, a sum of Rs. 53,092-1-4 was allowed as drawback under Section 158 (2) of the Act, and the sum of Rs. 2,50,856 was the amount payable by Government and the Port Trust. For the recovery of the remainder bills were issued as under:—

Years.	Bills issued.	
	No.	Amount.
		Rs. a. p.
1890-91	3	33 6 10
1891-92	12	283 2 6
1892-93	25	217 15 8
1893-94	125	2,218 5 4
1894-95	301	7,639 6 7
Total ...	466	10,392 4 11
1895-96	75,817	37,14,413 13 8
Total ..	76,283	37,24,806 2 7

54. The outstanding balance on account of property taxes at the end of 1894-95 was Rs. 80,666-12-1, and the total amount for Collection in 1895-96 was Rs. 38,05,472-14-8. At the end of the year the total amount outstanding was Rs. 74,135-7-10. This amount was by the end of July 1896 reduced to Rs. 32,725-11-7, Rs. 41,409-12-3 having been collected from 1st April to 25th July.

55. The following table gives the details of the amounts which had to be collected during the year:—

Taxes.	To be collected.				Collected			Uncollected.	Deduct			Balance outstanding at the end of 1895-96		
									On account of former years					
	Opening balance outstanding.	Total of Bills issued during 1895-96.	Amount payable by Government and Port Trust without Bills.	Total.	On account of former years.	On account of 1895-96.	Total.		Amount written off as per Standing Committee's Resolutions Nos. 1031, dated 24th April 1895 and 6563, dated 18th September 1895.	Bills cancelled (amended bills being issued in lieu of the same). Tax on Vehicles and Animals.

56. The opening outstanding balance on account of this tax was Rs. 3,607-5-4. The demand for the year ending 31st December 1895 was Rs. 1,80,590-3-11, as against Rs. 1,72,675-7-1 for the previous year, and bills to the extent of Rs. 271-11-0 were issued on account of tax due for former years, so that the total demand was Rs. 1,84,469-4-3. The amount actually collected during the year was Rs. 1,78,056-11-3, against a collection of Rs. 1,71,888-12-4 in the previous year.

57. The amount recovered on account of licensed public conveyances, including license fees and fees for badges, and the amount realized from tolls at the Mahim and Sion Causeways, as contrasted with the previous year, is as follows :—

Years.	Tax on Public Licensed Conveyances.	License Fees.	Fees for Badges.	Toll Fees at Mahim and Sion Causeways.
	Rs. a. p	Rs. a. p.	Rs. a. p.	Rs. a. p.

Appeals to the Chief Judge of the Small Causes Court.

61. There were sixteen appeals to the Chief Judge of the Small Causes Court, which were all against valuation of properties, and were disposed of as under :—

Subject of Appeal.	Total Number of Appeals.	How disposed of.				Total.
		Dismissed.	Allowed.	Withdrawn by appellants.	Settled by consent.	
Valuation	16	1	1	2	12	16

REVENUE AUDIT.

62. The books and balances of the Ward Clerks in all the seven Ward Offices of the City were duly examined at the end of each quarter, and the bills checked in detail after

comparison with the Head Office accounts. The Assessment Books in the Head Office were also examined with a view to ascertain that no property had escaped its liability for taxation. The books relating to the collection of taxes on vehicles and animals were also examined, and the entries checked. 12,192 claims for $\frac{1}{3}$ drawback under Section 158 (2) were received and scrutinized. 6,602 entries in Forms 11, 11-A and 11-B on account of increase and decrease of valuations were checked and traced through all the Assessment and Collection Accounts. 778 complaints against valuations were heard, and decisions on 405 cases of complaints against amendments under Section 167 were scrutinized.

63. The revenue receipts or vouchers of the following departments were also examined and checked :—

	No. of receipts.	Amount. Rs. a. p.
Markets and Slaughter-houses ...	15,650	4,03,356 12 8
Health Department	19,643	76,833 8 11
Engineer's Department ...	9,642	43,989 9 6
Victoria Gardens	3,647	7,259 11 11

64. In the Licensing Department each of the 5,884 licenses granted was scrutinized with respect to the amount of the fee leviable.

65. The number of claims for refund sanctioned after examination on account of vacancy or over-collection was 652, amounting to Rs. 30,211-8-2.

TOWN DUTIES.

66. The following table shows in detail the increases and decreases in collections, refunds and net revenue for the year. The total collections for the year amounted to Rs. 16,81,667-3-7 against Rs. 16,13,164-6-0 in the previous year, or an increase of Rs. 68,502-13-7. The increase accrued under almost all heads.

67. The amount of refunds sanctioned shows an increase of Rs. 44,030-15-0 as compared with the amount sanctioned last year.

68. The net revenue derived from the duties during the year was Rs. 8,81,379-4-7 against Rs. 8,56,907-6-0 in the previous year, or an increase of Rs. 24,471-14-7.

V.—Public Works.

SPECIAL DRAINAGE.

69. For the purpose of carrying out the various large schemes of special drainage required in the City, Mr. James W. Smith, M.I.C.E., the Drainage Engineer of the Municipality of Bombay, was appointed to be in charge of these works under the designation of Special Drainage Engineer, with effect from the 1st March 1893, and continued to hold that office throughout the year under report.

70. The unfinished works in progress, and the new works sanctioned or commenced during the year, were as follows :—

A.—Colaba Sewerage Works.

B.—Umarkhadi Sewerage Works.

C.—Connaught Road and Sussex Road Drainage and Sewerage Works.

D.—Parel Sewerage Works.

E.—Mazagon Sewerage Works.

F.—Malabar Hill and Khambala Hill Sewerage Works.

G.—Fergueson Road and Chinchpokli Sewerage Works (gravitation portion).

H.—Old Race Course Sewerage Works (gravitation portion).

A.—Colaba Sewerage Works.

71. The original grant sanctioned for these works was Rs. 7,09,608, but, in addition thereto, the sum of Rs. 50,000 was sanctioned by the Corporation, bringing the total grant up to Rs. 7,59,608. At the close of the year, the several payments made amounted to Rs. 7,53,198.

72. The works are being constructed on the Shone System, which is composed of the application of two forces, one resulting from the compression of atmospheric air and the other the natural force of gravity.

73. The following divisions are comprised in the works :—

Works in Pipe Sewers, &c.

74. The contract for this division of the work was let to Messrs. Bulkley and Co., but on the 20th of February 1895 they were required to withdraw from the whole of the work, and a suit has been filed by them against the Municipality, which was pending at the close of the year. The work has since been carried on departmentally, but as the most difficult part had been left by the contractors, considerable delay has resulted in bringing it to completion ; this was, however, practically accomplished in the middle of February 1896, but at present it would be premature to express an opinion as to the efficient working of the system as applied to Colaba.

Works in Air-compressing Machinery, &c.

75. The contractors for this part of the work were Messrs. Hughes and Lancaster, and the work was practically completed by them within the contracted time, which expired on the 1st of May. Official trials of the air-compressing machinery were made by the Assistant Executive Engineer, Mechanical Branch, on behalf of the Municipality, and reported by him to be satisfactory. The total amount payable to the Contractors, Messrs. Hughes and Lancaster, for the machinery, &c., under their contract was £13,651 and Rs. 14,276 for the erection thereof, making a total payment of Rs. 2,60,007. The last instalment of £1,551 was, however, not paid, as the machinery and mains were not finally tested.

Works in Engine House, Boiler House, Coal Store, Chimney, Engineer's and Firemen's Quarters, &c., at the Air-compressing Station. Works in Ejector Chambers, Excavation and Masonry for Air Mains and Sewage Mains.

76. The Contractors for this portion of the work were Messrs. Mistri, Bhedwar, Vachagandhi & Co. As stated in last year's report, this work was not completed even within the extended contract time, but was practically finished on the 1st of October 1895, from which date the

maintenance period of 12 months commenced. The bill, as finally settled with the contractors, amounted to Rs. 78,077, as against Rs. 82,239, the contract amount, thus showing a saving of Rs. 4,162; but some minor matters left undone by the contractors will absorb about Rs. 1,000 therefrom.

B.—Umarkhadi Sewerage Works.

77. Messrs. Bulkley and Co. were the contractors for this part of the general scheme, but on their withdrawal under notice from the work, it was carried on departmentally until stopped by the S.-W. monsoon of 1895. Subsequently it was considered desirable to complete the work by contract. Tenders were therefore invited, and two were received—one from Mr. Sitaram Lakshman, and the other from Messrs. Spencer & Co., their offers being Rs. 1,81,011 and Rs. 2,39,065, respectively. The former was accepted and the order to commence work given on the 6th November. The total expenditure on the Umarkhadi Works up to the end of the year was Rs. 2,14,682.

C.—Connaught Road and Sussex Road Drainage and Sewerage Works.

78. This work, so far as the contractors were concerned, is finished, and paid for; but some portions yet remain, the completion of which cannot be effected until certain houses which will carry the vent-shafts have been built, and water can be laid on to the flushing tanks by a main.

D.—Parel Sewerage Works (gravitation portion).

79. The Contractors for these works, Messrs. Mistri, Bhedwar, Vachagandhi & Co., did not complete them within the contracted period of 6 months, which expired on the 31st May 1895; but they were practically finished at the end of December. The final bill, however, cannot be passed until certain defects are remedied. The estimated cost of the work was Rs. 70,974, and the total expenditure at the close of the year was Rs. 58,127.

E.—Mazagon Sewerage Works (gravitation portion).

80. These works are contracted for by Messrs. Sulemanji Mulla Abdulali & Co. The Corporation sanctioned the execution of the works at an estimated cost of Rs. 3,32,661; tenders were accordingly invited and three were received,

that of the abovenamed contractors being the lowest and at rates 4 per cent. less than the estimated cost, it was accepted and the work commenced on the 23rd November 1895. The contract has to be completed in two years from that date. The total expenditure passed up to the end of the year was Rs. 46,479.

F.—Malabar Hill and Khamballa Hill Sewerage Works (Gravitation Portion).

81. Sanction of the Corporation was accorded to carrying out this work at a cost of Rs. 1,57,026. Tenders were invited, and that of Mr. Sayaji Naguji being the lowest was accepted for Rs. 1,17,978. Work commenced on the 30th November 1895. The contract time for completion is 18 months. The expenditure passed up to the close of the year was Rs. 34,219.

G.—Fergusson Road and Chinchpokli Sewerage Works (Gravitation District).

82. The total cost of this work is estimated at Rs. 93,572, but as the monsoon was approaching the work was allowed to stand over until the fine weather. No tenders had been invited at the close of the year.

H.—Old Race Course Sewerage Works (Gravitation Portion).

83. The commencement of this work, sanctioned at a cost of Rs. 40,815, was also postponed until the fair season.

Supply of Stoneware Pipes, etc.

84. Messrs. Richardson & Cruddas were the Contractors for the supply of stoneware pipes for the Parel Sewerage Works, and they should have completed delivery on the 28th February, but the Standing Committee extended the time to the 22nd April 1895.

85. Tenders were invited for the supply of stoneware pipes and fittings for the gravitation portions of the Mazagon, Malabar Hill, and Khambala Hill sewerage districts and two were received, one from Messrs. Garlick & Co. and one from Messrs. Richardson & Cruddas, but as the latter firm supplied pipes manufactured by Messrs.

Doulton & Co., which had hitherto been used with satisfactory results in Bombay, it was deemed advisable to continue their use; the offer of Messrs. Richardson & Cruddas was accordingly accepted and the contract signed on the 8th January 1896. The instalments of pipes were delivered irregularly, in consequence, it was said, of unforeseen difficulties of shipment, hence some half socket pipes from Municipal stores have had to be used in emergent cases. The stoneware pipes and fittings required for the Fergusson Road, Chinchpokli District and Bapty Road were ordered from Messrs. Richardson & Cruddas in extension of their contract at reduced rates. Tenders were therefore not invited. Some 12″ sluice valves were obtained from Messrs. John Fleming & Co. at a cost of Rs. 120 each for the Colaba Sewerage Works. As some cast iron covers, etc., were required for Mazagon, Malabar Hill and Khamballa Hill Sewerage Works, tenders were invited, and the lowest being that of Messrs. Sulemanji Mulla Abdulali & Co. was accepted at rates aggregating Rs. 28,211 and their contract was extended for the supply of similar articles for the Old Race Course District. The tender of Messrs. Richardson & Cruddas for materials of a like kind for Mazagon District was accepted for Rs. 29,224, the lowest of several tenders. An extension of the contract time was granted by the Standing Committee and delivery completed on the 23rd February.

86. The Committee to consider and report on a proposition to adopt the Shone system of drainage throughout Bombay submitted their report to the Corporation, and that body decided to wait until the system was sufficiently tested at Colaba. Should those works give a satisfactory result, the Committee would be prepared to consider the desirability of a further extension of the Shone system.

DRAINAGE.

87. *Pumping Station, Love Grove, Worli.*—The Worthington triple expansion pumping engines continue to give satisfaction, the average efficiency being 94 per cent. for the year. The whole of the plant was taken over from the makers, Messrs. James Simpson & Co., in the month of May 1895, the last instalment of £2,396 paid and all claims were

finally disposed of. Breakages of parts of the machinery occur occasionally, but the efficiency of the station is not interfered with, as three engines being sufficient for pumping purposes the fourth is always ready for use when wanted.

88. A new armature for the electric light dynamo was purchased from Messrs. Fischer & Co. at a cost of Rs. 300. This was necessary, as the present armature was showing signs of wear, and as the electric light is very necessary at this station, the armature was provided in case of breakdown. The plant worked satisfactorily throughout the year.

89. One of the condensing tanks has been plastered with Indian patent stone to render it watertight, as it was thought a saving might be effected in the water grant. The results will be noted in next year's report.

90. The boundary of the property purchased for the erection of the new engine and boiler house was fixed during the year.

91. One of the two barrels of the outfall sewer was blocked from time to time in the early part of the monsoon: the obstruction seeming to be influenced by the tide, early attention will be paid to this.

92. Tenders were invited for the supply of mechanical stokers, the grant for which was Rs. 10,000, and that of Messrs. John Fleming & Co. was accepted, being the lowest, amounting to Rs. 8,200. The stokers were not completely fixed or in working order at the end of the year.

93. It is found necessary to enlarge the shred lifters as the smallness of their areas causes the sewage to be retarded in its flow. The stench noticeable at and about the station is chiefly due to an accumulation of foul mud on the sea side of the sluices of the old storm water drain, the channel of which is directed the wrong way ; measures will soon have to be taken to remedy this.

Colaba Air-compressor Station (Shone System).

94. The air-compressing machinery of the station consists of three compound non-condensing horizontal steam engines with air-compressing cylinders and a suitable receiver for containing the compressed air, steam being supplied by two steam boilers of the marine type working up to a pressure of 120 lbs. per square inch. There are five ejector stations situated below the ground at different parts of Colaba, and in each station are two ejectors which, being actuated by the compressed air conveyed from the compressor station through pipes, cause the sewage to be propelled along suitable closed channels to its destination. The ejectors are automatic in their action. The work at the compressor station was practically completed in the beginning of July 1895, and the official trials proving satisfactory the plant was taken over on that date, and on the 22nd of August the station was formally opened, but regular work was not commenced until the 12th of December, since which date the system has worked satisfactorily.

95. As only a few drainage connections have yet been made, the cost of raising sewage by this system has not yet been ascertained.

96. As the full staff was not appointed until the close of the year under report, a considerable saving was effected under the head of Establishment as provision had been made in the budget for employment of the staff from the 1st May 1895. Rs. 2,200 of this saving was utilized to meet excesses in the grants for repairs, &c., at Love Grove Pumping Station. A saving in the coal grants also resulted from the same cause. As the machinery has to be kept at work day and night, it is proposed to expend the sum of Rs. 3,043 for providing an electric light installation. An automatic air pressure recorder was purchased of Messrs. Bradbury, Brady & Co. for the sum of Rs. 260 and fixed for use at the station. Regular daily reports of the number of engines at work, their speed, consumption of coal, &c., have been submitted to the Executive Engineer. The amount of sewage lifted could not be ascertained until counters showing the number of times the ejectors emptied themselves were fixed, and this was not done before the close of the year.

HOUSE CONNECTIONS.

97. The Municipal Corporation, under their No. 12429, resolved on the 29th January 1896 that " having had a favourable experience of the operation of its resolution of 3rd November 1882, extending over a period of 13 (thirteen) years, and having applied the principle embraced in the resolution to various districts of the city with satisfactory results and finding that the principle is in complete accordance with the wishes of all the persons concerned, the Corporation still adheres to that resolution, including in its scope all houses and outhouses and all new houses which were formerly excluded, and is now of opinion that the terms of the resolution of the 3rd November 1882 as now amended should be made applicable in the future to all the districts of the City." An advance of one lakh of rupees was provided, and the house connection work of all new houses completed was undertaken, together with repairs to the connections of houses already connected by the Municipality, and was carried out up to the end of the year. No expenditure on this account was debited to the above grant of rupees one lakh up to the 31st March 1896, as the expenses were incurred in March 1896.

98. The report of the House Connections Committee was submitted to the Corporation on the 10th December 1894, and the Corporation, at their meeting held on the 6th May 1895, resolved " that in carrying out house connections in future the Corporation trust that the recommendations of the Committee will be carefully considered."

99. *Miscellaneous Works.*—A storm water drain was placed in Cruikshank Road. The total outlay on the work, including Establishment and Contingent charges, was Rs. 17,358. The Dadar Road and Portuguese Church Road was also furnished with a storm water drain at a total outlay of Rs. 3,987. An open drain on the line of the existing water course near Elphinstone Road between Suparibaug Road and DeLisle Road was projected but not completed at the closing of the year. A grant of Rs. 2,469 was sanctioned for the removal of silt from the open main drain leading to Love Grove sluice gates, the work to be done departmentally. Rs. 1,089 was expended thereon, but

further progress was prevented by the rains. The work will be resumed after the rains of the coming year. Some works in pipe sewers, manholes, &c., in Kalachowkey Road have been completed. Out of the total number of catch-pits on pipe sewers and branch drains, *viz.*, 16 large and 60 small, there were constructed during the year 15 large and 34 small at a cost of Rs. 31,264. More experience with catchpits is necessary ere a decisive conclusion can be arrived at as to their success. A grant of Rs. 5,471 was sanctioned for arrangements in pipe sewer manholes to prevent splashing of the sewage. Messrs. Richardson & Cruddas supplied the materials, and the work was in progress at the close of the year. The sum of Rs. 4,400 was sanctioned for the construction of a tidal flap at the mouth of the Sonapore drain, and quotations were invited for the supply of (*a*) a special tidal flap and (*b*) piles, bolts, &c. The offer of Messrs. George Gahagan & Co. was lowest for the former, and that of Messrs. Richardson & Cruddas for the latter. Their respective tenders were therefore accepted. The work which is being done departmentally was in progress at the close of the year. Rs. 3,000 was sanctioned for the purchase of automatic sewage height recorders. Messrs. John Fleming & Co. offer to supply and fix in position two complete recorders at the rate of Rs. 867 each, which offer was accepted, and the balance of the grant reserved for departmentally executing the masonry work in connection with the sewer. The contractors were however unable to fix them before the close of the year. It was decided to entrust the erection of five masonry vent shafts on main sewers to the petty works contractors for 1896-97. The construction of public urinals and latrines at various places has been completed in addition to those already in existence. The sluices and penstocks under the supervision of the staff have continued to work satisfactorily. The work of miscellaneous drainage, comprising repairs, alterations, construction, flushing, &c., has been efficiently performed.

100. The value of drainage stock, such as stoneware pipes, iron fittings, &c., at the commencement of the year was Rs. 4,07,877 ; receipts and issues amounted to Rs. 94,347 and Rs. 1,43,455 respectively. The value of stock-in-hand at the close of the year was Rs. 3,58,769.

101. The number of summonses taken out and notices issued under different Drainage Sections of the Municipal Act during the year was 3,414, of which 391 summonses were withdrawn and 792 complied with ; 1,497 notices were complied with and 734 not complied with. In cases where convictions were obtained the fines inflicted amounted to Rs. 644 collectively.

WATER WORKS.

102. *Tansa Lake.*—The rainfall for the year 1895 was 92·37 inches. The heaviest rainfall in one day occurred on the 20th June 1895, when 5·34 inches were registered. The lowest water level was 394·85 T.H.D. on the 18th June. The lake overflowed on the 18th July after 31·59 inches of rain had been registered and ceased to do so on the 3rd October. The quantity of water which passed over the waste-water weir is estimated at 18,735 millions of gallons. The approximate quantity of water drawn off into the duct from the lake was 8,780,844,233 gallons throughout the year, of which quantity about 88 millions of gallons were passed into the Vehar Lake, the remainder being sent forward to the city. The building of Inspector's quarters at Kaling, sanctioned by the Corporation at an estimated cost of Rs. 3,932, was in progress at the end of the year. The erection of chawls at the lake, at an estimated cost of Rs. 12,000, was also in hand at the close of the year. The supply of water from Tansa was shut off from the 30th November to 7th December to allow of the annual general inspection and repair of the duct. Two bursts of the 48 inches main occurred, but were soon repaired, the stoppage of water through this cause lasting only for a period of two days and 23½ hours. The second portion of the work of repairing and strengthening the Kasheli embankment was in progress at the end of the year. The grant for the whole of this work was Rs. 30,000. The expenditure on the part previously done inclusive of that in progress was Rs. 26,212.

103. *Vehar Lake.*—The rainfall for 1895 was 82·81 inches, being 2·75 inches less than in 1894 and 1·09 inches less than the average which is 83·90 inches. The lake

overflowed on the 12th August and ceased on the 26th September. The heaviest rainfall in one day was 8·30 inches on the 8th September. The lowest water level was 253·70 T.H.D. on the 14th June. The storage on the 31st October 1894 was 11,335 millions of gallons and on the 31st October 1895 was 11,010 millions of gallons. The daily loss during the dry season from 31st October 1894 to 31st May 1895 was 14·3 millions of gallons per day in addition to that drawn from Tansa Lake. The estimated quantity of water received into the Vehar Lake from the Tansa Duct between the 31st October 1894 and the 31st May 1895 was 82·5 millions of gallons. Between the 8th August and 17th September 1895, 581 millions of gallons were received from the Tulsi Lake by overflow. The quantity of water that passed over the Vehar waste weir between the 12th August and the 26th September was estimated at 4,191 millions of gallons ; a joint leak occurred at Chinchpookly and a burst on the Suparibaug Road.

104. *Tulsi Lake.*—The rainfall for the year 1895 was 100·40 inches. The heaviest fall in one day was 8·08 inches on the 8th September. The lowest water level was 439·50 T.H.D. on the 14th June. The lake overflowed on the 8th August and ceased to do so on the 17th September 1895. The storage on the 31st October 1894 was 2,243 millions of gallons, and on the 31st October 1895 it was 2,136 millions of gallons. The loss during the dry season from 1st November 1895 to the 31st March 1896 was 880 millions of gallons. The quantity of water which passed over the waste weir into the Vehar Valley is estimated at 581 millions of gallons.

105. *Pawai Lake.*—The water supply from this lake was not required throughout the year. The pumping plant was transferred from the water branch to the Assistant Executive Engineer, Mechanical Branch, with all accessories thereto on the 29th January 1896. After protracted proceedings in the Thana District Court and the Bombay High Court, the purchase-money for the land acquired for the Pawai works, amounting to the total of Rs. 1,67,904, was paid into Court.

106. *Malabar Hill Reservoir.*—The Corporation, as per their Resolution No. 12569 of 30th January 1896, sanctioned

certain structural alterations to the filters at the Malabar Hill Reservoir at a cost of Rs. 14,400, and the work was in progress at the close of the year.

107. *Bhandarwada Reservoir.*—The filters have worked satisfactorily throughout the year. The covering of the clear water channel has answered its purpose. The parapet wall between the filters and distributing basin was raised at a cost of Rs. 434; this was to prevent the filtered water being fouled by washings from the garden over the distributing basin. The work of covering the storage basin was proceeded with throughout the year, but was not completed at the close of the year. The original grant for this work was Rs. 1,60,097, but the revised estimate shows that it may be completed for Rs. 1,47,000, whereby a saving may be realised of Rs. 13,097. The filling up of filter No. 9 with filtering materials was commenced, and photographs were taken at interval of about three months to show the progress and character of the work.

108. During the year the offers of reward for the capture of crocodiles in the lakes and the finding of their eggs resulted in claims for 7 crocodiles and 91 eggs. There was one reported case of leeches being ejected from the service tap of a house in the Fort. This, being traced, was found to be most likely due to a broken service pipe near a drain in which many leeches were found.

109. *Miscellaneous Works.*—No progress was made with the work of connections at Chinchpookly owing to the dispute with the G. I. P. Railway Company remaining unsettled. Negotiations for a settlement out of Court having failed, a Sub-Committee of the Standing Committee decided to recommend the Standing Committee to proceed with the suit in the High Court. On the 5th of September 1895, the Corporation sanctioned the laying of a 6-inch water main in Ballard Road at a cost of Rs. 2,951, the extension along the Ballard Pier being done at the expense of the Port Trustees. The work was completed with new pattern hydrants at a cost of Rs. 1,745. The laying of a 12-inch water main in Purbhadevi Road was sanctioned by the Corporation at a cost of Rs. 25,870. This work includes the removal of the existing small mains

which have been surrendered by the Bombay Dyeing Company and the Standard Mill Company in consideration of the benefit they will receive by the laying of a large main. The work was in progress at the close of the year. The relaying of the 24-inch water main in Gibb's Road was completed at the total cost of Rs. 5,409.

110. A Committee of the Corporation was appointed on 4th April 1895, in continuation of the Committees nominated on 11th August 1892, 21st May and 12th July 1894, to report on various questions connected with the improvement of the distribution of the water supply. The Committee submitted their report on 25th March 1896, and it was under the consideration of the Corporation at the close of the year.

111. *Distribution and Maintenance*—The number of bursts of water mains throughout the year was 255 against 313 during last year. During the year 522 new connections were made and 243 services disconnected on account of buildings demolished, non-payment of rates or for infringements of the provisions of the Municipal Act. The net increase in the number of connections was 279, bringing the total up to 19,445, and showing an increase of 1·4 per cent. The meters in use on the 31st March 1896 numbered 1,854, being an increase of 180 over the previous year. The registered consumption as per meter throughout the year was 1,290,500,000 gallons. The night reading work to check waste has been considerably increased owing to disturbance of subsoil for drainage work.

112. *Stock.*—The value of reserve stock on the 1st March 1895 was Rs. 4,43,548. Purchase during the year amounted to Rs. 72,010, and the issues aggregated Rs. 83,424-12-3. The balance on the 1st March 1896 was Rs. 4,41,239-6-4. During the year a supply of meters and fittings were obtained from Messrs. John Fleming & Co. at the contracted cost of Rs. 10,640. A supply of valves and hydrants were obtained from Messrs. Richardson & Cruddas at the contracted cost of Rs. 17,380. The sale of produce at the lakes and along the pipe lines realised Rs. 2,486 against Rs. 2,200 in 1894-95. The total number of notices issued during the year to owners on account of

faulty taps, service pipes, &c., was 8,920 against 6,781 in the previous year. Sanction was accorded by the Standing Committee, under Section 279 of the Municipal Act, to sever the connection of service pipes in 803 cases. The sanction was carried out in 151 instances.

MUNICIPAL BUILDINGS.

113. The principal Municipal buildings and works completed and under construction and repair during the year were as follows:—

Completed.

Fire Brigade Station at Dadar.
Falkland Road Overbridge approaches.
Kerosine Oil Godown at Bellasis Bridge.
Bigaris' Chawl at Arthur Crawford Market.
Ward Office at Null Bazaar.
New Market at Colaba.

Extension of retaining wall at Walkeshwar Road.

Under Construction.

Fire Brigade Station at Sankli Tank.

Do. do. at Babula Tank.

Bhuleshwar Market and Schools.

Making of streets which have become public under the Municipal Act.

114. Revised plans and estimates for a Fire Brigade Station at Gamdevi have been prepared and submitted. Since the original plans were submitted, it was found that the building at present occupied by the Fire Brigade Foreman on the upper floor and Ward Office on the ground floor is in a dilapidated state, and must be soon pulled down. The Fire Brigade Quarters and Ward Offices are included in the revised estimates. The Colaba Municipal Market was completed at a total cost of Rs. 92,077, against the sanctioned estimated cost of Rs. 100,300, whence a saving accrued of Rs. 8,223. The market was handed

over to the Market Department on the 10th May 1895. The deed of trust in respect of the grant-in-aid of Rs. 33,500 to be paid by Government for the construction of the school over the Bhuleshwar Market was executed and registered on the 21st May and 6th July 1895, respectively. The order to commence the work was given on the 15th May 1895. The building is in progress. The total expenditure up to the close of the year was Rs. 3,16,336.

115. Chawls for the use of the bigaries of the Health and Market Departments have been completed at a cost of Rs. 50,296, against the sanctioned estimated amount of Rs. 70,658, the saving being Rs. 20,362. These chawls were handed over to the departments concerned in the middle of September 1895.

116. Ward Offices at Null Bazaar have been completed at a cost of Rs. 11,627. The sanctioned estimated amount was Rs. 13,000 ; the consequent saving was Rs. 1,373. The work of building walls at Tank Bunder Burial Ground has been suspended, as some claims of ownership to the land on which the walls were to be built have been asserted.

117. The order to commence the building of the kerosine oil godown at Bellasis Bridge Depôt was given on the 1st October 1895. It was completed on the 5th February 1896 at a total cost of Rs. 4,724, against the sanctioned estimated amount of Rs. 5,925, saving Rs. 1,201.

118. In compliance with the Resolution of the Corporation No. 4030 of the 18th July 1895, an inventory, of all lands and buildings belonging to the Municipality with their approximate values, will be found as an Appendix to the Executive Engineer's report.

119. Application for permission to build or rebuild, &c., houses during the year amounted to 1,222, or 182 more than last year. Of these, 1,172 were passed either wholly or partially, and only 50 were unconditionally disapproved on sanitary and other grounds. Notices numbering 4,278 were issued on house-owners under various sections of the Municipal Act, being 665 more than during the previous year. Against house-owners who failed to comply with

notices served upon them, there were issued 328 summonses. In 133 of these cases the parties complied with the terms of the notices before service of summons, in 39 cases the parties were warned and discharged by a Magistrate, in 24 cases the parties were convicted and fined, and 48 cases were postponed to the ensuing year. The aggregate amount of the fines was Rs. 299.

120. During the year 31 buildings or parts of buildings fell down. In 25 instances no one sustained injury, but in six cases six persons were injured and ten killed.

121. Under sundry sections of the Municipal Act 2,847 notices for the summary removal of dangerous or objectionable structures were issued. Of these 563 were not decided at the close of the year.

122. General street improvements to an aggregate area of 4,371 square yards have been effected at a cost of Rs. 69,340.

ROADS.

123. The new road from Dongri Street across Nowroji Hill to Elphinstone Bridge was sanctioned by the Corporation, at an estimated cost of Rs. 3,32,023 ; but this was revised during the year. In addition to the two properties already acquired, two more of the aggregate value of Rs. 23,250 were purchased, and application made to the Collector to acquire two more on the fazendari land belonging to Mr. Jalbhai Ardesir Sett. The Collector has given his award for one of those, but as the owner of the building and Mr. Jalbhai dispute each other's right-of-ownership over the ground and the Collector's apportionment of the value, the matter has been referred to the High Court. The proposed road from the north end of Frere Road up to Kalachowki Road has been named the Reay Road by the Corporation. The Municipality has to construct that portion of it which will extend from Waree Bunder Road to Gunpowder Road. The acquisition of properties for the Municipal section of the road has been vigorously pushed on. The road over the Tansa main from Dadar to Matunga was connected with the Sion Road and opened to the public in the month of May 1895.

The construction of Souter Road is still at a standstill, pending settlement with the contractors. The land acquired for the completion of Gilder Street between Agripada drain and Arthur Road has been measured up, and when the area has been verified by the owner's Engineer, the conveyance will be prepared and the work taken in hand. An offer was received for the purchase of 24 plots of frontage land in the rear of the Byculla Club of the Agripada District from Messrs. Gostling and Morris on behalf of that Club and the Society for the Propagation of the Gospel. This offer was for 17 plots, admeasuring in all 10,983 square yards on Club and Morland Roads, and 7 plots in rear thereof, admeasuring 5,041 square yards, the former at Rs. 6-8-0 and the latter at Rs. 5 per square yard. The offer was rejected by the Corporation. Invitations for private offers were sanctioned by the Corporation for 40 plots of land abutting on the Club and Morland Roads. This resulted in only one offer, and that at so low a rate that it was rejected. If nothing better can be done, the sales will have to be by public auction. Some of the frontage plots of land on Connaught Road and Sussex Road near Victoria Gardens have been sold by public auction, five abutting on Parel Road and two on Connaught Road. The Corporation have sanctioned the sale of 15 other plots by private negotiation at fixed prices, but if after a reasonable period no satisfactory progress is made the plots will be put up to public auction again. During the year the total area of roads repaired was 8,820,997 square feet at a cost of Rs. 2,47,595, being at the average rate of $5\frac{1}{2}$ pies per square foot as against 7 pies per square foot last year. This area is exclusive of the large areas repaired on account of the Drainage, Water and Health Departments, and the Tramway and Gas Companies. The paucity of steam rollers was much felt. There are at present 22 steam rollers varying in weight from 6 to 20 tons. Some are old and much worn. A large quantity of metal was broken by the stone crushing machine lately purchased, but was not worked up to its full capacity as a suitable engine is wanted to drive it, a steam roller having been used when it could be spared.

124. A part of the new road now called Reay Road from Tank Bunder to Gunpowder Road and a portion

of the Tank Bunder Road were taken over by the Municipality from the Port Trustees.

125. The pickaxes manufactured by the Hardy Patent Pick Company, which are now used for road repairing, have given satisfaction.

126. The roads were kept clean by means of sixteen brushing and nine scraping machines, supplemented by hand-scraping when necessary. The plant has been found insufficient especially in the rainy season, and it is proposed to increase it.

127. The watering of the roads was carried out satisfactorily, and complaints from the general public were fewer than during last year. The watering of outlying roads was performed every alternate day, but the roads in thickly populated and business parts of the City were watered twice and even thrice a day. The work is done chiefly by carts drawn by bullocks, but this being an expensive and inconvenient system, reels provided with about 250 feet of flexible hose have been tried, and though found superior to carts, have some objectionable features, one of which is the partial obstruction caused by the hose lying over the road. A system of new pattern hydrants with about 6 feet of hose has been tried in several places and proved satisfactorily, but this has also an imperfection, *viz.*, the water, being ejected to a distance, sprays, and is blown about by the wind if at all high and may produce unpleasant consequences ; but on the other hand the system places the hydrants at distances of 130 feet instead of as with the old pattern hydrants 400 feet, and this offers increased facilities for fire-extinguishing purposes ; moreover, breaks in mains will be more speedily repaired without the necessity of emptying them and shutting them off as at present. The cost is however greater. Eighty-one of the new hydrants have been fixed and 262 are in hand.

128. The moorum footpaths have proved unsatisfactory. A small length of the footpath along Musjid Bunder Road has been paved with asphalt and has been found so far satisfactory, but no reliable opinion can yet be formed as to whether it resists the ravages of rats which infest that

neighbourhood. Other footpaths have been paved with blue stone to the extent of 36,713 square feet at a total cost of Rs. 19,711.

129. During the year a length of 880 feet of the single-track of tramway from Pydhowni to Bhuleshwar along Coppersmith Bazaar was doubled and opened to traffic on the 26th March 1896, and a new double tramcar track of the length of 710 feet was laid from the Tramway Company's Stable on Falkland Road to the junction of that road with Gilder Street and opened to traffic on the 21st December 1895. Serious complaints were received of the condition of the tramway rails, the grooves in them having been greatly widened by use. The Tramway Company is replacing them with new and narrow grooved rails.

130. Three hundred and forty-five trees were planted where required, and the existing ones well looked after. The young trees flourish well except those on the Queen's Road and Hornby Vellard. It appears that the salt air injuriously affects them in those exposed positions.

LIGHTING.

131. There was an increase of seven gas lamps during the year 1895-96, the total number of lamps in the city being 3,629. The minimum pressure of $\frac{8}{10}$ths of an inch was maintained at all the Municipal pressure registers. The gas supplied was free from sulphur, and the illuminating power was generally up to the contract standard. The contract with the Gas Company was renewed for another ten years from 1st July 1895, and the city is now being lighted on the incandescent principle. The total number of gas lamps converted into incandescent lamps up to the end of March 1896 was 2,735. Messrs. Mahlar and Roscher's new lamps, which they call "Patent No. 94," in which no chimney is required, are now being used in the new incandescent lamps. The cost of each complete lamp is Rs. 52-2-0. During the work of conversion advantage was taken of improving the present dispositions of the lamps, and brackets for holding them were attached to walls in place of wooden posts. If properly looked after, the incandescent system is much superior to the old mode

of utilizing the gas. In the cold weather some trouble is experienced with them chiefly from the choking of the pipes and holes with naphthaline, and prompt attention is necessary on the part of the Gas Company to remove these chokes. The pressure of the gas has much to do with the efficiency of the incandescent lighting. There is no provision in the contract with the Gas Company authorizing the Municipal officers to ascertain the actual pressure at which the gas issues from the burners. The contract only provides that none of the Municipal automatic pressure gauges should register, at any hour of the night, a less pressure than due to a column of water $\frac{8}{10}$th of an inch in height.

132. As in former years the kerosine oil lighting was carried out departmentally, and oil of 150° proof test was used throughout the year. The total number of kerosine oil lamps in the city at the end of the year was 1,724. A portion of the savings for the grant for kerosine oil lighting was appropriated to the construction of another kerosine oil godown at Belasis Bridge Store Depôt with a view to effecting larger purchases of oil when the market rate is low. The net cost of this mode of lighting during the year was Rs. 34,421. The average number of lamps during the year was 1,644.

133. The working of the electric plant for lighting the Arthur Crawford Markets and Municipal offices was not altogether satisfactory owing to breakages of wires in the armature. These breakages, however, did not occur until the plant was taken over by the Municipality, but the matter having been brought to the notice of the makers by their Agents, Messrs. John Fleming & Co., they undertook to repair the damage free of charge. The spare armature was accordingly put in the dynamo and the damaged one sent to England to the makers, whose opinion is that climatic influences caused the injury ; they therefore decided to make one of special construction to meet the difficulty. This was done, the new one sent out and put into use, but though a great improvement on the old pattern, it is by no means perfect, as breakages of wires have since occurred in it. A more flexible wire is now being tried, but it is too soon to express an opinion as to its

success. Excepting from the above cause the whole of the plant has worked well. Two spare field magnet coils for the market dynamo were purchased from Messrs. John Fleming & Co. at a cost of Rs. 595. The lighting of the Arthur Crawford Market by electricity has, on the whole, proved a success, and has gratified the stall-holders.

WORKSHOPS.

134. The charges on account of ground rent for the year 1895 for the land occupied by the Workshops and Stores premises, the Health Department Stables, Incinerator and Grant House amounting to Rs. 102-8-7 were paid to Government and Rs. 851-2-0 for water consumed at the workshops credited to the Municipal Fund out of the Workshops grant. Some new machinery was purchased at a cost of Rs. 3,550. As the Government now demands a much higher rent for the grounds, the question as to the advisability of continuing the tenancy was brought under consideration, but not finally disposed of at the close of the year.

135. The hydraulic lift in the Municipal Offices has worked well during the year.

FIRE BRIGADE.

136. The new manual fire engine station at Naigaum Tank Road, Dadar, was completed and opened on the 1st June.

137. The new station at Babula Tank will be completed and opened about the 1st May next.

138. The new Head-quarters stations at Sankli Tank, Byculla, is now in course of erection and will probably be occupied during the ensuing year.

139. The water supply has been satisfactory at all fires.

140. Several members of the Brigade received injuries in the discharge of their duty, but all have recovered, with the exception of one fireman who became permanently incapacitated for further service and was granted pension.

141. The fire service has been maintained in thorough working order.

142. The present equipment of the Brigade is as given below :—

8 Steam fire engines.
9 Manual fire engines.
15 Hose reels.
7 Tender carts.
6 Telescopic fire escapes.
1 Brake.
15 Horses.

319 Lengths of delivery hose, comprising about 23,580 feet, with other fire-extinguishing appliances.

143. The total strength of the Brigade is 149, including all ranks.

144. The estimated damage by fire and water to property during the year amounted to Rs. 20,41,571, out of which property to the extent of Rs. 20,12,657 was insured.

145. The following table gives the number of fires and estimated loss during the year under report, as compared with the preceding year:—

Months.	Serious Fires.	Slight Fires.	Total.	Estimated Loss. Rs. a. p.
April	4	11	15	20,156 0 0
May	4	6	10	79,262 0 0
June	2	9	11	1,17,194 0 0
July	2	7	9	8,108 0 0
August	1	1	2	6,003 0 0
September	...	3	3	206 0 0
October	1	8	9	60,074 0 0
November	3	9	12	5,09,884 0 0
December	5	19	24	28,411 0 0
January	...	13	13	713 0 0
February	...	9	9	676 0 0
March	4	9	13	12,10,884 0 0
Total for 1895-96...	26	104	130	20,41,571 0 0
Total for 1894-95...	10	87	97	2,25,445 0 0
Total Estimated Increase...				18,16,126 0 0

146. The following is a list of fires where property to the extent of Rs. 2,000 and upwards was destroyed :—

Date.	Locality.	Description of property destroyed.	Estimated value of property destroyed.
1895.			Rs.
Apr. 6 ...	Middle Colaba	Cotton	2,500
„ 28 ...	Cotton Green	Unpressed bales of Cotton ...	15,000
May 1 ...	Parel	Stacks of empty barrels ...	3,000
„ 20 ...	Cotton Green	Unpressed bales of Cotton ...	5,000
„ 24 ...	DeLisle Road	Cotton	70,000
June 1 ...	Tank Street	Dwelling house and godown ...	32,900
„ 29 ...	Bellasis Road	A shed and dwelling houses ...	6,000
„ 30 ...	Chakla	Dwelling house and godown ...	78,100
July 29 ...	Carnac Road	Shops	6,500
Aug. 10 ...	Carroll Road	Cotton	6,000
Oct. 6 ...	Bhagooria Street	Do.	60,000
Nov. 5 ...	Fergusson Road	Do.	8,000
„ 23 ...	DeLisle Road	Hope Mill	5,00,000
Dec. 6 ...	Kaji Syed Street	Dwelling and godown	15,000
„ 26 ...	Pinjrapole Street	Godown	6,350
„ 27 ...	Mahim	Cotton	3,000
1896.			
Mar. 11 ...	Esplanade Road	A. and N. Co-operative Society.	12,05,000
„ 31 ...	Parel Road...	Cotton	3,000

147. A comparative list of fires during the past five years is given below :—

Year.	Number of fires.	Value of property destroyed.
		Rs.
1891-92	127	75,903
1892-93	137	3,18,599
1893-94	120	6,77,128
1894-95	97	2,25,445
1895-96	130	20,41,571

PUBLIC GARDENS.

148. The Public Gardens have been maintained in fairly good condition as hitherto, and the following is a list of them :—

Victoria Gardens.
Elphinstone Circle Garden.
Falkland Road Garden.
Northbrook Garden.
Sir Cowasjee Jehangir Garden at Mahim.
Bazaar Gate Street Garden.
Garden on the Flats.
Dick's Tank Garden.
Malabar Hill Garden.

149. The work of improving and embellishing the Victoria Gardens is gradually progressing. The laying of water pipes wherever necessary and construction of storm water drains is being proceeded with.

150. Several new plants have been added to the Botanical collection during the year under report. The ornithological and zoological collections have also received additions either by purchase or gift from various sources.

151. Mr. J. M. Doctor, head animal-keeper, who was deputed to Calcutta for instruction under the Superintendent of the Zoological Garden as per Corporation Resolution No. 7561, dated 11th October 1894, returned to Bombay after a sojourn at Calcutta of one year, and took charge of his appointment on the 5th March 1896.

152. The mortality amongst the zoological collection has been considerable.

153. The total number of visitors to the Victoria Gardens during the year under report was 1,438,595, as compared with 1,298,264 for the previous year.

THE VICTORIA AND ALBERT MUSEUM.

154. Additions under the following heads were made from various sources during the year to the collections in the several departments of the Museum. Mammals, birds, reptiles, fishes and crustacea and entomological, anthropological and numismatological divisions.

155. The most important work done in the divisions of Natural History was the preparation of the ento-skeleton of a python—*python molurus*. All the bones have been thoroughly cured and anatomically arranged. It has formed a valuable addition to the osteological collection.

156. All the collections in the different departments of Natural History were examined from time to time and supplied with preservatives where necessary.

157. Books of reference of the value of Rs. 500 were added to the Museum Library.

158. Students from the Colleges and Schools of Bombay and the mofussil visited the museum for the purpose of studying botanical, geological and zoological specimens.

159. The museum was open to the public for 315 days during the year, and the total number of visitors was 749,299, which represents a daily average attendance of a little over 2,378.

160. The number of visitors for the past quinquennial period is given below :—

	No. of Visitors.	Daily Average.
1891-92	... 515,044	1,663
1892-93	... 559,239	1,786
1893-94	... 553,489	1,779
1894-95	... 685,047	2,188
1895-96	... 749,299	2,378

VI.—Public Health.

161. The state of the public health during the year under review showed a great improvement over that of the previous year, there being a decrease in the mortality of 2,249.

162. The total number of deaths from all causes amounted to 25,081, equal to a death-rate of 30·52 per 1,000 of population calculated on a population of 821,764 (census of 1891). The average number of deaths for the previous five years amounted to 25,183, or a death-rate of 30·64 per 1,000 of population.

163. The mortality returns show a decrease in almost all the usual causes of death.

164. The number and causes of deaths in the city during the last five years are shown in the following return :—

RETURN showing the Number of Deaths and the Death-rate per 1,000 of Population from Different Causes during the last Five Years.

YEAR.	Total number of deaths.	Per 1,000 of population.	Cholera.	Per 1,000 of population.	Small-pox.	Per 1,000 of population.	Measles.	Per 1,000 of population.	Fevers.	Per 1,000 of population.	Phthisis.	Per 1,000 of population.	Diseases of the Nervous system.	Per 1,000 of population.	Diseases of the Respiratory system.	Per 1,000 of population.	Diarrhœa.	Per 1,000 of population.	Dysentery.	Per 1,000 of population.	Accidents.	Per 1,000 of population.	Other causes.	Per 1,000 of population.
1891	.847	29·01	164	·20	108	·13	614	·75	6,837	8·32	3,132	3·81	2,447	2·98	4,379	5·33	1,039	1·25	472	·57	364	·44	4,301	5·23
1892	2,.518	32·26	169	·21	541	·66	710	·86	7,751	9·43	3,588	4·30	2,330	2·83	4,601	5·60	1,172	1·43	651	·79	392	·48	4,663	5·67
1893	23,142	28·16	147	·18	201	·24	289	·35	5,844	7·11	3,327	4·05	2,084	2·54	4,551	5·54	1,173	1·43	525	·64	453	·55	4,548	5·53
1894	27,330	33·25	426	·52	531	·64	787	·96	6,458	7·86	3,588	4·37	2,339	2·92	5,385	6·55	1,598	1·94	746	·91	390	·47	5,022	6·11
1895	25,081	30·52	80	·11	270	·33	544	·66	6,404	7·79	3,610	4·39	2,044	2·49	4,565	5·56	1,188	1·45	625	·76	487	·59	5,254	6·39
Total ..	125,918	153·20	996	1·22	1651	2·00	2,944	3·58	33,294	40·51	17,195	20·92	11,304	13·76	23,481	28·58	6,160	7·50	3,019	3·67	2,086	2·53	23,788	28·93
Average of five years	25,183	30·64	199	·24	330	·4	589	·71	6,659	8·10	3,439	4·18	2,261	2·75	4,696	5·71	1,232	1·50	604	·73	417	·50	4,757	5·78

165. The number of deaths according to place of birth was as follows :—

Born in Bombay	11,584
Born elsewhere and unknown ...	13,497
Total ...	25,081

166. The sections of highest mortality were 2nd Nagpada 50·61, Kamatipura 44·85, Tardeo 40·62, Khara Talao 39·24, Oomarkhadi 36·51, Chukla 36·49, Byculla 36·11, Girgaum 35·85, and the sections of lowest mortality were the Water Division 3·02, Fort Southern, 8·60, Esplanade 12·51, Chowpati 14·76, Walkeshwar 16·32, and Mahalakshmi 18·39, per 1,000 of population. The death-rate was highest amongst Negro-Africans, Lingaets, Hindu low caste, Jains, Mussulman, Bhatias and Eurasians, being 541·09, 65·05, 47·22, 45·15, 39·30, 38·27 and 35·56 per 1,000 of population respectively, and lowest amongst Europeans, Parsees, Jews, Native Christians and Brahmins, being 20·81, 22·94, 23·70, 25·51 and 25·72 per 1,000 of population respectively.

167. *Cholera.*—The number of deaths from cholera was 90, or 336 less than in the last year and 112 below the average. The sections of greatest mortality were Parel, Mahim, Tardeo, Mahalakshmi, Tarwadi, Byculla and Mandvie. The highest mortality by class was amongst Eurasians, Hindu low caste, Hindus of other castes, Bhatias, and Native Christians.

168. *Small-pox*—The deaths from small-pox were 270, or 261 below the total of the previous year and 36 less than the average. They occurred chiefly amongst the Negro-Africans, Lingaets, Native Christians, Brahmins and Jains. The mortality was highest in Girgaum, Fanaswadi, Middle and Lower Colaba, Dhobi Talao, Parel and Mazagon.

169. *Measles.*—There were 544 deaths from measles, or 243 less than in the previous year and 28 more than the average. Of these 423 occurred in the first three years of life. The highest mortality occurred amongst Lingaets,

Hindu low caste, Jews, and Eurasians. The death-rate was highest in the districts of Dongri, Girgaum, Kamatipura, Oomarkhari and Tardeo.

170. *Fever.*—There were 6,404 deaths from fevers, or 54 less than in the previous year and 272 less than the average. The death-rate was highest in the districts of Sewri, Khara Talao, Mandvi, Chukla, Girgaum, Mazagon and Dongri. The greatest mortality was amongst Negro-Africans, Lingaits, Jains, Bhatias, Hindu low caste and Brahmins.

171. *Leprosy.*—There were 42 deaths from leprosy, or 9 less than in the previous year and 17 below the average.

172. Of the dead 16,608 were buried, 8,767 were burnt and 1,177 conveyed to the Towers of Silence. This is inclusive of 1,470 still-born.

173. The number of births registered exclusive of still-born was 15,684, or 626 more than in the previous year. Of these 8,150 were males and 7,534 females. Excluding Negro-Africans, the birth-rate was highest amongst Hindu low caste, Jews, Parsees, Lingaits and Eurasians. The sections giving the highest birth-rate were Mahim, Parel, Tardeo, Kamatipura, Chukla and Sion.

174. On an average 4,419·4 men and women and 1,092·51 scavengering and drain carts and 205 night-soil and cesspool carts were at work each day. 3,22,656·69 tons of garbage equal to 883·99 tons a day was collected and removed and disposed of against 321,991·91 tons in 1894. 149,670·62 tons of night-soil equal to 410·05 tons a day was collected and removed against 150,004·24 in 1894. 179·6 miles of covered drains were opened and cleaned against 182·3 in 1894. There were 5 horses and 2,231 bullocks owned by the Municipality, and of these 2 horses and 199 bullocks died and 40 were cast off and sent to the Pinjrapole.

LICENSES.

175. The work of the Licensing Department has continued to show satisfactory results.

176. The total revenue collected on account of license fees during the year under report amounts to Rs. 65,048-8-0 as compared with Rs. 63,914-8-0 for the preceding year, showing an increase of Rs. 1,134-0-0.

177. The following table shows the number of licenses issued and the amounts of fees collected during the past quinquennial period.

Year.	No. of Licenses issued.	Amounts collected.
		Rs. a. p.
1891-92	4,110	46,383 0 0
1892-93	4,833	54,996 8 0
1893-94	5,407	60,507 8 0
1894-95	5,701	63,914 8 0
1895-96	5,880	65,048 8 0

178. The number of prosecutions undertaken during the year under report was 3,931, as compared with 3,162 for the preceding year. The fines inflicted aggregated Rs. 1,929 as against Rs. 1,168 for 1894-95.

MARKETS.

179. A new market at Colaba has been completed and occupied since the 16th May 1895. It has supplied a long felt want, and, judging from the start made, is likely to increase in popularity and custom.

180. The work of the new Bhooleshwar Market has been steadily in progress. The stall holders of the old market have been temporarily accommodated in a building belonging to the Panjrapole Committee.

181. The total revenue from the markets and slaughter-houses for the year was Rs. 4,03,356-12-8, against Rs. 3,92,261-13-0 for the previous year, thus showing an increase of Rs. 11,094-15-8 derived from various items.

182. The following table shows for a quinquennial period the number and class of animals slaughtered at the

Bandora slaughter-houses and in Bombay for public and commissariat consumption, exclusive of the local supply to Bandora :—

Year.	Horned Cattle.	Sheep and Goats.	Pigs.
1891-92 ...	33,094	4,75,049	797
1892-93 ..	34,496	4,73,210	850
1893-94 ...	35,456	4,87,515	954
1894-95 ...	35,614	5,14,753	871
1895-96 ...	38,296	5,21,731	821

183. The appended statement shows the number of animals taken from the Municipal slaughter-houses for private slaughter since 1891-92 :—

Year.	Horned Cattle.	Sheep and Goats.
1891-92	211	38,776
1892-93	338	36,494
1893-94	328	33,167
1894-95	250	32,643
1895-96	323	30,731

184. The bulk of unwholesome food destroyed throughout the year consisted chiefly of beef, mutton, fish, fruits and vegetables, and amounted to over 56 tons as against 28 tons for the previous year.

185. The supply of beef, mutton, fruit and vegetables was fair. The supply of mangoes and apples was considerably less than that of the preceding year, while the pomegranate supply was an abundant one.

186 The number of convictions for offences defined under the Presidency Magistrates Act and the Municipal

Act and By-laws was 109 against 77 during the preceding year.

187. The fines inflicted amounted to Rs. 454-12-0, as compared with 264 in the year preceding.

STREET ACCIDENTS.

188. The number of persons injured and killed in the public streets was as follows :—

Injured	... 523
Killed	... 28

189. The major part of these accidents occurred in the streets and roads mentioned below :—

Hornby Road.	Thakurdwar Road.
Frere Road.	Bhuleshwar Road.
Carnac Road.	Kika Street.
Queen's Road.	Girgam Back Road.
Dongree Street.	Grant Road.
Musjid Bunder Road.	Duncan Road.
Abdool Rahiman Street.	Falkland Road.
Paidowni Road.	Trimbuck Parashram Street.
Bhendi Bazaar Road.	Charni Road.
Mazagon Road.	Parel Road.
Kalkadevi Road.	Ripon Road.
Shaik Memon Street.	Haines Road.
Girgam Road.	

190. The accidents recorded on these roads, respectively, vary from 6 to 28.

191. The number of street accidents for the last quinquennial period is as follows :—

Year.	No. Injured.	No. Killed.	Total.
1891-92	510	30	540
1892-93	600	24	624
1893-94	620	19	639
1894-95	569	22	591
1895-96	523	28	551

VII.—Education.

192. The actual receipts of and expenditure on Municipal Primary Schools for the year 1895-96 were as follows :—

No.	Receipts.	Amount.	No.	Expenditure.	Amount.
		Rs. a. p.			Rs. a. p.
1	Balance on the 1st April 1895	42,059 7 5*	1	A.—SCHOOLS. Head Masters and Teachers	54,137 11 3

Joint Schools Committee's Establishment..	„	4,800
Total	Rs.	89,435

P. C. H. SNOW,
Municipal Commissioner
for the City of Bombay.

FINANCIAL.

REPORT OF MR. SORABJI NAVAROJI COOPER, Chief Accountant, as forwarded with his letter No. 2037 of 13th August 1896.

It will be observed from the following Statement A that the income, with two exceptions, exceeded the estimate under every head of revenue. Deducting the falling off of Rs. 244-10-7 under two heads from the gross excess revenue of Rs. 5,27,654-15-0, the net increase in revenue over the Budget Estimate of Rs. 62,34,300 was Rs. 5,27,410-4-5. This net surplus revenue included Rs. 619-5-7 on account of excess interest on Investments of Sinking, Worn-out water mains renewal and Premia, &c., funds, and Rs. 97,748-13-1, being the net premia on the second instalment of Rs. 10¼ lakhs of the 23¼ lakhs loan raised in the past year. The net premia and the excess interest realizations amounting to Rs. 98,368-2-8 having been invested appear on the expenditure side in Statement C, and consequently cannot be treated as real surplus. The actual available net surplus revenue thus amounted to Rs. 4,29,042-1-9, of which Rs. 1,25,000 were anticipated at the time of framing the Budget for 1896-97 in October 1895 and Rs. 1,35,000 while submitting the revised estimates in December 1895, or Rs. 2,60,000 in all, of which Rs. 2,25,000 have already been appropriated in the current year's Budget, leaving Rs. 2,04,042-1-9 for further appropriation.

A.

STATEMENT showing the Net Receipts during the Financial Year 1895-96 *from all Sources contrasted with the Budget Estimate.*

* Includes Rs. 2,834-2-2 received on Water Works portion of the Net Premia, &c., Fund Investment.
† Includes Rs. 16,736-8-1 received on the Water Works portion of the Loan.

I now proceed to relate the causes of the increases or decreases which occurred under the different items of revenue.

General Tax..	..Rs.	11,437 12	7
Halalkhor Tax	.. „	25,712 2	9
	Rs.	37,149 15	4
Water Tax & other Miscellaneous water Revenue ..	.. „	1,07,895 4	7
	Rs.	1,45,045 3	11

In consequence of the erection of 495 new buildings, allowing for those demolished, enlargement of 323 properties and enhancement in the valuation of different buildings, increased special halalkhor service and larger consumption of water through meters, we derived an increase of Rs. 1,45,045-3-11 under property taxes as detailed in the margin.

Wheel Tax and Tolls.—The increase of Rs. 15,524-11-3 was chiefly derived from private conveyances owing to an increase of about 100 four-wheeled carriages, 144 vehicles drawn or impelled otherwise than by horses, &c., and 158 horses and from Toll fees, the estimate for which was rather low, being based on the actuals of 1893-94.

Town Duties realized Rs. 1,23,850-15-10 more than the estimate as explained in detail at page 95.

Licenses.—Owing to larger number of licenses issued we obtained Rs. 5,048-8-0 more under (*a*) Dangerous and offensive trades and Rs. 3,156-8-0 more under (*c*) Land conveyance, music, &c., licenses than the respective estimates. There was, however, a decrease of Rs. 220 in the yield under (*b*) Streets and Buildings, (Plumbers and Surveyors.)

The receipts on account of *Tobacco Duties* recovered through the Collector of Customs amounted to Rs. 30,474-14-5 more than that officer's estimate, which was based on the actuals of the three preceding years. This large increase was, I understand, derived partly from increased imports and partly on account of more satisfactory preventive arrangements having been made at the railway stations since the employment of 26 additional peons was sanctioned in 1895.

The increase of Rs. 13,543-2-4 under Market Receipts was obtained chiefly from Slaughter, Squatters' and License fees.

Rs. 1,211-15-11 were realized in excess of the estimated receipts from sale of plants, flowers, fruits, &c., Victoria Gardens.

Owing to the extension of the double track tramway lines from Junction of Falkland and Duncan Roads along portion of Duncan Road to Two Tanks and from Junction of Grant and Falkland Roads to Junction of Falkland and Foras Roads and of a single track line between Junction of Carnac Road and Nagdevi Street along portions of Nagdevi Street and Musjid Road, the rent recovered from the Tramway Co. was Rs. 1,548-10-2 more than the estimate.

The increase of Rs. 1,482-0-6 under Miscellaneous Fines was entirely obtained from larger departmental fines inflicted by the Health Officer on halalkhors.

The sale of land at Jijibhoy Dadabhoy Street, Barber Lane and Currey Road, and the recovery of Rs. 5,000 from the Britannia Mills for construction of a road on Tulsi pipe line from Fergusson Road to Haines Road as per Corporation's Resolution No. 4241, dated 31st July 1893, and the commission charged on private works wholly account for the increase of Rs. 37,096-7-2 under Miscellaneous Receipts.

Rs. 9,060-10-3 were received in excess of our anticipations from Miscellaneous Fees of the Executive Engineer (Projecting Verandahs, Balconies, Rewas, &c., Opening Roads, Scaffoldings, Occupying Roads) and Health Department (Removing and Skinning Dead Animals).

The amount of pay and wages forfeited mostly by the different Municipal Establishments and the Engineer's Department labourers, &c., by not claiming them within the limitation period, was Rs. 391-13-2 more than the round sum of Rs. 3,000 entered as Miscellaneous Savings in the Budget.

Several employés having been admitted by the Standing Committee to the Pension Fund as provided for under the new rules sanctioned by the Corporation and Government under the Committee's Resolution Nos. 101 and 4332, dated 3rd April 1895 and 31st July 1895, respectively, the contributions for several years back having been recovered from some of them, principally Messrs. H. W. Watson, Dewoo Purdesh, Dorabji Hirjibhai, and peons and naiques of the Market Establishment, &c., resulted in a surplus receipt of Rs. 5,704-13-9 under Contribution from Municipal Servants towards Pension, &c., Fund.

Interest and Profit realizations on our surplus loan and other Balances amounted to Rs. 15,613-1-6 more than our expectations as detailed below :—

Interest realized on Investments :—

	Rs.	a.	p.
Rs. 26,94,000 Drainage Loan Deposit	1,697	12	0
44 Lakhs Sanitary Works Loan Deposit	13,948	8	0
7 do. do. do.	6,020	4	8
12 Lakhs Drainage and Water Works Loan Deposit	8,414	0	0
Rs. 10,08,500 Miscellaneous Works Loan Deposit	17,840	8	8
„ 2,48,000 Agripada House Sullage Water Connections Loan Deposit	1,163	15	8
„ 8 lakhs Municipal Building Loan Deposit	3,376	0	8
„ 4½ lakhs Fire Brigade Quarters and Stations Loan Deposit	1,546	5	5
23¾ Lakhs Drainage and other Works Loan Deposit	12,305	7	7
Surplus Cash Deposit	23,725	7	10
Total Interest Rs.	1,60,038	6	6
Less—Budget provision .. .. „	1,50,000	0	0
Excess Interest.. Rs.	10,038	6	6
Carried over.. Rs.	10,038	6	6

Brought forward.. Rs. 10,038 6 6

Add—Profit realized on Investments :—

	Amount of 3½ % Govt. Paper sold.	Purchase. Date.	Purchase. Rate.	Sale. Date.	Sale. Rate.	Profit realized.

							5,574	11 0
					Total Rs.		15,613	1 6

The excess yield of over Rs. 10,000 under Interest was chiefly due to the unexpended balance of 6 lakhs of the second instalment of 10¼ lakhs of the 23¼ lakhs loan raised in July 1895 having been partly lodged at interest at the local banks and partly invested in Government paper in September 1895 and January 1896. By the sale of 3½% Government paper of Rs. 1,93,500 of Surplus Cash Account and Rs. 1,88,000 of the Fire Brigade Loan Fund we realized a profit of Rs. 5,574-11-0.

On the Sale of Stores to contractors and others we realized a net profit of Rs. 10,560-3-0.

The Sale proceeds of Unserviceable Articles of tools, plant, &c., amounted to Rs. 2,982-10-11.

We derived a net profit of Rs. 6,990-6-3 on the works turned out at the Municipal Shops during the past year as explained in detail at pages 120 and 121.

The increased receipts of Rs. 619-5-7 on Interest realizations of Sinking, Water mains renewal and Net Premia funds, as also the net premia of Rs. 97,748-13-1 received on the second instalment of 10¼ lakhs of the 23¼ lakhs Loan raised in July 1895 having been invested and shown as expenditure in Statement C, the total of these items, Rs. 98,368-2-8, did not form part of the actual available surplus, though the different items appeared as receipts in excess of the Budget estimates.

It will be seen from the following Statement B, that Rs. 63,55,166 were sanctioned by the Corporation for expenditure during the past year under the provisions of section 129 of the Municipal Act.

Supplementary grants were from time to time sanctioned by the Corporation for converting the entire gas lamps of the city into incandescent lights with Welsbach burners, extra police charges, water main near Dhun Mills, a masonry channel for conveyance of sullage from the head of Elphinstone Road, converting nightsoil depôts at Bhungi Mohlla and Haines Road into receiving depôts, extra halalkhors, removing and replacing filter materials, Malabar Hill reservoir, charges for 1894-95, extra charges for repairs to roads opened for drain cleaning purposes, compassionate allowance to Mr. K. N. Bulsara's widow, water main Ballard Road, and for other sundry purposes. These amounted to Rs. 4,32,779-1-7, which, together with the investments of the net premia received on the second instalment of 10¼ lakhs of the 23¼ lakhs loan and of the extra interest realizations of Sinking, Worn-out mains renewal, &c., funds amounting to Rs. 98,368-2-8, raised the total of the additional grants to Rs. 5,31,147-4-3.

Unexpended balance of grants for 1893-94 and previous years were re-sanctioned by the Corporation at Rs. 97,970-15-8.

The lapsed grants for 1894-95 amounting to Rs. 3,86,246-9-0 were renewed by the Standing Committee under the provisions of section 132.

Transfers from one head to another were sanctioned by the Standing Committee under section 133, aggregating Rs. 15,122-12-4.

The original grants supplemented and modified as above finally reached Rs. 73,70,530-12-11, as shown in the last column of Statement B :—

B.

CONTRASTED STATEMENT showing the Original Budget Grants for 1895-96, Additions, Transfers and the Grants as amended.

Particulars.	Original Grants sanctioned by the Corporation as per Section 129.	Additional Grants sanctioned by the Corporation under Section 131 (1).	Additional Grants sanctioned by the Corporation in respect of unexpended balances of grants for 1893-94 and previous years required for expenditure in 1895-96.	Lapsed Grants for 1894-95 renewed by the Standing Committee under Section 132.	Add Transfers as per Section 133 (1) b & c and (2).	Deduct Transfers as per Section 133 (1) a & c.	Amended Grants.

* Exclusive of Rs. 18,060-7-1 paid on account of interest on the 4½ Lakhs Fire Brigade Loan out of the Fire Brigade grant.

∫ Of this, Rs. 11,30,722-0-6 are chargeable to Water Works Account.

g Of this, Rs. 1,56,824-1-8 are chargeable to Water Works Account.

h Exclusive of Rs. 8,100 on account of Sinking Fund instalment on the 4½ Lakhs Fire Brigade Loan.

i Chargeable to Water Works Account.

j Of this, Rs.2,834-2-2 are chargeable to ditto.

k Of this Rs. 16,736-8-1 are chargeable to ditto.

† Excluding Rs.1,60,000 paid out of the invested Sinking Fund on account of Debentures of the 44 lakhs Sanitary Works Loan repayable on 1st July 1895.

From the preceding Statement C, it will be seen that out of the total amended grants of Rs. 73,70,530-12-11, Rs. 6,68,014-13-6 remained unexpended at the close of the past year, of which Rs. 3,70,265-8-3 will have to be renewed, with the sanction of the Standing Committee under section 132 of the Municipal Act, for payment of liabilities actually incurred and remaining unpaid and for the completion of works already commenced or not taken in hand, and Rs. 1,09,782-11-1 will require the sanction of the Corporation to meet charges on account of 1894-95 and previous years, thus leaving a net saving of Rs. 1,87,966-10-2, of which Rs. 30,000 having been anticipated in October last have been appropriated in the current year's Budget; the remainder Rs. 1,57,966-10-2 will be available for future appropriation.

I have given below in detail the various reasons of the unexpended balances of the different Budget grants and shown how much of such balances will be required for expenditure during the current year and what amount should be treated as the actual saving under each head.

General Superintendence.—Rs. 6,160-10-0 remained unexpended under this head, of which Rs. 714-9-10 will be required during the current year to meet unpaid printing and binding charges of the Standing Committee and Corporation and Commissioner's Establishments. The balance of Rs. 5,446-0-2 was actually saved on Fees of members of the Standing Committee, Standing Committee and Corporation's and Commissioner's Contingencies, the Municipal Commissioner's pay and that of his personal and General Office Establishments, and on Chief Accountant's Establishment and Contingencies.

Assessment and Collection Department.—Of the aggregate saving of Rs. 10,867-6-0 under this head, Rs. 367-8-0 will have to be renewed for rent of telephone connections for the second half year ending 31st March 1896 and pay of a ward clerk on sick leave, and Rs. 2,948-13-5 for commission payable to the Port Trustees and the G. I. P. Railway Company for collection of Town Duties. The actual saving was consequently Rs. 7,551-0-7, which was principally effected on Assessor and Collector's Ward Establishment, Contingent and Receipt Stamps Grants, Commission on Town Duty Collection by the Railway Companies and Summons Fees (License Department).

Fire Brigade.—Rs. 3,382-12-4 of the total saving of Rs. 8,318-1-7 will have to be renewed for rent of Mahim Station and of telephone connections and for unpaid interest on the Fire Brigade 4½ lakhs loan debentures. Thus the sum actually saved under this head on the provisions for Establishment, Rent, Repairs, Feed, Contingencies and Purchase of Stock was Rs. 4,935-5-3.

Maintenance of Public Gardens.—The unexpended balance of the grants under this head amounted to Rs. 30,389-15-10, of which

Rs. 27,060-9-0 on account of new works and extensions of the Victoria Gardens will have to be renewed partly to carry to the credit of the Garden Fund the balances of grants for and prior to 1894-95 and partly for payment of labour and other charges for the past year. The remainder Rs. 3,329-6-10 was a true saving. Rs. 1,331-5-7 thereof was effected on the Establishment, Stores, Seeds, Plants, Repairs, Water Supply, Zoological Collection, &c., provisions of the Victoria Gardens, and Rs. 1,998-1-3 on the Stores, Repairs and Water-supply Grants of the other gardens in the City.

Public Works (Engineer's) Department. I.—General Supervision and Miscellaneous Duties.—Rs. 289-9-2 were saved on the Office Establishment and Contingent provisions. Rs. 5-9-5 will, however, have to be renewed for a printing bill which was not received in this office for payment until 15th June 1896.

II.—Drainage.—A. Miscellaneous Drainage.—Of the unexpended balance of Rs. 9,163-10-5 on Establishment, Inspection and Cleaning and Repairs, Altering Miscellaneous Drains and Gutters, &c., Contingencies, Water-supply and Telephonic Connections Grants, Rs. 2,647-10-6 will have to be renewed for the cleaning of the open main drain from the Bellasis Road Pipe Depôt to the Love Grove Sluice-gate, repairing and altering sundry drains sanctioned during the past year, rent for telephonic connection for the second half year ending 31st March last, and charges for water supplied at the Bellasis Bridge Pipe Depôt during the last quarter of 1895.

B. Maintenance of Love Grove Pumping Station.—Rs. 1,691-12-4 were saved chiefly on the provisions for Establishment, Coal, Repairs, Water-supply and Telephonic Connection, of which only Rs. 87-8-0 will be required in 1896-97 for payment of rent of telephonic connection for the second half-year ending 31st March 1896.

C. Maintenance of Sluices.—Rs. 250-9-1 were principally saved on Establishment and Materials, &c., grants.

D. Maintenance of Pumping Station, Colaba (Shone System).—There accrued a saving of Rs. 7,477-1-2 owing to the Establishment, Coal, Repairs, Contingent, Telephone and Water-Supply grants not having been fully expended, the station having commenced work partially from May 1895 and being in full working order from November 1895. Rs. 167-14-4 for unpaid telephone rent and water-supply, &c., charges will have to be renewed.

The aggregate unexpended balances amounted to Rs. 18,583-1-0, from which, if Rs. 2,903-0-10 to be renewed during the current year for payment of past year's charges were deducted, the total actual savings under Drainage would amount to Rs. 15,680-0-2.

III.—Water Works.—There remained Rs. 22,915-0-1 unexpended chiefly on the Establishment, Materials and Tools and Plant, Contingent, Repairs, the Tansa Main Embankment and Diversion of the Gibbs Road Main grants. Of this Rs. 6,261-11-0 will have to be renewed during the current year for repairing embankment of the Tansa Main and sundry unpaid store, establishment and telephone rent charges, leaving a net saving of Rs. 16,653-5-1. More than half of this saving was derived on Establishment in consequence of the full strength of painters, linemen, labourers, &c., not having been employed, to full schedule pay not having been allowed to some of the sub-inspectors, artizans, labourers, &c., to the Maintenance Superintendent having proceeded on six months' leave on half pay from 30th November 1895 and to several other employés having been allowed leave on lower pay or without pay. The remainder of the saving was on account of the diversion of the Gibbs Road Main, contingencies and materials.

. If to the above unexpended balance of Rs. 22,915-0-1, Rs. 24,773-7-7 and Rs. 60,684-5-9 on account of the balances of the Water Works New Works and Debt Grants, respectively, were added, the total unexpended balances of all Water Works items would amount to Rs. 1,08,372-13-5, and deducting therefrom Rs. 6,261-11-0, Rs. 24,233-11-11 and Rs. 59,900, required for renewals during the current year, as shown above and at pages 85 and 88, the real savings on all the Water Works items amounted to Rs. 17,977-6-6.

IV.—Streets and Buildings.—A. Inspection and Supervision.—Of the unexpended balance of Rs. 711-15-0 on Establishment and Contingencies, Rs. 131-0-6 will be required to be renewed for printing and binding charges and the pay of a lascar who was on leave; the real saving was thus Rs. 580-14-6.

B. Public Lighting.—Owing to the conversion of 2,326 gas lamps into incandescent lamps with Welsbach burners during the past year, there was a saving of Rs. 23,570-7-7 on Gas Lighting and Contingencies, of which only the small sum of Rs. 111-10-0 will have to be renewed for certain lamps which were sanctioned to be shifted in the past year. There was also a saving of Rs. 3,139-12-4 on Kerosine Oil Lighting and Contingencies, owing partly to our having a larger stock of unused kerosine oil at the beginning of the past year than that at the end, and partly to the full contingent provision not having been expended. Thus the total saving under Public Lighting was Rs. 26,710-3-11.

C. Road Watering.—Nearly the whole, *i.e.*, Rs. 7,275, of the unexpended balance of Rs. 7,505-14-0 will have to be renewed for 200 hydrants ordered out from England during the past year.

D. Road Repairs and Maintenance.—The unexpended balance chiefly on Materials, Paving Footpaths, and Repairs to Chowkies grants was Rs. 13,280-0-8. Rs. 9,152-3-8 will, however, have to be renewed for footpath pavements and charges for blister steel, kerbstones, &c., supplied during the past year ; the net saving would thus be reduced to Rs. 4,127-13-0.

E. Street Improvements.—Rs. 5,405-7-9 of the balance of Rs. 8759-2-2 of land, &c., compensation and the entire balance of Rs. 1,500-14-7 for purchase of Tin Plates and Street Boards will have to be renewed during the current year.

Deducting Rs. 23,576-4-6 required for renewal on account of different services for streets from the total unexpended balance of Rs. 58,468-2-4, there remained a net saving of Rs. 34,891-13-10 on the Streets and Buildings Branch.

V.—Special Provision for Cleaning, Lighting and Repairing Port Trust Wharves Roads.—Rs. 200 were saved on this provision.

The total unexpended balances of the four different branches of the Engineer's Department, including the special provision for Wharves Roads, aggregated Rs. 1,00,455-12-7. Of this Rs. 32,746-9-9 will have to be renewed and the balance Rs. 67,709-2-10 was the net saving.

New Works.—Of the unexpended balance of Rs. 2,28,163-15-10, Rs. 1,84,104-5-0 will be required in 1896-97 for completing works that remained unfinished or were not undertaken during the past year. Hence the saving on completed works or works not to be executed was Rs. 44,059-10-10 as detailed below :—

	Rs. a. p.	Rs. a. p.
Amount required for payment of bills for completed works and for the completion of works in progress—		
Water works	24,233 11 11	
Other Municipal works	†1,29,098 10 7	
		1,53,332 6 6

(Municipal Rs. ‡43,519-15-2 + Water Works Rs.	539-11-8)	44,059 10 10
(„ „ 2,03,390-8-3 + „ „	24,773-7-7)	Rs.2,28,163 15 10

Public Health.—I. General Supervision.—Rs. 1,554-13-7 remained unexpended on the Establishment and Contingent provisions, of which Rs. 399-10-0 will have to be renewed to meet a peon's pay and cost of fixing Wallace's Pail Depôts at the Girgaum and Kamatipura Night-soil Depôts and of wooden bars at the Mahaluxmi Level Crossing Gate, B. B. and C. I. Railway.

II. Conservancy Branch.—From the large unexpended balance of Rs. 35,822-4-2 only Rs. 2,714-5-3 will have to be renewed for payment of scavengering charges due to the Tramway Co. and for cost of advertisement and construction of a drain cart and repairs to carts, &c. The net saving of Rs. 33,107-14-11 was obtained as under :—

	Rs. a. p.	Rs. a. p.

Net Savings Rs...		33,107 14 11

III. Markets and Slaughter Houses.—A saving of Rs. 7,868-3-0 was derived principally under Labour, Lighting, Meat Carriage, Contingencies, Repairs and Water Supply.

IV. Registration of Births and Deaths.—The saving of Rs. 2,006-7-5 was mostly due to the re-arrangement of the pay of the karkoons according to the results of their work, and small balances remained unexpended under Contingencies, Establishment and Lighting Sonapur Burning Ground. Rs. 300 of the above balance will be required during the current year to meet pay of an extra clerk sanctioned for preparing mortality returns, as also Rs. 2-0-5 for gas for February 1896 for lighting the Sonapur Burning Ground.

V. Cemeteries.—Rs. 851-5-3 remained unexpended, of which Rs. 62-9-2 will be required for charges for shoeing horses and repairs to hearses. The remainder was a saving chiefly due to one driver and one horse being below the budgetted strength and to the contingent provision not being fully spent.

VI to XI. Laboratory, Mahaluxmi Dhobiwada, Infectious Diseases, Milch Cattle Stables and Rooms, Tank Conservancy and Rustomji Jamsetji Dharamsala, Falkland Road.—Small savings accrued under these heads aggregating Rs. 1,384-10-6, of which only Rs. 2-9-8 will be required during the current year for payment of gas charges for the Laboratory and hire of a gas meter affixed to the disinfecting chamber, Frere Road.

XII. Vaccination Contribution to Government.—Rs. 2,148-0-10 remained unexpended, chiefly under Contingencies.

The total unexpended balances of the different branches of the Health Department aggregated Rs. 51,635-12-9. Of this Rs. 20,000 were taken credit for in the past year's Budget, and Rs. 3,481-2-6 will have to be renewed for payments to be made during the current year on account of liabilities, &c., incurred in 1895-96. The net saving of the Health Department was consequently Rs. 28,154-10-3.

Police Charges.—The full grant of 5 lakhs was paid to Government through the Accountant-General. The saving of Rs. 26,234-1-0 is the unexpended balance for 1894-95 renewed during the past year for payment to Government on the amount of contribution payable by the Municipality for past years being settled. This amount will again have to be renewed during the current year, as the question of the arrears of Municipal contribution for Police charges has not yet been finally settled between Government and the Corporation.

Education.—Victoria and Albert Museum.—The saving of Rs. 944-5-4 was effected chiefly on Collection of Artware, &c., grants, of which Rs. 6-10-3 will have to be renewed for an unadjusted water tax bill for the last quarter of 1895-96.

Joint Schools' Committee's Establishment.—Rs. 10-7-1 were saved on the Office Establishment and Contingent grants.

The total savings on Education were Rs. 954-12-5, or, allowing for Rs. 6-10-3 to be renewed, the net saving was Rs. 948-2-2.

Hospitals.—Gokuldas Tejpal Hospital.—Government refunded to us on 1st October 1895 Rs. 1,737-12-1 on account of the unexpended balance of our contribution for the year 1894-95, out of which we defrayed Rs. 1,000 for pay of 4 nurses and the cost of their uniform, thus leaving a net saving of Rs. 737-12-1.

Homeless Leper Asylum at Matunga.—The small saving of Rs. 2-1-7 was due to there being only an average number $299\frac{14}{31}$ patients during March 1895 instead of the full number 300.

The total savings on Hospitals was Rs. 739-13-8.

Miscellaneous.—The unexpended balances under this head amounted to Rs. 6,556-14-7, of which Rs. 373-3-10 will have to be renewed for unpaid pensions and compassionate allowances, Rs. 854-12-0 for sundry works, &c., sanctioned out of the Commissioner's Discretional grant for the past year, and Rs. 2,227-7-7 for cost of procuring air analysis from an expert and of printing and other charges to be incurred in carrying out the enquiry into the question of Disposal of town sweepings. The balance Rs. 3,101-7-2 was a real saving derived

under Pensions, &c., Discretional Contingencies, Auditors' Allowance (in consequence of the death of our old and respected Auditor, Mr. Ardeshir Framji Moos, on 8th November 1895, and the new Auditor, Mr. Adam Smith, having joined in his place on 4th December 1895) and Election Expenses.

Municipal Debt.—The unexpended balance amounted to Rs. 2,17,512-14-8, of which unpaid interest amounting to Rs. 1,94,045-10-10, as per Statements Nos. *1-B* to *1-N*, and Rs. 1,500 on account of unpaid debentures of 1878, will have to be renewed, leaving a net saving of Rs. 21,967-3-10 :—

Investments.—The saving of Rs. 24-10-7 was entirely due to a round sum of Rs. 990 having been entered in the Budget as interest expected to be received on Fire Insurance Fund Investments and the actual net sum realized being Rs. 965-5-5.

The principal heads under which the total balance of Rs. 6,68,014-13-6 remained unexpended as detailed in Statement C, are given in the following table. The sums required to be renewed for expenditure in the current year and the net actual savings are also shown opposite the respective heads :—

The estimated and actual opening balance, income and expenditure of the past year have been contrasted in the following statement:—

Particulars.	Estimate.	Actuals.	Better than Estimate.
	Rs. a. p.	Rs. a. p.	Rs. a. p.
Opening Balance	18,25,000 0 0	*27,98,839 15 0	9,73,839 15 0
Revenue	62,34,300 0 0	67,61,710 4 5	5,27,410 4 5
	80,59,300 0 0		
Expenditure—			
Original Estimate	63,55,166 0 0		
Subsequent Estimate as per Statement B	73,70,530 12 11	67,02,515 15 5	6,68,014 13 6

Rs. 4,84,217-8-8 on account of the Lapsed grants for 1894-95 and previous years included in the large Surplus Opening Balance were renewed during the past year, and the balance of Rs. 4,89,622 was appropriated in the current year.

* Exclusive of Rs. 9,14,283-10-7 advanced for Reserve Stock.

Of the surplus income, Rs. 98,368-2-8 on account of Premia and Interest realizations have been invested and appear also as expenditure. Thus the balance, Rs. 4,29,042-1-9, was the net surplus revenue, of which Rs. 2,25,000 were appropriated in the current year's Budget (Rs. 1,25,000 having been anticipated in October 1895 while framing the draft budget and Rs. 1,00,000 out of Rs. 1,35,000 as per revised estimates framed in December 1895). Rs. 2,04,042-1-9, therefore, remained available at the close of the past year for further appropriation.

The saving of Rs. 6,68,014-13-6 includes Rs. 4,80,048-3-4 on account of lapsed grants for 1895-96 and previous years. The net saving was thus Rs. 1,87,966-10-2, of which Rs. 30,000 have been appropriated in the current year's Budget, leaving over Rs. 1½ lakhs available for further appropriation.

The following statement gives what actual surplus balance would be available for further appropriation out of the large sums referred to above, allowing for liabilities already incurred and appropriations sanctioned up to the close of the year :—

	Rs.	a.	p.	Rs.	a.	p.

To be renewed for unpaid charges for and prior to 1895-96		4,80,048 8 4	
			32,46,707 13 0
			Net Unappropriated Surplus...Rs. 4,25,610 1 7

Against this net surplus of Rs. 4,25,610-1-7, additional grants sanctioned up to date amount to Rs. 1,21,693-14-1. The balance of over 3 lakhs will prove very useful in meeting payments to be made for arrears Police charges and for making good the damage caused to the Tansa Pipe line by the recent excessive rainfall.

APPENDICES.

Nos. 1-A and B.—It will be seen from these statements that Rs. 1,500 remain unredeemed owing to 3 bonds, one redeemable in 1890, one in 1893 and one in 1895, not having been presented for repayment by the holders, and that the outstanding interest on 31st March 1896 was Rs. 21,562-8-0 against Rs. 19,350 at the close of 1894-95.

Nos. 1-C and D.—The former statement shows the amount of interest paid from the beginning of the loan to the end of the past year. It also gives the amount of principal paid off and the sum invested as Sinking Fund on account of the 44 lakhs Sanitary Works Loan. The latter statement shows that the outstanding balance on account of interest was reduced from Rs. 26,262-8-0 on 31st March 1895 to Rs. 24,612-8-0 at the end of last year.

Nos. 1-E to 1-N give the amount of Sinking Fund including interest accumulations and of the unpaid interest at the close of 1895-96 on account of the various 5 and 4 per cent. Municipal Loans raised from the public.

No. 2.—This is the usual Town Duty Statement showing the various articles on which duty was levied at the time of import under the provisions of section 192 (1) of the Municipal Act and also the Refunds allowed thereon on their export as provided for in section 195 (1).

I have contrasted below the Balances, Revenue and Refunds, during the past year with those of the preceding year :—

	1894-95.		1895-96.

Refunds	7,33,646		7,76,856	
Closing Balance	13,067		7,028	
		7,46,713		7,83,884
Net Revenue		8,88,542		9,10,850
Less—Cost of Collection, &c.		59,237		52,757
Net Revenue after payment of Collection Charges	Rs.	8,29,305	Rs.	8,58,093

The gross Collections for the past year having been estimated at Rs. 16,29,000 and the refunds at Rs. 8,42,000, a net income from this source of Rs. 7,87,000 was provided for in the Budget. The total realizations, however, were Rs. 52,667 more and the refunds Rs. 65,144 less than the respective estimates, and the closing balance was Rs. 6,039 less than that at the beginning of the year. Thus the net yield was Rs. 1,23,850 more than the anticipated figure.

The gross income from the duties levied during the past year has been contrasted in the margin with that of the preceding year. Except the trifling falling off of Rs. 10 under Flour, there was an increase under every item aggregating in all Rs. 68,512, owing mostly to larger imports during the year.

No. 3 is the Cash account comprising the entire cash transactions, including adjustments, and showing the total Receipts and Disbursements of the past year, together with advances, deposits, investments, &c. It will be seen therefrom that the ordinary income of the year exceeded the expenditure by Rs. 5,77,237-0-5 as detailed in the margin.

Income	Rs.	67,61,710	4 5
Expenditure	„	61,84,473	4 0
Surplus...	Rs.	5,77,237	0 5

This surplus was more than sufficient to cover Rs. 5,18,042-11-5 paid for reduction of debt and the investment of Sinking, Insurance, Water Mains Renewal and Premia, &c., Funds.

LOAN WORKS.

No expenditure was incurred on Drainage Works sanctioned to be executed out of the 17 lakhs Drainage Loan of 1878 and the Rs. 8,12,000 and Rs. 20,88,000, two of the three Sanitary Works Loans aggregating 44 lakhs, and Rs. 10,08,500 Miscellaneous Works Loan.

Rs. 2,135-4-6 were expended on House Connections, which brought up the total expenditure on Drainage Works sanctioned to be executed out of the 15 lakhs loan (one of the three Sanitary Works Loans aggregating Rs. 44 lakhs) to Rs. 6,80,692-1-10 as detailed below :—

The advances made from surplus balances pending raising of a loan or sanction from savings on other loans for laying 27″ and 24″ mains from Malabar Hill Reservoir to Frere Fountain and for connections at Chinchpokli between Tansa and Vehar mains have been adjusted during the current year, as the cost of these works has been sanctioned

by the Corporation to be met out of savings on other loans. The remaining advance on account of Major Tulloch's fee for submitting a report on the best means of filtration of the Tulsi water-supply in Bombay will be adjusted as soon as the additional filter-beds for the Malabar Hill Reservoir, proposed to be carried out at a cost of Rs. 1,86,000, are sanctioned by the Corporation.

The cost of Roads sanctioned to be made out of the Rs. 10,08,500 Miscellaneous Works Loan aggregated Rs. 52,141-8-2, including Rs. 24,065-9-0 spent during last year on account of land acquired for roads through Nowroji Hill :—

Against Rs. 4,40,848 provided for the construction of the Wari Bunder Road in the 15¾ lakhs Sewerage, Wari Bunder, &c., Roads, and other Works Loan, the expenditure in the past year was Rs. 8,321-8-0. The Port Trust contribution for the road, Rs. 1,56,500, was paid to us on 5th February 1896.

Rs. 1,64,000 were paid before the close of 1895-96 for value of Port Trust ground purchased by the Municipality for a burial ground for the Mahomedan and Beni-Israel communities.

Health Department Bigaris' chawl at Bori Bunder and stables in F and G wards along with the stables at Girgaum and Halalkor chawls in F and G wards were originally sanctioned by the Corporation to be constructed out of the 25¼ lakhs Loan, but Government having declined to sanction these works pending the submission of a complete scheme for chawls and stables for the Health Department throughout the City, the amount of the Loan was reduced to 23¼ lakhs, and the expenditure for the following works, which were sanctioned to be undertaken out of loan or other balances pending the sanction of Government to the raising of the above loan and which appeared in the past and current years' accounts as a debit against that Loan, has been omitted from the expenditure statement of the said Loan and shown as met by advances from surplus balances :—

	Sanctioned Grant.	Amount expended up to 31st March 1895.	Amount expended during 1895-96.	Total.

The total expenditure on the different Fire Brigade Stations constructed out of the 4½ lakhs Loan reached Rs. 3,23,384-8-9 with Rs. 35,293 spent in the past year on the Babula and Sankli Tanks and other stations as per following statement :—

* Includes Rs. 28,060 advanced from surplus balances pending the inclusion of the item in a new loan as per Corporation's Resolution No. 1200, dated 9th May 1892, to meet the balance of the cost of the site for the Market. This sum having subsequently been sanctioned by the Corporation in their Resolution No. 1291A dated 6th February 1896, to be met out of savings effected on different Loan Works has been adjusted in the accounts for 1896-97.

* In 1891-92 only establishment charges amounting to Rs. 1,756-9-10 were incurred in preparing detailed plans and estimates.

The advances to Municipal Officers stood at Rs. 6,780-6-6 on 31st March 1896 against Rs. 7,281-5-1 at the end of the preceding year.

The Private and Departmental Works outstandings at the close of the past year amounted to Rs. 34,788-14-11 against Rs. 11,359-2-0 on 31st March 1895. This large increase was principally due to bills for Road repairs, &c., against the Colaba Sewerage Works, and for Cart repairs, &c., against the Health Department remaining unadjusted during last year in consequence of excesses on sanctioned grants. The excesses having been sanctioned by the Corporation during 1896-97, the bills have been passed and adjusted in this year's accounts.

The unsold Repair and Building Certificate and Water Application Forms on 31st March 1896 were of the value of Rs. 247 against Rs. 241-12-0 at the close of 1894-95.

Advances to Contractors, &c., stood at Rs. 2,307-1-0 at the close of last year against Rs. 5,963-9-8 on 31st March 1895. The reduction was due to the recovery of advances made to Messrs. Framroze Pestonji and Co., and Messrs. Mistri, Bhedwar, Wachaghandy and Co. for materials brought on the sites of the Bigaris' Chawl at Bori Bunder and the Club Road.

The value of Reserve Stock in hand on 31st March 1896 at the General Stores and the Drainage and Water Works Depôts aggregated Rs. 8,76,659-9-8 against Rs. 9,14,283-10-7 in the preceding year. This reduction in Stock of Rs. 37,624-0-11 has helped to increase the Surplus Cash balance.

No. 4, Liabilities.—Payment of Rs. 11,549-3-4 during the past year reduced the Vehar debt due to Government from Rs. 25,65,140-7-2 on 31st March 1895 to Rs. 25,53,591-3-10 at the close of last year.

Debentures of the value of Rs. 60,500 on account of the 5% Loan of 1878 were paid off during the past year. But owing to the 3 debentures of Rs. 500 each (one repayable on 1st January 1890, one on 1st January 1893, and one on 1st January 1895) remaining unpaid, the holders thereof not having presented them for repayment, the outstanding debt on account of this loan stood on 31st March 1896 at Rs. 21,19,500 instead of at Rs. 21,18,000 as per the terms of the loan. The difference of Rs. 1,500 has been renewed during the current year to enable us to pay off the bonds whenever presented for repayment.

Holders of bonds of the value of Rs. 1,60,000 for the short term of 10 years instead of the full period of 40 years of the 44 lakhs Sanitary Works Loan were paid off during the past year. This, together with bonds for shorter periods of 1, 2, & 5 years paid off in 1886-87, 1887-88 and 1890-91, reduced the debt on account of this loan to

Rs. 37,39,000, the whole of which is repayable on 1st July 1925, there being no other short period debentures payable in the interval. As the invested Sinking Fund on 31st March 1896 of this Loan amounted to Rs. 4,51,047-15-5, the balance due on account of this Loan at that date should be taken at Rs. 32,87,952-0-7 or say Rs. 32,88,000. To repay this at the end of 29 years, when the term of this Loan expires, an annual sum of Rs. 2,17,500 will be required for payment of interest and investment of Sinking Fund, causing an annual saving for the remaining 29 years of the currency of this Loan of Rs. 26,000 on the sum provided in the Budget for the purpose since 1895-96. This favourable result is due to the full Sinking Fund Instalment on the whole loan of 44 lakhs with interest accumulations thereon as also with the interest savings referred to at pages 63 and 64 of the Report for 1885-86 having been invested during the first 11 years of the currency of this loan, during which period the short-term loans for 1, 2, 5, and 10 years, amounting to Rs. 6,61,000, have been paid off.

The second instalment of the 23½ lakhs Drainage, Water Works, Roads and other Works Loan was raised from the public between 11th and 15th July 1895 at rates varying from 109$\frac{15}{16}$ to 110$\frac{1}{16}$ per cent., the average rate realized being 110$\frac{1}{16}$ per cent. Thus the raising of the full amount of the loan was completed in the past year.

Owing chiefly to receipts of deposits on account of Oomercarry, Mazagon and Malabar Hills Sewerage Works contracts and of those for sale of land at Connaught and Sussex Roads, the Contractors', &c., cash deposits amounted to Rs. 2,60,971-7-3 on 31st March 1896 against Rs. 2,46,259-4-6 at the close of the preceding year.

The balance of Rs. 72-2-0 due to Government on account of Income Tax recovered by the Municipality was paid into Her Majesty's Treasury at the Bank of Bombay on 23rd April and 20th July 1896.

Owing to the House Connections Works having been stopped since 1892, the Loan Works Establishment balance stood at the same figure in the last as that in the preceding two years.

The aggregate liabilities of the Municipality at the end of last year amounted to Rs. 3,80,22,864-12-9 including Rs. 2,40,89,085-1-1 on account of Water Works as per Statement *No. 7* against Rs. 3,72,22,425-4-8 on 31st March 1895.

No. 5 Assets.—Owing to the increase in the Private and Departmental Works and Workshops outstandings, chiefly on account of Colaba Sewerage and Health Department Cart repair bills remaining unadjusted, the recoverable advances on 31st March 1896 amounted to Rs. 44,123-6-5 against Rs. 24,845-3-9 on 31st March 1895.

The invested balances at the end of last year amounted to Rs. 59,58,288-11-7 as detailed below against Rs. 54,46,581-3-3 at the close of the previous year :—

Deduct—Total LIABILITIES .....Rs.	3,80,22,864 12 9
Assets in excess of Liabilities ...Rs.	1,69,89,101 0 6

It will be seen from the marginal figures that the entire Assets of the Municipality at the end of last year exceeded the Liabilities by nearly 1 krore and 70 lakhs, *i.e.*, by about 45 per cent.

* Net Premia received on the 2nd instalment of Rs. 10¼ lakhs of the 23¼ lakhs loan raised in July 1895.

Nos. 6 and 7 are the Water Works Income and Expenditure, and Assets and Liabilities Statements shown separately as directed in the Standing Committee's Resolution No. 10625, dated 22nd December 1891.

The former shows that the Expenditure exceeded the Income by Rs. 1,82,374-10-2, which deficiency had been met from the general revenues of the Municipality. The latter statement gives the Assets, *i.e.*, the cost of works *plus* the amount of investments on account of the Worn-out Water Mains Renewal and the Net Premia, &c., Funds at Rs. 2,78,67,109-5-6, and the Liabilities to Government and the public for loans borrowed at Rs. 2,40,89,085-1-1. Of the excess assets of Rs. 37,78,024-4-5, those worth Rs. 23,37,168-14-8 were obtained from Municipal revenues, and the remaining costing Rs. 14,40,855-5-9 from the Water Works revenue proper.

No. 8, Garden Fund.—This fund was constituted under the Corporation's Resolution No. 7057, dated 17th February 1890. The above resolution was rescinded under that body's Resolution No. 14171, dated 5th March 1896. The account is not therefore credited with the balance of expenditure or revenue for the past year. It only shows the balances of unappropriated receipts and unspent expenditure grants for 1894-95 and previous years and will continue to show the same hereafter until such balances are fully expended on the improvements of the gardens as required by the provisions of the Municipal Act. The unexpended expenditure grants for and prior to 1894-95 amount to Rs. 23,453-2-1, and the unappropriated receipts and donations for the same period, amount to Rs. 31,771-1-10 or Rs. 55,224-3-11 in all. Rs. 22,818 have been sanctioned as per Corporation's Resolution No. 14171, dated 5th March 1896, for the following garden improvements :—

Construction of a storm-water drain in the new ground,
Do. animal-keepers' quarters,
Do. a wall and fencing along the southern boundary of the gardens,
Do. clerks' office room, and
Do. a bullock stable.

STORES.

On 31st March 1896 the Inspector of Stores had in his charge Reserve Stock of the value of Rs. 65,655-6-5 at the General Stores, Paltan Road, against Rs. 55,136-1-1 at the close of the previous year.

I have contrasted below the principal items of stock balances during the past three years.

Total Rs....		63,400 3 5		53,679 15 7		62,188 11 4

It will be seen that these balances still include Rs. 42,983-8-8 on account of earthenware pipes, bends, junctions and flaptraps which have been considered not useful for general drainage purposes as already pointed out in my No. 1500, dated the 8th ultimo, and former annual reports. It would therefore be well if the Drainage and Executive Engineers went over this stock and utilized it, if not for regular drainage purposes, for ordinary purposes of draining gardens, &c., even at reduced prices, if necessary.

The total local purchases during the past year amounted to Rs. 1,00,983-12-7. Rs. 73-5-0 were recovered from Government for the sale of disinfecting powder to the Commissioner of Police. The proceeds of surplus articles (such as empty drums of acid, oil, &c., wooden coal tar and oil casks, &c.), sold by auction through the municipal auctioneers, amounted to Rs. 46-0-3. The issues of stores to the Municipal Workshops, Public Health Department, Executive Engineer, Drainage Engineer, Markets, and other Municipal Departments, amounted to Rs. 91,045-15-11.

As required by the General Rules for the purchase and adjustment of stores, approved by the Standing Committee, the Inspector of Stores examined daily the postings in the Store-books and accounts at the Bellasis Bridge Depôt and Chinchpokli stores, and took inventory of actual balances at the General Stores in November 1895, at the Drainage Depôt (Bellasis Road) in April 1896, and at the Water Work Stores, Chinchpokli, in May and June 1896, tallying the balances shown in the respective stock books with those actually on hand.

WORKSHOPS.

The receipts and disbursements, as also the balances of the Municipal Workshops for the past year, have been contrasted in the following statement with those of the preceding year :—

	1894-95.		1895-96.	
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.

Total Rs....		1,15,023 9 5		1,10,287 4 8

The slight falling off in the total expenditure on Labour and Stores during the past year was chiefly due to a largé number of dust-bin carts having been made in the Shops during 1894-95.

In consequence of charging as usual 35 per cent. over the actual cost of Establishment and Stores and an additional 15 per cent. for private works, the Workshops realized a surplus of Rs. 27,328-7-0 on departmental and private works executed at the Shops, including the hire of pumping engine and other petty charges as detailed in the margin. More than a third of the surplus was obtained on repairs to Health Department carts and about a tenth on repairs to watering carts, Engineer's Department, as will be seen from the following details :—

	Rs.	a.	p.
35 per cent. Charges	26,064	11	4
15 " "	19	0	4
Hire of Pumping engine	1,183	5	9
Allowance to Workshops on account of Stationery, &c., for supervising and working the Garlick incinerator	60	0	0
Amount of overcharge in Bill No. 34.	1	5	7
Total Rs.	27,328	7	0

Nature of Work.	Actuals.			Amount charged, including 35 % and 15 per cent.			Amount of percentage charged over actuals.		
	Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.
Private Works	94	4	1	146	4	2	52	0	1
Departmental Works	75,912	6	1	1,03,188	13	0	27,276	6	11
Total Rs...	76,006	10	2	1,03,335	1	2	27,328	7	0
Repairs to Scavengering Carts	13,993	0	4	18,890	9	9	4,897	9	5
Do. Drain Carts	6,384	5	0	8,618	13	2	2,234	8	2
Do. Night-soil Carts	6,586	6	0	8,891	9	10	2,305	3	10
Total Repairs to Health Department Carts..	26,963	11	4	36,401	0	9	9,437	5	5
Do. Watering Carts	7,466	15	8	10,080	6	11	2,613	7	3
Total Rs...	34,430	11	0	46,481	7	8	12,050	12	8

Adding to the above surplus of Rs. 27,328-7-0 derived by the percentage charged for covering shops, supervision, repairs, &c., charges Rs. 1,332-3-5 obtained by the sale of unserviceable stores, &c., the gross earnings of the Shops during the past year amounted to Rs. 28,660-10-5, from which the following establishment, shop, repairs, &c., charges, amounting Rs. 21,670-4-2 were defrayed :—

	Rs.	a.	p.
Supervising Establishment	7,938	8	3
Stores Establishment	1,020	0	0
Rs.	8,958	8	3
Shop Charges	12,062	10	11
Repairs Charges	649	1	0
Total ... Rs.	21,670	4	2

The net profit on the year's working has thus been Rs. 6,990-6-3 or over 7 per cent. on the outlay for labour and stores. The usual percentage for shop and supervision was raised from 25 per cent. to 35 per cent. from November 1891. The enhanced rate has thus been in vogue for 4½ years including the past year, and as the net profit during the past 4 years has been at the rate of from 3 per cent. to 7 per cent. on the outlay, *i.e.*, an average annual profit of over 5½ per cent., perhaps it would be well for the Executive Engineer to consider whether the shop and supervision percentage could not now be safely reduced from 35 to 30 per cent., as by the Budget arrangements it is not necessary to obtain by an overcharge to Departmental works any profit on the working of the Shops, the estimates for the receipts being taken as balancing the expenses.

The Workshop's outstandings on account of completed works for the past year amounted to Rs. 11,964-5-10, and those on account of incomplete works to Rs. 1,096-14-5, or Rs. 13,061-4-3 in all. The larger outstanding on account of completed works was chiefly due to our being unable to adjust during the past year Health Department cart repair bills for December 1895 and January and February 1896, amounting to Rs. 10,608-9-11, for want of sufficient grant. These bills were adjusted during the current year as soon as the Corporation sanctioned on 4th May 1896 an additional grant of Rs. 8,600 to meet the excess repair charges.

GENERAL REMARKS.

The annual cash disbursements made through the Paymaster since 1873 and the net unpaid savings in each year carried to Deposit account since March 1890, pending forfeiture under the Limitation Act, are shown in the following table :—

Year.	Sums handed over for payment to Employés. Rs.	Net Unpaid Savings. Rs.	Wages credited to Deposit Account. Rs.
1872	In this year there was no Paymaster.	2,177	.....

1894-95	16,60,124	3,347	1805
1895-96	18,41,892	3,392	974

* Forfeited under the Statute of Limitation.

The increase of Rs. 1,82,000 during the last year over the payments in 1894-95 was chiefly due to payments made on account of the Oomerkhady and Colaba Drainage Works carried on departmentally on account of the contractors, Messrs. Bulkley and Co. They were also larger than those made in any of the preceding 22 years.

Cash received	Rs.	96,85,884	9 0
„ paid	„	99,61,488	13 1
	Rs.	1,95,97,473	8 1
Adjustments	„	40,10,105	11 9
Total	Rs.	2,36,07,579	1 10

The figures in the margin indicate that the gross outturn of the past year, including adjustments, amounted to over Rs. 236 lakhs against—

1894-95	28,027	7,33,645	12	0
1895-96	20,815	7,76,856	3	0

The number of Town Duty Certificates annually passed by the Revenue and Refund Audit Office, and the amount of town duty refunded by this office from 1873 up to the end of last year as given in the margin, show that the amount actually refunded was larger during the last year than in the previous year, and the number of certificates like those of 1893-94 exceeded those passed in any of the previous years since 1873.

* Including 963 lakhs on account of Water Works Assets and Liabilities transferred to the Municipal Fund, as explained at page 120 of the Administration Report for 1891-92.

The following statement shows that the number of Receipt and Disbursement Vouchers that were scrutinized and adjusted by this department in the past year was the largest passed in any one of the preceding 19 years :—

Year.	No. of Receipt Vouchers.		No. of Disbursement Vouchers.		Total including Journal Vouchers.
1876	4,862	+	12,073	=	16,935
1877	5,013	+	14,410	=	19,423
1878	5,511	+	18,783	=	24,294
1879	5,626	+	26,163	=	31,789
1880	5,677	+	24,314	=	29,991
1881	5,917	+	27,030	=	32,947
15 months. { 1882 1st Qr. of 1883 }	7,839	+	34,085	=	41,924
	or 33,540 proportionately for 12 months.				
1883-84	6,352	+	25,819	=	32,171
1884-85	6,942	+	32,872	=	39,814
1885-86	6,855	+	31,008	=	37,863
1886-87	7,040	+	36,966	=	44,006
1887-88	7,197	+	42,283	=	49,480
1888-89	6,527	+	42,989	=	49,516
1889-90	6,358	+	36,468	=	42,826
1890-91	15,329	+	44,022	=	59,351
1891-92	20,093	+	43,918	=	64,011
1892-93	20,552	+	44,460	=	65,012
1893-94	21,957	+	45,653	=	67,610
1894-95	23,198	+	43,204	=	66,402
1895-96	24,407	+	46,243	=	70,650

The number of Inward and Outward letters received and despatched during the past year were respectively 38,753 (exclusive of 46,243 Vouchers and 26,683 Ward Remittance Reports) and 5,479 (excluding 1,476 intimations sent to parties to call for receiving payments) against 38,299 and 5,523 in 1894-95 and 2,250 and 1,301 respectively in 1875.

4 per cent. Municipal Bonds for the second instalment of 10¼ lakhs of the 23¼ lakhs Drainage and Water Works, Roads and Other Works Loan raised from the public between 11th and 15th July 1895, were issued as under :—

			Rs.
650	Bonds of Rs. 500 each	... ...	3,25,000
400	" " 1,000 "	... ...	4,00,000
60	" " 5,000 "	... ...	3,00,000
1,110		Rs.	10,25,000

As the above loan was raised rather early in the season, *viz.*, between 11th and 15th July 1895, a greater portion of it remained unexpended. On my return from furlough, steps were taken to deposit 4½ lakhs thereof at interest with the Local Banks, and to invest 1½ lakhs together with other Surplus funds not required before the close of the past year; this arrangement, together with the putting off for a year as suggested in this office No. 2677, dated 27th September 1895, the raising of each of the first and second instalments of the loan of

Rs. 15,75,000 sanctioned by Government as per their Resolution No. 883, General Department, dated 22nd February 1896, caused a saving of over 1 lakh of rupees, which enabled us to balance for the first time the Budget for the current year. Taking advantage of the easy state of the money market, it was further suggested in my No. 2772, dated 4th October 1895, to obtain sanction of Government to raise the above loan at 3½ per cent., if practicable, instead of at 4 per cent., as originally sanctioned by Government. This proposal has also been sanctioned by Government, and I have no doubt that we would be able to raise the loan bearing the reduced rate of interest, viz., 3½ per cent. at much above par, if not at 7 or 8 per cent. premium. The reduction in the rate of interest will cause an annual saving of Rs. 6,000 for 40 years in the amount of the Interest and Sinking Fund instalment for the loan.

It will be perceived from the facts and figures given in the preceding pages, that the work of this office has been annually increasing by leaps and bounds, and I find it impracticable to keep pace with it with the existing staff which is considerably undermanned and in many cases greatly underpaid. I have been compelled, ever since my return, to employ as many as 8 candidates (about a fifth of the entire strength of the office). Some of these candidates have occasionally been given acting or temporary appointments when regular employés are absent on leave, &c. Notwithstanding the employment of so many extra candidates the work is falling into arrears and very often delays in reports, payments, &c., occur. In such a department, which has responsible work of the character described above to go through, it is not satisfactory that it should extensively employ unpaid and consequently irresponsible persons. I trust, therefore, that you will consider the claims of the employés of this department to substantial increase both in number and pay while considering the schedule now under revision.

From the beginning of the past year to 27th August 1895, Mr. W. Pearson acted for me on the post of Chief Accountant. I resumed charge of my duties on the 28th idem, after being away on furlough to Europe for 16 months.

I regret I was unable to submit this report earlier in spite of all the hard work of my office and notwithstanding it being otherwise complete on the 22nd ultimo, owing to several adjustment vouchers and sanctions having been received in my office during the past month and the last sanction having been received so late as the 4th instant.

Before concluding, I have to thank the Deputy Accountant Mr. Manecksha Cawashah Taleyarkhan, who I find materially helped the Acting Chief Accountant during my absence in keeping the Department in fair working order, and have once more to acknowledge his services as well as of all other members of the establishment, who one and all with a few exceptions have tried their utmost to help in getting through the heavy, onerous and responsible work of this Department as described in the preceding pages of this report.

APPENDICES

TO THE

CHIEF ACCOUNTANT'S REPORT

FOR 1895-96.

No. 1 A.

BOMBAY 5% MUNICIPAL LOAN OF 1878 (Rs. 26,94,000).

Raised in two equal instalments on 1st November and 1st December 1878 as per Corporation's Resolution No. 1296, dated 10th September 1878, and Government Resolution No. 2951, dated 28th September 1878.

Wholly repayable on 1st January 1919.

STATEMENT showing the Amount of Interest and Principal annually payable in Bombay from December 1878.

Total...Rs.		59,417 16 11

March Animal office

(1) Out of this sum, Rs. 22,818 have been sanctioned in Corporation's Resolution No. 11171, dated 5th 1896 to be spent on constructing—(1) a storm-water drain in the new ground lately acquired, (2) keepers' quarters, (3) a wall and fencing along the southern boundary of the gardens, (4) clerks room, and (5) a bullock stable.

P. C. H. SNOW,
Municipal Commissioner.

REVENUE.

1. REPORT of the ASSESSMENT and COLLECTION DEPARTMENT by Mr. R. P. BRUNTON, Assessor and Collector, as forwarded with his letter No. 10641, dated 27th July 1896.

2. REPORT of the REVENUE and REFUND AUDIT DEPARTMENT by Mr. W. PEARSON, Revenue and Refund Audit Officer, as forwarded with his letter No. 1177, dated 27th July 1896.

1. The total amount collected under all heads, exclusive of miscellaneous receipts, was Rs. 43,51,271-11-4 against the estimated amount of Rs. 41,96,100.

2. As compared with the total collections for the previous year, which amounted to Rs. 42,86,095-4-9, the increase for 1895-96 is Rs. 65,176-6-7.

3. The total collections for the last five years, exclusive of miscellaneous receipts, were

	Rs.	A.	P.
In 1891-92...	39,73,453	7	10

11. *Halalkhor Tax.*

1894-95.			1895-96.			Increase.
On Value.	Special Service.	Total.	On Value.	Special Service.	Total.	
1	2	3	4	5	6	7
Rs. a. p. 5,17,615 2 9	Rs. a. p. 1,24,978 1 11	Rs. a. p. 6,42,593 4 8	Rs. a. p. 5,35,770 12 2	Rs. a. p. 1,27,801 6 11	Rs. a. p. 6,63,572 3 1	Rs. a. p. 20,978 14 5

12. Up to the end of the year under report the question of the rates to be charged for special service to mills was still under discussion.

13. The total demand on account of property taxes for 1895-96 amounted to Rs. 40,18,361-15-0, to which must be added Rs. 10,392-4-11, demands on account of previous years, making a total of Rs. 40,28,754-3-11.

14. Of the above total demand, a sum of Rs. 53,092-1-4 was allowed as drawback on the General Tax under section 158 (2) of the Act.

15. The following bills were issued during the year 1895-96 :—

For which year.	Bills issued.		
	No.	Amount.	
		Rs. a. p.	
1890-91	3	33 6 10	
1891-92	12	283 2 6	
1892-93	25	217 15 8	
1893-94	125	2,218 5 4	
1894-95	301	7,639 6 7	
Total ...	466	10,392 4 11	
1895-96	75,817	37,14,413 13 8	
Total ...	76,283	37,24,806 2 7	

16. The Government and Port Trust payments on account of the General Tax are not made on bills; they are paid direct into the Chief Accountant's Office. The number of bills issued in 1893-94 was for altered Halalkhor bills.

17. The outstanding balance on account of property taxes at the end of 1894-95 was Rs. 80,666-12-1, and the total amount for collection in 1895-96 was Rs. 38,05,472-14-8.

18. At the end of the year under report the total amount outstanding was Rs. 74,135-7-10, of which amount Rs. 41,409-12-3 have been collected up to 25th July, leaving a balance of Rs. 32,725-11-7.

19. The following table gives details of the amounts which had to be collected during 1895-96 :—

Taxes.	To be collected.			Collected.			Uncollected.	Deduct.			Balance outstanding at the end of 1895-96.		
								On account of former years.					
	Opening Balance outstanding.	Total of Bills issued during 1895-96.	Amount payable by Government and Port Trust without Bills.	On account of former years.	On account of 1895-96.	Total.		Amount written off as per Standing Committee's Resolutions Nos. 1031, dated 24th April 1895, and 6563, dated 18th September 1895.	Bills cancelled (amended bills being issued in lieu of the same). Tax on Vehicles and Animals.

20. The demand on account of the tax on private vehicles and animals for the four quarters ending 31st December 1895 was Rs. 1,80,590-3-11 (against Rs. 1,72,675-7-1 for the previous calendar year), to which are to be added Rs. 3,607-5-4, outstanding balance on 31st March 1895, and Rs. 271-11-0, amount of bills for former years issued in 1895-96, making a total of Rs. 1,84,469-4-3.

21. The total number of wheel tax bills issued was 13,646. The amount actually collected during the year was Rs. 1,78,056-11-3. Last year the amount was Rs. 1,71,888-12-4.

22. Out of the amount of Rs. 5,911-3-7 outstanding on the 31st March 1896, Rs. 2,612-6-0 were collected up to 25th July 1896, leaving a balance of Rs. 3,298-13-7.

23. The details are shown in the subjoined table :—

To be collected.			Collected.			Uncollected.	Deduct Bills cancelled on account of former years.			Balance outstanding at the end of 31st March 1896.		
Opening balance outstanding.	Total of bills issued in 1895-96.	Total to be collected.	On account of former years.	On account of 1895-96.	Total.		Amount written off as irrecoverable as per Standing Committee's Resolutions Nos. 1031, dated 24th April 1896; and 6965, dated 18th September 1895.	Bills cancelled (amended bills being issued in lieu of the same).	Total.	On account of former years.	On account of 1895-96.	Total.
Rs. a. p. 3,607 5 4	Rs. a. p. 1,80,861 14 11	Rs. a. p. 1,84,469 4 3	Rs. a. p. 2,989 14 4	Rs. a. p. 1,75,066 12 11	Rs. a. p. 1,78,056 11 3	Rs. a. p. 6,412 9 0	Rs. a. p. 109 15 6	Rs. a. p. 391 6 0	Rs. a. p. 501 5 6	Rs. a. p. 387 12 7	Rs. a. p. 5,523 7 0	Rs. a. p. 5,911 3 7

24. The number and description of private vehicles and animals taxed at the end of calendar year 1895 as contrasted with those of the calendar year 1894 are as under :—

For 1894-95.			For 1895-96.			Increase.		Decrease.	
Number at the end of 1894-95.			Number at the end of 1895-96.						
4-wheeled Vehicles.	3,649		4-wheeled Vehicles.	3,749		4-wheeled Vehicles.	100	4-wheeled Vehicles.	...
2-wheeled Vehicles.	957		2-wheeled Vehicles.	909		2-wheeled Vehicles.	...	2-wheeled Vehicles.	48
Vehicles drawn or impelled otherwise than by horses, &c.	380		Vehicles drawn or impelled otherwise than by horses, &c.	474		Vehicles drawn or impelled otherwise than by horses, &c.	144	Vehicles drawn or impelled otherwise than by horses, &c.	...
Horses.	3,888		Horses.	4,041		Horses.	158	Horses.	...
Ponies.	232		Ponies.	226		Ponies.	4	Ponies.	...
Bullocks.	904		Bullocks.	857		Bullocks.	...	Bullocks.	47
Donkeys.	1		Donkeys.	1		Donkeys.	...	Donkeys.	...
Amount.	Rs. 1,72,675	a. p. 7 1	Amount.	Rs. 1,80,590	a. p. 3 11	Amount.	Rs. 7,314	a. p. 12 10	Rs. a. p. .....

25. Under the head of vehicles drawn or impelled otherwise than by horses, ponies, mules, donkeys, bullocks or machinery, are included 60 bicycles and 23 tricycles, total 83, which I believe is very far short of the number in use. But although every endeavour has been made to levy the tax (Rs. 2 per quarter) on all seen in the streets, a large number escape taxation, and this will continue until some system of registration and numbering is introduced, or until some amendment is made in the provisions of section 189 (1), under which we inspect stables and coach-houses. But as bicycles and tricycles are kept inside houses (I heard of one case where a cycle was kept under a bed), it is impossible for us to find out all the untaxed ones.

26. Sections 187 and 188 empower us to serve returns and require information from persons possessing vehicles and animals, but I would submit that in the case of cycles (where the amount of the tax is comparatively small), rigidly putting into force the provisions of these sections would probably cause much irritation and friction, and I have not enforced them in all cases.

27. The amount recovered on account of licensed public land conveyances, including drivers' license fees, fees for badges, and the amount realized from tolls at Mahim and Sion Causeways (which tolls are collected by the Port Trust), as contrasted with the previous four years, is as follows :—

Years.	Tax on Licensed Public Land Conveyances.	License Fees.	Fees for Badges.	Toll Fees at Mahim and Sion Causeways.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
1891-92	1,60,537 14 0	5,773 14 0	7,843 10 0	13,087 14 0
1892-93	1,66,070 14 0	5,374 4 0	8,877 8 0	12,331 8 0
1893-94	1,64,720 8 0	5,094 4 0	7,914 1 0	12,665 14 0
1894-95	1,68,889 0 0	5,376 2 0	7,963 1 0	15,371 10 0
1895-96	1,67,967 8 0	5,020 0 0	7,853 8 0	19,528 14 0

28. The taxes and licenses on public land conveyances are now collected for the calendar year. The details of the collections for the official year are :—

Period.	Labour Carts.	Riding Hackeries.	Victorias, Shigrams, &c.	Arrears of Taxes.	Municipal Taxes.	License Fees.	Cost of Badges.	Total.
				Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.

I.—REVENUE AUDIT.

1.—Assessor and Collector's Department.

(a) *Ward Offices.*

1. The balances and books of the 57 ward clerks in the seven wards of the City were duly examined at the end of each quarter. The amount of audit work done on each of these occasions is shown in detail in Appendix A, the totals being transcribed below for ready reference :—

Ward Balances examined.

On 1st April 1895.		On 1st July 1895.		On 1st October 1895.		On 3rd January 1896.		Total.	
No. of Bills.	Amount.	No. of Bills.	Amount.	No. of Bills.	Amount.	No. of Bills.	Amount.	No. of Bills.	Amount.
	Rs. a. p.		Rs. a. p.		Rs. a. p.		Rs. a. p.		Rs. a. p.
2,976	67,720 4 6	14,314	6,72,089 5 5	8,385	1,44,442 11 4	14,681	6,83,408 8 11	35,256	15,57,660 14 2

2. The 35,256 bills for Rs. 15,57,660-14-2 were duly checked in detail with the Ward Office bill book, Form 16 (every entry in which was subjected to scrutiny), and in totals, which were themselves tested with the book, kept under para. 9 at page 155 of the Manual, which is practically the Ward Clerk's Ledger. They were also checked with the Head Office Accounts (Forms 8 and 9), both in detail and in totals, respectively.

(b) *Head Office.*

3. The Assessment Book in both its parts—one for the General Tax and the other for the Water and Halalkhor Taxes—was duly examined, and the exemptions from the payment of the General Tax, the Water Tax, and the Halalkhor Tax were duly checked with a view to ascertain that no property liable to pay any or all of these taxes had escaped

assessment. Appendix B shows the work done in detail, the following being an abstract of its totals :—

Total No. of Properties on the Assessment Book.	Of which number exempted from payment of						Remainder, which pay		
	The General Tax.				The Water Tax.	The Halalkhor Tax.	The General Tax.	The Water Tax.	The Halalkhor Tax.
	Religious and Charitable Institutions.	Properties vesting in and occupied by the Corporation.	Properties of small value, for which no Bills are issued.	Total.					
52,639	1,823	1,161	7,795	10,779	17,066	17,322	41,860	35,573	35,317

4. The vehicle and animal tax book, kept under section 186 of the Act, was also examined, and all the entries therein checked with the quarterly returns of the Ward Superintendents, and, where necessary, also with the owners' returns under Section 187, and with the charges made for the preceding quarter. The following table shows the total number of entries so checked for each quarter. Appendix C giving the details for each ward :—

1st Quarter.	2nd Quarter.	3rd Quarter.	4th Quarter.	Total.
3,655	4,106	4,545	5,075	17,381

5. As the year recognised by the Bombay Act VI of 1863 is the calendar year, the revenue from the tax on public land conveyance licensed by the Commissioner of Police under that Act was also audited for the twelve months, from 1st January to 31st December 1895, the certificates of issue of licenses supplied by that officer under arrangements made with him having been duly checked with the Register kept by the Superintendent of the Byculla Ward. The following table shows the work done :—

Description of Public Land Conveyance.	No. of Certificates or Vouchers.	Amount of Revenue, including Fees for Badges, &c.
		Rs. a. p.
Victorias	1,479	60,345 1 0
Riding hackeries or reeklas	510	7,548 4 0
Labour carts	8,186	1,11,417 8 0
Total ...	10,175	1,79,310 13 0

6. Appendix D shows the number of claims to one-fifth drawback under Section 158 (2) of the Act, which were scrutinized by this office during 1895-96, the totals being abstracted below :—

1st half of 1895-96.			2nd half of 1895-96.			Total for the year.		
Number of claims received	Number of claims admitted.	Amount of drawback sanctioned.	Number of claims received	Number of claims admitted.	Amount of drawback sanctioned.	Number of claims received	Number of claims admitted.	Amount of drawback sanctioned.
		Rs. a. p.			Rs. a. p.			Rs. a. p.
5,752	4,475	25,678 9 1	6,440	4,834	27,413 8 3	12,192	9,309	53,092 1 11

7. The alterations in value and in demand made through the Increase and Decrease Forms, 11, 11A, and 11B, were duly checked with the authority for such alterations, as contained in your orders in the Tabulated Ward Report (Form 13) and in separate sanctions recorded in the Audit Note Books kept in this office. Appendix E exhibits the details of the alterations, of which the following are the totals :—

Total number of Increase and Decrease entries in Forms 11, 11A and 11B.	The number of those entries which were checked.	Original Valuation.	Amended or Revised Valuation.	Difference, being net Increase.
1	2	3	4	5
		Rs.	Rs.	Rs.
6,602	6,602	1,05,51,350	1,12,42,096	6,90,746

8. The number of complaints against valuations under Section 163 heard by me was 181 in A or Fort Ward, and 597 in C or Bhuleshwar Ward, giving a total of 778. The total number of the decisions on complaints against amendments under section 167 of the Municipal Act, which were scrutinized by this office amounted to 405 from all the seven wards of the City.

9. Irrecoverable bills for Rs. 191-9-9, as per details given in the subjoined table, were scrutinized and submitted to you in the prescribed form for action under Section 216 of the Act :—

Ward.	No. of Bills.	AMOUNT.					
		Tax on Vehicles and Animals.	Property Taxes.	Charges for Water by meter measurement.	Special Halalkhor Tax.	Notice Fee.	Total.
		Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a p.	Rs. a. p.
A ...	8	27 4 8	0 4 0	...	0 15 8	...	28 8 4
B ...	...	...	...	...	...	...	.....
C ...	8	75 15 6	...	...	...	...	75 15 6
D ...	4	36 0 0	...	...	...	...	36 0 0
E ...	3	35 4 8	...	...	...	...	35 4 8
F ...	3	...	11 1 3	...	...	0 12 0	11 13 3
G ...	1	4 0 0	...	...	...	...	4 0 0
Total.	27	178 8 10	11 5 3	...	0 15 8	0 12 0	191 9 9

The Standing Committee sanctioned their being written off in their resolutions Nos. 1031, 6563, and 438, dated 24th April 1895, 18th September 1895, and 15th April 1896, respectively.

10. The preliminary list of voters under section 19 for the final Election Roll under section 21 were duly scrutinized.

11. The demands, collections, and balances of the Department at the close of the year, as duly audited in the manner contemplated by the Manual, are shown in Appendix F in detail and summarized in the following table :—

	The General Tax.	The Water Tax.	The Halalkhor Tax.	The Vehicle and Animal Tax.	The Tax on Public Land Conveyance.	Miscellaneous Revenue.	Total.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
I—Total demand as represented by bills issued ...	19,99,105 11 8	14,56,027 9 1	7,10,252 2 7	1,85,940 12 3	1,67,967 8 0	32,538 11 1	45,51,832 6 8
II—Deduct bills recalled, which were either cancelled or for which amended bills were issued	73,929 5 11	24,060 15 7	20,403 2 8	1,862 14 0	.....	195 10 9	1,20,452 0 11
III—Net demand for collection	19,25,176 5 9	14,31,966 9 6	6,89,848 15 11	1,84,077 14 3	1,67,967 8 0	32,343 0 4	44,31,380 5 9
IV—(*a*) Collections paid into the Treasury, including Departmental adjustment	18,99,857 0 6	14,11,184 1 4	6,61,804 0 3	1,78,056 11 3	1,67,967 8 0	31,486 0 4	43,50,355 5 8
(*b*) Irrecoverable bills written off	4 8 9	2 2 4	4 10 2	109 15 5	.....	.....	121 4 8
Total of IV ...	18,99,861 9 3	14,11,186 3 8	6,61,808 10 5	1,78,166 10 8	1,67,967 8 0	31,486 0 4	43,50,476 10 4
V—Balance at the close of the year...	25,314 12 6	20,780 5 10	28,040 5 6	5,911 3 7	.....	857 0 0	80,903 11 5

12. The collections were checked with receipts passed by the Chief Accountant, as also with his totals under each head, and the balances by an examination of the bills actually on hand in the several Ward Offices on 1st April 1896. They were found to be correct.

2—Engineer's Department.

13. The revenue books kept in the Streets and Buildings, Water Works, Drainage, and Special Drainage Branches of the Engineer's Department were duly checked each month with the permits, receipts, vouchers, and other papers supporting the several entries therein, the object of the audit being to see that the charges were correctly calculated at rates duly sanctioned, and that the collections as shown by the books were all paid into the Municipal Treasury. The following table shows the work carried out in detail :—

	Items.	Number of Vouchers examined.	Amount. Rs.	a.	p.
1	Projections; Verandahs, Balconies, Rewas, Weather frames, &c.	61	8,288	5	5
2	The erection of Scaffolding, &c., on public land.	253	7,702	7	11
3	Opening Roads	3,389	4,462	1	6
4	Temporary occupation of public streets on marriages and other occasions	712	4,507	7	1
5	Licenses issued to Plumbers	83	830	0	0
6	Licenses issued to Surveyors	34	2,550	0	0
7	Supplying copies of office records and giving evidence...		189	10	10
8	Sale of fruit, right of drawing toddy, water, &c.		581	2	0
9	Sale of right of catching fish	2,215	1,188	0	0
10	Hire of Steam-rollers, Carts, &c.		6,826	14	7
11	Ground rents		2,865	0	10
12	Sale of building forms under Section 337 ...		392	8	0
13	Sale of repair forms under Section 342 ...		359	0	0
14	Sale of applications for water connections ...		447	8	0
15	Sale of right of cutting grass		727	1	2
16	Sale of tender forms	2,895	124	0	0
17	Fees for testing water pipes, meter fittings, &c.		823	8	8
18	Meter hire...		1,124	13	6
	Total...	9,642	43,989	9	6

14. A comparison of the Engineer's accounts, with the Audit Note Book in this office which records your sanction in each case as it passes through this office, showed that in 33 cases the fees, the levy of which had been sanctioned by you in the course of the year under report, had not been collected and paid into the Municipal Treasury up to the close of the year, and these 33 cases were duly brought to the notice of the Executive Engineer in this office No. 508, dated the 28th May 1896, which was forwarded to him through you.

3—Health Department.

15. The revenue books kept in the Health Office were duly checked each month with the receipts, vouchers, and other papers supporting the entries therein, the object of the audit being to ascertain that the amounts collected as shown by the books were at the rates fixed under due authority, and that they were all paid into the Municipal Treasury. The following table exhibits in detail the number of receipts or vouchers examined under each head of revenue and the amount of such revenue :—

	Head of Revenue.	Number of Receipts or Vouchers examined.	Amount.
			Rs. a. p.
1	Digging graves	5,681	3,345 6 0
2	Removal of carcasses of animals	6,791	6,323 4 0
3	Supplying copies of office records, giving evidence, &c.	387	424 8 0
4	Rent of Mahalakshmi Dhobiwada	5,365	17,064 0 0
5	Rent of reclamation grounds	605	29,220 0 2
6	Rearing and catching fish, &c.		40 0 0
7	Grazing cattle and cutting grass, &c.		16 0 0
8	Sale of bones, manure, waste paper, &c. ...		1,214 12 0
9	Cleaning drains		2,441 6 9
10	Sale of tender forms		32 0 0
11	Rent of Mody Bay milch cattle stables ...		4,668 0 0
12	Rent of Kamatipurá milch cattle stables ...	814	8,532 0 0
13	Rent of Agripada milch cattle stables ...		3,512 4 0
	Total ...	19,643	76,833 8 11

4—Licensing Department.

16. Appendix G shows the number of licenses for 1895-96, the issue of which was sanctioned by you under sections 394 and 393 of the Act for the several purposes mentioned in Schedule M, with the amount of fees leviable therefor. Each of the 5,884 cases for Rs. 62,335-8-0

therein referred to passed through this office, and was duly scrutinized by it, particularly with reference to the amount of fee leviable, as also in respect of the stamp duty payable in the case of explosives. The register of the Superintendent and the counterfoils of the several license books were also checked each month with the Audit Note Book kept in this office, in accordance with your No. 3176 of the 20th May 1890, and with the counterfoils of the receipts given by the Chief Accountant's Cashier, for the purpose of seeing that the full amount of fee leviable in each case was collected and paid into the Municipal Treasury. As in a large majority of cases you sanction the issue of a license after payment of the fee, the registers show no outstandings at the close of the year.

5—Markets and Slaughter Houses.

17. The registers and accounts kept were duly checked with the counterfoils of receipts issued to stall-holders, &c., and with the other vouchers available. The following tables show the work done :—

Market Revenue.

	Markets.	Number of Receipts or Vouchers examined.	Amount.			Total No. of Receipts or Vouchers examined.	Total Amount.		
			Rs.	a.	p.		Rs.	a.	p.
1	Fort General Market ...	530	8,974	0	0	530	8,974	0	0
2	Arthur Crawford Beef Market	332	11,436	4	0				
	Arthur Crawford Old Fish and Mutton Market ...	476	17,452	2	0				
	Arthur Crawford New Mutton Market...	272							
	Arthur Crawford Fruit and Vegetable Market ...	2,280	57,398	8	8				
	Arthur Crawford Godowns...	120	5,460	0	0				
	Arthur Crawford Fowl Rooms	348	3,280	4	0	3,828	95,027	2	8
3	Erskine Road Mutton Market	456	24,830	0	0				
	Erskine Road Old Fruit and Vegetable Market... ...	1,812	32,639	7	8				
	Erskine Road New Fruit and Vegetable Market... ...	512				2,780	57,469	7	8
4	Temporary Bhuleshwar Market at Pinjrapole	512	8,766	3	10	512	8,766	3	10
5	Colaba Market	280	1,491	8	0	280	1,491	8	0
6	Pedder Market	160	2,492	9	0	160	2,492	9	0
7	Foras Road Market	272	609	3	0	272	609	3	0
8	Sonapore Pork Market ...	2	100	0	0	2	100	0	0
9	DeLisle Road Sheep Market.	100	4,830	0	0	100	4,830	0	0
	Total ...	8,464	1,79,760	2	2	8,464	1,79,760	2	2

Other Revenue.

	Items.	Number of Receipts or Vouchers examined.	Amount.
			Rs. a. p.
1	Slaughter Fees	365	1,38,722 14 0
2	Butchers' License Fees	3,918	11,947 0 0
3	Weights and Measures	2,462	3,886 5 0
4	Contributions from Private Markets	216	3,096 0 0
5	Fair Ground and Feeding Fees at Bandora Slaughter Houses...	12	59.181 4 0
6	Chawl Rent	.....	2,942 8 0
7	Miscellaneous	213	3,820 11 6
	Total ...	7,186	2,23,596 10 6

The total number of vouchers was 15,650 for Rs. 4,03,356-12-8. The total revenue collected appears duly credited in the Chief Accountant's books.

6—Victoria Gardens.

18. The revenue books kept in the Superintendent's office were duly checked with the counterfoils of receipts issued for the sale of garden produce. The following table shows the work done in detail :—

Sale Proceeds of Garden Produce.

	Items.	No. of Receipts or Vouchers.	Amount.
			Rs. a. p.
1	Flowers	2,560	2,747 15 8
2	Plants	605	2,901 5 9
3	Leaves	273	84 6 0
4	Seeds	93	104 6 0
5	Fruits	11	311 6 0
6	Miscellaneous	105	1,110 4 6
	Total ...	3,647	7,259 11 11

The total revenue collected appears duly credited in the Chief Accountant's books.

7—General.

19. As the monthly or quarterly audit of the several departments proceeded, the errors, irregularities, or omissions, which were discovered in the course of it, were brought to the notice of the heads of departments concerned by means of official communications addressed to them through you.

II—REFUND AUDIT.

1—Assessment Department.

20. The subjoined table shows the number and amount of claims to refund for vacancy under Sections 174 to 179 of the Act, and on account of over-collections which were scrutinized and sanctioned by this office in the year under report :—

Wards.	Number of Claims.	Amount of Refund sanctioned.
		Rs. a. p.
A. Fort and Colaba	143	20,928 8 5
B. Mandvi	96	1,157 11 5
C. Bhuleshwar	116	1,123 9 6
D. Girgaum	104	3,076 9 1
E. Byculla	101	2,119 3 8
F. Parel	36	435 9 11
G. Mahim	56	1,370 4 2
Total ...	652	30,211 8 2

The sum of Rs. 30,211-8-2 shown in the above table was sanctioned under the following heads of Revenue :—

Items.	Amounts. Rs. a. p.
1. General tax	22,151 4 7
2. Water tax	4,172 2 7
3. Halalkhor tax	3,853 11 0
4. Vehicle and Animal tax ...	30 6 0
5. Toll fees	.....
6. Meter hire	4 0 0
7. Process fees	.....
Total Rs. ...	30,211 8 2

Out of the item of Rs. 22,151-4-7 refunded on account of the General Tax, the sums of Rs. 4,441 and Rs. 11,041 were refunded to the Government and the Port Trustees, respectively, who had paid the general tax for 1894-95 on the basis of the former valuations pending settlement of the amount payable by them under sections 144 and 145 of the Municipal Act for that year.

Town Duty Refunds.

21. As the Port Trustees and the two Railway Companies send in no administration report of the town dues collected by them on behalf of the Municipality, it is usual for this office to submit the two statements (compiled in respect of collections from figures supplied by

the Chief Accountant) marked as Appendices H and I to this report. The following table compares the total results for the year under report with those for the preceding year :—

Year.	Gross Revenue.	Total Refunds.	Net Revenue.
	Rs. a. p.	Rs. a. p.	Rs. a. p.
1894-95	16,13,164 6 0	7,56,257 0 0	8,56,907 6 0
1895-96	16,81,667 3 7	8,00,287 15 0	8,81,379 4 7
Increase in 1895-96	68,502 13 7	44,030 15 0	24,471 14 7

22. From the detailed Statement H it will be seen that the increases in the gross revenue and in the refunds are made up almost wholly of increases under the heads of all articles, the only exception being a decrease of Rs. 9-11-6 in the gross revenue from flour. The result of these variations is that the net revenue, taking all the articles together, has been better than that of the previous year by Rs. 24,471-14-7, notwithstanding a decrease of Rs. 2,880-7-3 under the head of grain and flour and of Rs. 15,969-7-3 under that of sugar.

23. The total amount of refunds claimed during the year was Rs. 8,38,092-10-0, of which sum Rs. 37,804-11-0 were retrenched as follows :—

	Rs.	a.	p.
On account of claims legally inadmissible...	5,910	1	6
Excess of amounts claimed over those actually due	31,894	9	6
Total Rs....	37,804	11	0

24. The number of claims disposed of during the year was 29,814 (against 28,027 in the previous year) which gives an average of 105 claims per every working day in the year.

25. The question as to the best means to adopt for the prevention of frauds in the refunds of town duties, on which a report has been called for under a Resolution of a Committee of the Corporation, is under consideration, and the report asked for will shortly be submitted.

Conclusion.

26. In addition to the above, the office had to deal with correspondence of all departments affecting revenue which passes through this office, and with questions of principles relating to revenue, the importance of which can scarcely be judged by the number of inward and outward references, which was respectively 3,910 and 4,007 in the year under report.

Appendix A.

STATEMENT of Balances examined quarterly during 1895-96.

Ward.	No. of Ward Clerks	Balances examined on 1st April 1895.		Balances examined on 1st July 1895.		Balances examined on 1st Oct. 1895.		Balances examined on 3rd Jan. 1896.		Total Balance examined.

PUBLIC WORKS—SPECIAL.

Report of Mr. James W. Smith, Special Drainage Engineer, forwarded under his No. S.D. 1890 of 25th July 1896.

1. During the year under review I was on privilege leave from 10th September to 3rd November 1895, and Mr. C. C. James, the Drainage Engineer, attended to my duties, in addition to his own, during that period.

2. The unfinished works in progress and the new works commenced during the year were as follows :—

UNFINISHED WORKS.

(1) Colaba Sewerage Works.

(2) Umarkhadi Sewerage Works.

(3) Connaught Road and Sussex Road Drainage and Sewerage Works.

(4) Parel Sewerage Works.

NEW WORKS.

(5) Mazgon Sewerage Works.

(6) Malabar Hill and Khambala Hill Sewerage Works.

3. Works sanctioned by the Corporation during the year, but not taken in hand, were :—

(1) Fergusson Road and Chinchpokli Sewerage Works (Gravitation portion).

(2) Old Race Course Sewerage Works (Gravitation portion).

1.—COLABA SEWERAGE WORKS.

4. These works were divided into three portions and let separately to three firms of Contractors as follows :—

(*a*) Works in pipe sewers, &c., let to Messrs. Bulkley and Company.

(*b*) Works in air-compressing machinery, ejectors, air mains, sealed sewage mains, &c., under the Shone System, let to Messrs. Hughes and Lancaster.

(*c*) Works in engine-house, boiler-house, coal store, chimney, Engineer's and Firemen's quarters, &c., at the Air Compressor Station, works in ejector chambers, and works in excavation and masonry for air mains and sewage mains let to Messrs. Mistri, Bhedwar, Vachaghandi and Company.

(*A*).—*Works in Pipe Sewers, &c.*

CONTRACTORS—MESSRS. BULKLEY & CO.

5. On the withdrawal of Messrs. Bulkley & Co. on 20th February 1895, the works were carried on departmentally at their risk and expense.

6. Every endeavour was made to bring them to speedy completion, and they were carried on, as far as practicable, even during the rains.

7. The deepest and most difficult parts of the work, however, having been left by the Contractors, the progress was less rapid than could have been wished.

8. They were practically completed in the middle of February 1896.

9. The Contractors have filed a suit for damages and loss of reputation against the Municipality in the High Court. The hearing of the case commenced on the 10th March 1896, and is still going on.

(*B*).—*Works in Air-compressing Machinery, Ejectors, Air Mains, Sealed Sewage Mains, &c.*

CONTRACTORS—MESSRS. HUGHES AND LANCASTER.

10. The erection of the whole of the machinery for the Air Compressor Station was practically completed by the Contractors within the contract time, which expired on 1st May, but the laying of the air and sewage mains was delayed owing to the earthwork entrusted to other Contractors not being done in time.

11. It being desirable that the machinery during its erection should be supervised by a Mechanical Engineer on behalf of the Municipality, Mr. Hewett, the Superintending Engineer, Love Grove, and now Assistant Executive Engineer, Mechanical Branch, was directed to exercise such supervision.

12. Although the engines and boilers on the 1st of May were ready to be tried under steam, the engine and boiler houses were incomplete ; and until the roof, windows and doors were finished, the place could not be cleared so as to allow the engines to run.

13. The official trials of the air-compressing machinery were made by Mr. Hewett on behalf of the Municipality, and by Mr. Ault on behalf of Messrs. Hughes and Lancaster on the 8th, 9th and 10th of July 1895.

14. On the 8th the boilers were tested for evaporation efficiency, on the 9th the engines were tested for air compression, and on the 10th trials were made to determine the coal consumption.

15. The engines and boilers worked smoothly and well during the trials, and Mr. Hewett in his report says, "I am satisfied that a good and sound job has in all respects been made." The only point to which he took objection was the unnecessary size of the donkey pumps for feeding the boilers. Though this is an error on the right side, it prevents the feed pumps from being worked continuously, and Mr. Ault promised to enquire into and rectify the matter.

16. The boilers were examined on the 3rd May 1895 by the Government Inspector of Steam Boilers, and he granted a working certificate.

17. The four keys of the lock-up safety valves were handed over by Mr. Allan, the Agent of Messrs. Hughes and Lancaster, on the 15th July 1895, and were delivered to Mr. Hewett.

18. On 20th August 1895 the ejectors in Station No. 2 were tried and on the 22nd idem the Municipal Commissioner formally opened the Compressor Station. It was not, however, until the 12th of December that the Station commenced to work regularly, some few connections having then been made with the system.

19. Ejector Station No. 1 began working at the end of November 1895, when the sullage of the Apollo Hotel and several houses in Colaba Causeway, together with that of all the houses and stables on the south side of Lansdowne Road or between that road and the Ejector Station, was received into the station from an open drain constructed by the Drainage Engineer.

20. Ejector Station No. 3 began working regularly in March 1896, when the new Terminus of the B. B. & C. I. Railway was connected therewith. Other connections in Victoria Bandar Road have since been made.

21. Ejector Stations Nos. 4 and 5 were complete, but no connections had been made with them. Mr. Allan, the Agent of Messrs. Hughes and Lancaster, still remained in Bombay, attending to defects in the air mains and stop valves.

22. The total amount payable to Messrs. Hughes and Lancaster for the machinery and ejectors under their contract, dated 16th January 1894, was £13,651, and Rs. 14,276 for the erection thereof.

23. The sterling amount was payable by instalments, and the rupee payment at the expiration of six months from the date of the completion of the erection.

24. The remittances for the sterling instalments were made as shown in the following table:—

Instalment No.	Amount in Sterling.	Rate of Exchange.	Date of remittance.	Value in Rupees.
	£	s. d.		Rs. a. p.
1st	3,300	1 2	14th March 1894 ...	56,571 6 10
2nd	3,400	1 0⅛	11th April 1894 ...	59,889 14 6
3rd	2,000	1 0 1/32	18th July 1894 ...	37,555 0 2
4th	3,400	1 0 7/32	27th July 1894 ...	63,532 13 6
5th	1,551	1 1 5/16	.....	27,961 11 0
				2,45,510 14 0
Add—Cost of telegraphic instructions to Messrs. Coutts & Co. for making payment...				220 8 0
			Total Rs. ...	2,45,731 6 0

25. The last instalment was not paid during the year under report as the machinery and mains were not finally tested, though the draft for the amount had been purchased.

26. In addition to the above, the vent-shafts and their fittings on the Shone and Ault principle of ventilation were purchased from Messrs. Hughes and Lancaster to the value of £749, of which a part payment of £654 was made during the year.

27. The cost of remittance of £654 was Rs. 11,791 plus Rs. 20, the cost of telegraphic instructions.

28. The air mains and sealed sewage mains with their fittings were all delivered on the ground in good time and were laid by Messrs. Richardson and Cruddas, the sub-contractors of Messrs. Hughes and Lancaster, as the trenches to receive the pipes were made ready by Messrs. Mistri, Bhedwar, Vachaghandi & Co.

29. The total value of these pipes and fittings laid complete as provided for by the contract was Rs. 50,635. Payments amounting to Rs. 47,893 were made to the Contractors on this account up to the end of the year: the final bill has been prepared, and it amounts to Rs. 51,026.

(C).—Works in Engine-house, Boiler-house, Coal Store, Chimney, Engineer's and Firemen's Quarters at the Compressor Station, Works in Ejector Chambers, and Works in Excavation and Masonry for Air Mains and Sealed Sewage Mains.

CONTRACTORS—MESSRS. MISTRI, BHEDWAR, VACHAGHANDI & Co.

30. As stated in the preceding Annual Report, the works were not completed even within the extended contract period which expired on 1st May 1895. The attention of the Contractors was continually drawn to this circumstance by myself and particularly by the Commissioner under his No. 3849, dated 24th May 1895.

31. The engine-house and boiler-house were ready to allow of the erection of the engines, boilers, and other machinery, but the roof, windows and doors were not finished by the 1st of May, when the contract time of Messrs. Hughes and Lancaster for erecting the machinery expired, and owing to this delay they could not complete their work.

32. The works were practically completed on 1st October 1895, from which date the period of 12 months' maintenance will commence. There were some minor items left unfinished, and they have been carried out departmentally.

33. The final bill submitted by the Contractors amounted to Rs. 89,477 as against the contract amount of Rs. 82,239. This claim was objected to and argued upon with the Contractors, and the bill, as finally settled with them, amounted to Rs. 78,077, which shows a saving of Rs. 4,162 on the sanctioned grant. The minor works which the Contractors did not carry out will, however, absorb about Rs. 1,000 from this saving.

2.—UMARKHADI SEWERAGE WORKS.

CONTRACTORS—MESSRS. BULKLEY & Co.

34. The Contractors having withdrawn from the works, the completion thereof was commenced departmentally, but was stopped when the S.-W. monsoon of 1895 set in. It was then considered advisable to complete the works by contract, and tenders, returnable on 29th August, were invited.

35. Six copies of the form of tender were sold, but two tenders only were received—one from Mr. Sitaram Lakshman and the other from Messrs. Spencer & Co., the former amounting to Rs. 1,81,011 and the latter to Rs. 2,39,065.

36. Mr. Sitaram Lakshman's tender was accepted under the Standing Committee's Resolution No. 6558, dated 18*th* September 1895 ; and the contract having been executed on the 6th November, the order to commence the work was given on the same day.

37. The contract period for completion is 10 months, which will expire on 6th September 1896. It is premature to say whether or not the works will be completed within the contract period, but there is no particular reason why they should not be.

38. The total amount spent on the Umarkhadi Works to the end of the financial year was Rs. 2,14,682-14-10.

3.—CONNAUGHT ROAD AND SUSSEX ROAD DRAINAGE AND SEWERAGE WORKS.

CONTRACTORS—MESSRS. MISTRI, BHEDWAR, VACHAGHANDI & Co.

39. The two Guest and Chrimes's patent tell-tales which the Contractors had not provided were obtained from Messrs. Richardson and Cruddas for Rs. 70 each, or Rs. 140 for the two, and were fixed at the Contractors' cost. The charges incurred for fixing them amounted to Rs. 4-6-0.

40. The amount payable to the Contractors for the two tell-tales fixed complete was Rs. 100, and the excess cost, *viz.*, Rs. 44-6-0, was recovered from their deposit.

41. The work, as far as the Contractors are concerned, has been completed and paid for. The only work remaining to be done which was included in the contract consists of (*a*) the metal vent-shafts, which cannot be put up until buildings are erected suitable to receive them ; and (*b*) the connections of the service pipes of the flush tanks, which cannot be connected until water mains are laid in the roads.

4.—PAREL SEWERAGE WORKS (GRAVITATION PORTION).

CONTRACTORS—MESSRS. MISTRI, BHEDWAR, VACHAGHANDI & Co.

42. These works, which were commenced on 1st December 1894, were not completed within the contract period of six months, which expired on 31st May 1895; and although the contract time was extended by one month, namely, to the end of June 1895, a good deal of work comprised in the contract even then remained to be done.

43. The whole of the contract was practically completed at the end of December, but some defects remained to be remedied, and these the Contractors were called upon to attend to.

44. The final bill cannot be passed until the defects are satisfactorily remedied.

45. The total expenditure passed to the end of the financial year was as follows:—

	Rs.	a.	p.
Establishment	6,695	2	0
Contingencies	2,667	7	9
Work	45,705	13	1
Road Repairs	3,059	6	5
Total Rs. ...	58,127	13	3

NEW WORKS COMMENCED DURING THE YEAR.

5.—MAZGAON SEWERAGE WORKS (GRAVITATION PORTION).

CONTRACTORS—MESSRS. SULEMANJI MULLA ABDULALI & Co.

46. The Corporation sanctioned my proposal for the execution of these works at an estimated cost of Rs. 3,32,661 under their Resolution No. 6098, dated 5th September 1895.

47. I proposed to use 30″ and 24″ C. I. pipes for the pipe sewer in Grant Road from Parel Road to Kharsetji Suklaji Street, and though at first some objection was taken to the use of C. I. pipes for the purpose, the matter having been fully considered, the objection was withdrawn, and my design as proposed was sanctioned.

48. Tenders returnable on 24th October 1895 were invited on 10th October.

49. Five copies of the form of tender were sold, but only two tenders were received as follows :—

Mr. Sitaram Lakshman	...	...	...	Rs. 2,87,999
Messrs. Hirji Bhojraj & Co. ...		...	...	„ 3,17,138

50. The first tender was Rs. 20,753 and the second Rs. 49,892 higher than my estimate.

51. Comparing the rates with the recent tender for the Umarkhadi Works received on 29th August from Mr. Sitaram Lakshman, the rates of his tender for Mazgaon were found to be much higher, and no satisfactory explanation of this could be given.

52. Under these circumstances, the two tenders received were declined, and the earnest money returned.

53. Another offer was received by the Municipal Commissioner from Messrs. Sulemanji Mulla Abdulali & Co. to carry out the works at rates 4 per cent. less than those of my estimate, undertaking to complete the works in 2 years from date of commencement, and the offer was accepted under the Standing Committee's Resolution No. 9049, dated 13th November 1895.

54. The contract was executed on 23rd November 1895, and an order to commence the work was given the same day.

55. The progress which the Contractors have made is very creditable, and there is at present no reason to doubt that the works will be completed within the contract period.

56. The total expenditure passed up to the end of the financial year was as follows :—

				Rs.	a.	p.
Establishment	...	...	...	11,231	9	6
Contingencies	...	...	...	1,609	2	5
Work ...	...	...	...	27,773	11	6
Road Repairs	...	...	...	5,865	7	11
			Total Rs. ...	46,479	15	4

6.—MALABAR HILL AND KHAMBALA HILL SEWERAGE WORKS (GRAVITATION PORTION).

CONTRACTOR—MR. SAYAJI NAGUJI.

57. The Corporation under their Resolution No. 6099, dated 5th September 1895, sanctioned the proposal for carrying out the sewerage works in the gravitation portion of the district at a cost of Rs. 1,57,026.

58. Tenders were advertised for on the 21st October, and were made returnable on 1st November 1895.

59. Six forms of tenders were sold, but only four tenders were received. They are as follows :—

1.	Amruta Babaji & Co.	...Rs. 1,28,333
2.	Sulemanji Mulla Abdulali & Co. ...	... „ 1,23,159
3.	Spencer & Co.	... „ 1,22,998
4.	Sayaji Naguji	... „ 1,17,978

60. The lowest tender—that of Mr. Sayaji Naguji for Rs. 1,17,978—was accepted under the Standing Committee's Resolution No. 9407, dated 20th November 1895.

61. The contract was executed on the 30th November 1895, and an order to commence the work was given on the same day.

62. The contract period for completion is 18 months, which expires on 31st of May 1897. The progress of the work is very satisfactory, and gives good promise of completion within the contract period.

63. The total expenditure passed up to the end of the financial year was as follows :—

	Rs.	a.	p.
Establishment	1,784	6	6
Contingencies	610	8	8
Work	29,168	13	8
Road Repairs	2,656	4	0
Total Rs. ...	34,219	11	10

(1).—FERGUSSON ROAD AND CHINCHPOKLI SEWERAGE GRAVITATION DISTRICT.

64. The Corporation sanctioned in their Resolution No. 12557, dated 30th January 1896, the carrying out of these works at a cost of Rs. 81,617, together with Rs. 6,500 for a pipe sewer in Fergusson Road and Rs. 5,455 for a pipe sewer in Bapty Road, or a grand total of Rs. 93,572.

65. No tenders were invited for these works as the season was too far advanced to allow of the preliminary arrangements (including the provision of stoneware pipes) being made for a general commencement of the works before the rains.

(2).—OLD RACE COURSE SEWERAGE DISTRICT (GRAVITATION PORTION).

66. The Corporation sanctioned my proposal to carry out these works at a cost of Rs. 40,815 under their Resolution No. 12570, dated 30th January 1896 ; but there was insufficient time to obtain stoneware pipes and make other preliminary arrangements so as to commence the works during the fair season.

SUPPLY OF STONEWARE PIPES AND FITTINGS, IRON ARTICLES AND CEMENT.

67. Under the contract, dated 23rd October 1894, for the supply of stoneware pipes and fittings for the Parel Sewerage Works, Messrs. Richardson and Cruddas were bound to complete the delivery on or before 28th February 1895 ; but the whole of the supply was not delivered until 22nd April 1895. The contract was varied by the Standing Committee's Resolution No. 3166, dated 3rd July 1895, and the period extended accordingly.

68. Tenders for the supply of the stoneware pipes and fittings required for the gravitating portions of the Mazgaon and the Malabar Hill and Khambala Hill Sewerage Districts were invited on 27th September 1895. They were returnable on the 28th October, and two tenders were received—one from Messrs. Richardson and Cruddas for goods manufactured by Messrs. Doulton & Co., and the other from Messrs. Garlick & Co. for goods manufactured by Messrs. Burn & Co. of Jabalpur and Raniganj.

69. As Messrs. Doulton & Co.'s pipes have all along been used exclusively on the Bombay Sewerage Works and have proved most satisfactory, it was considered very undesirable to now use pipes of other manufacturers.

70. The tender of Messrs. Richardson and Cruddas was, under the circumstances, accepted under the Standing Committee's Resolution No. 9755, dated 27th November 1895, and the contract was executed on 8th January 1896.

71. The Contractors, in consideration of the acceptance of the tender having been delayed a month after submission, applied for a corresponding extension of time for delivery, and this was granted by the Standing Committee under their Resolution No. 10780, dated 19th December 1895.

72. It was stipulated that the whole of the supply should be delivered in six equal instalments. The first instalment was due on 15th February 1896, and the last on 15th July. Though the delivery of the supply under this contract was commenced in the first week of January—that is, more than a month earlier than the contract date—the subsequent supply was irregularly delayed and not commensurate with the progress of the several works. The pipes were used as fast as they were delivered, and at one time there were no 9″ pipes in stock. In this difficulty a few half-socket pipes lying in store near the Municipal Workshops were used (with the Commissioner's permission) in some emergent cases.

73. Messrs. Richardson & Cruddas, doubtless, did their utmost to meet the conditions of their contract, and supplied some pipes from their own stock. The delay in the arrival of the pipes was due to a large number of the P. & O. steamers having been chartered by the Government for the transport of troops to India and Africa. This upset all the arrangements of Messrs. Doulton & Co., which had been carefully considered and worked out.

74. The stoneware pipes and fittings required for the sewerage of the Fergusson Road and Chinchpokli and the Old Race Course Gravitation Districts and for Bapty Road were ordered from Messrs. Richardson & Cruddas in extension of their contract, dated 8th January 1896, but at reduced rates. In consideration of this reduction, the invitation of tenders was dispensed with, and the purchase was sanctioned under the Standing Committee's Resolution No. 14813, dated 25th March 1896.

75. The 9″ stoneware pipes and junctions manufactured by Messrs. Burn & Co., of Raniganj, which were purchased for experimental use in the Parel Sewerage Works, were not so used as they were not received in time. They have, however, been used in the Mazgaon Sewerage Works.

76. Ten 12″ sluice valves required for the Colaba Sewerage Works were obtained from Messrs. John Fleming & Co. at Rs. 120 each, after obtaining quotations from four different firms. A formal contract for the supply of the valves was executed on the 10th July 1895.

77. Tenders, returnable on 3rd October 1895, for the supply of cast iron and galvanized sheet iron vent-shafts and cast iron covers, frames and steps required for manholes on the Mazgaon and the Malabar Hill and Khambala Hill Sewerage Works were invited on 20th September 1895.

78. Three tenders were received, and the lowest tender (that o Messrs. Sulemanji Mulla Abdulali & Co.) was accepted at rates aggregating to Rs. 28,211 under the Standing Committee's Resolution No. 7079, dated 9th October 1895.

79. The contract was executed on 19th November 1895 and the supply under the contract was deliverable in six equal monthly instalments, the first batch being due on 31st December 1895 and the last on 31st May 1896.

80. The delivery of the goods was very regular, and the supply was completed within the contract period.

81. The supply of similar articles required for the sewerage of the Fergusson Road and Chinchpokli and the Old Race Course Gravitation Districts was obtained from Messrs. Sulemanji Mulla Abdulali & Co. in extension of their contract, dated 19th November 1895, under the Standing Committee's Resolution No. 166, dated 8th April 1896.

82. Ninety-seven 30″ cast-iron pipes and one hundred and twenty-two 24″ pipes being required for the sewerage of the Mazgaon Gravitation District, tenders for the same, returnable on 12th October 1895, were invited on 20th September. Fifteen copies of the form of tender were sold to 11 firms, but only four tenders were received as follows :—

	Rs.
George Service and Company	37,325
Sulemanji Mulla Abdulali and Company	33,476
John Fleming and Company	30,173
Richardson & Cruddas	28,651

83. Messrs. Richardson & Cruddas stipulated in their tender for a deviation in weight of 2 per cent. either way ; but even taking for granted that the deviation in the weight would be always 2 per cent. in excess, the amount of their tender came to only Rs. 29,224, which was lower than that of the next higher tender.

84. The tender of Messrs. Richardson & Cruddas was accepted at Rs. 29,224 under the Standing Committee's Resolution No. 7500, dated 16th October 1895, and the contract was executed on 18th November 1895.

85. The whole of the supply under the contract was to be completed on 31st January 1896, but it was not until the 23rd February that the delivery was completed. The contract period was extended accordingly by the Standing Committee under their Resolution No. 1533, dated 13th May 1896, it having been shown that the delay was quite unavoidable, and it had caused no loss or inconvenience to the Municipality.

86. Cast iron flooring plates for covering the spaces between the engines at the Colaba Compressor Station being required, it was considered advisable to obtain them from Messrs. Richardson & Cruddas, they being the sub-contractors of Messrs. Hughes and Lancaster for fixing the machinery at the Compressor Station.

87. It was originally intended to fix wrought iron plates, and a provision of Rs. 1,078 was made for this item in the contract with Messrs. Mistri, Bhedwar, Vachaghandi and Company. The substitution of cast iron plates was, however, deemed desirable, and the cost amounted to only Rs. 730.

88. The proposal for this substitution was sanctioned under the Commissioner's No. 11986, dated 9th September 1895, and the matter was reported to the Standing Committee under the Commissioner's No. 11987, dated 9th September 1895. The contract was executed on 17th September 1895, and the plates were supplied and fixed for the agreed amount.

CEMENT.

89. Indents for the cement required for the several works referred to in this report were, as before, made on the Drainage Engineer during the year. Previous intimation as to the requirements of the works was given to him to enable him to keep a sufficient stock in hand.

Note.—The Report on Public Works—**A** to **I**—is by M. C. Murzban, Esq., C.I.E., F.R.I.B.A., M.I.C.E., Executive Engineer, Municipality, forwarded with his letter No. 6317, dated 10th August 1896.

The Report on **J**—Fire Brigade—is by W. Nicholls, Esq., Chief Officer of the Fire Brigade, forwarded with his letter No. 244, dated 18th May 1896.

The Report on **K**—Gardens—is by C. D. Mahaluxmivala, Esq., Superintendent of Municipal Gardens, forwarded with his letter No. 356, dated 10th June 1896.

The Report on **L**—The Victoria and Albert Museum—is by the Secretary and Curator, Dr. MacDonald, M.D., B.SC., C.M., forwarded with his letter No. 121, dated 11th May 1896.

No. 6317 OF 1896-97.

EXECUTIVE ENGINEER'S OFFICE,

BOMBAY, 10*th August* 1896

To

THE MUNICIPAL COMMISSIONER

for the City of Bombay.

SIR,

I have the honour to forward herewith the Administration Report of this Department for the year 1895-96, as requested in your No. 385 dated 13th April 1896.

2. The report is divided under the following heads :—

	Paras.
A.—Introductory Remarks.....	3 to 11
B.—Drainage Works	12 to 141
C.—Water Works	142 to 241
D.—Municipal Buildings—Construction and Repairs	242 to 282
E.—Regulation of Streets and Buildings	283 to 303
F.—Roads	304 to 350
G.—Public Lighting.....	351 to 380
H.—Workshops	381 to 397
I. General—Contracts, Rights Sold, Bills, Notices and Correspondence, Garlick's Incinerator, Municipal Properties and Municipal Servants Act.....	398 to 409

A.

INTRODUCTORY REMARKS.

ESTABLISHMENT.

3. I held the appointment of the Executive Engineer, Municipality, throughout the year, and was assisted by the following officers in conducting the duties of the different branches of the Department.

4. MR. S. TOMLINSON, M.I.C.E., Water Engineer, in the Water Works Branch of this Department, assisted by MR. NASSARWANJI DORABJI BHADA, A.M.I.C.E., Assistant Engineer. MR. TOMLINSON was allowed privilege leave from 6th May to 27th July 1895, and MR. C. C. JAMES, Drainage Engineer, carried on the duties of his office in addition to his own during the period of MR. TOMLINSON'S absence.

5. MR. C. C. JAMES, A.M.I.C.E., sub *pro tem* Drainage Engineer, in the Drainage Works Branch.

6. My personal assistant, MR. MANEKJI SHERIARJI BHARUCHA, L.C.E., was in charge of the Road Department during the year. He also assisted me in preparing projects of works, framing reports, and supervising new works.

7. MR. B. H. HEWETT, who was First Engineer and Superintendent of the Love Grove Pumping Station under MR. JAMES, was appointed as Assistant Engineer, Mechanical Branch, from 1st May 1895. He supervised the working, repairs and maintenance of the machinery at the Love Grove Pumping Station and the Municipal Workshops, of the road rollers, the road scraping and brushing machines and the electric lights machinery, &c.

8. MESSRS. PUNDLIC GANESH, L.C.E., KAIKHOSRU PESTANJI BHEDWAR, L.C.E., and JAMSETJI DADABHAI NADIRSHAH, L.C.E., all of whom are qualified Assistant Engineers, assisted me in matters connected with the regulation of streets and buildings.

9. MR. KAIKHOSRU PESTANJI BHEDWAR was allowed privilege leave from 15th January to 14th March 1896, and MR. PUNDLIC GANESH and MR. JAMSETJI DADABHAI NADIRSHAH conducted his duties in addition to their own during his absence on leave.

10. MR. GOVINDRAM DULLUBHRAM, Architectural Surveyor, was in charge of the Architectural and Drawing Branches. He helped me in preparing plans and estimates of all new buildings and in supervising the construction of those in progress.

11. MR. SORABJI BARJORJI, the Chief Clerk and Accountant, was in charge of the Clerical and Account Staff of this Department, and helped me in supervising and guiding the account and clerical work of this Department.

B.

DRAINAGE WORKS.

	Paras.
PUMPING STATION AT LOVE GROVE, WARLI	12 to 40
Efficiency of the pumping engines	12
Result of fortnightly observations	13
Total number of revolutions of the engines during each month of the year	14
Taking over the engines from, and final settlement of accounts with, Messrs. James Simpson & Co.	15
Slight breakages of the pumping plant ...	16
Result of the working of the engines during the year	17
Comparison of the cost of working the engines with that of the several pumping installations in London	18.
Appointment of the Superintending Engineer as Assistant Engineer, Mechanical Branch, and the appointments of 1st, 2nd, 3rd and 4th Engineers	19
Average consumption of coal compared with the preceding year	20
Average rate paid for coal compared with that for the last year	21
Purchase of the Dermatine valve faces ...	22
Replacing of piston rings with new ones ...	23
Purchase of an armature for the electric light dynamo and the working of the electric light installation	24
Purchase of a double cylinder steam winch for lighting the screens...	25

PUMPING STATION AT LOVE GROVE, WARLI.—*contd.*

	Paras.
Purchase of cap bolts and nuts and tubes for the steam-boilers	26
Purchase of a bottom scraper bar and two dozen scrapers for the economiser	27
Transfer of Rs. 1,200 to the grant for contingencies and stores	28
Transfer of Rs. 1,000 to the grant for repairs to machinery and advisability of keeping the engines in thorough repairs	29
Savings in the grant for water supply ...	30
Plastering of one of the condensing tanks with Indian patent stone to make it watertight and prevent wastage in the consumption of water	31 & 242
The marking off of the property purchased for the new engine house with boundary stones	32
Trial of valve faces made of a material called "Celluvert," which proved inferior to Dermatine	33
Obstruction at the mouth of the Outfall Sewer	34
Fixing of the four sets of Henderson's patent mechanical stokers	35 & 243
Letting of Mr. Varjivandas Madhavdas' large bungalow to Veterinary Lieut.-Col. J. Anderson	36
Want of a godown and office at the Pumping Station	37
Desirability of enlarging the shred-lifters ...	38
Unpleasant smell at the station, which is mostly attributable to the storm-water channel on the seaside of the sluices	39
Statement of the Budget grants of the Pumping Station	40

COLABA AIR COMPRESSOR STATION (SHONE SYSTEM)	Paras. 41 to 56
Description of the Installation	41
Completion of the Central Compressor Station and result of the official trials of the engines and boilers on the 8th, 9th and 10th of July 1895	42
Trial of the ejectors in No. 2 Station and formal opening of the Compressor Station by the Municipal Commissioner on the 22nd August 1895	43
Completion of the lines and connections to the various ejector stations on the 12th December 1895	44
Regular working of the Compressor Station	45
Connections made to the system	46 & 47
Average daily consumption of coal	48
Appointments of the 1st and 2nd Engineers...	49 & 50
Savings in the grant for Establishment transferred to the grant for repairs to machinery and contingencies and stores, Love Grove Pumping Station	51
Proposed provision of an Electric Light Installation and the tiling of the engine-room floor	52
Purchase of a pressure recorder for automatically recording the air pressure maintained at the station	53
Purchase of a small platform scale for weighing coal and the making of a coal-weighing box, a vice-bench, a cupboard for stores, a writing table, and two oil tanks at the Municipal Workshops	54
Daily reports showing the number of engines at work, their revolutions and the consumption of coal	55
Statement of the Budget grants of the Pumping Station	56

	Paras.
HOUSE CONNECTIONS, &c.	57 to 62, 242 & 243
Decision of the Corporation regarding the execution of house-connection works ...	57
The sanction of a grant of rupees one lakh for the drainage-connections of new houses and repairs to the connections already made	57
The employment of an establishment for carrying out the house-connection works and for preparing estimates of the cost of house-connections in the Colaba and Parel Sewerage Districts	57 to 60
House-connections in the Agripada District...	61
STORM-WATER DRAINS, &c.	63 to 79
Storm-water drain with manholes and water gullies in Cruickshank Road	63 to 65 & 242
Storm-water drain on Dadar Road and Portuguese Church Road	66 to 70 & 242
Open drain in the line of the existing water course near Elphinstone Road between Soparibag and DeLisle Roads	71 to 77 & 243
Cleaning of the open main drain from the Municipal Pipe Depôt at Bellasis Bridge to Love Grove sluice gates	78 & 79
MAIN SEWERS, PIPE SEWERS, CATCH-PITS, VENT-SHAFTS, &c. ...	80 to 107, 242 & 243
Pipe sewers with manholes, automatic flush tanks and metal vent-shafts in Kalachauki Road	80 to 85 & 242
Catch-pits on pipe sewers and branch drains	86 to 91 & 242
Arrangement in pipe sewer manholes to discharge sewage from a higher level to a lower level without splash	92 to 94, 242 & 243
Tidal flap at the mouth of the Sonapur drain	95 to 101
Automatic sewage height recorders	102 to 104 & 243
Vent-shafts on main sewers	105 to 107
Vent-shafts in Agripada District	62, 242

	Paras.
LATRINES AND URINALS	108 to 115
LATRINES	108 to 113
Koliwada, Mazagon	108 & 242
Mahim	108 & 242
Worli Middle Pakhadi	109 & 242
Worli Moti Pakhadi	109 & 242
Charni Road Garden	242
Parel Back Road	110 & 242
Dharavi	111, 112 & 242
Parel Village	111, 112 & 242
Parbhadevi	113
Colaba N. S. Depôt	242
Sankli Tank E Ward Office	242
URINALS	114 & 115
Paltan Road	114 & 242
Carnac Road	114 & 242
Junction of Hornby Road and Carnac Road ...	114 & 242
Bazar Gate Garden	114
Dalal Street	115 & 242
Junction of Chinch Bunder and Dongri Street	115 & 242
Each end of the Musjid Bridge	115 & 242
Junction of Northbrook Street and Grant Road	115 & 242
Near the Shipping Office	115 & 242
Near the Fort Market	115 & 242
Kochin Street...	242
Kalikat Street...	242
DRAINAGE SLUICES	116
MISCELLANEOUS DRAINAGE	117 to 122
Repairs, alterations and construction of drains, &c.	117 & 242
Work done by scrapers	118
Supervision of the erection of new latrines and urinals	119
Supervision of the drainage arrangements of new buildings	119
Service of notices	120 & 121
Issue of summonses	122
WORKS EXECUTED	123 & 124
Departmentally	123
By the Petty Works Contractors	124

	Paras.
STORES AT BELLASIS BRIDGE DEPOT ...	125 to 136
Stoneware pipes	125 to 127
Cast-iron and galvanized sheet-iron fittings, manholes and other castings	128 to 130
Cement	131 to 135
Value of stores in hand and of stores received, issued and balances	136
GENERAL REMARKS	137 to 141
Summary of work got through by the Drainage Office	137
Shone system and house-connections therewith ...	138
House-connections generally	139
Satisfactory working of the Worthington Pumps at Love Grove	140
Preference of water closets to privies	141

PUMPING STATION AT LOVE GROVE, WARLI.

12. The Worthington Triple Expansion Sewage Pumping Engines continue to give satisfaction, and notwithstanding the large amount of wear and tear caused by the passage of silt through the pumps necessitating repairs, their efficiency has been maintained.

13. Fortnightly observations taken by the Drainage Engineer's staff show an average efficiency of 94 per cent. for the year under report.

14. The following table gives the total number of revolutions of all engines for each month of the year :—

Month and year.	Total number of revolutions.	
March 1895	1,569,132	
April "	1,358,387	
May "	1,398,449	
June "	1,746,452	
July "	2,166,820	
August "	2,202,279	
September "	2,108,175	
October "	1,899,101	
November "	1,711,824	
December "	1,662,194	
January 1896	1,790,631	
February "	1,593,199	
	Total for the year	21,206,643

15. The whole of the plant was taken over from the makers, Messrs. James Simpson Co., in the month of May 1895, and a final settlement was arrived at by the Municipality paying to the Company the last instalment of £2,396, the Company foregoing their claim of £475-14-6 for the supply of new valve-faces, &c., and the Municipality their claim of Rs. 2,000 for the renewal of pump rods.

16. Slight breakages of the plant continue to occur, but they are not more frequent or serious than must be expected with large pumps of this description. On August 26th the left-hand pump rod of No. 1 engine broke, and 4 new suction frames and 3 delivery frames have been put in to replace broken ones during the year. Such breakages do not, however, in any way interfere with the efficiency of the station, as three engines are the maximum number required to keep the sewage down, the fourth engine being always available to replace the one stopped for repairs.

17. The following statement shows the result of the working of the engines at Love Grove during the year under report :—

Period.	Average number of gallons pumped during 24 hours.	Coal consumed per one million gallons.	Water supply.	Cost per million gallons lifted one foot high.	Remarks.
		Cwt. qrs.	Gallons.	Rs. a. p.	
Wet weather from 1st June 1895 to 30th September 1895	34,570,720	5 1·42	33,500,000	0 4 11	
Dry weather from 1st March 1895 to 31st May 1895 and from 1st October 1895 to 29th February 1896	26,912,330	5 0·86	33,500,000	0 5 1	
From 1st March 1895 to 29th February 1896...	29,465,127	5 1·08	33,500,000	0 5 0	

18. The following statement shows the cost of working of the Love Grove engines during the year under report as compared

with those of the several pumping installations in London :—

Pumps.	Average cost per one million gallons lifted one foot high.		Remarks.
New Worthington Pumps, Love Grove	60	Pies	From 1st March 1895 to 29th February 1896.
Abbey Mills Pumping Station, London. (Worthington Pumps)	51	Pies	
Western Pumping Station, London. (Beam engines and centrifugal pumps)	90	,,	
Crossness Pumping Station, London. (Beam engines and centrifugal pumps)	84	,,	For the year ending 31st December 1893.
Deptford Pumping Station, London. (Beam engines and centrifugal pumps)	69	,,	The sterling rate is taken at 1*s.* 2*d.* = Re. 1.

19. On May 1st, Mr. Hewett, Superintending Engineer, was appointed to the newly created post of Assistant Engineer, Mechanical Branch, and ceased to reside at the Station. Mr. Singlehurst, 2nd Engineer, was appointed 1st Engineer on Rs. 250 per mensem. Mr. Nasarwanji Hormusji was promoted from 4th Engineer to 3rd Engineer on Rs. 90, *vice* Mr. Ardeshir B. Mehta, transferred to Colaba Air Compressor Station (Shone system); and Mr. G. Biem, who held an appointment in the establishment for the Electric Light Installation at the Municipal Workshops, was appointed to the post of 4th Engineer on Rs. 75 per mensem. Mr. Sorabji R. Ghandi was appointed 2nd Engineer on Rs. 100 per month from June 2nd.

20. 1,446 tons, 9 cwts. and 17 lbs. of West Hartley coal and 1,396 tons, 9 cwts. and 18 lbs. of Cardiff coal were consumed during the year, which gives an average daily consumption of 7 tons, 15 cwts. and 15 lbs., as against 8 tons, 3 cwts., 3 qrs. and 20 lbs. in the preceding year.

21. The average rate paid for coal being Rs. 19-5-5 per ton, or nearly one rupee more than that paid for 1894-95, the Budget grant for coal had to be supplemented by an additional grant of Rs. 2,980-11-4. A loss of about 20 tons of coal was occasioned by a fire, due to spontaneous combustion, on the 15th May 1895.

22. One thousand pounds of dermatine for the renewal of valve-faces were purchased from Messrs. Bradbury, Brady and Company at a cost of Rs. 3,750, the rate paid to them being Rs. 3-12 per lb.

23. A full set of piston rings for the steam cylinders were purchased from Messrs. James Simpson and Company at a cost of £65, or Rs. 1,188-9-1 at the current rate of exchange, as most of the original rings had worn out and have now been replaced with these new ones.

24. A new armature for the electric light dynamo was purchased from Messrs. F. Fischer and Company at a cost of Rs. 300. The present armature has been several years in work, and it was showing signs of wear; and as repairs to this class of machinery cannot be executed locally, it was considered advisable to obtain a spare armature for use in case of a breakdown. The electric light is an absolute necessity to the proper working of the station, and a stoppage of it for even one night would cause considerable inconvenience. The whole plant worked satisfactorily during the year.

25. A second-hand double cylinder steam winch for lifting the screens was purchased from Messrs. Sullemanjee Mulla Abdoolalli and Company at a cost of Rs. 200 to replace one which had been in use since the starting of the former pumping station and which was worn out.

26. Three dozen cap bolts and nuts and 6 tubes for the steam boilers were purchased from Mr. C. Briggs, the makers' agent, at a cost of Rs. 220-13-6.

27. One bottom scraper bar and 2 dozen scrapers for the economiser were purchased from Messrs. Greaves, Cotton and Company, the makers' agents, at a cost of Rs. 72.

28. All the articles mentioned in paras. Nos. 22 to 27 were paid for out of the grant for contingencies and stores, which had to be supplemented by a transfer of Rs. 1,200 from Section 1, Establishment, Colaba Pumping Station.

29. Under Section 3, "Repairs to Machinery," the Budget grant of Rs. 4,000 having been found insufficient, a sum of Rs. 1,000 was transferred to this head from the grant under Section 1. "Establishment for Colaba Pumping Station" (*vide* Standing Committee's Sanction No. 12435 of 29th January 1896).—For the current year the grant under this head has been increased to Rs. 6,000, and it is hoped that this will be sufficient. But should an expenditure in excess of this amount be necessary to keep the engines and pumps up to efficiency, it will be more economical to spend money in repairs and renewals than to prevent wear by the adoption of an elaborate scheme of silt-pits.

30. Under Section 7, "Water Supply," there was a saving of Rs. 684-11-0.

31. As mentioned in the last year's report, it was considered advisable to render one of the condensing tanks watertight by plastering with Indian patent stone in order to ascertain what saving could be made in the water grant. One tank has now been completed by Messrs. Garlick and Company and is watertight, and the saving effected during the current year will be noted in the next year's report.

32. The property which was purchased for erection of the new engine and boiler house was marked off by boundary stones during the year.

33. In October 1895, Messrs. Richardson and Cruddas supplied, for trial, 3 valve-faces made of a material called "celluvert," which they were of opinion might be found superior to dermatine. These faces were put into one of the pumps, together with 3 new dermatine faces, and after 32 days' work it was found that they had worn completely, while the dermatine faces were still quite good.

34. Some anxiety was caused at the commencement of the monsoon by an obstruction at the mouth of the outfall sewer. One barrel was completely blocked at times, and the sewer had to be relieved by taking off the manhole covers and allowing the sewage to overflow on to the foreshore. The obstruction commenced with an incoming tide and disappeared at the ebb of the same tide, and this tended to the supposition that some large stones or bags of concrete were being washed to and fro at the mouth of the pipe by the force of the waves. It is a matter which will shortly have to receive attention, as the total blocking of either of the outfall pipes would be a serious matter.

35. A sum of Rs. 10,000 having been sanctioned for mechanical stokers in the Budget for 1895-96, tenders were invited for the supply of 4 sets of Henderson's patent mechanical stoker, complete for attachment to the boilers. Messrs. John Fleming and Company's tender, amounting to Rs. 8,200, being the lowest of the two tenders received, was accepted, and a sum of Rs. 1,085-8-0 was sanctioned for fixing and contingencies by the Standing Committee under their resolution No. 4565, dated the 7th August 1895. The stokers were supplied by the firm in January 1896. They were not completely fixed and in working order at the end of the year under report.

36. Mr. James W. Tanish, to whom the large bungalow owned by Mr. Varjivandas Madhowdas at Love Grove was let at Rs. 75 per mensem from the 5th July 1896, having vacated it on 31st May 1895, it was relet to Veterinary-Lieut.-Col. J. Anderson from 1st June 1895 at a monthly rental of Rs. 80.

37. The want of a godown and office at this otherwise very efficient station still continues. The old dismantled engine-house, which is very unsightly in its present state, can be suitably converted to supply this deficiency.

38. As it has now been decided that Major Tulloch's scheme for silt-pits at Love Grove is not to be adopted, it is necessary to enlarge the present screens or shred-lifters, which are of far too small an area for the work they have to do. They quickly block with refuse, and at times cannot be cleaned in time to prevent a serious damming back of sewage in the main sewer.

39. A great deal of the unpleasant smell which is attributed to the station and the outfall arises from the storm-water channel on the sea-side of the sluices owing to the large quantity of foul mud which is washed into it and deposited during the fair season. As mentioned in the Annual Report for 1893-94, the channel falls the wrong way, and a bar exists across the entrance, and the accumulation of mud appears to get worse year by year, and the stench arising from it at low tide is very bad. Arrangements must sooner or later be made for removing this bar below low-water level, and the sooner the work is undertaken the better it will be for the health and comfort of persons living in the locality.

40. The following statement shows the grants for the several heads in the Budget for the maintenance of the station and the actual expenditure incurred under each head :—

Section.	Particulars.	Budget grants with transfers and extra grants.	Expenditure.	More.	Less.
		Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
1	Establishment	12,622 0 0	12,698 7 6	.....	423 8 6
2	Coals	54,980 11 4	54,980 11 4	.....	130 12 8

8	Telephone connection ...	200 0 0	87 8 0	.....	112 8 0
	Total ...	95,787 6 1	94,255 5 0	.....	1,532 1 1

COLABA AIR COMPRESSOR STATION (SHONE SYSTEM).

41. The machinery in connection with this installation consists of—

(1) Three sets of compound side by side non-condensing steam engines and air compressors, worked to a steam pressure of 120 lbs. The high pressure cylinders are 9″ diameter, the low pressure 14″ diameter, and the air compression cylinders 13″ diameter, all with a stroke of 18″.

(2) Two dry up-take tubular steam boilers of the marine type, 7′ diameter, 7′-9″ long, with one internal furnace 37″ diameter outside, and 80 tubes $2\frac{3}{4}$″ diameter.

(3) One wrought-iron air receiver, 7′ diameter and 24′ long.

(4) Two ejectors, of 500-gallon capacity each, fixed in No. 1 Ejector Station, which is situated on the Apollo Reclamation, near the Apollo Hotel.

(5) Two ejectors, of 500-gallon capacity each, fixed in No. 2 Ejector Station on the Colaba Causeway, near Grant Buildings.

(6) Two ejectors, of 500-gallon capacity each, fixed in No. 3 Ejector Station on the Wodehouse Road, near the new Colaba Station of B. B. & C. I. Railway.

(7) Two ejectors, of 300-gallon capacity each, fixed in No. 4 Ejector Station on the seaface near St. John's Church.

(8) Two ejectors, of 100-gallon capacity each, fixed in No. 5 Ejector Station on the seaface near the Royal Artillery Mess, Upper Colaba.

42. The work at the Central Compressor Station was practically completed in the beginning of July 1895, and official trials were made of the engines and boilers on the 8th, 9th and 10th of that month, when it appeared that the various clauses of the contract had been duly fulfilled, and the plant was from that date taken over by the Municipality.

43. On the 20th August 1895, a private trial of the ejectors in No. 2 Station was made, and on the 22nd idem, the Compressor Station was formally opened by the Municipal Commissioner.

44. The line and connection to the various ejector stations not being all complete at the time of opening the Compressor Station, it was not in regular work until the 12th December, when the Tramway Company's drain was connected to No. 2 Station.

45. Since then the Compressor Station has been in regular work night and day, and although sufficient time has not elapsed to ascertain the cost of raising sewage by this system, the working of the system itself has been in every way satisfactory.

46. Only a very few connections have as yet been made to the system, the principal ones being :—

(*a*) To No. 1 Station, the open drain at the back of the Apollo Hotel (temporary) and a godown of Gymkhana boat house at the Apollo Bunder.

(b) To No. 2 Station, the Tramway Company's stable drain and the Night-soil Depôt, the Fort Press Company's godowns at Arthur Bunder, the old Hemp and Jute Mills premises at Colaba Road, and Mr. Hormusjee Sorabjee Battliwala's premises at the junction of Bohra Cross Lane and Colaba Road.

(c) To No. 3 Station, the new Colaba Station of the B. B. & C. I. Railway Company, the chawls of Messrs. Tribhowandas Jadhavji and Nasserwanjee Dadabhoy at Victoria Bunder and Mr. Jagojee Hanmantrao's stable at Victoria Bunder.

47. No. 4 and No. 5 Stations having no connections, they have not as yet been put in regular work.

48. The average daily consumption of coal during the three months of the year (under report), for which the engines were working, was as shown below :—

Period.	Average per day.			
	Tons.	Cwt.	Qrs.	Lbs.
December 12th to December 31st 1895	0	19	0	22
January 1896	1	3	3	6
February 1896	1	6	2	9

49. On the 1st May 1895, Mr. Ardeshir B. Mehta was transferred from the Love Grove Pumping Station to the post of 1st Engineer at Colaba on a salary of Rs. 125 per mensem, and from the 1st January 1896, he has been allowed the full pay of the appointment, *viz.*, Rs. 150, with free quarters.

50. On the 23rd January 1896, Mr. Shamrao B. Kantak was appointed as 2nd Engineer at the station on a salary of Rs. 80 per mensem, also with free quarters.

51. The full staff not being appointed until the close of the year under report, a considerable saving accrued under the head of Establishment, provision having been made in the Budget for the employment of the staff from the 1st May 1895. A part of this saving, amounting to Rs. 2,200, was utilised to meet excess in the grants for Repairs to Machinery, Contingencies and Stores, Sections 3 and 4, Love Grove Pumping Station.

52. As the station was not in regular work until December 1895, there was also a considerable saving in the amount budgetted for coal, Section 2, Air Compressor Station. It has been proposed to expend a sum of Rs. 3,043-12-0 for the provision of an electric light installation for the station, the same being an urgent necessity, and a further sum of Rs. 862 for tiling the engine-room floor, as the present concrete floor absorbs oil and is difficult to keep clean.

53. A pressure recorder for automatically recording the air pressure maintained at the station was purchased from Messrs. Bradbury, Brady and Company at a cost of Rs. 260, which was met from the grant for Stores and Contingencies.

54. A small platform scale for the weighment of coal was also purchased from the Hardware Contractors at a cost of Rs. 150, and a coal-weighing box, a vice-bench, a cupboard for stores, a writing table, and two oil tanks were made at the Municipal Workshops at a total cost of Rs. 277-10-4, and the whole of this expenditure was met from the above grant for Stores and Contingencies.

55. Daily reports showing the number of engines at work, their revolutions, and the consumption of coal, &c., have been regularly submitted by the Assistant Executive Engineer, Mechanical Branch, to the Drainage Engineer, and by the latter officer to the Executive Engineer. The amount of sewage lifted by the ejectors could not be ascertained in the absence of counters, which were not fixed and in working order before the expiry of the year under report.

56. The following statement shows the grants for the several heads in the Budget for the maintenance of the stationand the expenditure incurred under each of the heads :—

Section.	Particulars.	Budget grants with transfers.	Expenditure.	More.	Less.
		Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p
1	Establishment ...	3,530 0 0	3,224 9 7	.....	305 6 5
2	Coals	8,693 0 0	3,043 12 0	.....	5,649 4 0
3	Reparis to Machinery.	600 0 0	263 6 0	.....	336 10 0
4	Contingencies and Stores	2,000 0 0	1,964 3 3	.....	35 12 9
5	Repairs to Buildings...	200 0 0	.....	.....	200 0 0
6	Telephone Connection.	200 0 0	.....	.....	200 0 0
7	Water Supply... ...	750 0 0	.....	.....	750 0 0
	Total ...	15,973 0 0	8,495 14 10	.....	7,477 1 2

HOUSE CONNECTIONS.

57. The Municipal Corporation under their No. 12429 resolved, on the 29th January 1896, "That having had a favourable experience of "the operation of its resolution of 3rd November 1882, extending "over a period of 13 (thirteen) years, and having applied the princi- "ple embraced in the resolution to various districts of the City with "satisfactory results, and finding that the principle is in complete ac- "cordance with the wishes of all the persons concerned, the Corporation "still adheres to that resolution, including in its scope all houses and "outhouses and all new houses which were formerly excluded, and is "now of opinion that the terms of the resolution of the 3rd November "1882, as now amended, should be made applicable in the future to all "the districts of the City;" and under their No. 13193, dated the 10th February 1896, the Corporation sanctioned—

(*a*) an advance of rupees one lakh for the cost of providing connections to new houses and repairs to the connections already laid down ;

(*b*) the employment of an establishment for a period of two months for preparing estimates for the cost of connections in the Colaba and Parel Sewerage Districts ;

(*c*) the employment of a staff for supervising and estimating the cost of the drainage connection of new houses ; and

(*d*) the employment of one mukadam and nine koolies for cleaning choked drains ;

And directed that the work of providing connections be proceeded with in the following order:—

First the Parel district, comprising in its area Government House Road, Parel Village, Lalwadi, Kalachauki Road and Parel Tank Road ; second the district known as Districts Nos. 1 and 2, Colaba, No. 1 District being bounded on the east by the Sailors' Home and the Apollo Bandar, and on the south and west by the Colaba Causeway, as far as the first cross street, No. 2 District being the whole of Lower Colaba from the south end of the Causeway to the railway crossings on Colaba Road ; third to complete the house connections in the remaining portion of the first drainage section.

58. The various establishments above referred to were employed, and the connection of new houses was taken in hand, from the 1st March 1896.

59. The house-connection work of all completed new houses was undertaken by the staff sanctioned by the Corporation, and the cost thereof was charged to the grant of one lakh of rupees, and the repairs of house-connections already put up by the Municipality was also carried out to the end of the year under reference.

60. No expenditure on this account was debited to the above grant of Rupees one lakh up to the 31st March 1896, as the expenses were incurred in March 1896.

House Connections in the Agripada District and erection of five masonry vent shafts.

61. The Drainage connection of three houses left unconnected in the Agripada District was completed by the Petty Works Contractors, Messrs. Deoram Keshavjee & Co., on 6th June 1895, at a total cost of Rs. 3,677-13-11.

62. The erection of the five masonry vent shafts was also completed by the same Contractors and the cost thereof amounted to Rs. 2,044-2-10.

STORM WATER DRAINS, &c.

Construction of a Storm Water Drain with Manholes and Water Gullies in Cruickshank Road.

Contractors—MESSRS. BIBRA, HIRJEE & Co.

63. The Contractors were, under the terms of their contract, bound to complete the work on or before the 12th May 1895, but they were unable to do so until the 2nd July 1895 under the following circumstances :—

(*a*) The Tramway Company refused to allow more than two excavations for connecting the water gullies under their line and the Company's objection was allowed on the ground of public convenience, because had all the excavations been in progress at one time the tramway traffic would have been practically stopped.

(*b*) The Contractors were for a time prevented from making certain trial pits on account of the departure and arrival of their Excellencies Lord Harris and Lord Sandhurst.

(*c*) Owing to the fact that the Contractors did not deposit a sufficient quantity of kerb stones and water-tabling at the site of the works in the early part of the year when it was possible to obtain these materials easily.

64. The contract time had consequently to be extended from the 12th May to 2nd July 1895, and the establishment charges from the 13th to 24th May were debited to the contingency provision for the work, and those for the remaining period of 39 days were recovered from the Contractors in accordance with the Standing Committee's Resolution No. 6709, dated 25th September 1895.

65. The total outlay on the work, including establishment and contingent charges, was Rs. 17,358-5-7.

Construction of a Storm Water Drain on Dadar Road and Portuguese Church Road.

Contractors.—MESSRS. AMRUTA BABAJEE & Co.

66. A grant of Rs. 4,853 was sanctioned for this work in the Loan Works Budget for 1893-94, but the amount was not available until the 2nd August 1894, when the Corporation, under their Resolution No. 4873, sanctioned an advance of the required amount from surplus cash balance pending the raising of a loan.

67. Tenders returnable on the 3rd December 1894 were invited for the work. No tenders having been received on that day, quotations were invited by a circular letter from several contractors and in response to it four tenders were received.

68. Messrs. Amruta Babajee & Co.'s tender, amounting to Rs. 3,473-3-0, being the lowest, was accepted as per Standing Committee's Resolution No. 13027, dated 20th February 1895.

69. The Contractors were, under clause 23 of their contract, bound to complete and give over the works within three months from the date of order, and this having been given to them on the 20th March 1895, they should have completed the work on the 19th June 1895, but they failed to do so until the 9th July 1895, owing to the delay in acquiring and handing over to them the ground on which the drains were to be laid : The contract time was consequently extended from the 19th June to 9th July 1895, as per Municipal Commissioner's No. 8991 of 31st July 1895.

70. The total outlay on the work, including establishment and contingent charges, amounted to Rs. 3,987-15-11.

Construction of an open Drain in the line of the existing Water course near Elphinstone Road between Soparibag Road and DeLisle Road.

71. A grant of Rs. 18,000 was sanctioned for this work from surplus cash balance under Corporation Resolution No. 7683 of 21st October 1895.

72. Tenders returnable on the 20th January 1896 were invited for the work. Three tenders were received, *viz.*, from Messrs. Amruta Babajee & Co., Messrs. Sullemanjee Mulla Abdoolalli & Co. and Messrs. Spencer & Co.

73. Messrs. Amruta Babajee & Co.'s tender was the lowest, but Messrs. Sullemanjee Mulla Abdoolalli & Co. had under some misunderstanding quoted different rates in the (*a*) schedule and (*b*) bill of quantities.

74. They stated that they understood that the rates in the schedule were meant for extra work only and expressed their willingness to execute the work at the rates quoted by them in the bill of quantities. Taking these rates accordingly their tender worked out lower than that of Messrs. Amruta Babajee & Co.

75. There was, however, a distinct note on the bill of quantities as follows :—

"*N. B.*—Tenderers are particularly requested not to fill up this bill "of quantities. The Contract is based on rates not on quantities."

And the Standing Committee under their Resolution No. 12741 of 5th February 1896 accepted the tender of Messrs. Amruta Babajee & Co. amounting to Rs. 12,787.

76. The Contractors were bound to complete and give over the work within three months from the date of order, which was given on the 24th February.

77. The work was in progress at the close of the year and bid fair to very successfully fulfil all anticipations in regard to it.

Cleaning the Open Main Drain from the Municipal Pipe Depot at Bellasis Bridge to Love Grove Sluice Gates.

78. A grant of Rs. 2,469 was sanctioned for this work under the Corporation Resolution No. 13968 of 14th March 1895.

79. The work was taken in hand departmentally, as per Municipal Commissioner's No. 842 of 17th April 1895, and as much silt as could be removed from the drain before the rains was removed at an expense of Rs. 1,089-5-3 and the balance of Rs. 1,379-10-9 has been reserved for further work after the rains of the coming year.

MAIN SEWERS, PIPE SEWERS, CATCH-PITS VENT SHAFTS, &c.

Works in Pipe Sewers, Manholes, Automatic Flush Tanks and Metal Vent Shafts in Kalachauki Road.

Contractors—MESSRS. SPENCER & CO.

80. The Contractors were bound under the terms of their contract to complete the works on or before the 15th January 1895, but they did not do so until the 4th March 1895.

81. As the works were in no way retarded owing to any delay on the part of the Municipality, the establishment charges at the rate of Rs. 160 per mensem were recovered from the Contractors from the 16th July to the 4th March, as per Standing Committee's Resolution No. 2057 of 22nd May 1895.

82. The construction of a masonry vent shaft on the pipe sewer was entrusted to the Contractors as an extra work and time up to the 4th May was allowed to them for the same.

83. As they did not complete this work until the 9th July the extra supervision charges incurred by the Municipality from the 5th May to 9th July were also recovered from the Contractors at the rate of Rs. 40 per mensem, and the painting of the shaft was deferred until the end of the rainy season in accordance with the Standing Committee's Resolution No. 5925 of 4th September 1895.

84. The painting work was completed by the Contractors on 26th November 1895.

85. The total outlay on the works, including establishment and contingent charges, amounted to Rs. 9,597-2-1.

Construction of Catch-pits on Pipe Sewers and Branch Drains.

86. Out of the total number of catch-pits sanctioned, *viz.*, 16 large and 60 small, 15 large and 34 small catch-pits were constructed during the year at a cost of Rs. 31,264-7-3.

87. It has been decided to construct the remaining 1 large and 26 small catch-pits after the rainy season of 1896-97.

88. It was not possible to complete the works earlier owing to the serious water difficulties met with in some of the catch-pits, especially in the one at the junction of Queen's Road and 1st Marine Street, where the excavation was effected by tides and the presence of a steam-pump was rendered necessary for a lengthened period.

89. In other catch-pits considerable trouble was experienced with the fine sand met with at varying depths along the line of the Queen's Road sewer.

90. Up to the end of the year each of the 7 large catch-pits that were working had been cleaned on an average three times, and each of the 29 small ones that were working were cleaned on an average four times, with the result that 4,104 cubic feet of silt was removed from them, and this silt, had it not been caught in these catch-pits must of necessity have formed its way into the main sewer and eventually to Love Grove and through the engines.

91. These catch-pits have so far been found successful, but some more time will be required to form a reliable opinion as regards their success or otherwise.

An arrangement in Pipe Sewer Manholes to discharge Sewage from a Higher Level to a Lower Level without splash.

92. A grant of Rs. 5,471 having been sanctioned for this work, the special stoneware bends and junctions required for the manholes were ordered from Messrs. Richardson & Cruddas, who were, under the terms of their agreement, bound to complete the delivery of the articles on or before the 5th March 1895, but they failed to do so until the 27th June 1895. They explained that the delay was due to the extremely bad weather which prevailed in England, completely blocking up the canals and rivers, interfered with the manufacture of the goods. They further explained that a 15" balance valve, the delivery of which was also considerably delayed, was sent by Messrs. Doulton & Co. per P. & O. Co.'s S. S. "Ceylon," but it having gone astray in transit they had to manufacture and send another in lieu of it.

93. Messrs. Richardson & Cruddas's contract time was under these circumstances extended up to the 27th June 1895, as per Standing Committee's Resolution No. 5237, dated 21st August 1895. The execution of the work was taken in hand departmentally in accordance

with the Municipal Commissioner's No. 14379, dated 11th October 1895, and was in progress at the close of the year.

94. The certified expenditure on account of the work up to the 31st March was Rs. 2,961-15-0.

Construction of a Tidal Flap at the mouth of the Sonapur Drain.

95. The amount sanctioned for the work was Rs. 4,400.

96. Quotations were obtained for the supply of (*a*) special tidal flap and (*b*) cast iron shoes, pile rings and bolts for piles; and the quotation of Messrs. George Gahagan & Co. being the lowest for the former and that of Messrs. Richardson & Cruddas being the lowest for the latter, were accepted as per Standing Committee's Resolution No. 14066 of 20th March 1895.

97. Messrs. George Gahagan & Co. were, under the terms of their contract, bound to deliver the tidal flap on or before the 7th May 1895, but they failed to do so until the 24th May 1895, and explained that the amount of iron work required was heavy and the progress of the work was impeded owing to the illness of their skilled workmen. The contract time was thereupon extended up to the 24th May 1895.

98. Messrs. Richardson & Cruddas were bound to supply the cast-iron shoes, pile rings, &c., on or before the 15th May 1895, but they also failed to complete the delivery until the 13th June.

99. Their explanation regarding the delay was that their despatch clerk omitted to send the bolts along with the other articles which were despatched on the 9th and 20th May 1895. The contract time was thereupon extended up the 13th June 1895.

100. The execution of the work was taken in hand departmentally in accordance with the Municipal Commissioner's No. 17883 of 2nd November 1894 and was in progress at the close of the year.

101. The certified expenditure on account of the work up to the 31st March was Rs. 4,230-2-3.

Automatic Sewage Height Recorders.

102. A sum of Rs. 3,000 was sanctioned for these recorders in the Budget for 1895-96.

103. Messrs. John Fleming & Co.'s offer to supply and erect in position two recorders complete with drum, float, chain, &c., was accepted at the rate of Rs. 867 each as per Standing Committee's Resolution No. 8705 of 6th November 1895, and the remaining sum of Rs. 1,266 was reserved for departmentally executing the masonry work and connections with the Municipal sewer.

104. Messrs. John Fleming & Co. were, in accordance with the terms of their agreement, bound to supply and erect the recorders on or before the 17th February 1896, but they were unable to do so until the close of the year under report.

Vent Shafts on Main Sewers.

105. A grant of Rs. 3,500 was sanctioned for this work.

106. Detailed estimates for each of the vent shafts were prepared and the sites for them were settled during the year.

107. It was decided to entrust the erection of five masonry vent shafts and of four zinc vent shafts to the petty work contractors for 1896-97.

LATRINES AND URINALS.

Latrines.

108. The construction of the latrines at Koliwada, Mazagon, and at Mahim was completed by Messrs. Deoram Keshavji & Co. during the year at a cost of Rs. 2,505-3-10 and Rs. 2,975-13-3.

109. The construction of the latrines at Warli Middle Pakhadi and Warli Moti Pakhadi was completed departmentally during the year, and the certified expenditure at the end of the year was Rs. 3,209-6-7 and Rs. 2,338-9-2 respectively.

110. The construction of the latrine at Parel Back Road was also completed departmentally during the year at a cost of Rs. 6,392-3-3.

111. The construction of the latrines at Dharavi and at Parel village was taken in hand departmentally and was nearly completed at the end of the year.

112. The certified expenditure at the end of the year was Rs. 1,877-7-2 and Rs. 2,304-5-7.

113. The construction of a twenty-seated water system latrine at Parbhadevi is still being deferred.

Urinals.

114. The construction of the urinals at Paltan Road and Carnac Road was completed by Messrs. Deoram Keshavji & Co. at the respective cost of Rs. 619-9-6 and Rs. 607-13-6, and that of the urinal at the junction of Hornby Road and Carnac Road and at the Bazar Gate Garden was completed departmentally during the year at the respective cost of Rs. 994-4-8 and Rs. 1,254-3-11.

115. The urinal in Dalal Street was thoroughly remodelled departmentally at a total cost of Rs. 402-15-9, and the construction of the following new urinals was also carried out departmentally during the year at the cost noted against each of them :—

	Rs.	a.	p.
At the junction of Chinch Bandar Road and Dungri Street...	637	15	5
At each end of Musjid Bridge (2 urinals) ...	827	8	5
At the junction of Northbrook Street and Grant Road	1,125	15	0
Near the Shipping Office	868	3	4
Near the Fort, Market	653	5	0

DRAINAGE SLUICES.

116. The sluices and penstocks at the following places, which are in charge of this department, have worked satisfactorily during the year with the usual staff, and the expenditure incurred has not exceeded the budget provision :—

(*a*) Dharavi.
(*b*) Warli.
(*c*) Love Grove.
(*d*) Flats.
(*e*) Bellasis Bridge.
(*f*) Queen's Road.
(*g*) Carnac Road.
(*h*) Mint Road.

MISCELLANEOUS DRAINAGE.

117. The works under this head, which comprised repairs, alterations, construction, cleaning and flushing of sewers and drains generally, and the cleaning of the main sewers, were carried out under the supervision of the Chief Inspector of Drains.

118. Daily reports in the prescribed form, showing the number of scrapers and the work done, were submitted by the Chief Inspector.

119. The erection of the latrines and urinals was supervised by the Chief Inspector of Drains and the drainage arrangements of new buildings were supervised generally by the Head Plumber.

120. The following statement shows that 2,231 notices were served on the house-owners when the requirements of the various sections of the Municipal Act were not complied with by them :—

Statement of Notices.

Section of the Municipal Act.	Total number issued.	Complied with.	Not complied with.	Remarks.
222	1	.....	1	
230	8	.....	8	
231	686	235	451	
232	24	3	21

WORKS EXECUTED.

Works executed departmentally.

123. The following is a Summary of Miscellaneous Works executed during 1895-96 for Municipal Departments and private parties by the Drainage Branch :—

Number of works.	Name of Department.	Aggregate Cost.
		Rs. a. p.
143	Drainage Department	48,445 12 8
137	Health do.	1,836 9 11
80	Road do.	1,194 7 9
16	Water do.	361 0 2
9	Market do.	188 7 4
5	Gardens do.	21 13 9
3	Fire Brigade do.	6 14 4
62	Private parties...	7,031 13 6
455	Total ... Rs.	59,086 15 5

Works executed by Petty Works Contractors.

124. The following works were entrusted to the petty works contractors, Messrs. Dewram Keshavji & Co., and were carried out by them under the supervision of the Chief Inspector of Drains and the Head Plumber :—

Consecutive No.	Nature of Works.	Locality.	Cost of the Work. Rs. a. p.
1	Laying 6" C. I. pipe across the road.	Opposite Goculdas Tejpal High School in Agiary Street.	156 0 10
2	Repairing side drain	Girgaum Back Road at the entrance to the Paper Mill Lane.	21 5 5
3	Construction of water entrances.	Both the approaches of Falkland Road overbridge.	588 1 6
4	Connecting the property No. 28.	Adjoining the building at Love Lane.	2,176 12 1
5	Removing vent pipe fixed to the compound wall of the Free Church of Scotland.	Carnac Road...	25 0 0
6	Laying 18" pipe drain	Between Nagpada Tank and Bellasis Road.	599 5 1
7	Construction of water entrance.	At the junction of Chinchpokli and the south entrance of Victoria Garden.	204 5 0
8	Annual repairs to drainage Chauki.	Foras Road	37 10 4
9	Do. do. ...	Bapty Road	126 13 9
10	Annual repairs to engine and boiler house.	Love Grove, Warli	377 10 4
11	Constructing masonry gully for fair weather connection of the Bellasis Road storm water drain with the main sewer.	Bellasis Road...	116 7 10
12	Annual repairs to the sluice house.	Love Grove, Warli	147 0 11
13	Annual repairs to sluice ...	Warli Koliwada	369 11 10
14	Annual repairs to Drainage Chauki.	Charni Road	110 1 6
15	Annual repairs to servants' quarters.	Carnac Road night-soil depôt.	6 13 7
16	Annual repairs to sluice house.	Dharavi	151 1 8
17	Removing and refixing additional railing to the Arthur Road side of the pipe depôt.	Arthur Road...	53 3 5
18	Annual repairs to pipe depôt. ...	Bellasis Road	42 0 11
19	Paving the floor of the latrine with Indian patent stone 1" thick.	Warli Moti Pakhadi ...	91 0 1
20	Do. do. ...	Warli Middle Pakhadi ...	88 14 10
21	Putting a galvanized sheet iron screen in front of the latrines.	Calicut Street	155 13 11

Works executed by Petty Works Contractors—(*contd*).

Consecutive No.	Nature of Works.	Locality.	Cost of the Work. Rs. a. p.
22	Lengthening the vent shafts and raising it 5 feet above the roof of the house owned by Mr. Jehangirjee Hormasjee.	Bruce Lane, Fort	95 13 1
23	Connecting the latrines and the hopper with 9" pipe sewer.	Colaba Night-soil Depôt ...	761 11 5

STORES AT BELLASIS BRIDGE DEPÔT.

Stoneware Pipes.

125. Stoneware pipes and specials for Parel, Mazagon and Khamballa Hill sewerage works were supplied by Messrs. Richardson & Cruddas and Messrs. Garlick & Co.

126. The goods supplied by Messrs. Richardson & Cruddas were manufactured in England by Messrs. Doulton & Co., and those supplied by Messrs. Garlick & Co. were manufactured by Messrs. Burn & Co. in Jabalpore (India).

127. The value of the pipes and specials (traps, junctions, bends, &c.) received during the year was Rs. 41,435-10-4 and of those issued to different contractors and sold to plumbers and others amounted to Rs. 86,582-7-1.

Cast-Iron and Galvanised Sheet Iron Fittings, &c.

128. Cast-iron manholes, frames and covers and galvanized vent shafts for special sewerage works were supplied by Messrs. Sullemanji Mulla Abdoolalli & Co.

129. Cast-iron manholes and other castings for ordinary drainage and other miscellaneous works were supplied by Messrs. Sorabjee Shapurjee & Co., who were the casting contractors for the year.

130. The total value of the fittings received and issued during the year amounted respectively to Rs. 18,774-5-9 and Rs. 22,795-13-11.

Cement.

131. The proprietors of the Palej Lal Gin Press Co. delivered 872 casks of Portland cement manufactured by Messrs. John, Cubit Gostling & Co., of London, that being the balance due under their contract of the 7th November 1894.

132. The following contracts were executed for the further supply of cement during the year :—

(*a*) Contract, dated the 27th April 1895, with Messrs. John Fleming & Co. for the supply of 2,500 casks of Portland cement manufactured by Messrs. Knight, Bevan and Sturge, of North Fleet, Kent, at Rs. 7-12-0 per cask; and

(*b*) Contract, dated the 20th February 1896, with Mr. Gulamali Jivaji for the supply of 2,000 casks of Portland cement manufactured by Mr. John Gostling, of Glasgow, at Rs. 7 per cask.

133. Messrs. John Fleming & Co. delivered in full their contract quantity of cement within the stipulated time.

134. Mr. Gulamali Jivaji delivered the first instalment of the 500 casks of the cement on the 20th February 1896 in accordance with the terms of his contract, but he was unable to deliver the 2nd instalment of cement due on the 1st March 1896 until the close of the year.

135. The total value of cement received and issued during the year from the new supply and previous year's stock was Rs. 34,137-3-4 and Rs. 34,077 respectively.

Value of Stores in hand and of Receipts, Issues and Balances.

136. The following statement shows that the value of stores in hand at the commencement of the year was Rs. 4,07,877-14-5, that the receipts and issues amounted respectively to Rs. 94,347-3-5 and Rs. 1,43,455-5-0, and that the total value of the stock in hand at the close of the year was Rs. 3,58,769-12-10.

SUMMARY.

GENERAL REMARKS.

137. The following is a summary of work got through by the Drainage Office :—

(1)	Inward numbers, including replies to references from Inspectors and other subordinates of this office	37,254
(2)	Outward letters and references to Inspectors, &c.	19,411
(3)	Notices served	2,231
(4)	Summonses issued	1,183
(5)	Contracts executed for works and supplies ...	20
(6)	Vouchers received and passed during 1895-96	1,967
(7)	Departmental and private works bills prepared and forwarded during 1895-96 ...	390
(8)	References made to Inspectors, &c., for certificates on vouchers	1,967
(9)	Reports and certificates received from the Inspectors, &c.	1,967
(10)	Requisitions received and forwarded ...	1,173
(11)	Morning reports received and checked ...	507

138. The Shone system at Colaba has been taken over by the Drainage Branch, but up to the end of the year under reference house-connections in this district had not been undertaken.

139. This applies to the rest of the City and there is no good progress to report under this head ; practically no house-connections have been done except in a few new houses since the year.

140. The Worthington Pumps at Love Grove have continued to work satisfactorily and the average consumption of coal has slightly decreased.

141. There is a steady advancing feeling in the City as to the advantages of water closets over privies.

TANSA LAKE AND DEPENDENT WORKS.

Rainfall and Collection.

142. The rainfall for the year 1895 was 92·37 inches; that for 1894 was 114·64 inches, and 1893, 116·32 inches.

143. The heaviest daily falls (those over 3 inches in 24 hours) were:—

20th	June 1895	...	5·34 inches
17th	July „	...	4·15 „
7th	August „	...	4·34 „
8th	„ „	...	3·01 „
7th	September 1895	...	4·12 „

144. The lowest water level was 394·85 T.H.D. on the 18th June. The lake overflowed on the 18th July after 31·59 inches of rain had been registered. The lake ceased to overflow on the 3rd October.

145. The storage above lowest inlet on the 31st October 1894 was 18,434 millions of gallons, on the 31st May 1895 it was 10,302 millions of gallons, and on the 31st October 1895 it was 18,348 millions of gallons.

146. The loss during the dry season from the 1st November 1895 to the 31st March 1896 was 18,348 — 12,825 = 5,523 millions of gallons. In the corresponding period of the preceding year the quantity was 5,548 millions of gallons.

147. The quantity of surplus water passed over the waste weir is calculated to have been 18,735 millions of gallons. The highest flood was 0·80 ft. over the waste weir, 8th September.

148. Table No. 1 gives the details of the rainfall and height of water in the lake.

Draw-off.

149. The approximate quantity drawn off into the duct from the lake was:—

April	1895	.....	768,177,452 gallons
May	„	.....	798,178,481 „
June	„	.....	755,674,867 „
July	„	.....	675,309,012 „
August	„	.....	597,505,331 „
September	„	.....	679,171,690 „
October	„	.....	751,828,735 „
November*	„	.....	682,050,577 „
December	„	.....	697,115,377 „
January	„	.....	868,299,115 „
February	„	.....	740,000,000 „
March	„	.....	767,533,596 „
			8,780,814,233 gallons.

* Supply stopped from 30th November to 7th December.

150. The quantity throughout the year was as large as Syphon No. 6 can discharge. Of the above quantity about 88 millions of gallons were passed into the Vehar Lake.

Construction of Inspector's Quarters at Khaling and quarters for Sub-Inspector and Watchmen at Tansa.

151. The work of Inspector's Quarters at Khaling was sanctioned by the Corporation in their Resolution No. 12743 of the 7th February 1895 at an estimated cost of Rs. 3,932. This work was entrusted to Mr. Framji Sorabji Contractor and was commenced on the 23rd October 1895. It was in progress at the close of the year under report and the expenditure was Rs. 1,015-3-3.

152. The work of Chawls at Tansa Lake was sanctioned by the Corporation in their Resolution No. 11676 of the 17th January 1895 at an estimated cost of Rs. 12,000. It was also entrusted to Mr. Framji Sorabji Contractor and was commenced on the 23rd October 1895. It was in progress at the close of the year under report and the expenditure was Rs. 3,534-5-11.

Repairs of Duct and Bursts of 48″ Main.

153. From 4 A.M. on the 30th November to 12 noon on 7th December 1895 the supply of water was shut off at Tansa to allow of the annual general inspection and repair of the duct.

154. The supply to Bombay was also stopped on the following dates for the repair of bursts on the 48″ main :—

Date.	Locality.	Remarks. Water stopped for—
Tuesday, 16th April 1895.	Soparibag Road.	From 6-30 A.M. on 16th April to 1-30 A.M. on 18th April.
Thursday, 30th May 1895.	33-249 Balcomb.	24 hours.

155. The total length of time during which the Tansa supply was stopped on account of bursts in the City during the year was 2 days and 23½ hours.

Repair of Kasheli Embankment.

156. The second portion of the work of repairing and strengthening the bank of the Tansa Water Main on syphon line No. 6 was entrusted to Messrs. Littlewood & Pallonji. It was commenced on the 2nd May 1895 and was in progress at the close of the year. The expenditure during the official year was Rs. 15,758-3-0, which, including that for the portion done in the previous year, amounted to Rs. 26,212-1-0 out of the grant of Rs. 30,000 sanctioned by the Corporation in their Resolution No. 6308 of 6th September 1894.

VEHAR LAKE AND DEPENDENT WORKS.

Rainfall, Collection and Discharge, 1895.

157. The rainfall for 1895 was 82·81 inches. This was 2·75 inches less than in 1894 and 1·09 inches less than the average (83·90 inches).

158. The lake overflowed on the 12th August; the overflow ceased on the 26th September.

159. The heaviest daily falls were :—

18th July	1895	...	...	4·65 inches.
8th August	„	...	...	4·17 „
9th „	„	...	...	3·60 „
8th September	„	...	...	8·30 „
15th „	„	...	...	4·13 „

160. The lowest water level was 253·70 T. H. D. on the 14th June.

161. The storage on the 31st October 1894 was 11,335 millions of gallons; on the 31st May 1895, 8,305 millions of gallons; and on the 31st October 1895, 11,010 millions of gallons.

162. The daily loss during the dry season from the 31st October 1894 to the 31st May 1895 was 11,335 — 8,305 = 3,030 = 14·3 millions of gallons per day in addition to that drawn from Tansa.

163. The calculated quantity received into Vehar Lake from the Tansa Duct between the 31st October 1894 and the 31st May 1895 is 82·5 millions, of which 23 millions and 40 millions were in February and April 1895 on the occasions of the joint leak at Chinchpokli and the burst on Soparibag Road respectively, an average of 0·38 millions of gallons per day, against 12·3 millions of gallons, or an average of 0·58 millions of gallons per day in the preceding year. Between the 1st June 1895 and the 31st October 1895, 0·36 millions of gallons were received as against 83·5 millions of gallons in the corresponding period of 1894; and between the 1st November 1895 and the 31st March 1896, 3 millions of gallons against 33 millions of gallons in the preceding year. It will be noticed that practically the whole of the Tansa supply has been sent into the City during 1895.

164. Between the 8th August and the 17th September 1895, 581 millions of gallons were received from the Tulsi Lake by overflow.

165. The quantity that passed over the Vehar Lake waste weir between the 12th August and the 26th September was roughly 4,191 millions of gallons.

166. Table No. 2 gives the details of the water level, rainfall and gaugings of leakage at Vehar Lake.

TULSI LAKE AND DEPENDENT WORKS.

Rainfall and Collection.

167. The rainfall for the year 1895 was 100·40 inches. In 1894 it was 111·15 inches and in 1893, 94·07 inches.

168. The heaviest daily falls were :—

16th July	1895	...	4·49 inches.
18th „	„	...	6·11 „
19th „	„	...	4·19 „
8th August	„	...	5·13 „
9th „	„	...	4·20 „
8th September	„	...	8·08 „
15th „	„	...	4·24 „

169. The lowest water level was 439·50 T.H.D. on the 14th June.

170. The lake overflowed on the 8th August, and the overflow ceased on the 17th September 1895.

171. The storage on the 31st October 1894 was 2,243 millions of gallons ; on the 31st May 1895 it was 1,079 millions of gallons; and on the 31st October 1895 it was 2,136 millions of gallons.

172. The loss during the dry season from the 1st November 1895 to the 31st March 1896 was 2,136 — 1,256 = 880 millions of gallons. In the corresponding period of the preceding year the quantity was 834 millions of gallons.

173. The quantity of water which passed over Tulsi waste weir into Vehar Valley is estimated at 581 millions of gallons.

174. Table No. 3 gives the details of water level and gaugings of leakage at Tulsi Lake.

PAWAI LAKE AND DEPENDENT WORKS.

Pumping Plant.

175. The Pawai pumping plant was transferred from the Water Branch to the Assistant Executive Engineer, Mechanical Branch, on the 29th January 1896, together with all accessories thereof.

Compensation for Land.

176. After protracted proceedings in the Thana District Court and the Bombay High Court the purchase money for the land acquired for the Pawai Works was paid into Court.

177.

	Rs.	a.	p.
The compensation was ... ... including 15 % compulsory purchase.	1,27,258	10	3
Interest from 26th December 1889 to date of payment	40,646	1	0
Total Rs. ...	1,67,904	11	3

Water Level and Rainfall.

178. Table No. 4 gives the details of the water level and rainfall.

BHANDARWADA (JOHN HAY GRANT) SERVICE RESERVOIR.

Filters.

179. The filters have been worked throughout the year under report and the results as shown by the analyses (Table 5) have been very satisfactory.

Covering over Clear Water Channel.

180. The covering of the clear water channel referred to in last year's report has answered its purpose satisfactorily.

Raising Parapet Wall between Filters and Distributing Basin.

181. During the year the parapet wall between the filters and the distributing basin was raised at a cost of Rs. 434-5-9, the object being to prevent the water in the filters and channel being fouled by washings from the garden over the distributing basin.

Covering Storage Basin and Construction of Filters over it.

182. The work has proceeded throughout the year, but the progress has not been sufficiently rapid to secure the completion of the work as early as was originally hoped.

183. The payments during the year were Rs. 48,746-4-3.

184. The revised estimate shows that the work may be expected to be completed for Rs. 1,47,000, showing a saving of Rs. 13,097-14-4 on the sanctioned grant of Rs. 1,60,097-14-4.

185. At the close of the year under report, the foundations were all completed : one-half of the covering arches were completed and filling of filter No. 9 with the filtering materials had been commenced.

186. Photographs were taken at intervals of about 3 months to show the progress and character of the work.

QUALITY OF WATER.

Crocodiles, Crocodile Eggs and Leeches.

187. During the year the offers of reward for the capture of crocodiles in the lakes and for the finding of their eggs was continued. The claims were for seven crocodiles and 91 eggs.

188. There was one reported case of leeches being ejected from the service taps of a house in Fort. This was traced and it is most probable that the leeches found their way into a broken service pipe near a drain, in which many leeches were found during a temporary stoppage of the water supply.

Analyses of Water.

189. Analyses of water are given in Table No. 5.

Temperature of Water.

190. Table No. 6 gives the details of the temperature observations of the water in the lakes and service reservoirs.

191. It will be seen that the maximum and minimum temperatures of the water at 6 a.m. in the different places were as follows :—

Place.	Maximum and Date.	Minimum and Date.
Vehar Lake	86° F. from 30th Sept. to 18th Oct. 1895	75° F. on 14th Jan. and from 4th February to 17th Feb. 1895.
Tulsi Lake	88° F. from 6th June to 10th June 1895.	73° F. from 7th to 14th Feb. 1895.
Bhandarwala Reservoir		
Inlet Channel ..	89° F. from 7th June to 13th June 1895	75° F. on 29th April 1895.
Distributing Basin..	88° F. from 5th June to 14th June 1895	75° F. on 29th April 1895.
Malabar Hill Reservoir		
Inlet Channel ..	89° F. from 8th June to 11th June 1895	74° F. on 7th January 1896.
Distributing Basin..	88° F. from 8th June to 11th June 1895	74° F. on 16th January 1896.
Tansa Lake	88° F. on 6th June 1895	72° F. on 16th and 17th January 1895.

MISCELLANEOUS WORKS.

Connections at Chinchpokli.

192. No progress was made with the work owing to the dispute with the G. I. P. Railway Company remaining unsettled. Negotiations for a settlement out of court proved abortive and as the year closed a Sub-Committee of the Standing Committee decided to recommend the Standing Committee to proceed with the suit in the High Court.

Extensions of Water Mains.

193. In their Resolution No. 4329 of the 31st July 1895 the Standing Committee recommended the Corporation to sanction the laying of a 6″ main in Ballard Road. The Corporation sanctioned the work in their Resolution No. 6097 of the 5th September 1895 at a cost of Rs. 2,951 ; the extension along the pier being done at the expense of the Port Trust.

194. The work was commenced by Messrs. Littlewood and Pallonji on the 9th September 1895 and completed on the 6th October 1895 (except fixing new pattern hydrants which were not in stock and were fixed departmentally in February 1896). The cost of the work was Rs. 1,745-3-9.

Laying 12″ Main in Parbhadevi Road.

195. In their Resolution No. 4115, dated 24th July 1895, the Standing Committee recommended the Corporation to sanction the laying of a 12″ main in Parbhadevi Road at an estimated cost of Rs. 25,870.

196. This work was sanctioned by the Corporation in their Resolution No. 5791 of the 29th August 1895.

197. The work was entrusted to Messrs. Littlewood & Pallonji and was commenced on the 1st January 1896.

198. The work also includes the removal of the existing small mains in the road which have been surrendered by the Bombay Dyeing Company and the Standard Mill Company in consideration of the benefit received by the laying of a large main.

199. The work was in progress at the close of the year under report.

Relaying 24" Main in Gibbs Road.

200. The relaying of the 24" main in Gibbs Road was completed on the 26th June 1895.

201. The pipes which had formed the diversion were thereupon removed and the whole work was completed on the 28th October 1895 at the total cost of Rs. 5,409-8-4.

DISTRIBUTION AND MAINTENANCE.

Public Supplies.

202. Table No. 7 gives the details of the free supplies 195 in number.

Bursts Repaired.

203. The repairs during the following three years have been :—

Diameter of pipe.	1893-94.	1894-95.	1895-96.	Remarks.

Connection Work.

204. During the year 522 new connections were made, of which the details are given in table No. 10.

205. 243 were disconnected either on account of the buildings being pulled down or with the Standing Committee's sanction for non-payment of rates or infringements of the provisions of the Municipal Act.

206. The net increase in the number of connections during the year was 279, bringing the total up to 19,445, and being an increase for the year of 1·4 per cent.

207. The numbers and percentages have been :—

Years.	Number	Percentage of total number in preceding years.
1893-94	370	2·0
1894-95	310	1·7
1895-96	279	1·4

Meter Supplies.

208. The meters in use on the 31st March 1896 numbered 1,854, being an increase of 180 on the number (1,674) for the preceding year.

209. The consumption registered through meters in the three years 1893, 1894, and 1895 was—

	Gallons.
1893	1,081,000,000
1894	1,277,700,000
1895	1,290,500,000

210. Further details are given in tables Nos. 11 and 12.

Waste Prevention.

211. Table No. 13 gives the night readings in the different districts.

212. The breaking up of the roads in many localities and the disturbance of the sub-soil for new drainage works has greatly increased the work in this department.

FINANCIAL.

Stock.

213. The value of the reserve stock on the 1st March 1895 was Rs. 4,43,543-9-10 as audited. The purchases during the year aggregated Rs. 72,010-4-9. The issues during the year aggregated Rs. 83,424-12-3 and the value of the balance on the 1st March 1896 was Rs. 4,41,239-6-4. This leaves a profit of Rs. 9,110-4-0.

Supply of Meters, Fittings, Pipes and Hydrants.

214. During the year a supply of meters and fittings were obtained by contract with Messrs. John Fleming & Co.

215. The materials obtained were :—

Description.	No.	Per	Rate. Rs.	a.	p.
Siemen's meters, 2"	5	Each.	129	12	0
Do. 3"	4	,,	190	0	0
Do. 4"	5	,,	230	0	0
Do. 6"	5	,,	382	0	0
Tyler's meters, ¾"	50	,,	36	8	0
Penny's stop ferrules, 1½"	50	,,	7	2	0
Ball valves 1"	25	,,	6	4	0
Galvanized W. I. elbows, ½"	400	,,	0	2	0
Do. do. ¾"	100	,,	0	3	0
Do. Checknuts ¾"	200	,,	0	4	0
Do. Reducing couplings, ¾" to ½" ...	50	,,	0	4	0
Do. do. 1¼" to 1" ...	50	,,	0	6	0
Wrought-iron plugs, ½"	300	,,	0	2	0
Do. do. 1"	100	,,	0	4	0
Galvanized W. I. piping, ½"	3,011	R. ft.	0	2	0
Do. do. ¾"	997	,,	0	3	0
Do. do. 1"	2,011	,,	0	4	0
Do. do. 2"	1,989	,,	0	7	6
Lead piping ½"	228⅔	,,	0	5	0
Do. ¾"	524⅓	,,	0	7	0

216. The contract amount for these meters and fittings was Rs. 10,640.

217. Tenders for the above were received on the 22nd April 1895.

218. A supply of valves and hydrants were also obtained by contract with Messrs. Richardson & Cruddas.

219. The materials obtained were :—

Description.	No.	Per	Rate.
			Rs. a. p.
3″ Sluice valves....	32	Each.	23 12 0
4″ Do.	44	„	31 5 10½
6″ Do.	43	„	50 8 0
9″ Do.	22	„	88 0 0
12″ Do.	25	„	140 0 0
2½″ Rack and Pinion straight-way hydrants...	199	„	32 0 0

220. The contract amount of these valves and hydrants was Rs. 17,380-15-0.

221. Tenders for the above were received on the 22nd July 1895.

Sale of Produce at Lakes and other Places.

222. The right of taking fruits from the trees on Municipal land about the lakes and on the pipe lines, and of taking grass, leaves, dead trees, brushwood, &c., on the Pawai Lake property was sold in 1895-96 for Rs. 2,486 against Rs. 2,200 realized in 1894-95.

Works Executed for Municipal Departments and Private Parties.

223. The following is a summary of works executed during 1895-96 for Municipal Departments and private parties by the Water Branch :—

No. of Works.	For what Department.	Aggregate Cost.
		Rs. a. p.
158	Health	1,364 10 9
190	Roads	10,820 5 3
38	Markets	265 3 8
44	Gardens	949 1 6
8	Leper Home	136 12 10
.....	Victoria and Albert Museum	.....
8	Fire Brigade	44 2 0
34	Drainage...	836 3 1
37	Special Drainage	4,378 7 2
1	Assessor and Collector	0 4 10
24	Water Works	18,319 10 11
377	Private Parties	7,123 1 8
919	Total Rs. ...	44,237 15 8

GENERAL.

Notices issued.

224. Tables Nos. 8 and 9 give the number of notices issued during the year. The total was 8,920 against 6,781 in 1894-95 and 5,055 in 1893-94.

225. Application was made to the Standing Committee and sanction accorded under Section 279 of the Municipal Act to sever the connections of service pipes in 803 cases for different reasons; the sanction was carried out in 151 cases.

Correspondence.

226. The following is a comparative statement of correspondence for the three years 1893-94, 1894-95, and 1895-96 :—

Particulars.	1893-94.	1894-95.	1895-96.
Inward letters	8,476	9,857	11,011
Outward letters	9,104	9,803	11,381
Total ...	17,580	19,660	22,392
Letters sent to Inspectors for report ...	4,712	7,521	8,597
Do. received from Inspectors with reports.	4,686	7,353	8,532
Total ...	9,398	14,874	17,129
Grand Total ...	26,978	34,534	39,521

Bills and Vouchers.

227. The following number of bills and vouchers were also dealt with in the respective years :—

Particulars.	1893-94.	1894-95.	1895-96.
Bills, vouchers, pay-sheets, &c.	1,584	1,707	1,731
Departmental works bills	566	612	542
Private works bills	268	386	377
Total number ...	2,418	2,705	2,650

FIRE BRIGADE STATIONS.

244. The Corporation, under their Resolution No. 5144, dated 14th August 1892, sanctioned the construction of eleven Fire Brigade stations in different parts of the Island, of which eight stations, the particulars of which are given in the following statement, have been completed up to the end of 1895-96. Two Stations, *viz.*, one at Sankli Tank and the other at Babula Tank were under construction at the close of the year under report and the last one, *viz.*, that at the junction of Gamdevi and Gowalia Tank Roads will be taken in hand during the year 1896-97.

Fire Brigade Stations completed up to end of 1895-96.

245. The following statement shows at a glance the dates of commencement and completion, cost and other particulars regarding each of the eight Fire Brigade Stations which have been completed :—

Locality.	Names of Contractors.	Date of Commencement of Work.	Date of Completion of Work.	Sanctioned Grant for the Work.	Total Cost of Work including Contingencies and Establishment.	Savings.	REMARKS.

Fire Brigade Station at Babula Tank.

246. As stated in the last Administration Report the portion of the Babula Tank on which this station is to be constructed was filled in, under contract, by Mr. Sayaji Naguji. This portion of the work was completed on 2nd September 1894.

247. The construction of the station was entrusted to Messrs. Bhaskar Shiwram and Dhondiba Hanmantrao, as sanctioned by the Standing Committee under their Resolution No. 14078, dated 20th March 1895.

248. The order to commence the work was given on the 10th May 1895 and it was very nearly completed at the close of the year under review.

249. The total expenditure up to the end of the year was Rs. 46,296-11-1.

Fire Brigade Station at Sankli Tank.

250. This station which is being constructed, partly on land reclaimed by filling up the Sankli Tank and partly on that purchased from Mr. Jamsetji Nowroji is to be the Head Quarters of the Fire Brigade and consists of the following seven blocks of buildings :—

1. Office and quarters of the Chief Officer of the Fire Brigade.
2. Engine House and Fireman's quarters.
3. Brake and manual Engine House, Stalls for horses, Engineer's quarters and servant and cook rooms.
4. Quarters for servants of the Chief Officer and Foreman.
5. Stables and Coach House.
6. Quarters for 14 Lascars.
7. Latrines.

251. The contract for the construction of these buildings is let to Mr. Muncherji Kavasji Guzdar, as per Standing Committee's Resolution No. 1584 of 8th May 1895.

252. The order to commence the work was given on 1st July 1895 and it is expected that it will be completed by the end of October 1896.

253. The total expenditure on account of this work up to the end of the year has been Rs. 1,11,682-3-1.

Fire Brigade Station at Dadur.

254. This work which was reviewed in the last Annual Report was completed on the 10th May 1895 by the contractors, Messrs. Gangaram Laxman & Co.

255. The total expenditure on account of this station has [illegible] Rs. 9,060-3-0 against the estimated amount of Rs. 10,402. S[illegible] Rs. 1,341-13-0.

256. The station was given over in charge of the Fi[illegible] and occupied by them on the 1st June 1895.

Fire Brigade Station at Gamdevi.

257. It was mentioned in the last Administration Report that plans and estimates for this station were revised by me and submitted for the approval of the Commissioner, but it having since been found that the building in the vicinity of the Fire Brigade Station, the first floor of which is occupied by the Foreman of the Fire Brigade and the ground floor by the Ward Offices of the street and building branch of this Department, was in a delapidated and unsound condition, and will have to be pulled down and re-constructed in the near future, it has been considered advisable to again revise the plans and estimates so as to include the quarters of the foreman and the Ward Offices in the same project.

258. This has now been done and the plans and estimates have been re-submitted to the Commissioner for his approval.

CHALS, QUARTERS AND OFFICES FOR MUNICIPAL EMPLOYES, &c.

Quarters for the Chief Inspector and Sluicemen of the Water Works Department.

259. As the proposal to construct the quarters for the Chief Inspector of Water Works at Bhandarwada has been negatived, the plans and estimates for the construction of the quarters for the Chief Inspector and six sluicemen on the reclaimed ground at Babula Tank have been submitted to the Commissioner for his approval.

260. The tenders for the construction of these quarters will be invited and the work proceeded with during the year 1896-97.

Chals at Bori Bunder for the Biggaris of the Health and Market Departments.

261. This work, which has been fully described in the previous Administration Reports, was completed by the Contractors Messrs. Framroz Pestonji & Co., on 21st September 1895.

262. The total cost of constructing these buildings has been Rs. 50,296-4-1 against the sanctioned estimated amount of Rs. 70,658. Saving Rs. 20,361-11-11.

263. These chals were given over in charge of the Health and Market Departments in the middle of September 1895.

264. The latrines in connection with these chals are being constructed departmentally by the Drainage Branch of this department.

Ward Offices at Null Bazar for the Executive Engineer's Department.

265. This work was completed by the Contractor Mr. Dewram Keshowji on 23rd October 1895 and the building was occupied on 16th November 1895.

266. The total expenditure on account of these works has been Rs. 11,627-5-11 against the amount of the sanctioned estimate of Rs. 13,000. Saving Rs. 1,372-10-1.

267. It has been proposed to re-construct the latrines in connection with the Ward Offices out of the savings in the work. The proposal has been approved and the work will be carried out departmentally by the Drainage Branch during the year 1896-97.

MUNICIPAL MARKETS, STABLES, &c.

New Market at Colaba.

268. This work,described in the last year's Administration Report, was completed by the Contractors Messrs. Ratanji Bejonji & Co. on the 14th April 1896.

269. The total cost for the purchase of land and the construction of this market has been Rs. 92,077-6-7 against the estimated sanctioned amount of Rs. 1,00,300. Saving Rs. 8,222-9-5.

270. The building was given over in charge of the Market Department on 10th May 1895.

Bhuleshwar Market and Schools.

271. The deed of trust, in respect of the grant-in-aid of Rs. 33,500 to be paid by Government for the construction of the schools, was executed and registered on the 21st May and 6th July 1895, respectively.

272. The order to commence the work was given on 15th May 1895, and the building is now in progress.

273. The total expenditure passed up to the end of the year under report has been Rs. 3,16,336-8-0.

Paving the yard of the Bori Bunder Stables with set stones.

274. This work was completed by the Contractors Messrs. Rattanji Bejanji & Co. on the 9th April 1895.

275. The total cost of the work has been Rs. 9,967-3-8 against the estimated sanctioned amount of Rs. 13,500-0-0. Saving Rs. 3,532-12-4.

Building Walls at Tank Bunder Burial Ground.

276. This work for which a sum of Rs. 3,029 has been provided in the Budget for 1895-96 was entrusted to Messrs. Devram Keshavji & Co., Annual Repairs and Petty Works Contractors.

277. The work was commenced by the contractors, but its further progress was suspended on account of certain persons having claimed ownership of the land on which the boundary walls were to be constructed. The matter is still pending disposal.

Construction of a Kerosine-oil Godown at Bellasis Bridge Depot.

278. The Corporation under their Resolution No. 13690, dated 7th March 1895, sanctioned a sum of Rs. 5,925, for constructing an additional godown for the storage of kerosine oil at Bellasis bridge.

279. Tenders for the work were invited in the usual way. Only two tenders were received and that of Messrs. Dewram Keshowji & Co., the lower of the two tenders was accepted by theStanding Committee under their Resolution No. 633 of 17th April 1895.

280. The order to commence the work was given on 1st October 1895. It was completed on 5th February 1896, at a total cost of Rs. 4,723-14-4, against the sanctioned estimated cost of Rs. 5,925. Saving Rs. 1,201-1-8.

281. The following statement gives the particulars of Petty Works executed during the year 1895-96 :—

Number.	Description of Work.	Amount of sanctioned Grant.	Work entrusted to	Date of Commencement.	Date of Completion.	Total Cost of Work.

E.

REGULATIONS OF STREETS AND BUILDINGS.

	Paras.
Applications for building or re-building houses ...	283
Notices and Summons issued	284 to 288
Buildings or parts of buildings which fell down ...	289 to 292
Removal of ruinous houses, huts, objectionable constructions, doors, projections and encroachments ...	293
Street improvement, set-backs, &c.	294 to 302
Municipal ground sold or exchanged	303

BUILDING APPLICATIONS.

283. The number of applications for permission to either *build* or re-build houses, &c., during the year under report amounted to 1,222 or 182 more than those received during the preceding year. Of these 1,172 were passed either wholly or partially and only 50 were unconditionally disapproved on sanitary and other grounds.

NOTICES AND SUMMONSES ISSUED.

284. During the year under review, 4,278 notices were issued on house-owners under various sections of the Municipal Act, or 665 more than those issued during the previous year.

285. The following statement shows the number of notices issued and the sections of the Municipal Act under which they were issued :—

Sections of Municipal Act.	Particulars.	Number of Notices.
231	To provide rain-water eaves, gutters, and downtake pipes	167
247	To provide privy accommodation to new buildings.....	28
257	To remove encroachments on privy, drain, house gully, &c.....	46
299	Intimation of intention to take possession of land outside buildings for street improvement.....	43
305	To level, metal and drain private streets and to provide lights.....	89
308	To remove new projections.....	126
309	To remove old projections	48
311	To remove or alter doors or windows opening over streets.....	53
312	To remove structures erected without Municipal permission	1
313	To remove temporary projections or obstructions	5
329	To fence or enclose tanks, wells, and dangerous places	9
349	To remove inflammable materials in external walls and roof covering	990
351	To remove structures erected without Municipal approval or submitting plans for the same	484
353	To remove buildings erected contrary to provisions of the Act and Building Bye-laws	421
354	To pull down ruinous houses	400
383	To cut and trim trees hanging over streets	8
488	Intimation of intention to enter houses after 24 hours' notice.....	1,315
488	Intimation of intention to enter houses after 48 hours' notice	46
	Total ...	4,278

286. Three hundred and twenty-eight summonses were issued under different sections of the Municipal Act against the house-owners who failed to comply with the notices served upon them.

287. In 133 of these cases the parties complied with the terms of the notices served upon them before the service of the summonses; in 39 cases the parties were warned and discharged by the Magistrates; in 24 cases the parties were convicted and fined; 48 cases were postponed to year 1896-97 and in 67 cases second summonses and in 17 third summonses were issued. The amount of fine realised was Rs. 299 4-0.

288. The following statement shows the different sections of the Act under which offenders were prosecuted and other details of the prosecutions during the year 1895-96 :—

Superintendents.	Number of Sections of the Act.	Number of Summonses issued.	Cases withdrawn as requirements were complied with, &c.	Persons warned and discharged.	Persons convicted and fined.	Cases postponed to next year 1896-97.	No. of 2nd Summonses.	No. of 3rd Summonses.	Amount of Fines.

NEW ROADS, &c.

Road from Dungri Street across Navroji Hill to Elphinstone Bridge.

304. The work of constructing a new road from Dungri Street across Navroji Hill to Elphinstone Bridge was sanctioned by the Corporation in their Resolution No. 5293 of 19th November 1888. The sanctioned estimate amounts to Rs. 3,32,023. As some of the items in this estimate were over-estimated, whilst others were not considered sufficient to cover the expenditure, it was deemed expedient to revise the whole estimate. This was done during the year under report.

305. In addition to the two properties already acquired some time ago, two more properties of the aggregate value of Rs. 23,250 were purchased, and application was made to the Collector to acquire two more, on the Fazandari land belonging to Mr. Jalbhai Ardesar Shett. The Collector has given his award for one of these two, but as the owner of the building and Mr. Jalbhai dispute each other's right of ownership over the ground and the Collector's apportionment of its value, the matter has been referred to the High Court. The Collector has postponed the hearing of the other case until the decision of the High Court is known in the first one. Had it not been for this dispute regarding the Fazandari right over the land on the Hill, other properties would have been acquired during the year. It is hoped, however, that after the High Court has decided in the matter, the task of acquiring the properties will be facilitated, and a satisfactory progress will be made before the next year's report is submitted.

Reay Road, Victoria Road Extension and the Mahomedan Burial Ground at Tank Bandar.

306. The proposed road from the north end of Frere Road up to Kalachowki has been named Reay Road by the Corporation under their Resolution No. 13629 of 17th February 1896, and the Municipality has to construct a portion of it from Wari Bandar Road to Gunpowder Road.

307. The acquisition of the properties for the Municipal section of the road has been pushed on with vigour during the year under review.

308. The following statement gives the particulars of the properties acquired up to the end of the year 1895-96 :—

Serial No.	Names of parties from whom the properties were purchased.	Amounts of compensation awarded or agreed upon.	Remarks.
		Rs.	
1	Bai Perojbai, widow of Pestonji Kuverji Lavangia...	6,000	Properties acquired by agreement and the purchases completed.
2	Mr. Mancherji Hormasji Mistri ..	2,750	
3	Mr. Thakarsi Ravji	4,000	
4	Bai Kulsumbibi, wife of Kherudin ...	4,500	
5	Mr. Haji Salemahamad...	5,000	
6	Bai Jamalbibi, wife of Shekhan Husenkhan	1,930	
7	Mr. Fardunji Bamanji Bagaria ...	6,000	
8	Bai Navazbai Rustomji Wadia ...	60,000	
9	Mr. Hormasji Merwanji Nareilwala ...	25,000	
10	Mr. Harichand Issa	1,000	Properties for which private negotiations have been successfull, but the purchases have not yet been completed.
11	Government and Messrs. Alcock and Ashdown	10,357	
12	Mr. Ismail Ahamad	1,600	
13	Mr. Fakir Mahamad Vazir	2,000	
14	Mr. Rastamji Sorabji Engineer ...	12,200	Properties acquired under the Land Acquisition Act.
15	Mr. Haji Allarakhia Khoja Mahamadbhai Malubhai...	5,175	
16	Mr. Gulam Husen bin Amir Saheb ...	3,450	
17	Mr. Abdul Karim bin Husen and Mr. Mahamad bin Husen...	1,336	
18	Mr. Dawud Kazi Alli	7,974	
19	Mr. (Ahmad Mauji Khoja) Mahamadbhai Malubhai...	2,500	
20	Mr. Bora Kadarbhai	2,700	
21	Mr. Bawasaheb vallad Bapusaheb ...	4,000	
22	Mr. Kavasji Pestonji Bharucha ...	17,953	
23	Mr. Muljibhai Jivraj	8,115	
24	Messrs. Martyn	13,788	
25	Mr. Kharsetji Ardeshar Patel... ..	7,500	Properties being acquired under the Land Acquisition Act. The amounts of compensation have been settled in almost all cases, but the titles of the owners over the properties being defective, the acquisitions are made through the Act.
26	Mahamedan Jamat (Reservoir) ...	2,821	
27	Do. do. (House)	90,374	
28	Mr. Baburao Damulji	2,200	
29	Bai Kuverbai, widow of Dinsha Shapurji Karani	13,000	
30	N. S. D. Rozario, Church and Government	.....	Private negotiations for the purchase of of these properties are being carried on.
31	Mr. Edalji Sorabji Davar	.....	
32	Mr. Anandrao Vinayak...	.....	
33	Government and Mr. Surti	.....	

309. In addition to the properties mentioned in the above statement, a strip of land, admeasuring 3,040·20 square yards, together with the building thereon, has been acquired from Narielwadi from Mr. Mancherji Merwanji Narielwala for a lump-sum of Rs. 30,000 for the construction of the Victoria Road extension.

310. A plot of land, admeasuring about 32,800 square yards, has also been acquired from the Port Trustees, at Rs. 5 per square yard, for a burial ground at Tank Bunder.

311. The work of constructing a portion of the Reay Road from Dockyard Road to Gunpowder Road and of the Victoria Road extension; and that of filling in the proposed burial ground at Tank Bunder, will probably be taken in hand in November of 1896.

Road over the Tansa Main from Dadar to Matunga.

312. During the year under review this new road was connected with Sion Road and opened for public Traffic in the month of May 1895. The final bill of the contractors has, however, not yet been settled as they dispute several items of measurements and especially that of earth-work. They have now appointed an engineer to check the measurements, &c., and it is hoped that a reasonable settlement of the dispute will be the result.

Souter Road.

313. The construction of this road is still at a standstill. Negotiations are going on with one of the partners of the firm who originally contracted to do the work and if they turn out to be unsuccessful the work will have to be completed through other agency.

Extension of Gilder Street.

314. The land required for the completion of this street between the Agripada drain and Arthur Road has now been measured up and the area calculated.

315. Directly the Engineer of the owners of the land verifies the area thus arrived at, the conveyance will be prepared, the land will be taken possession of, and the construction of the remaining portion of this road will be proceeded with

Frontage Land in Agripada District.

316. An offer was received for the purchase of 24 plots of frontage land in the rear of the Byculla Club premises from Messrs. Gostling and Morris on behalf of that Club and the Society for the Propagation of the Gospel. The offer was for the purchase of 17 plots of frontage

land admeasuring in all 10,985·43 square yards on Club and Morland Roads, at Rs. 6-8-0 per square yard, and 7 plots of land at their rear admeasuring in all 5,041·67 square yards, at Rs. 5 per square yard.

317. The Corporation, however, at their meeting, dated 10th October 1895, rejected this offer.

318. The Corporation then under their resolution No. 12695, dated 3rd February 1896, sanctioned the invitation of private offers for 40 plots of land abutting on Club and Morland Roads. This was with the result that an offer for only one plot of land was received, but as the offered rate was inadequate it had to be rejected with the sanction of the Corporation.

319. The question therefore stands in an undecided state at present. Messrs. Gostling and Morris have now practically withdrawn the offers made by their two constituents, and if no other suitable private offers are forthcoming, the plots of land in question will have to be sold by public auction.

Frontage Land on Connaught and Sussex Roads.

320. As regards the frontage plots of land on Connaught and Sussex Roads near the Victoria Gardens, seven plots of land, *viz.*, 5 abutting on Parel Road and 2 on Connaught Road, have been sold by public auction.

321. The Corporation have authorized the sale of fifteen other plots of land by private negotiations at fixed prices. Private offers for some of these plots as well as for other plots are being gradually received, and if no satisfactory progress is made within a reasonable period of time, the plots will have to be put up for sale by public auction again.

ROADS, FOOTPATHS, &c.

Repairs and Maintenance.

Deviation from the usual System of Budget.

322. The new system of budgetting for road repair works referred to in paras. 354—359 in the last year's report, has worked satisfactorily. It has considerably facilitated the execution of the repair works. Considerable correspondence has been saved, the necessity of obtaining frequent sanction for transfers has been avoided, and the keeping of accounts considerably simplified and reduced. The only modification that has been found necessary is to eliminate the quantities from the apportionments sanctioned by the Commissioner at the commencement of each official year, because, while on the one hand it was found impracticable to foretell with any degree of accu-

racy the quantity of metal that would be required for any particular road, on the other it took up a good deal of the time of the Inspectors in measuring daily the large areas of roads watered and scraped without securing any corresponding good results.

Road Repairs.

323. At the commencement of the official year the grant made in the Budget for this work was apportioned to the different wards and roads, and in doing so, care was taken not to lose sight of the minor roads in the Fort and in the Native Town.

324. The following comparative statement shows the estimated quantities and amounts of different items of road repair works and in parallel columns the actual quantities and amounts of expenditure.

325. Statement showing the estimated and actual quantities and amounts of the different items of works, the cost of which was met from the grant of Rs. 3,22,111 for road repairs and maintenance for the year 1895-96.

Particulars.	Estimated quantities.	Estimated amount.	Actual quantities executed.	Actual amount spent.	Balance.

				Saving..Rs	2,424 15 3

326. It will be seen from this statement that a total area of 8,820,997 square feet of roads were repaired at an aggregate cost of

Rs. 2,47,595-11-6 which gives an average rate of 5½ pies per square foot, as against 7 pies per square foot during the previous year. This area is exclusive of the large areas of roads repaired on account of the Drainage, Water and Health Departments and the Tramway and the Gas Companies.

327. It has been found impracticable to keep some of the roads in the Fort in proper repair, owing to their faulty construction. These roads have a concave surface sloping towards the centre, where there are covered masonry drains. These drains have perforated slab stones on them at intervals for the passage of storm-water. Under this arrangement, streams of water are formed in the centre of the roads, cutting them up, and rendering it inconvenient for foot passengers to walk during heavy rains. This defect was aggravated by the want of eaves, gutters and down-take pipes from the eaves of houses. To remedy these defects some of the streets have been re-modelled to the convex form and more vigorous action taken against the house-owners to provide suitable troughs and pipes for the conveyance of water falling upon the roofs and weather frames of their houses.

328. This alteration in the surfaces of the roads has been found satisfactory and it is intended to gradually carry out the improvement in other streets which have concave surfaces.

329. It has also been found difficult to keep the roads in the City in good order owing to their having to be constantly opened in various places by the Drainage, Health and Water Departments, by the Gas Company, and by private plumbers for laying pipes. This difficulty had considerably increased during the year under review owing to the great vigour with which the special Drinage Works have been carried out. Every endeavour was, however, made to repair the trenches made by the Special Drinage Department and other Departments as soon as they were handed over to the Road Department.

Steam Rollers.

330. The want of sufficient rolling power was much felt during the year under review. It will be seen from the following statement that there are at present 22 steam rollers varying in weight from 20 to 6 tons. Some of them are now old and worn out and consequently frequently get out of order. On an average as many as five rollers are daily sent to the workshops for repair, the number actually in use, therefore, is generally about 16. This is found inadequate for expeditiously repairing the large and increasing area of roads, causing a great deal of inconvenience to the general public besides being expensive. I beg, therefore, to renew the application made in my last annual report for at least 3 more steam rollers. This addition is necessary for the efficient, economical and speedy completion of the road repairs and provision will be made in the next year's Budget for it.

331. Statement showing the conditions of the steam rollers now in stock.

Ward.	No. on Steam Roller.	Weight in Tons.	Date of Manufacture.	Condition.
A	1	20	1891	In good condition.
	3	15	1870	An old type of roller, expensive in up-keep. Fitted new steel spur and pinion wheels. In fair order.
	8	10	1874	In good condition, new boiler fitted in 1894.
	21	6	1894	In good condition.
	13	8	1880	In workshops, undergoing repairs, new boiler being made.
B	12	8	1888	In good condition.
	17	8	1890	Much worn, getting fire-box put in.
	13	8	1889	In good condition.
C	5	12½	1888	In good condition.
	6	10	1891	In good condition.
	10	8	1888	In good condition.
D	2	15	1891	In good condition.
	9	10	1874	New boiler fitted in 1896. In good condition.
	22	6	1894	In good condition.
	11	8	1888	In good condition.
	19	8	1874	Much worn out. A new boiler is required.
E	7	10	1888	In good condition.
	4	12½	1891	In good condition.
	20	8	1880	Much worn out. New fire-box required.
F	16	8	1895	In good condition.
G	14	8	1889	In good condition.

Road Metal.

332. The total quantity of metal supplied by the contractors during the year under report was 1,555,519·65 cubic feet, and the cost thereof amounted to Rs. 87,984-1-3.

333. A large quantity of metal was broken by the stone-crushing machine lately purchased, but it was not possible to work the machine to the fullest extent, as a steam roller is required to drive it which could not always be spared.

Private Streets.

334. A part of the new road now called Reay Road from Tank Bunder to Gunpowder Road and a portion of the Tank Bunder Road were taken over from the Port Trustees.

Pickaxes.

335. The pickaxes manufactured by the Hardy Patent Pick Company, which are now used for road repairs, have given satisfaction. They last much longer than those formerly used and the expenditure on account of tools has decreased in consequence.

Road Cleaning.

336. The roads were kept clean by means of sixteen brushing and nine scraping machines which was supplemented by hand scraping when necessary. This plant has been found insufficient to cope with the demands of the roads, especially in the rains, and it is intended to add to it a few more brushing machines out of the Road Repair Grant.

Widening of old Streets.

337. The area of land obtained by setting back houses and added to roads during the year under review was 4,372 square yards and the cost of addition (exclusive of the value of land) has been Rs. 5,075.

Road Watering.

338. The watering of the roads was carried out satisfactorily during the year and the complaint from the public was much less than in the previous years. Some of the roads in the outlying districts were watered every other day, but those in the thickly-populated and business parts of the city were watered twice and in some cases even three times a day.

339. The following comparative statement shows in parallel columns the estimated and actual quantities and amounts of the different items of the road watering grant.

340. Statement showing the estimated and actual quantities and amounts of the different items of works, the cost of which was met from the grant of Rs. 79,400 for road watering for the year 1895-96.

				Savings Rs	230 7 0

341. The watering is principally carried out at present by water carts drawn by bullocks. This system being inefficient, expensive and inconvenient to the public, the watering by means of reels provided with hose about 250 feet in length has been tried. This system

is certainly superior to that of watering by carts, but it is not entirely free from defect. The great length of the hose stretched on the road inconveniences the public traffic and the cost of renewal of hose is heavy.

342. A new system of watering directly from the mains by means of the new pattern hydrants and short length of hose has been commenced as reported in the Administration Report of last year. It has been tried in Church Gate Street and portions of Gibbs and Clerk Roads and proved satisfactory. The initial cost of providing these hydrants at distances of 130 feet instead of the old pattern hydrants which are placed at about 400 feet distances is somewhat heavy, but the facilities offered for extinguishing fires will be tripled and the breaks in the main will be repaired more speedily and carried out without emptying the main and shutting it off as is necessary at present. Besides that the old pattern hydrants are so worn out that they will have to be removed before very long. The expenditure proposed to be incurred in putting in the new pattern hydrants will be a distinct gain. Eighty-one hydrants of the new pattern have already been fixed and 262 are now in hand for further extension. Some of these will be fixed during the year 1896-97, the cost of fixing being defrayed from the watering grant of that year for which a sum of Rs. 8,000 has been reserved. These are proposed to be laid in the Queen's Road, the Esplanade Road, and in a portion of Hornby Road.

Footpaths.

343. As stated in the last annual report the moorum footpaths are a source of trouble to the Road Department and are not satisfactory. It is advisable therefore to have them paved as soon as possible, but the annual grant of Rs. 25,000 made for this purpose is not sufficient to carry out the work expeditiously.

344. A small length of the footpath along Masjid Bunder Road, which was largely infested by rats, has been paved with asphalt which was lying idle in stock. This has been found so far satisfactory, but no reliable opinion as to whether asphalted footpaths will withstand the ravages of rats can be given at this stage.

345. The footpaths, admeasuring in all 36,713 square feet along Cochin Street and portions of Ripon, Argyle, Surat and Hornby Roads, were paved with blue stone at a total cost of Rs. 19,711-6-3.

TRAMWAYS.

346. During the year under review 880 feet of the single track of tramway from Paidhoni to Bhuleshwar, along what is called the Coppersmith Bazaar, was doubled and opened to traffic on the 26th of March 1896, and a new double tram track of a length of 710 feet was also laid from the Tramway stable on Falkland Road to the junction of that road with Gilder Street and opened to traffic on 21st December 1895.

347. Serious complaints having been received of the condition of the tramway rails and the grooves in them which have greatly widened by use the Tramway Company are replacing them with those of narrow grooves and the rails in the following streets have already been renewed :—

Hornby Road from Crawford Market to Flora Fountain.

Esplanade Road from Flora Fountain to the Prince of Wales Statue.

Colaba Causeway Road from Apollo Hotel to Grant Building.

Cruickshank Road.

Portions of Kalbadevi Road.

348. The extension of the existing tram lines has however somewhat retarded this work ; but as all the extensions hitherto sanctioned have now been completed, the Tramway Company will, it is hoped, push on with the work of the renewal of the rails with greater vigour after the rains.

ROADSIDE TREES.

349. Three hundred and forty-five trees were planted where required during the year under review.

350. The young trees are flourishing in all the wards except those on the Queen's Road and the Hornby Villard, where they do not seem to be improving probably owing to the salt air and the high winds to which they are exposed.

PUBLIC LIGHTING.

	Paras.
GAS LIGHTING	...351 to 363
Number of gas lamps	351
Pressure and quality of gas	...352 & 353
Contract with Gas Company renewed for 10 years ...	354
Number of gas lamps converted into incandescent lamps...	355
Cost of incandescent lamps, lanterns, &c.	356
Position of lamps shifted to secure better lighting of streets...	357
Cracked cast iron columns renewed and lamps on wooden posts fixed to walls with brackets	358
Superiority of incandescent lights to ordinary gas lights...	359
Incandescent lights give trouble in cold weather ...	360
Brilliancy of light depends on pressure	361
Provision in contract regarding pressure of gas to be maintained at pressure gauges, but no provision is made to test the pressure at the burners ...	362
Advisability of fixing more pressure gauges in the City.	363

Paras.

KEROSINE OIL LIGHTING ... ...364 to 368

Kerosine oil lighting done departmentally 364

Quality of oil used 364

Number of kerosine oil lamps 365

Savings utilized in constructing another godown for storage of oil... 366

Total and net cost of kerosine lighting 367

Average number of lamps and cost of lighting each lamp 368

THE ELECTRIC LIGHT INSTALLATION FOR THE CRAWFORD MARKETS AND THE MUNICIPAL OFFICE ... ...369 to 380

Working of plant not satisfactory on account of breakage of wires of armature of the dynamo 369

Damages repaired by the makers free of charge although not bound to do so 370

Damage found on examination to be due to influence of tropical climate and the manufacturers supplied a new armature to suit such special conditions ... 371

Frequent breakages of wires in old armature which was replaced by the new one 372

New armature found to be still not perfect ... ...373 to 374

Defect remedied by use of more flexible wire where breakages occurred ... ...375 to 376

All other plant worked satisfactorily 377

Purchase of 2 spare field magnet coils 378

Lighting the market with electricity give general satisfaction 379

Acknowledgment of assistance rendered by Mr. Arthur Hoare of Messrs. John Fleming & Co. 380

GAS LIGHTING.

351. There was an increase of 7 gas lamps during the year 1895-96. The total number of lamps in the City at the end of the year being as follows :—

Ward.	Ordinary.		Ornamental.				Special and Bray's.										Total.
	Part month.	Whole month.	Part month triple.	Whole month triple.	Part month quadruple.	Part month quintuple.	Blaney's Statue.	Queen's Statue.	Apollo Pier.	Hornby Road.	Church Gate Street.	Wellington Fountain.	Frere Fountain.	Prince's Dock.	Victoria Dock.	Cumbalia Hill.	
A.....	649	162	8	...	...	1	4	16	16	1	1	8	8	...	...	...	869
B.....	466	195	1	...	...	...	...	...	...	...	...	...	...	1	4	...	667
C.....	434	209	...	1	...	...	...	...	...	...	...	...	...	...	...	...	644

F.....	112	10	1	...	...	...	...	...	...	...	...	...	..	...	...	...	123
G.....	121	16	...	...	...	...	...	...	...	...	...	...	...	...	...	...	140
Total...	2,828	721	17	1	1	1	4	16	16	1	1	8	8	1	4	1	3629

352. The minimum pressure of $\frac{8}{10}$ths of an inch was maintained at all the Municipal pressure registers.

353. The gas supplied was free from sulphur and other impurities. The illuminating power of the gas when tested with an argand burner in the Municipal Photometer house at Arthur Road was generally up to the contract standard, *viz.*, equal to 14 candle-power. This power is, however, only a hypothetical one. The illuminating power of an ordinary street gas light is about 12 candle-power.

354. The contract with the Gas Company was renewed for another term of 10 years from 1st July 1896 and the city is now being lighted with incandescent gas.

355. The total number of gas lamps converted into incandescent gas lamps up to the end of 31st March 1896 was 2,735.

356. Messrs. Mahlar and Roscher's new lamps which they call "Patent number 94" in which no chimney is required are now used in the new incandescent gas lamps. The cost of these lamps including the lantern-holder and climbing flame arrangement is Rs. 52-2 0 each.

357. During the work of conversion advantage was taken of improving the present disposition of the lamps, many of which were shifted with a view to secure the maximum effect attainable as regards the lighting of the streets.

358. Cracked cast-iron columns were substituted by new ones and wherever possible the lamps which were originally fixed on wooden posts have been fixed on brackets attached to walls. The posts thus obtained were utilised for replacing the old wooden posts of other gas lamps which had become rotten and otherwise unserviceable.

359. The new incandescent lights are certainly superior to the ordinary gas lights in every way, if proper care be taken to keep the mains, service pipes and the holes in the burners free from the accumulation of dust and other solid substances.

360. In the cold weather however the new incandescent lights give considerable trouble principally owing to the choking of the service pipes and the holes in the burners by nephtholine. Prompt attention is therefore necessary on the part of the Gas Company to remove these chokes.

361. The pressure of gas in the mains is an essential element in the case of the new lights. The greater the pressure at which the gas issues out of the burners the more brilliant is the light.

362. There is no provision in the contract with the Gas Company authorizing the Municipal Officers to ascertain the actual pressure at which the gas issues out of the burners. The contract only provides that none of the Municipal automatic pressure gauges should register at any part of the night a less pressure than what is represented by a column of water $\frac{8}{10}$ths of an inch in height. There are only six gauges at present in use and they represent the pressure at only six points of the mains. It is therefore clear that even if these gauges register up to the contract standard, it by no means follows that the pressure in all the mains is at least $\frac{8}{10}$ths or that the gas issuing from all the burners is at that pressure.

363. It is therefore advisable to fix more automatic pressure registers in different parts of the island, but under the present contract nothing can be done to test the pressure at which the gas issues from the burners without the consent of the Gas Company in every instance.

KEROSINE OIL LIGHTING.

364. As in the preceding years, the kerosine oil lighting was carried out departmentally during the year under review, and kerosine oil of 150° proof test has been used throughout the year.

365. The total number of kerosine oil lamps in the City at the end of the year under review was 1,724 as shown in the following statement :—

WARD.	Double wick.		Single wick.		Totals.
	Part Month.	Whole Month.	Part Month.	Whole Month.	
A	63	...	97	15	175
B	...	...	126	45	171
C	...	...	28	100	128
D	32	...	112	46	190
E	...	...	271	122	393
F	2	...	357	2	361
G	...	...	232	74	306
Total ...	97	...	1,223	404	1,724

366. A portion of the savings from the grant for kerosine oil lighting was utilized in constructing another kerosine oil godown at Bellasis Bridge Store Depôt in order to admit of the purchase and storage of a larger quantity of oil when the market is low.

367. The total cost of kerosine oil lighting during the year under review was Rs. 36,428-11-2. Deducting from this Rs. 2,148-7-6, the sum recovered by the sale of empty kerosine oil cases and tins, the net cost of the kerosine oil lighting of the city during the year has been Rs. 34,280-3-8.

368. The average number of lamps during the year was 1,644. The cost of lighting each lamp was therefore Rs. 20-15-0 per annum.

THE ELECTRIC LIGHT INSTALLATION FOR THE CRAWFORD MARKETS AND THE MUNICIPAL OFFICE.

369. The working of the plant for lighting the Crawford Markets and the Municipal Buildings was not altogether satisfactory during the year, as there were several failures of the light, caused by the breakage of the wires of the armature of the dynamo.

370. These breakages did not take place till after the plant was taken over by the Municipality and the makers were, therefore, under no obligation to remedy the defect, but on the matter being brought to their notice by their Agents, Messrs. John Fleming & Co., they willingly undertook to repair the damage free of charge.

371. The spare armature purchased with the plant was put in place of the defective one which was sent to England in May 1895. On examination the makers stated that the damage in their opinion was caused by influence peculiar to a tropical climate, and they therefore decided to make an entirely new armature to suit the special conditions of the case.

372. While this new armature was being made, the one in use did not work satisfactorily and much anxiety was caused by the frequent breakages.

373. The new armature arrived in October and was at once put in use. Although it certainly is a great improvement on the old one, still it is not quite perfect, as three breakages of the wires have occurred since it was started.

374. While agreeing with the makers, that the cause of damage was due to climatic influence, still it was found that the new pattern armature did not remedy all the defects.

375. It was thought that the original pattern armature could be improved upon by the use of a more flexible wire at the place where the breakages occurred.

376. The alteration was therefore effected, and though it is yet too soon to give a definite opinion, it may be stated that the armature thus altered is at present working satisfactorily.

377. Excepting the armatures above referred to, all the other plant and machines of the electric light installation have worked satisfactorily during the year.

378. Two spare field magnet coils for the Market dynamo were purchased from Messrs. John Fleming and Co. at a cost of Rs. 595.

379. The lighting of the Markets with electricity, notwithstanding the occasional stoppages, has been a source of great gratification to the stall-holders and the installation, on the whole, has been a decided success.

380. In concluding this portion of the report I beg to acknowledge with thanks the valuable assistance and advice rendered on several occasions to the Assistant Engineer, Mechanical Branch, by Mr. Arthur Hoare, of Messrs. John Fleming and Co., during the time of failure of the electric plant.

Expenditure in 1895-96 for works executed and supervision, &c., charged	33,518 5 2	141 6 3	43,443 13 2	77,103 8 7	27,328 7 0	
Add—Amount of incomplete jobs at the beginning of the year 1895-96 and completed during that year	1,176 3 11	....	1,869 3 9	3,045 7 8	1,066 0 5	....
Total.. Rs.	34,694 9 1	141 6 3	45,313 0 11	80,149 0 3	28,394 7 5	....
Deduct—Amount of incomplete jobs at the end of the year 1895-96	266 15 0	....	545 9 4	812 8 4	284 6 1	....
Total amount of Workshop bills preferred in 1895-96	34,427 10 1	141 6 3	44,767 7 7	79,336 7 11	28,110 1 4	1,07,446 9

382. From this statement it will be observed that the expenditure incurred under the different heads of the Workshop Accounts was as follows :—

	Rs. a. p.	Rs. a. p.
For Departmental Works, &c.—		
Labor	32,976 2 2	
Stores	41,353 0 11	
Piece-work, cart-hire, &c.	141 6 3	
Total ...		74,470 9 4
For Workshop Stores—		
Labor	542 3 0	
Stores	2,090 12 3	
Total ...		2,632 15 3
For Shop Charges—		
Labor	958 5 3	
Stores	10,095 10 3	
Piece-work, contingencies, ground rent, water, &c.	1,008 11 5	
Total ...	12,062 10 11	
For Tools, Repairs to Machinery, &c.—		
Labor	112 15 6	
Stores	441 12 3	
Piece-work, repairs to building, &c.	94 5 3	
Total ...	649 1 0	
For Supervision Charges, Establishment, &c.—		
Establishment	8,380 0 0	
Stores	11 1 10	
Contingencies, &c.	567 6 5	
Total ...	8,958 8 3	
Total working expenditure ...		21,670 4 3
The Total expenditure during 1895-96 was Rs, ...		93,778 12 9

	Rs. a. p.	Rs. a. p.
The total expenditure during 1895-96 on account of Departmental works, &c., and for Workshop store jobs aggregated, with the percentage for supervision, shop charges, &c., to	.....	1,04,431 15 7
Add—Amount of incomplete jobs at the beginning of the year 1895-96	.....	4,111 8 1
		1,08,543 7 8
Deduct—Amount of incomplete jobs at the end of the year 1895-96	.....	1,096 14 5
Thus the total amount of bills preferred by the Workshops in 1895-96 was	.....	1,07,446 9 3
The actual charges for working the Shops, *i.e.*, for supervision, (exclusive of the pay of the Superintendent of Workshops and Machinery which was in former years charged to the Workshops but now debited to the Executive Engineer's Office Establishment as pay of the Assistant Engineer, Mechanical Branch) shop and repair charges, repairs to and purchase and renewal of tools and machinery, &c., amounted to	.....	21,670 4 2
The amount recovered on account of the above-mentioned expenses by charging the fixed percentage of 35 per cent. on the cost of labour employed and materials used for works executed at the Shops was	26,064 11 4	.....
The difference between the actual cost of working the Municipal pumping engine and the fixed charges at which it was let on hire, to private parties and for departmental works, was	1,183 5 9	.....
The percentage charged on private works executed was	19 0 4	.....
Amount realized by the sale of unserviceable and surplus articles was	1,319 3 5	.....
Amount realized by the sale of saw-dust	13 0 0	.....
Overcharge in Bill No. 8, dated 20th April 1895 ...	1 5 7	.....
Allowance for stationery, &c., for Garlick's Incinerator	60 0 0	.....
The balance in favor of the Workshops was therefore	.....	6,090 6 8
Total Rs. ...	28,660 10 5	28,660 10 5

383. Charges on account of ground rent for the year 1895, for land occupied by the Workshops and stores premises, the Health Department Stables, Incinerator and Grant House, amounting to Rs. 102-8-7, were paid to Government; and Rs. 851-2-0 for water consumed at the Workshops credited to the Municipal Fund, out of the Workshop Grants.

Establishment.

384. Ten extra workmen at a cost of Rs. 185-10-0 per mensem, were sanctioned in the budget and employed during the year to work the new machines purchased for the Workshops.

New Machines.

385. The following machines were purchased for the Workshops during the year and the cost thereof debited to the budget grant of Rs. 3,550 for New Machinery sanctioned in the detailed statement No. 12 of the Budget for 1895-96:—

						Rs.
One sliding, surfacing and screw cutting lathe complete 8″ centre						1,700
One	do.	do.	9″	„	... ...	1,850
					Rs.	3,550

386. Both of these machines are made by Messrs. F. Berry & Co. and they were purchased through Messrs. John Fleming & Co.

Works executed at the Workshops.

387. The following works, which were in hand at the close of the last year, were completed during the year under report :—

(*a*) Four road-watering machines.

(*b*) Eight new pump rods for the Love Grove Pumping Station.

(*c*) Twenty scraping or drain carts for the Road Department.

388. No large items of new works were executed during the year the staff being principally engaged on repair works, the Municipal rolling stock, fire engines, steam road rollers, Love Grove and Colaba pumping machinery, &c.

Engines and Machinery.

389. The old engine used for driving the machinery of the Workshops, having become worn and found to be wasteful in fuel, was stopped in the month of November and the portable engine, formerly used for driving the 10″ centrifugal pump at Love Grove, was placed in its place.

390. The old engine when opened out for examination was found to be not worth repairing, but as the portable engine placed in its stead is doing the work satisfactorily with considerable saving in fuel, it is thought desirable to continue to use it for the present and not to make any application for the purchase of new one until the question of the future location of the Workshops is definitely settled, which is at present under consideration, as Government now demands a much higher rent for the ground occupied by the Workshops and Store premises, Incinerator, Health Department Offices and Stables, etc., than what was paid formerly.

391. With the exception of the Engine, above referred to all the other machinery worked well during the year. There have been no stoppages on account of break-downs or accidents.

Repairs executed.

392. The rolling stock of the road and health departments, the machinery of the Love Grove Pumping Station, steam rollers, fire engines, electric light machinery, Garlick Incinerator and the Gully flushing engine were repaired from time to time and kept in working order.

393. The ten-ton Steam Roller No. 9 for which a new boiler was made in the previous year has been completed and sent out to work. A new boiler for the eight-ton Steam Roller No. 18 has been completed and the roller will be ready for work during the current year.

Hydraulic Lift in the Municipal Offices.

394. The hydraulic lift has worked satisfactorily during the year.

395. There were only two stoppages during the year, the first was necessary for putting in a new cup leather to the piston of the cylinder, and the other for painting the service tank in the dome of the Municipal Office Buildings which supplies the water for working the Lift.

396. The large fire service tank, also in the tower, has been replenished with water from time to time by the pump used for filling the hydraulic lift service tanks and at no time has the water level been allowed to fall beyond a few inches of the maximum contents.

397. The grant for working the lift was Rs. 1,000 and the total expenditure during the year was Rs. 1,547-8-8.

THE GARLICK AND CHRISTIANSEN INCINERATOR AT THE WORKSHOPS.

403. In last year's administration report it was mentioned that the Incinerator was stopped at the end of December 1894 for repairs. These repairs were undertaken by Mr. Pestanji Shapurji Mestri and were completed in May 1895 at a total cost of Rs. 1,220-5-7, and were as follows :—

(*a*) Removing the arch of the main flue and re-building the same.

(*b*) Filling in space at the side of the air flue with concrete and placing six inches of concrete over the flue to prevent leakage.

(*c*) Cutting out several cracks in the masonry of the furnaces and filling in the same.

404. From May 1895 up to November 1895 the Incinerator worked well, when it was found that a considerable leakage of air was again taking place. On examination the blast heater was found to be at fault, as the tubes were damaged by the heat of the furnaces and were allowing the heated air to escape direct into the main flue and

thence into the atmosphere without being fully utilized. It being useless to work the engine boiler and blast fan for producing the draught under these conditions they were stopped and the Incinerator continued to work from November 1895 up to the middle of February 1896 with natural draught only, the result being, as was expected, that a smaller quantity of town-sweepings and garbage was consumed.

405. The Incinerator was stopped on 15th February 1896 for the purpose of repairing the blast heater, but finding on inspection that the needful repairs were very expensive, they were not undertaken till the question of disposal of town-sweepings was finally settled. The damaged blast heater was therefore removed altogether.

406. As the Health Officer intimated that the reduced consumption of 'Cutchra' was causing his Department considerable inconvenience it was decided to try the Incinerator with an unheated blast. For this purpose a masonry flue was constructed to convey the blast from the fan across the blast heater chamber into the air flue, and this work was completed by the Workshops on 29th February 1896 at a cost of Rs. 185-10-0.

407. After allowing the brick-work to dry, the Incinerator was started with an unheated blast on 6th March 1896 and it was found that the Incinerator was capable of consuming the same quantity of dry 'Cutchra' as with a heated blast. It is probable that this would not be the case with wet 'Cutchra.' What the difference will be cannot be ascertained until the setting in of the monsoon.

LIST OF PROPERTIES BELONGING

408. The following statement gives the Particulars of Municipal

Ward

THE MUNICIPAL SERVANTS ACT.

409. No circumstances have arisen in this Department during the year to necessitate the putting of the Municipal Servants Act into operation.

I have the honour to be,

Sir,

Your most obedient servant,

M. C. MURZBAN, F.R.I.B.A., M.I.C.E.,
Executive Engineer, Municipality.

J.—FIRE BRIGADE.

The Establishment has been upheld in a state of efficiency during the year, and all appliances are in good condition and thorough working order.

No case of loss of life by fire, where the Brigade was concerned, has occurred during the year.

Several members of the Brigade have received injuries in the execution of their duty at fires, all of whom have since recovered, with the exception of one Fireman, named Pandoo Abaji, who, in consequence of his injuries having permanently disabled him from further service, was invalided, and allowed a pension of Rs. 4 a month by the Corporation from the 1st February.

The water-supply at fires has been satisfactory in all cases, and the attendance of the Water Works staff has been prompt and of great assistance to the Brigade.

Foreman Mr. Weston has been permanently appointed Head Foreman from the 1st March.

An order for 113-60 feet lengths of rubber-lined canvas hose was executed by Messrs. Merryweather & Sons, and the supply received in the month of October.

Provision has been made in the ensuing year's budget for a supply of 2,880 feet of hose (in place of other hose condemned), additional suctions for steamers, valves, &c.

Two horses have been purchased during the year in place of two unfit for Fire Brigade work and disposed of by public auction.

The work of periodically inspecting the hydrants throughout the city has been carried out by the Brigade during the year in a satisfactory manner.

The Fire service at the Municipal offices has been maintained in thorough working order, and the employés periodically drilled in the use of the appliances. The Fire appliances at the several Municipal markets have also been inspected and cleaned at frequent intervals.

The new Manual Fire Engine Station at Naigaum Tank Road, Dadar, was completed and duly opened on the 1st June; and the old Fire Engine Shed at Duncan Road, at which the engine and men for this station were temporarily located, was abolished on the same date.

The new station at Babula Tank will be completed and opened about the 1st May next.

The new Head-quarters Station at Sankli Tank, Byculla, is now in course of erection, and will, in all probability, be occupied during the ensuing year.

The present equipment of the Brigade is—

8 Steam Fire Engines.
9 Manual do. do.
15 Hose Reels.
7 Tender Carts.
6 Telescopic Fire Escapes.
1 Brake.
15 Horses.

319 Lengths of delivery hose, comprising about 23,580 feet, and other necessary fire-extinguishing appliances.

The strength of the Brigade is :—

1 Chief Officer.	12 First Class Tindals.
1 Surgeon.	6 Second do. do.
1 Clerk.	102 Firemen of grades.
1 Head Foreman.	7 Drivers.
5 Foremen.	7 Grooms.
6 Engineers.	

Making a total of 149, including all ranks.

The distribution of Engines, &c., is as under :—

The number of calls to fires received during the year has been 140. Of this number 43 were reported by the Police, but did not require the attendance of the Brigade, the remaining 97 involved the turning out of engines and men, and resulted in 10 false alarms and 87 fires; 49 of which were extinguished by Brigade appliances and 38 before the arrival of the Brigade. (*See tables Nos.* 1 *and* 2).

The estimated damage to property during the year has amounted to Rs. 20,41,571, showing an increase of Rs. 18,16,126 as compared with the preceding year. (*See table No.* 3).

This large increase has principally accrued through fires which occurred at Cotton Green, Colaba, on the 28th April, doing damage to the extent of Rs. 15,000. DeLisle Road (Currimbhoy Mill) on the 24th May, where cotton to the value of Rs. 70,000 was damaged. A dwelling house and godown in Tank Street, on June 1st, consumed Rs. 32,900. A dwelling house and godown in Dhobi Street, Chackla, on June 30th, covers damages to the extent of Rs. 78,100. A cotton godown at Bhagooria Street, Colaba, on the 6th October, was damaged to the extent of Rs. 60,000, whilst the loss at the Hope Mill at DeLisle Road on the 23rd November was estimated at Rs. 5,00,000. A dwelling and godown in Kaji Syed Street on the 6th December was responsible for Rs. 15,000 damage, whilst the fire of the year, that of the Army and Navy Stores, contributed Rs. 12,05,000.

These eight fires consumed the greater portion of the loss of the year, they aggregating the sum of Rs. 19,76,000, thus leaving a balance of Rs. 65,571 to cover the loss of the remaining 122 fires.

The estimated damage to insured property has been Rs. 20,12,657, whilst that to uninsured property has been Rs. 28,914.

The amount of damage to property at the 49 fires extinguished by the Brigade, with the use of Brigade appliances, is estimated at Rs. 20,00,360, whilst the property in imminent risk of becoming involved at these fires has been rated at Rs. 60,05,779. (*See tables Nos.* 2 & 4.)

The estimated quantity of water used for extinguishing fires during the year has been 2,343,582 gallons, or about 10,462 tons. Of this quantity 2,289,282 gallons were taken from the mains, and 54,300 gallons from the sea, wells, and tanks. (*See table No.* 5.)

The fires of 1895-96 show an increase of 33 over the fires of 1894-95, or compared with the average of the past 10 years, an increase of 32.

The following tables are annexed :—

Table No. 1.—Attendance at Fires.
Do. „ 2.—Statement showing by what means Fires were extinguished.
Do. „ 3.—Summary of Fires, and estimated loss.
Do. „ 4.—Statement showing the estimated damage and property at risk at Fires extinguished by Fire Brigade appliances.

K.—PUBLIC GARDENS.

1. The following Gardens were maintained during the year under report:—

(*a*) Victoria Gardens.
(*b*) Elphinstone Circle Garden.
(*c*) Falkland Road Garden.
(*d*) Northbrook Garden.
(*e*) Sir Cowasjee Jehangeer Garden at Mahim.
(*f*) Bazaar Gate Garden.
(*g*) Garden on the Flats.
(*h*) Dicks Tank Garden.
(*i*) Malabar Hill Garden.

2. The total number of visitors to the Victoria Gardens during the year under report was 1,438,595 against 1,298,264 in the previous year, once more showing an increase of about one lakh and forty thousand.

3. Some more roads were metalled during the year under report and all the roads repaired and kept in as good a condition as possible.

4. The work of laying water pipes where necessary and making drains for rain water across roads was continued.

5. The roofs of all the old animal cages were in a very dilapidated and dangerous condition. More than half of them were entirely renewed at a cost of Rs. 799, and the remaining kept in abeyance for want of funds.

6. Mention was made in the last report of the very bad condition of the Chawls for malis and animal-keepers, of the cattle shed and the shed attached to the office. Proposals were submitted for their renewal with the Budget estimate for the current year, and all of them have been sanctioned with the exception of the malis' Chawl. The present quarters of the malis are extremely insanitary, in a very dilapidated condition and situated in a most inconvenient spot in the interior of the garden, with no facilities in respect of privy drains. They would require a large amount to repair and improve them and to connect the privies with the sewage drain on the Connaught Road, which is situated at a great distance from them. Under the circumstances it is to be hoped that new quarters would be sanctioned before long in a more convenient situation.

7. The large area of lawns in the garden, which is one of its chief features, takes up most of the time of the staff to keep it up in the requisite condition. In many cases they have sunk below the level of the roads and are overrun with weeds and coarser grasses, and almost all of them require to be dug up, levelled, manured and returfed. This work was continued during the year under report as much as possible with the resources at command.

8. All the shrubberies, which were in the beginning planted out in haste to fill up empty places with the materials that were available then, are being gradually improved by removing old and unsuitable shrubs and planting more suitable ones in their places and with an eye to the grouping of striking shrubs wherever convenient. Steps

are also being taken to increase the number of flowering shrubs in the gardens, of which the present stock is very limited. Two new large beds were also made during the year under report and planted with hardy country rose plants, which, after sufficient growth, are being budded on with free flowering and well-known exotic varieties. Attempt is also being made in several beds to arrange trees and shrubs according to their natural orders and to increase the stock of trees and shrubs indigenous to the Presidency.

9. 284 plants were supplied to the Road Department for roadside planting.

10. Among the plants added to the Garden Collection during the year under report are :—Strychnos nux-vomica, Mimusops hexandra, Dodonea viscosa, Stachy tarpheta urticæfolia, Myrospermum toliferum, Guazuma tomentosa, Acacia soondra, Pterocarpus marsupium, Morus indica, Strychnos potatorum, Ficus aurea, Bambusa siamensis, Aristolochia gigas stertivantii, Thuja aurea, and some orchids, palms and roses. If the rules of the Gardens allowed of greater freedom for exchanging plants with other public Gardens in India and elsewhere, the stock of new and rare plants would, no doubt, increase more rapidly than now.

11. The other Municipal Gardens were maintained in as good a condition as possible. The improvement of Dicks Tank Garden was undertaken during the year under report, and the roads had their level raised and put in proper order. Improvement in planting will be carried out during the current monsoon.

12. Of the animals added to the collection during the year the following are worth noting :—

Names of animals.	No.	How obtained.
Silver pheasant	1	Purchased.
Black do.	4	
Gold do.	4	
Flamingo	2	
Top knot fowls	2	
American bulbuls	2	
Paradise whydah bird	1	
Monal pheasant	2	
Kalij do.	2	
Cockateels	2	
Pennant's parrakeet	1	
Magpie	1	
Thrushes	3	
Slender-billed cockatoo	1	
Thick-tailed galago	1	Presented by Natural History Society.
Antelopes (Indian)	2	
Badger	1	
Panther cubs	2	
Black-necked stork	1	
Gazelle (Indian)	1	Presented by N. H. Patuck, Esq.
Antelope („)	1	Do. by the Military Secretary to H. E. the Governor.
Axis deer	1	Do. by Surgeon-Major Culling.
Do.	1	Do. by G. P. Panvelkar, Esq.
Gazelle	1	

Names of animals.	No.	How obtained.
Gazelle	1	Presented by Mrs. Richardson.
Nilgai	2	Do. by Virjee Tricumb, Esq.
Rock snakes	4	Do. by B. Punja, Esq.
Gazelle	1	Do. by Hoosain Hassan, Esq.
Lion cubs	2	Do. by the Nawab of Junagadh.
Barking deer	1	Do. by A. M. King, Esq.
Persian gazelle	1	Do. by J. Unger, Esq.
Hog deer	1	Do. by Lieut. A. M. McArthur.
Gazelle	1	Do. by G. McKenzie, Esq.
Sarus crane	1	Do. by P. N. Wadia, Esq.
Gazelle	1	
Zanzibar monkeys	2	Do. by F. L. Wallace, Esq.
Sarus cranes	2	
Black buck	1	Do. by Rahimtula Khairaj, Esq.
Wild ducks	2	Do. by J. E. Sassoon, Esq.
Panther cubs	2	Do. by A.D. Younghusband, Esq.
Australian magpie	1	Do. by G. Gilchrist, Esq.
Pea-fowl	1	Do. by P. M. Mehta, Esq.
Barking deer	1	Do. by J. Peace, Esq.

13. Among the animals which died during the year under report were :—

Galago,	Talapoin monkey,
Female lion cub,	Mongoose lemur,
Australian sloth,	Opossum, and
Malbrouck monkey,	some deer and birds.

14. The old temporary bamboo enclosure made for Kangaroos having completely broken down was renewed during the year under report and made more lasting by using teak posts and battens and solid bamboos.

15. Mr. J. M. Doctor, Head Animal Keeper, who was deputed to Calcutta for instructions under the Superintendent of the Calcutta Zoological Garden, rejoined his duties on 5th March 1896, after staying for one year at the Calcutta Garden, and is at present engaged in drawing up a report for the improvement of the Zoological portion of the Victoria Gardens.

16. The Budget allotments and the actual expenditure of the several gardens are shown below :—

	Names of Gardens.	Total amount sanctioned.			Expenditure.		
		Rs.	a.	p.	Rs.	a.	p.
(a)	Victoria Gardens	52,373	0	0	48,702	1	4
(b)	Elphinstone Circle Garden	2,160	0	0	2,145	11	5
(c)	Falkland Road Garden	550	0	0	431	13	5
(d)	Northbrook Garden	1,806	0	0	1,778	12	5
(e)	Sir Cowasjee Jehangeer Garden.....	679	0	0	644	0	0
(f)	Bazaar Gate Garden	804	0	0	720	5	11
(g)	Garden on the Flats	1,140	0	0	990	10	0
(h)	Dicks Tank Garden	454	0	0	421	8	7
(i)	Malabar Hill Garden	1,268	0	0	1,201	12	4
	Total... Rs.	61,234	0	0	57,036	11	5

L.—THE VICTORIA AND ALBERT MUSEUM.

1. In the Natural History division the following additions were made to the department of Mammals :—

One panther, *Felis pardus* ; one young lion, *Felis leo var. Guzeratensis* ; and one young loris, *Loris gracilis*. These animals died in the Victoria Gardens and were forwarded by the Superintendent to the Museum from time to time. The mammals were all skinned and cured at the Museum, and such specimens as were in good order were stuffed and mounted for exhibition purposes.

2. The additions made to the department of Birds were as follows :—

One Brahminy duck, *Tadorna casarca* ; one mandarin duck, *Æx galericulata* ; one flamingo, *Phœnicopterus antiquorum* ; and one gold pheasant, *Thaumalea picta*. These died in the Victoria Gardens and were forwarded by the Superintendent to the Museum from time to time. Such birds as were in good order were skinned, cured, stuffed and mounted at the Museum. Also over one hundred and fifty specimens of eggs representing nearly fifty different species were added to the department by purchase.

3. The department of Reptiles received very few additions during the year. One cobra, *Naia tripudians*, one poisonous tree-snake, *Trimesurus anamallensis*, and two grazing lizards, *Uromastix Hardwickii*, were secured by purchase. All the four specimens were cured, preserved and mounted in spirits of wine at the Museum. A young python and a cobra which died in the Victoria Gardens were sent by the Superintendent to the Museum, but as the specimens were not in good order they had to be thrown away.

4. To the department of Fishes and Crustaceans were added several minor specimens by purchase, which were all cured, preserved and mounted in spirits of wine. Also a small sea-horse, *Hippocampus histrix*, was received by presentation from Mr. William P. Healy of Byculla.

5. The department of Entomology received no important addition during the year.

6. In the division of Anthropology several valuable additions were made during the year. The department of Artware received twenty-two specimens of silver manufactures by purchase ; also a few pieces of pottery and lacqueredware together with one or two other specimens were added to the department.

7. To the department of Numismatology was added one silver coin of Aurangzeb found in the Nassick district, received by presentation from the Honorary Secretary, Bombay Branch, Royal Asiatic Society, agreeably to the Resolution of the Government of India, No. $\frac{46}{1668\text{-}82}$, of the 9th October 1884.

8. To the department of Ethnology no addition was made during the year.

9. The most important work done in the division of Natural History was the endo-skeleton of a python, *Python molurus*. All the bones are thoroughly cured and anatomically arranged. The skeleton is complete and perfect and has formed a valuable addition to our osteological collection.

As usual, all the collections in the different departments were examined from time to time and were frequently supplied with preservatives. Also the spirit of wine collection was, now and then, looked into and several new specimens were cured, preserved and mounted in spirits of wine.

10. In the division of Anthropology the bulk of the work consisted in the overhauling of the various collections. The specimens of valuable cloths and other textile fabrics were examined both before and after the rains and were all in good order and preservation.

11. On the 3rd March 1896 a Pathan visitor to the Museum mischievously knocked down a wall-case located in a room in the Museum upstairs with the result that the glass-fronted doors along with the figures exhibited in the case were all smashed and broken to pieces. The damage done amounted to Rs. 270. The Pathan was said to be under the influence of *bhang* and *ganjah*. The Police charged the man with disorderly conduct before the Fourth Presidency Magistrate, when the Magistrate convicted the accused and sentenced him to ten days' rigorous imprisonment. Never before within the history of the Museum was there such an instance of mischief done by a visitor to the Museum during the time the building was open to the public.

12. During the year under review the Museum was visited by several private enquirers for the purpose of studying the Museum collections and taking notes of the localities in which particular pro-

ducts are found. Also students from the Grant Medical College, Bombay; the College of Science, Poona; the Veterinary College, Bombay; as well as Biology students from the several Arts Colleges in Bombay visited the Museum for studying Botanical, Geological and Zoological specimens. Some of the senior students have been regularly attending the Museum to study the osteology of reptiles and mammals. The School Final Examination boys from the Elphinstone High School, the New High School, and two or three other High Schools in Bombay also visited the Museum for the purpose of studying Botanical specimens.

13. Towards the end of the rains an Austrian Professor of Biology from Prague called at the Museum several times with varied collections of plants, which were all identified and named by my Assistant, Mr. R. M. Dixon, B.A.

14. During the year reference books of the value of Rupees five hundred were added to the Museum Library.

15. A statement showing how the annual and special grants were utilized will be found in Appendix A at the end of the report.

16. The Museum was open to the public for 315 days, and the total number of visitors was 749,299, showing a daily average attendance of a little over 2,378. Last year the Museum was open to the public for 313 days, and the total number of visitors was 6,85,047, showing a daily average attendance of 2,188.

APPENDIX A.

Statement showing how the annual and special grants were utilized :—

Natural History Grant.

		Rs.	a.	p.
1.	Spirits of wine	490	0	0
2.	Sundry preservatives	326	0	0
3.	Natural History specimens	164	0	0
4.	Miscellaneous charges	220	0	0
	Total ... Rs.	1,200	0	0

Grant for Cases.

		Rs.	a.	p.
1.	Materials and labour for repairing and polishing old cases	249	0	0
2.	One glass-fronted wall-case	51	0	0
	Total ...Rs.	300	0	0

Artware Grant.

		Rs.	a.	p.
1.	Silver Manufactures	599	7	0
2.	Sundry Artware specimens	156	0	0
	Total ...Rs.	755	7	0

Special Grant.

		Rs.	a.	p.
1.	Reference Books	500	0	0

BOMBAY PRESIDENCY
BOMBAY CITY.

PUBLIC HEALTH.

1. REPORT of Surgeon-Lieutenant-Colonel T. S. WEIR, Municipal Health Officer, forwarded with his No. 17878, dated 24th August 1896.
2. REPORT of the SUPERINTENDENT OF LICENSES, forwarded with his No. 1671 of 28th May 1896.
3. REPORT of the SUPERINTENDENT OF MARKETS, forwarded with his No. 568, dated 27th May 1896.
4. RETURN OF STREET ACCIDENTS, forwarded by the COMMISSIONER OF POLICE, with his No. $\frac{3461}{7}$, dated 5th May 1896.
5. REPORT of the MEDICAL OFFICER IN CHARGE, Infectious Diseases Hospital, Arthur Road.

1.—REPORT OF HEALTH OFFICER.

Although there has been a very great improvement in the public health this year, the mortality being 2,249 less than in the last year, yet I cannot hope for further reduction in the mortality until the local insanitary causes that I have so frequently described, and which I will once more describe so that there may be no responsibility on me, are removed. 25,081 deaths were registered, being 2,249 less than in 1894. Of this reduction in mortality 820 deaths were from Diseases of the Respiratory System, 594 from Diseases of the Digestive System, 336 from Cholera, 261 from Small-pox, 243 from Measles, and 54 from Fevers.

2. The two previous years 1893 and 1894 were remarkable from the meteorological phenomena observed and the incidence of diseases recorded, not only amongst human beings, but amongst animals. The abnormal meteorological features of these two years were accompanied by the prevalence of Zymotic diseases amongst human beings and animals.

3. I have in former reports again and again demonstrated that epidemic states amongst animals or human beings in the city have always been synchronous with epidemic conditions and influences in the country around. The experience of this year is a further confirmation of the accuracy of this opinion, and it cannot be better and more forcibly demonstrated than by the annexed diagram exhibiting the mortality in Bombay and the country around.

4. In the report for 1893 I wrote as follows :—"I have after "the very unfavorable record of 1892 to report in this year a very "great improvement in the public health, the mortality being 3,376 "less than in that year, but only 197 less than the average. This is so "far satisfactory, but it will not and cannot continue unless that "more effective means for carrying away the water brought into the "city are constructed."

5. Although in 1895 there have been 2,249 fewer deaths than in 1894, I must repeat again what I wrote in 1893, that this improvement in the public health, so far as represented by 2,249 deaths, will not and cannot continue unless that more general and therefore more effective means are constructed for carrying away the water brought into the city. It is true that the reduction in mortality over the previous year indicates that the general health of the city was so much better, but it does not indicate, when the figures are carefully examined, that the local causes of disease have been proportionately removed. The reduction is chiefly due to a lower mortality from diseases whose prevalence I have always contended was due, not to local conditions, but to general seasonal influences, although the mortality from each type of disease was influenced and intensified by local conditions. The reduction in mortality due to Fevers is not considerable, being 54 less than in the last year and 273 below the average. The chief reduction has been caused through a diminished mortality from Cholera, Small-pox and Measles, or, in other words, the three chief Zymotic causes and the groups of diseases which accompany or are synchronous with them. I will now briefly discuss the local causes unfavorably influencing the public health, and in doing so I am merely repeating the remarks made in previous reports and more especially in the Quarterly Reports of the last year and in the last Annual Report. The causes are :—

I. Insufficient Drainage—
   - *a.* Sewage.
   - *b.* Subsoil water.
   - *c.* Absence of connections between building and sewers.

II. Over-crowding.

III. Disposal of all the dry refuse on the Flats.

IV. The imperfect provision in the Municipal Act in regard to—
   - *a.* rebuilding of houses on old foundations without a space for ventilation and drainage being left on one side,
   - *b.* the exclusion of the evidence of Municipal Officers in regard to nuisances.

V. The obstruction of the sea-currents around the Island by the embankments at Bandora and Coorla.

6. The unequal equilibrium between the water coming into the Island and the liquid sewage pumped out is the most serious and urgent condition affecting the public health to be given attention to.

7. There has been an enormous increase of the water supply since 1892, from 16½ million gallons to some 29 million gallons or more daily, and very little increase in the number of drains. The Island is flooded or irrigated with water, and unless drains are constructed to take away all the water that comes into the city, the life of a healthy population will not be possible ; what has been seen in countries of marsh and wet, the poisoning of life from malarial fevers, will be seen here. It is not possible to look to the future except with anxiety. With incomplete drainage, there has been an enormous quantity of water left in the ground, some five or more million gallons of water daily, which the pumping power has been unable to remove, a floating balance indicating danger ; and there must be, however powerful and perfect the pumping power may be, an enormous quantity of water which will not flow away and which cannot flow to, nor be carried by, the tributary drains of the out-fall sewer, till drainage channels are constructed, because in more than half the Island there are not drains. I hope much in the future from the new and powerful pumps and the increased pumping power which it is known they give, but drains must be constructed in the districts undrained to carry the water and sewage to the tributaries of the pumps, if the greater power in pumping is to have any general effect in reducing the balance of water now unremoved in the Island. However powerful the pumps may be, there must be drains in the districts which now have not drains, if the pumps are to remove the water and the drainage from these districts. The first principle for the preservation of public health is this, that the water coming into the city shall be taken away and not left in the soil, and this first principle has been neglected so far in Bombay. Even the water currents round the Island have been obstructed by the causeways and embankments at Bandora and Coorla. The estuary between Bombay, Bandora and Coorla is silting up. The most offensive trades—the tanneries—discharge into the estuary, and the water at low-tide is fœtid.

8. The obstruction of the sea-currents around the Island by the embankments at Bandora and Coorla or elsewhere is, next to insufficient drainage on land, the most serious condition affecting generally the Island. An additional water-way ought to be opened on the south side of the Dharavie Creek so as to establish a current on the south to scour away the drainage from the tanneries. To those who take an interest in the public health few questions can be of more interest than the state of the subsoil water of the Island.

9. There is no doubt, the questions of first importance to the health of this city are : (i) the completion of the drainage of the city, and (ii) the prevention of waste of water. The drainage operations have given us an opportunity that we had not before of observing the distribution of the subsoil water. If any one had a doubt as to the saturation

of the subsoil and as to the rapidity with which the subsoil water, in some portions of the Island, rises and falls, an inspection of some of the drainage excavations near Colaba would dispel that doubt. The rapidity with which the subsoil water rises in portions of Colaba, is the most extraordinary phenomenon that can be observed in this Island; it is a phenomenon which can be observed with the eyes, for in some of the excavations as soon as the subsoil water has been pumped out, fresh subsoil water can be seen welling up. It seems as if the tidal currents flow across under the land, and the loose nature of the artificial soil of portions of Colaba which have been reclaimed favor the circulation of the currents. The drainage works have also given us an opportunity of studying the distribution of the subsoil water in other portions of the Island as, for instance, on the north side of the Marine Lines, where some 1,008,000 gallons of subsoil water were pumped out between the 5th and 25th February 1896. In Oomerkharee I observed a curious and interesting phenomenon showing how in rocky formations houses may be damp on the sides of the drainage excavations. Between the rock formation and the road metal there seemed to be a reservoir of subsoil water which kept escaping into the excavations. The drainage works in one portion of the city, near the Cawasji Patel Tank, have also come down to what can only be described as an underground stream. It has to be remembered that the position where this stream has been struck is near Howdachi Wadi, from wells in which, at one period, a portion of the water supply of Bombay used to be pumped up to the Two Tanks. An enormous quantity of water has been pumped up from this excavation and the stream seems as free as ever. My impression is that the excavation there has struck the subsoil stream that fed the Baboola Tank and the wells in Howdachi Wadi, for there has been this year a very remarkable subsidence in the level of the water in the Babula Tank. The water in this tank has never been so low before [illegible] when, many years ago, the Municipality attempted to clean the tank out, it was not possible to pump the water to as low a level as it has fallen this year. The low level of the water disclosed two large streams of subsoil water entering the tank from the south. I may mention that on a former occasion when it was attempted to clean the Baboola Tank out, the most serious nuisances were caused, nuisances accompanied by a great prevalence of fevers in the J. J. Hospital. Before any tank is filled in, I think it should be insisted on as an essential condition that a certificate should be obtained from the Executive Engineer that the subsoil drainage of the locality in which the tank may be will remove quickly all the subsoil water flowing into the tank. Until drainage works are sufficiently advanced to remove the water which collects in the tanks of a locality, tanks ought not to be filled in. We have had an illustration of this in Khandia Tank Street. A large tank was filled in, and the result has been that the subsoil water of the street at high states of the tide rises up through the metal of the road.

10. In former reports I have referred to the waste of water, and the apprehensions I entertained of the effects of waste as seen in damp ground inside and outside buildings were not shared by some others, but I imagine that no one has now any doubts as to the reality of that waste and the

evil effects which come of it. The measures taken to prevent waste, and the attention given to water pipes during the last year, have undoubtedly been beneficial and have had the effect of reducing the ill consequences of water running to waste. In one case in which waste of water had been carefully gauged by the Water Department, the Water Engineer wrote in reference to it: "I caused a metre to be fixed, with the "result that the consumption is found to be over 3,000 gallons per day. "This works out to a payment of less than ½ anna per 1,000 gallons. "Taking the out-force of water at 3 annas per one thousand, the pay-"ment should be over Rs. 2,000 per year, instead of about Rs. 350 as "now paid. The consumption per head is over 20 gallons against a "desirable and efficient allowance of 6 for such purposes as it is here "used for." This, be it remembered, is waste of water at a group of buildings very imperfectly drained, and in consequence very damp.

11. It has occurred to me that at all chawls the water-pipes should be so placed that the water running to waste would flush the drains.

12. A very interesting correspondence has taken place on a letter from me suggesting that the scrub and long grass on the gathering grounds of the lakes Tansa, Vehar and Tulsi should be cut down and burnt before the annual season of rainfall in the monsoon. During an inspection of the Tansa Lake in the last hot weather, I observed a quantity of long grass and scrub, more or less dead, just above the lake, and it seemed to me that the grass must soon rot and be washed down into the lake. The Forest Officer to whom the question was referred for opinion disapproved of the burning of the grass and scrub because of the denudation that, in his opinion, it would lead to. He wrote:—

"The tree growth must also in due course disappear, and the soil, "having no protection, will be washed down the slopes into the lake "and silt it up; while, in the meantime, the leaves of the trees "(which are now retained in the grass and gradually incorporated in "the soil, forming the mould so necessary for plant life) will be blown "or washed into the lake, and till all the trees were dead the water of "the lake would probably be worse than it can possibly at present."

13. The question at first sight appears to be—"Will burning of the grass cause denudation of the soil?"—that, however, is not the real question. The real point is this: "Will burning of the grass as proposed by me cause denudation of the soil?" The Forest Officer has had, I think, in mind the burning of the soil and the turning up of it afterwards for agriculture. That is a totally different operation, I maintain. Last year, at Lanowli, I watched carefully the effect of burning the grass of a hill-slope, and I observed that the burning had not, after the rain came, the effect of denuding the soil. On the first moisture the tender shoots of grass came up and bound the earth firmly. The serious question is this: Is the preservation or conservation of all the grass and all the rubbish in the forests around the lakes compatible with the conservancy of the lakes and a pure supply of water. Clearly our policy ought to be to prevent all the impurities

we can prevent descending into the lakes rather than to let the impurities in and have afterwards to adopt measures to intercept or destroy them. The preservation of forest means the preservation of mould, and with forest mould, some of which must be washed into the lakes, come Forest Fevers.

14. Towards the end of the year, I had a correspondence with the G. I. P. Railway in regard to the importation of cases of Cholera from Pandharpoor. Four cases within two days were taken out of the train ill, two at Dadar and the other two from other stations on the line. I wrote to the Railway Company inquiring whether any special precautions were taken for the examination of passengers coming from Pandharpoor. I was informed in reply "that at Dhond "and Manmar the Company's apothecary was present on the platform "for all trains conveying pilgrims."

"Special precautions were also taken at Barsi Road, and I am "informed that only one female passenger showing symptoms of "Cholera was detected and prevented from travelling."

"In the village the District Police were on the alert to prevent "sick people from entering the Railway premises."

"The Cholera house was open and in charge of a Hospital Assistant, "and it is stated that nineteen cases were traced between the 30th "October and 5th instant, and eleven deaths occurred."

"It is possible with such a rush of passengers for cases in the early "stages to escape."

15. The subtleties that the Municipal Law encourages cannot be better illustrated than by the following case :—We have the power, under section 257, to call on a person to pave a sweepers' passage, and if the passage is not paved and the law complied with, there are certain penalties imposed for neglecting to comply with the Law, but the passage must be a sweepers' passage and no other kind of passage. Let us take another passage between houses on to which slops are thrown and which is in a constant state of soddenness and, therefore, a danger to the buildings whose foundations are polluted through the water thrown on this passage. In this case we can do nothing because the passage is not a sweepers' passage. This is almost absurd, and it is certainly trifling with the public health and the public comfort.

16. It is deplorable that houses in the most crowded portions of the city can be rebuilt without leaving on one side an open space for ventilation and drainage. It seems of little avail having Building Bye-laws when people can build houses where houses are closest together without leaving on one side a gully for open air, for light and for drainage. Public attention is affected by the loss of life, however small, when a building falls, but here we have, through imperfection in the Municipal Law, many people annually poisoned by foul air. We have had cases of rapid poisoning through the foul air of sewers, men suddenly

suffocated by mephitic vapours, and the cases have been the subject of prolonged legal inquiry, but here, in the case of buildings without a gully on one side, we have, although slower, not less certain, poisoning protected or tolerated by the law.

17. I have before referred to the dangerous positions in which water-closets have been constructed inside buildings. I have lately seen some plans on which it was proposed to construct water-closets near not only wells but alongside cook-rooms, and further this dangerous proposal could not be prevented. In many old buildings in the most crowded parts of the city the privies are near cook-rooms, and the result is cases of diarrhœa developing into cases of choleraic diarrhœa with the symptoms of cholera. It is a most dangerous position for cook-rooms to be placed in.

18. I am glad to be able to refer to the resolution of the Corporation sanctioning the construction of an open drain where the foul ditch described in former reports flows and the sewage lies in pools on the ground between buildings :—

"The drainage from Parel to the north of Government House, "Parel, on the south flows down in ditches past the church in a wide "cesspool to a ditch between buildings—between two rows of dwellings— "and between these buildings occupied by many people the sewage "soaks into the ground. On the north the drainge flows on to the low "ground near the railway station—ground flooded with sewage and "wet from the leakage of a water main."

19. Such is the ditch! The open drain sanctioned will take the place of the ditch. Money could not be better spent. It is a mistake to suppose that the money will be wasted when a system of drainage has been carried out in this locality. The ditch follows the course of a natural rain-water channel and it carries rain-water, and the same purpose this open drain will serve. The open drain will do harmlessly what the ditch could not do—carry sewage away from dwellings. It will give great relief to the people of the locality, and it was the only means by which speedy relief could have been given.

20. About a mile and-a-half of open drains will be constructed with open drain connections from the buildings. The sides of the drains will be pitched and embankments formed which may be used for bathing, so that the people, instead of standing in pools of water in front of their dwellings, will be able to stand and walk on dry ground, and where they bathe the ground will not be flooded nor made into a pool of water and mud. It is true that the sewage will only be carried away from buildings to low-lying ground far from buildings, but to the people living in this locality what comfort these open drains will bring!

21. I am glad to state that tanks have been sanctioned to collect the waste water where water from stand-pipes was running to waste and washing away footpaths in Parell, to relieve pressure in the water-mains, and the water can now be used for bathing or other purposes.

22. In one case in which I objected to the position of a water-closet within two feet of a well, the Executive Engineer was of opinion that there is nothing in the Municipal Act under which the Commissioner can fix a particular site or object to a site proposed by a party for a water-closet or a privy. But in Bye-law No. 34, however, such power is given to him for privies only, and the Executive Engineer is, therefore, of opinion that the Municipality cannot prevent a man from building his water-closet wherever he chooses to do so. As the question was one of great importance, the opinion of the Municipal Solicitors was asked. The Solicitors were of opinion that "the "Municipal Act gives no power to the Commissioner to prescribe the "position in which an owner of property is to place a water-closet which "he proposes to build, nor does it contain any provision which enables "the Commissioner to prevent such an owner from building his water-"closet wherever he chooses to do so, provided of course that the posi-"tion chosen is not inconsistent with the due observance and ful-"filment of the provisions of section 251. Bye-law No. 34 of the "Building Bye-laws does not extend to, and cannot possibly be held "to apply to, water-closets."

23. Very great anxiety has been caused to me by the number of applications we have received to construct water-closets. A person who has not space for a privy thinks that he is wise in putting a water-closet where he would not be permitted to build a privy. I referred to this in my last annual report, and I have also referred to it in other reports. If the rules proposed by the Committee, consisting of the Executive Engineer, the Special Drainage Engineer, the Drainage Engineer, and the Health Officer, appointed by the Commissioner to consider the system of house-connections for Colaba be adopted and carried out in the city generally, the danger from water-closets will be reduced to a minimum. A curious experience occurred while this Committee was sitting. On one day when I happened to be strongly objecting to the construction of water-closets in bathrooms, information came to us that on that morning in one of the finest buildings in the Fort the sewage had regurgitated back from the street sewer up through the water-closets. We went in consequence and inspected the building and found an abominable nuisance, an odour which may be described as of putrid paints. This led to the inspection of another building not far away, in which there are water-closets, and in this building we observed outside the water-closets of all places a tiffin room for "young ladies."

24. I am sorry that practically no progress has been made in the works necessary to the making of connections between sewers, some of which have been constructed as far back as 1880, a list of which I gave in the last Annual Report, and buildings. The question as to whom the connections were to be made by, was, however, coming to a final stage of discussion. The question of most urgency, after the construction of drains to carry away sewage and water, is the question of connections between buildings and sewers. There are sewers on the east end of the Island that have been ready for use for some 16 years to

which connections have not yet been completed. Fortunately, on that side of the Island in the most crowded portions there are old channels, more or less worn away by cleaning and scraping, originally intended for rain-water, by which sewage and rain-water can flow away. But on other sides and in other parts of the Island, there are only ditches, the sides of which have at one time been roughly formed by the Health Department collecting and arranging some stones to form banks between which the sewage might flow, from which most serious nuisances come. Unless that connections are promptly made, I fear that the position of some of the sewers will be forgotten and that they will, as occurred in Kamatipoora many years ago, silt up. There is no question the most careful supervision is necessary, no matter by whom house-connections are made, and a very large establishment ought to be, and will have to be, employed for supervision. The construction of house-connections in crowded portions of the city is attended by many difficulties. In fact, if house-connection work is to be thoroughly supervised, it involves an expenditure for supervision which the Municipality have little idea of. In the narrow lanes and in gullies in which a man can scarcely turn it is most difficult to supervise the work.

25. It seems to me that the only immediate remedy for the serious nuisances that now exist in Parel and the suburbs is the construction of a number of intercepting open drains to carry sewage and water away from dwellings.

26. I am glad that a system of drainage which will embrace the Nagpadas, districts specially referred to in my last annual report, has been sanctioned.

27. As yet connections have not been made to the Shone system in Colaba.

28. I would give an instance in a district now forming a portion of the city of the difficulties which the absence of drains causes. The district is Byculla, and the locality is the important one of Gilder Street, the north portion of which has not a sewer. There are most serious nuisances in the locality around groups of chawls off this street caused by pools of water and sewage. The Health Department prosecuted in order to abate the nuisances and obtained the construction of cess-pools. The cess-pools, which are masonry tanks, merely embank the sewage during the fair weather. In the wet weather the tanks overflow and sewage and water cover the open ground to the foundations of the buildings. The Drainage Engineer and I made a long inspection of the locality, the time of the year being the rainy season. The ground around the chawls was covered with water. It occurred to the Drainage Engineer that a connection might be made with the rain-water drain in Gilder Street, but on taking the levels it was found that the storm-water drain was higher than the level of the dwellings, so that a connection could not be made. This is a very important locality, in which there are, as I have now described them, serious nuisances.

Further south of the Bellasis Bridge the same difficulties have occurred owing to, not the absence of drainage, but the low level of the ground. There is a group of buildings in that locality consisting of 6 chawls, and although they have plinths above the level of the surrounding ground, they are still too low to be connected with the system of drainage in the district. The result is that all the water and sewage has to be used for irrigation around the dwellings.

29. A great deal of attention has been given during the year to the arrangements for the filtration of the water-supply. I strongly advocated the improvement of the ventilation of the chambers in which the filter beds are placed, and improvements have been effected. Still in the hot season the temperature in the filtration chambers is some 5° above the temperature in the shade in the outer air. The water in the reservoirs ought to be kept as cool as possible. The following table showing the results in free ammonia and albuminoid ammonia of analyses of the water-supply will be of interest. It will be observed that in July a sample of Tulsi water gave, on one occasion, the enormous result of ·12 parts of free ammonia. The Tulsi supply acquired its maximum impurity in April, and it will be noticed that in December the filtered Tulsi water from the Malabar Hill reservoir was of more than the average good quality, the albuminoid ammonia being as low as ·08 parts per million.

30. The Vehar unfiltered supply was most impure in April. From the table the much greater purity of the Tansa water as compared with the other sources of the water supply will be observed. In July the Tansa water was almost pure.

STATEMENT of Some Analyses of Water during the Year 1895.

| MONTHS. | Unfiltered Tulsi water from the Inlet Well, Malabar Hill Reservoir. | | Unfiltered Tulsi water from the Settling Basin of Malabar Hill Reservoir. | | Unfiltered Tulsi water from the Tap on the side of the Laskars' Chawl, Malabar Hill Reservoir. | | Unfiltered Tulsi water taken out of the Tulsi Main through the Fire hydrants on top of the main near the Malabar Hill Fire Brigade. | | Filtered Tulsi water from the Distributing Box of the Malabar Hill Reservoir. | | TULSI WATER. Filtered Tulsi water from the Siphon well No. 1 (filter), Malabar Hill Reservoir. | | Filtered Tulsi water from the Waterfall in No. 1 vault below No. 1 Filtered bed, Malabar Hill Reservoir. | | Filtered Tulsi water from the Waterfall in No. 2 vault below No. 2 Filter bed, Malabar Hill Reservoir. | | Filtered Tulsi water from the Waterfall in No. 3 vault below No. 3 Filter bed, Malabar Hill Reservoir. | | Filtered Tulsi water from the Waterfall in No. 4 vault below No. 4 Filter bed, Malabar Hill Reservoir. | | Filtered Tulsi water from the Clear Channel Near Waterfall of Malabar Hill Reservoir. | | Unfiltered Vehar Water, from No. 1 Filter bed, Malabar Hill Reservoir. | | Filtered Tulsi water from the 48" pipe in No. 3 Filter of Malabar Hill Reservoir. | | Filtered Tulsi water from the 48" pipe in No. 4 Filter of Malabar Hill Reservoir. | | VEHAR WATER. Unfiltered Vehar water from the Inlet Channel of the Bhandarwada Reservoir. | | Filtered Vehar water from Filter Channel of the Bhandarwada Reservoir. | | Filtered Vehar Water from No. 3 Filter Water Channel of the Bhandarwada Reservoir. | | TANSA WATER. Tansa Water obtained from the finished Water Basin at Ghat Cooper Siphon Head. | | POWAI WATER. Sample of Powai Water that is being let out through the second discharge pipe in the Engine House. | | REMARKS. |
|---|---|---

31. It will be observed from the table following that the reduction in mortality is greatest by 186 deaths amongst people born outside of Bombay.

TABLE SHOWING THE NUMBER OF DEATHS EXCLUSIVE OF STILL-BORN ACCORDING TO PLACE OF BIRTH.

32. The general death-rate is very unequally distributed ; the Water Division having a mortality of 3·02, the Fort, South, 8·60, the Esplanade 12·51 and Chaopati a death-rate of 14·76. At the other extreme we find Second Nagpada with a mortality of 50·61, Kamathipura with a mortality of 44·85, Tardeo with a mortality of 40·51, and Khara Talao with a mortality of 39·24.

33. The highest mortality has occurred in Second Nagpada. I am glad to be able to record that a system of drainage has been sanctioned for the Nagpadas and that after many years there is a hope of this district being drained. A system of subsoil drainage will, however, have eventually to be carried out in the Nagpadas. The locality of Kandia Street to which I have referred as exhibiting a remarkable fluctuation and rise in the subsoil drainage up to the road level is in second Nagpada.

34. The second highest mortality has occurred in Kamathipura. The measures necessary for the improvement of Kamathipura, I have described fully in the following words in the last annual report :—

"The district of second highest mortality is Kamathipura. I "have for many years described the insanitary conditions influencing "the health of the people of this locality and enhancing the mortality "of Kamathipura, and I need not now do more than briefly refer to "some of these conditions. The conditions to which I am now draw- "ing attention are the high level of the subsoil water and the nature "of the soil. In the annual report for 1892-93 I referred to the "mortality in the locality of Kamathipura as follows :—'Although the "mortality in Kamathipura is high, it is not the highest as in the "last year. There are two improvements which should be carried out "in Kamathipura—the drainage of the subsoil water which is almost "up to the surface even in the hot season and the improvement of "buildings. A member of the Corporation, who has come to live in "the old Kamathipura district, has seen to his amazement the water "rising up through the floor of his house. I told him it would be "so, and even worse before the rains were over. Kamathipura is "now one of the densely populated localities.' "

35. Tardeo, the locality of third highest mortality, is very damp, and localities in it are very low lying and made up also of artificial soil. Portions of this district were, many years ago, reclaimed with refuse, traces of which are still found. There is moreover a very numerous and poor population in the locality, and, in addition, an increasing number of factory hands.

36. Umarkhari occupies the fifth place. I am glad that a system of drainage, which will embrace this district, has been sanctioned.

37. Chukla occupies the sixth place. It is a district of intense crowding, having had as many as 624 persons to an acre in 1891. The houses are also very imperfectly ventilated, being dark and overcrowded. The district has a number of sewers to which connections have not yet been made. Not only should connections be made to these sewers and the system of drainage completed, but an open space for which there is great need should be provided in the district.

38. The mortality under one year of age and under, very closely indicates the insanitary conditions and the chances of life in districts. For instance, the five sections in which the highest mortality amongst children under one year of age has occurred, are Tardeo, Second Nagpada, First Nagpada, and Umarkhari. These are all undoubtedly sections of very insanitary conditions, both within and without buildings.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM ALL CAUSES IN EACH SECTION IN 1895.

39. The mortality by class is an indication of the conditions influencing each community and, in consequence, the mortality, by class is always of very great interest.

40. It will be observed that, of the four principal classes shown in the table following, the mortality, compared with the year before, is very much lower amongst Mussulman, the reduction of mortality in this community being equal to 2·80 per 1,000, and a little higher amongst Europeans. The mortality of European males is a little lower than in 1894, being 18·72 against 18·97, representing a difference of two deaths. The mortality of European females is 2·21 higher, the excess, I believe, being due to European females when seriously ill coming here either for medical treatment or on their way to some other place for a change.

41. Nothing can better illustrate the favourable chances of life where economic and other conditions are favourable than the following table showing the mortality amongst males in different classes :—

TABLE SHOWING THE MORTALITY AMONGST MALES IN DIFFERENT CLASSES.

Classes.	Mortality.
Jains	33·54
Brahmins	20·78
Lingacts	75·75
Bhatias	31·07
Hindus of other caste	22·32
Hindus, low-caste	42·06
Mussalman	33·20
Parsees	21·25
Jews	20·07
Native Christians	20·75
Eurasians	35·74
Europeans	18·72
Negro-Africans	566·66
Buddhists	36·49
Other and unknown classes	.....
Total	25·75

42. The mortality amongst Parsees is 1·14 higher than in 1894, but ·84 lower than in 1892. Although the total mortality of Parsees is 1·14 higher than in 1894, it will be seen on examining the mortality by sex that the mortality of males is actually lower and that the total enhancement is caused by a higher female death-rate. When the statistics of the mortality of the Parsee community are examined, the results are found interesting. The inconsiderable enhancement in the total mortality is made up of an increase amongst females and a decrease amongst males, the increase in the female death-rate counterbalancing the decrease in the mortality of males, the male mortality being 21·25 against 22·38 in 1894, while the female mortality is 24·78 against 21·31 in the previous year. The

increase in female mortality, I am inclined to believe, is due to a number of females, when seriously ill, coming to Bombay for medical assistance. But compared with the death-rate in the great mass of the population, the mortality amongst Parsee females is very low. We observe that in this year the mortality amongst females in all the large classes of the population is higher than amongst males. I have so often referred to the causes favourably influencing the chances of life and the mortality of Parsees that I need not describe them again.

TABLE SHOWING THE NUMBER OF DEATHS AND THE RATE OF MORTALITY PER 1,000 OF POPULATION BY CLASS, DURING 1895, ARRANGED ACCORDING TO SEX.

Classes.	Males.			Females.		
	Population.	Deaths.	Per 1,000 of Population.	Population.	Deaths.	Per 1,000 of Population.

43. Excluding the small communities liable to great fluctuation in population the highest mortality has occurred amongst Hindu Low-Caste, although the death-rate is less than in the year before. It has ever been so. The mortality will always remain high amongst Hindu Low-Caste. Whenever the seasons have been unfavourable and disease rife, Hindu Low-Caste have suffered most. They are very poor, living in crowded localities, and in the most insanitary buildings of these localities, several families in one room, a custom unknown in other classes, on damp floors and eating the poorest food. I can only suggest what I suggested in 1885, that the Municipality should build dwellings for them and give medical relief and charity.

44. In all the chief classes the female mortality is much in excess of the male. The heaviest excess is amongst two classes, Jains (a small and fluctuating community) and Hindu Low-Caste. In the

following table the mortality amongst males and females in the four principal classes is shown, and the high fatality amongst women indicates the need for medical assistance to them. This table is to be read with the table which follows, showing the mortality by age periods according to sex.

Classes.	Mortality amongst Males.	Mortality amongst Females.
Brahmins	20·78	37·22
Mussalman	33·20	48·93
Parsees	21·25	24·78
Europeans	18·72	26·16

45. There are many influences unfavourably affecting the chances of female life during the child-bearing age: of these imperfect house ventilation and seclusion of life in ill-ventilated and ill-drained and overcrowded buildings amidst privation or poverty are the most evident and those to which attention is first directed.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM ALL CAUSES BY CLASSES IN 1895.

Classes.	Population by Census of 1891.	Number of Deaths.	Mortality per 1,000 of Population.
Jains	25,225	1,139	45·15
Brahmins	37,982	977	25·72

1879.....	20·45	24·81	
1880.....	20·14	26·88	
1881.....	20·10	22·77	These calculations are based on the population of 1881.
1882.....	18·43	17·70	
1883.....	22·96	18·94	
1884.....	22·86	19·23	
1885.....	20·43	19·25	
1886.....	21·42	17·89	
1887.....	20·47	17·22	
1888.....	22·67	19·04	
1889.....	22·88	20·66	
1890.....	21·11	18·56	
1891.....	28·28	18·60	These calculations are based on the population of 1891.
1892.....	23·78	20·10	
1893.....	22·27	18·68	
1894.....	21·80	20·37	
1895.....	22·94	20·81	

47. The mortality from the chief death causes is shown in the table following :—

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM DIFFERENT CAUSES IN 1895.

Causes of Deaths.	No. of Deaths.	Death-rate per 1000 of Population.
Small-pox	270	·33
Measles	544	·66
Fevers	6,404	7·79
Cholera	90	·11
Phthisis	3,610	4·39
Diseases of the Nervous System	2,044	2·49
do. do. Respiratory System	4,565	5·56
Diarrhœa	1,188	1·45
Dysentery	625	·76
Accidents	488	·59
All other causes except Still-born	5,253	6·39
Total	25,081	30·52

48. The mortality from Small-pox, Measles, Cholera and Fevers in 1894 and 1895 is contrasted in the table following :—

Causes.	1894.	1895.
Small-pox	·6	·33
Measles	·96	·66
Cholera	·52	·11
Fevers	7·86	7·79

49. It will be observed that there has been a decrease in the mortality from the chief death causes, namely, Fevers, Small-pox, Measles and Cholera, equal to 2·73 per thousand.

50. The mortality by age periods follows nearly the same incidence as in former years.

51. The mortality of male children of two years of age and under is higher than of females; while from two years of age and upwards the mortality amongst female children commences to rise until in the nubile period it is more than double the male mortality. The causes of this terrible fatality amongst women and young women, I have frequently referred to. The high female mortality at this important period of life is one of the most serious influences enhancing the mortality. The terrible loss of female life indicated in these tables may be diminished through medical relief and more prosperous and economic conditions and by better house sanitation.

52. Between 9 and 40 years of age the female mortality is more than double the male. This is a very deplorable loss of life and it falls heaviest on the following classes, *viz.*:—Jains, Brahmins, Musalman and Native Christians. The incidence of the female mortality is a great factor in the fluctuation of the death-rate of localities. The localities of highest mortality are the localities with the highest female death-rate. High district mortality indicates a sacrifice of adult female life and a high death-rate of children.

53. The mortality from Measles is much less than in the last year ; Measles.
544 deaths were registered, being 243 less than in 1894, and 28 more than the average. With the lower mortality from Small-pox there has also been a decrease in the number of deaths from Measles. Of the large communities, the highest mortality has occurred amongst Hindu Low-Caste, then follow Jews and Eurasians.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM MEASLES BY CLASSES IN 1895.

Classes.	Population by Census of 1891.	Number of Deaths.	Mortality per 1,000 of Population.
Jains	25,225	15	·59

55. As is to be expected, the mortality by age periods follows the incidence of former years. The highest mortality occurred during the first three periods of early life, the male mortality being in excess of the female.

TABLE SHOWING THE NUMBER OF DEATHS FROM MEASLES AND THE DEATH-RATE AT DIFFERENT PERIODS OF LIFE BY SEX IN 1895.

56. 270 deaths were registered from Small-pox, being 261 less than in the last year and 36 less than the average. There is, as I have stated

Small-pox

before, a remarkable relation between the incidence of the mortality from both Small-pox and Measles. Of the large communities, the highest mortality occurred amongst Native Christians and the mass of the Hindu population.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM SMALL-POX BY CLASSES IN 1895.

Total	821,764	270	·33

57. The mortality by sex follows the same incidence as in former years, the female mortality being higher than the male. The incidence by age periods is much the same as in former years, the highest mortality occurring under 4 years of age. It will be observed that over 50 years of age only one death from Small-pox occurred.

59. The mortality from Fevers is 54 less than in the last year and 272 less than the average. 5,150 of the deaths from Fevers were referred to Remittent fever, being 140 less than in the last year and 289 less than the average. 35 were referred to Enteric Fever, being 9 more than in the last year and 15 more than the average. The increase in the mortality from Enteric Fever must, I think, be ascribed to more cases having been treated by medical men and therefore more accurate registration.

60. It will be observed from the table following that the mortality from fevers acquired its highest incidence in the month of May. In the same month in the previous two years the highest mortality from fevers also occurred.

TABLE SHOWING THE MORTALITY FROM FEVERS ACCORDING TO MONTHS.

Months.	Number of Deaths.	Mortality per 1,000 of Population.
January	555	8·10
February	507	7·40
March	585	8·54
April	570	8·32
May	764	11·15
June	591	8·63
July	477	6·96

September	422	6·11
October	387	5·65
November	469	6·84
December	555	8·10
Total	6,404	7·79

61. The incidence of the mortality by months indicates in this year as in the previous year that the mortality from fevers is highest at the two periods of greatest subsoil fluctuation. I would draw attention to the importance of this phenomenon.

62. The incidence of the mortality by sections is very interesting. The section of highest mortality in 1894 namely Sewri is again the section of highest mortality in 1895. The section of second highest mortality is Khara Talao, and the section of third highest mortality Mandvi. The first section, Sewri, is a district without drains but with an increasing population of mill-hands, and the high mortality is therefore, to some degree, probably connected with immigration and the increase of population. Khara Talao is a section with drains, mere rain-water channels, very imperfectly ventilated, very dilapidated and with very little fall. I have so often described the imperfect sanitary state of Mandvi that I need not now do more than refer to the description of the district in the last Annual Report. There is a large sewer, giving most insanitary communications, running through the east of Mandvi, a sewer which from its high level, is difficult to flush except at high tide and very imperfectly ventilated. The sewer I refer to is the Frere Road sewer.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM FEVERS IN EACH SECTION IN 1895.

63. The mortality by sex is interesting and unequal in incidence. The excess of female over male mortality is 2·28, while in the previous year it was 2·77. The total mortality is ·07 less, than in 1894, but while the female mortality is ·37 lower than in the previous year, the male mortality is ·12 higher. The decrease in the mortality

from fevers has, therefore, been greatest amongst females. In the previous year the increase in the fatality from fevers had been chiefly amongst females and female children under one year of age. In the table following the male and female mortality in 1893, 1894, and 1895 is contrasted.

Years.	Male Mortality from Fevers.	Female Mortality from Fevers.
1893	6·30	8·48
1894	6·83	9·60
1895	6·95	9 23

64. Examining the mortality by age periods we observe that the highest mortality occurred under the first year of life and the lowest under 14 years of life.

65. The mortality by class is suggestive. Of the large communities the highest mortality occurred amongst Jains and the lowest amongst Europeans. Compared with the previous year the mortality amongst the following communities, *viz.*, Jains, Brahmins, Lingaets, Bhatias, Hindus of other castes, Native Christians and Eurasians, is lower than in 1894.

66. The mortality amongst Parsees, which was highest and unusually enhanced in the months of May and June, declined to 3·79 in November and remained at the same rate in December.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM FEVERS BY CLASSES IN 1895.

67. A very small mortality from cholera, namely, 90 deaths, was registered. The mortality is 336 less than in the last year and 112 less than the average. The disease cannot be considered to have been epidemic during the year. The mortality has been very low, in fact most of the cases might have registered as choleraic diarrhœa. In the following sections, *viz.*, Parel and Mahim, the highest mortality occurred; they are in the suburbs, one forming the north boundary of the Island.

TABLE SHOWING THE NUMBER OF DEATHS AND THE DEATH-RATE FROM CHOLERA IN EACH SECTION IN 1895.

BOMBAY

REGISTRATION SECTIONS

AND SUB-SECTIONS.

Fractional figures in red show the date of the 1st attack in each section.
The numerator shows the day and the denominator the month.
Figures in black show the death rate from cholera per 10000. The calculations are based on the population of sections by the Census of 1891.

Scale 3000 Feet to one Inch.

68. The highest fatality occurred amongst Hindu low-caste and the mass of the Hindu population.

69. Even with the low mortality of this year, the death-rate by age periods exhibits the same results as in former years—a small number of cases with a light fatality at early periods of life and an increasing mortality as years advance. The highest mortality at any one period occurred between 35 to 39, *viz.*, ·23 per 1000.

70. It will be observed that even in this year when so few deaths have occurred from cholera 40 per cent. of the cases occurred on ground-floors. Most of the cases in this year as in previous years came from the population outside Bombay, and the fatality was heavier amongst these strangers. If the cases are grouped according to periods of residence, it will then be observed that as many as 41 cases were under three months' and 14 under six months' residence in Bombay.

71. The mortality from Phthisis is a little higher than in the last year. 3,610 deaths were registered, being 22 more than in the last year and 348 higher than the average. The death-rate is equal to 4·39

per 1,000 of population. Examining the death-rate, we find that, by sex it has been unequal, being more than twice as high amongst females, and that, as compared with the previous year, there has been a decrease of mortality amongst females and an increase amongst males, the male mortality being 3·03 and the female mortality 6·71, against 2·96 and 6·75 in 1894. The excess female mortality is noticeable in the large community of Mussalman. The female mortality varied from ·49 amongst Eurasians and 1·49 amongst Parsees to 18·61 amongst Jains and 12·75 amongst Mussalman. Looking at the table following, it is evident that the mortality from Phthisis is lowest, as would be expected, in the communities whose females live most in the open air. The male mortality varied from ·24 and ·76 amongst Europeans and Parsees to 5·20 and 5·53 amongst Mussalman and Jains. The mortality in the mass of the Hindu population is very much the same as in the previous year. Amongst Native Christians there has been an increase of mortality amongst males. It will be observed that while in the Parsee community the mortality of males is low, the death-rate of females is also low and, indeed lower than in most other communities.

73. The mortality by sections is interesting. The five districts of highest mortality in 1894-95 are shown in a table following. It will be observed that the highest death-rate occurred in 2nd Nagpada, and that Umarkhari, which was the district of second highest mortality in 1894, is not amongst the five districts of highest mortality in this year. A system of drainage has been sanctioned for the Nagpadas. In regard to the reduction of mortality in Umarkhari, I would refer to the remarks in the last Annual Report :—

74. The drainage of Umarkhari is being carried out and should produce an appreciable effect on the mortality from Phthisis in that district. There is, however, one very important improvement that still remains to be effected in this district of crowded houses, imperfectly ventilated, with dark and damp ground floors, without one open space for recreation—the provision of open spaces. Bhuleshwar, the third district in 1894, is intensely crowded and imperfectly drained. But it will be observed that in the district of Bhuleshwar there is also a decreasing mortality from Phthisis. This district has been partly drained.

75. There has been a very large reduction in the mortality from diseases of the respiratory System. 4,565 deaths were registered, being 820 less than in the last year and 115 more than the average. Of the deaths from diseases of the Respiratory System, 2,632 were referred to Bronchitis, being 721 less than in the last year and 137 less than the average; 1,354 were ascribed to Pneumonia, being 47 more than the last year and 298 more than the average.

76. *Digestive System.*—The mortality from diseases of the Digestive System is 594 less than the last year and 120 more than the average of the last five years. Of the deaths from diseases of the Digestive System, 1,188 were ascribed to Diarrhœa, being 410 less than in the last year and 13 more than the average; and 625 were referred to Dysentery, being 121 less than in the last year and 45 more than the average. To all other diseases of the Digestive System 678 deaths were ascribed, being 63 less than in the last year and 62 more than the average.

77. From diseases of the Nervous System 2,044 deaths were registered, being 355 less than in the last year and 195 less than the average.

78. To diseases of the Circulatory System 184 deaths were referred, being 6 more than in the last year, but 13 more than the average.

79. There were 93 deaths from diseases of the Urinary System, being 1 less than in the last year and 20 more than the average.

80. From diseases of the Generative System 244 deaths were registered, being 8 less than in the last year and 5 more than the average.

81. To diseases of the Organs of Locomotion and Cellular Tissue 95 deaths were ascribed, being 3 less than in the last year and 13 more than the average.

82. From Affections of the Cutaneous System 33 deaths were registered, being 2 less than in the last year and 5 more than the average.

83. To the general affection—Dropsy—114 deaths were due, bein 42 less than in the last year and 18 less than the average.

84. From Leprosy 42 deaths were registered, being 9 less than in the last year and 17 less than the average.

85. From Hooping Cough 275 deaths were registered, being 97 more than in the last year and 163 more than the average.

86. To Old Age and Debility 2,436 deaths were ascribed, being 95 more than in the last year and 281 more than the average.

87. The number of Premature Births is high, being the same as in the last year and 12 more than the average.

88. 488 deaths were registered from Accidents and Violence, being 98 more than in the last year and 89 more than the average. 67 deaths were referred to Poisoning, being 16 more than in the last year, but 12 more than the average : of the deaths from Poisoning, 35 were reported to have been accidental and 31 suicidal. 98 deaths were due to Drowning, being 4 less than in the last year and 8 more than the average.

89. The deaths from Drowning are classified as under :—

Accidental	45
Suicidal	38
Unknown	15

90. The cases of suicide through Drowning were reported to have occurred under the following circumstances —

1.	By jumping into a tank	26
2.	Do. do. pond	10
3.	Do. do. quarry holes	2

91. At the Burying and Burning Grounds of the City 16,608 bodies were buried, 8,767 burnt, and 1,177 conveyed to the Towers of Silence.

92. There has been a considerable increase in the number of births reported this year. 15,684 living and 1,470 still-born births were registered. Of the living births 8,150 were males and 7,534 females. The proportion of females to males by the census of 1891 was as 170·60 to 100, and, assuming that there were 100 males to 100 females, the birth-rate would be equal to 32·55 per 1,000 of population. This is the largest number of births registered since 1889.

TABLE SHOWING THE NUMBER OF BIRTHS AND THE BIRTH-RATE IN EACH CLASS.

Classes.	Population by Census of 1891.	Number of Births.	Birth-rate per 1,000 of Population.
Jains	25,225	416	16·49
Brahmins	37,982	394	10·37
Lingaets	784	21	26·78
Bhatias	7,891	149	18·88
Hindus of other castes	451,465	7,538	16·69
Hindus, low-caste	45,169	1,578	34·93
Mussalman	155,101	3,127	20·16

Jews	5,021	160	31·86
Native Christians	29,712	553	18·61
Eurasians	4,330	112	25·86
Europeans	11,290	201	17·80
Negro-Africans	146	9	61·64
Buddhists	190	3	15·79
Other and unknown castes	.....	1	.....
Total	821,764	15,684	19·08

93. The birth-rate by class indicates that the registration of births is not far from correct. The chief increase in the birth-rate has occurred amongst a class rapidly increasing, namely, Hindu low-caste. It will be observed that the birth-rate is more equally distributed by class than in the last year, showing evidently a settling down of the population. It will further be observed that the birth-rate amongst Hindu low-caste is as high as 34·93. This is a class having 134·96 males to 100 females. The birth-rate by districts depends on the classes or communities inhabiting the districts. In a table following the proportion of births to the female population is shown :—

TABLE SHOWING THE NUMBER OF BIRTHS AND THE BIRTH-RATE IN EACH SECTION IN 1895.

Wards.	Sections.	Population by Census of 1891.	Births.	Birth-rate per 1,000 of Population.

Appendix A.

AGGREGATE AND MEAN VELOCITIES AND RELATIVE FREQUENCY OF DIFFERENT WINDS, 1895.

TABLE showing for the year 1895 the Sums of the Velocities, and the Mean Velocities, in miles per hour, of the Winds which blew in each Month, from each of the Sixteen Principal Directions, and also the number of hourly Observations which those sums comprise; the latter numbers indicating the Relative Frequency of the same Wind (as to directions) in the several months, and of different Winds during the same Month.

2.—LICENSE DEPARTMENT.

1. I append a tabulated statement showing the total amount of fees collected under each head of licensable trades for each of the months of the year under report.

2. The income from all these up to 31st March last, including Rs. 3,866 collected for 1894-95 during 1895-96, was Rs. 65,048-8, adding to which the sum of Rs. 1,018 collected for last year up to the date of this report, the total revenue amounts to Rs. 66,066-8, or Rs. 6,066-8 in excess of the budget estimate. I have now no arrears to collect for 1895-96.

3. The statement given below showing the number of licenses issued and the revenue made each year since 1890 speaks for itself. It shows that not only has the revenue increased enormously since the establishment of this department, but also that dangerous and offensive trades have been brought under proper control by the issue of thousands of licenses and by the regular inspection of licensed places, though such inspections are at present necessarily few and far between owing to the limited outdoor staff at my disposal.

Official Year.	Licenses issued.	Amounts collected.
		Rs. a.
1890-91	3,235	36,417 8
1891-92	4,110	46,383 0
1892-93	4,833	54,996 8
1893-94	5,407	60,507 8
1894-95	5,701	63,914 8
1895-96	5,880	65,048 8

4. I have again to express my great satisfaction at the way in which all the subordinates of this department have discharged their arduous and responsible duties.

A.

TABULATED STATEMENT showing the amount of License Fee, with that of Process Fee, recovered for each of the licensable articles appearing in Schedule **M** during 1895-96.

Total Rs. ...	66,066 8	1,156 8	

3.—MARKETS.

APPENDED hereto are five tabulated statements marked Nos. 1, 2, 3, 4 and 5.

2. Statement Nos. 1, showing the revenue derived from various sources, with details of increases and decreases, and 2, showing the revenue of each of the last ten years, show that the total revenue has been gradually and steadily rising. For ready reference, the revenue of each of the ten years is given below :—

	Rs.	a.	p.
1886-87	2,93,375	11	2
1887-88	3,04,516	8	10
1888-89	3,22,517	6	8
1889-90	3,29,170	3	9
1890-91	3,48,106	5	7
1891-92	3,63,781	8	3
1892-93	3,77,527	4	6
1893-94	3,80,324	13	5
1894-95	3,92,261	13	0
1895-96	4,03,356	12	8

3. The revenue for the year under report is more than that of the previous year by Rs. 11,094-15-8, a rate of increase of about Rs. 925 a month. This must be considered most satisfactory.

4. Statement No. 3 shows the number of animals slaughtered during the year under report. The increase in the revenue derived under this head (Slaughter Fees) is chiefly due to the increase in the number of animals slaughtered, both cattle, sheep and goats. The increase under this head is Rs. 3,526-14-0, which is more than one-third of the total increase of Rs. 11,094-15-8. The following figures will show the number of animals (cattle, sheep and goats) slaughtered

for the Bombay markets during the year under report and those in the previous year :—

	1894-95.	1895-96.	Increase.
	Rs.	Rs.	Rs.
Buffaloes	2,911	2,942	31
Cows, Bullocks and Calves	30,711	33,544	2,833
Sheep and goats	4,95,089	5,01,839	6,750

5. Statement No. 4 will show the quantity of unwholesome food condemned and destroyed during the year. The quantity thus destroyed during the year under report amounts to 56 tons, 13 cwts., 2 qrs. and 15 lbs., against 28 tons, 5 cwts., 3 qrs. and 8 lbs. Thus the public have been to this extent protected from having meat, fish, &c., unfit for human food, sold to them.

6. Statement No. 5, *list of prosecutions*, speaks for itself.

General Remarks.

7. It is satisfactory to note the increase of Rs. 1,311-12-0 under the head "Verifying Weights and Measures." This must be due to the action of the Police in prosecuting dealers using fraudulent weights and measures.

8. *Colaba Market.*—This market was completed and occupied from 16th May 1895. The market is in two blocks ; one of these containing 50 stalls is used as a Fruit and Vegetable Market, and the half portion of the other (20 stalls) is used as a Mutton Market, leaving the rest for sale of fish.

9. During the year under report the supply of beef and mutton was plentiful, and fairly good and cheap.

10. The supply of fruit and vegetables was fair, both in quantity as well as in quality. About 14,241 baskets of pomegranates of sorts, 4,639 baskets of moosoombi, 5,610 baskets of grapes,

4,598 baskets of apples, and 1,353 baskets of mangoes of sorts were imported for the Bombay markets. The supply of mangoes and apples was considerably less than that of the previous year, whereas the pomegranate supply was plentiful.

11. It is a matter of satisfaction to me to be able to submit this report which shows such a steady and considerable increase in the revenue of the markets. I would mention that the market staff, on the whole, have worked well, and I must not omit to mention that the Head Clerk and Accountant (Mr. Burjorji Rustamji) of this office, Inspector Sullivan and Sub-Inspector Syed Ishmail had all worked particularly well during the year under report.

5.—REPORT OF THE MUNICIPAL HOSPITAL FOR INFECTIOUS DISEASES AT ARTHUR ROAD FOR THE YEAR 1895.

1. BUILDINGS AND GROUNDS.—In the report for the year 1894 I made the following remarks, and I regret to note that no action has been taken in the matter, and the state of the hospital is practically the same as before :—"The present buildings, or, more correctly speaking, open sheds, are hardly adequate to fulfil the functions of a modern infectious diseases hospital, consisting as they do of a plinth with mud flooring and a tiled roof (without planking) supported on iron columns, open on all sides, and in which the patients are protected so far as they can be from the westerly winds and inclemencies of the weather by bamboo matting. As the hospital has now for the last three years been open and working without breaks, whatever temporary arrangements that were made in former years are not likely to suit any longer, and it is essential that the buildings should be so altered as to make them adequate for the purpose for which they are being utilized. No bathing arrangements exist for the patients. There is not enough accommodation for the servants, and the cook-room also requires to be properly built." The level of the compound has been raised, and the surface drains constructed are working well ; a metalled road was also constructed during the year.

2. CONSERVANCY, DRAINAGE AND WATER-SUPPLY.—The water-carriage system has been introduced, and new automatic flushing tanks were fixed during the year and they are working satisfactorily. The water-supply is from the Vehar main, but as there is only one stand-pipe in the compound, great inconvenience is felt in the distribution of water ; one or two hydrants are required in the compound, and also water connection in the cook-room.

3. THE HOSPITAL continued working throughout the whole year, the hospital at Grant Road being closed.

4. ESTABLISHMENT.—The permanent establishment consisted of one Medical Officer, one Resident Apothecary, three Ward Boys, one Ayah, one Police Ramosee, one Cook, one Biggaree, and one Sweeper.

5. DISEASES TREATED.—The total number of patients suffering from the following diseases treated during the year was 205, as contrasted with 322, 214, and 336 in 1894, 1893, and 1892, respectively :—

	Diseases.	Number.
I	Small-pox	139
II	Chickon-pox	26
III	Measles	6
IV	Cholera	28
V	Choleraic Diarrhœa	6
	Total ...	205

6. The following table gives a comparative statement showing the details of all cases treated in the Municipal Infectious Diseases Hospital from 1892 to 1895 :—

Years.	Small-pox.	Chicken-pox.	Measles.	Cholera.	Choleraic Diarrhœa.	Chronic Diarrhœa.	Total of each year.
1892...	219	25	20	72	...	...	336
1893...	89	47	4	74	...	...	214
1894...	158	34	31	91	2	6	322
1895...	139	26	6	28	6	...	205
Grand Total	605	132	61	265	8	6	1,077

7. RESULTS.—The following table shows the results of treatment, together with the percentage of mortality for each disease for 1895 :—

	Diseases.	Number treated.	Cured.	Died.	Percentage of mortality.
I	Small-pox	139	110	29	20·86
II	Chicken-pox	26	26	...	0·00
III	Measles	6	6	...	0·00
IV	Cholera	28	11	17	60·71
V	Choleraic Diarrhœa ...	6	6	...	0·00
	Total ...	205	159	46	

The mortality from small-pox was 20·86 per cent. of those treated as against 28·66 in 1894, 37·07 in 1893, and 15·98 in 1892; the average for the 4 years being 25·54 per cent.

8. SMALL-POX.—Of the 139 small-pox patients treated 51 were vaccinated and 81 unvaccinated, and the ratio of mortality between these two classes was as about 1 to 3 :—

—	Number treated.	Cured.	Died.	Death-rate.
Vaccinated	51	46	5	9·80
Unvaccinated	88	64	24	27·27

The following table contrasts the mortality rate amongst these two classes according to castes :—

	Vaccinated.			Unvaccinated.		
	Treated.	Death.	Death-rate.	Treated.	Death.	Death-rate.
Christians	31	3	9·67	48	11	22·91
Hindoos	15	1	6·66	10	3	30·00
Mussulmans ...	5	1	20·00	30	10	33·33

It thus appears that in the Christians for every death amongst the vaccinated there were 2·5 deaths amongst those not vaccinated, and similarly 5 unvaccinated Hindus and 1·3 unvaccinated Mahomedans died for every vaccinated.

The types of small-pox were distributed as follows in these two classes :—

	Discrete.	Confluent.	Malignant.	Total.
Vaccinated	30	20	1	51
Unvaccinated	36	49	3	88

This shows that the percentage of confluent cases amongst the vaccinated was 39·21 as against 55·68 in the unvaccinated.

9. Chicken-pox.—26 cases of chicken-pox were treated during the year without any deaths as against 34, 47, and 25 during 1894, 1893 and 1892, respectively. All these cases were cured, and were as a rule of mild type.

10. Measles.—Only 6 cases of measles were treated during the year without any deaths as against 31, 4, and 20 during 1894, 1893 and 1892, respectively, with 4 deaths during 1892 and 3 deaths during 1894.

11. Cholera.—28 cases of cholera were treated during the year, as contrasted with 91, 74, and 72 during 1894, 1893 and 1892 respectively. The mortality rate was as follows :—

	Treated No.	Cured.	Died.	Death-rate
1892	72	33	39	54·16
1893	74	36	38	51·35
1894	91	40	51	56·04
1895	8	11	17	60·71

12. CHOLERAIC DIARRHŒA.—6 cases were treated without any deaths.

13. REMARKS.—(*a*) *Small-pox.*—The treatment adopted was the same as in previous years. Creolin was used for external application, and it again proved very useful in shortening the period of convalescence, and thus enabling the patients to leave the hospital earlier than under the older plan of treatment. No other modification in treatment was introduced.

The "non-actinic" treatment of small-pox, under red light, has come into extensive use in Europe and America, and it is to be hoped that a small outlay would be sanctioned for fitting up a room for experimental purposes. I would also request a special grant for making some experiments with the serum of immunised calves for the treatment of small-pox.

(*b*) *Chicken-pox and Measles.*—These diseases require no comments.

(*c*) *Cholera.*—The number of patients treated was the smallest during the last four years. No other modification in treatment than that described in the report for the year 1894 was adopted.

14. The conduct of the establishment was satisfactory. The Resident Hospital Apothecary, Mr. Samuel Samson, has proved very useful, and I would commend his services to the notice of the Health Officer.

N. H. CHOKSY,

Medical Officer in Charge,

Infectious Diseases Hospital, Arthur Road.

BOMBAY, 29*th August* 1896.

EDUCATIONAL.

REPORT OF THE JOINT SCHOOLS COMMITTEE, forwarded by the Committee's Secretary under his No. 485 of 6th July 1896.

THE JOINT SCHOOLS COMMITTEE'S OFFICE,
MUNICIPAL OFFICES, FORT,
BOMBAY, *10th June* 1896.

REPORT ON THE ADMINISTRATION OF THE JOINT SCHOOLS COMMITTEE FOR THE YEAR 1895-96.

Personnel of the Committee.

At the commencement of the year the Joint Schools Committee consisted of the following members :—

Appointed by Government.	*Appointed by the Corporation.*
G. N. NADKARNI, Esq.	Dr. THOMAS BLANEY, C.I.E.
GRATTAN GEARY, Esq.	NANU N. KOTHARE, Esq.
J. T. HATHORNTHWAITE, Esq.	Hon. Mr. A. M. DHARAMSI.
Hon. Mr. N. N. WADIA, C.I.E.	K. N. KABRAJI, Esq.

2. In accordance with the provisions of section 39 (3) of the Bombay Municipal Act, the two senior members who retired during the year were Dr. Blaney and Mr. Ghanasham Nilkanth Nadkarni. The Corporation re-elected Dr. Blaney as member of the Committee, while Government appointed the Hon. Mr. Javerilal U. Yajnik in place of Mr. Nadkarni. The Committee, while welcoming the Hon. Mr. Javerilal as a colleague, recorded their regret at having to lose the benefit of the assistance and advice of Mr. Nadkarni, who from the knowledge acquired during a long previous connection with the Educational Department as Deputy Educational Inspector, Bombay, was enabled to render valuable services to the Committee from its formation in 1889.

3. The Hon'ble Mr. Wadia was unanimously re-elected Chairman for the year.

Finance.

4. At the first quinquennial contract, Government had fixed their annual contribution to the School Fund at Rs. 25,000. That having terminated last year, Government issued a Resolution, and therein expressed their satisfaction at the efforts made by the Committee to promote primary education in Bombay, and raised their grant to Rs. 39,666.

5. The Corporation, it will be remembered, contributed to the School Fund during the five years, from 1890-91 to 1894-95, as under :—

Year.	Rs.
1890-91	39,500
1891-92	51,300
1892-93	52,220
1893-94	58,532
1894-95	59,135

The Committee decided that, for the present, the contribution from the Municipal Funds should remain the same, and applied for Rs. 59,135 for the year under report.

6. Government, as hitherto, continued to contribute Rs. 3,000 as their share of the cost of the Inspectors' Establishments for duties other than those connected with primary education.

7. During the year, the income from fees was Rs. 23,481-1-0 as against Rs. 22,231-3-0 in 1894-95.

8. The opening workable balance was Rs. 42,059-7-5. The total receipts were Rs. 1,25,805-12-0 as against Rs. 1,10,049-3-3 in 1894-95. The total expenditure was Rs. 1,11,069-12-7 as against Rs. 1,03,143-5-2 in the previous year, leaving a balance to the credit of the School Fund of Rs. 56,795-6-10 on 1st April 1896.

9. This surplus will gradually diminish as the scheme for the improvement of school accommodation, the status of teachers, and the promotion of education among Mahomedans and Low Castes by the opening up of new Schools, comes into operation. It is calculated that in the current year about Rs. 13,000 out of the balance will be appropriated for this purpose.

10. The cost per pupil during the last year was Rs. 12·4 as against Rs. 12·7 in 1894-95, and is made up as follows :—

(*a*) Teaching...	Rs.	8·4
(*b*) Rent	,,	3·1
(*c*) Miscellaneous	,,	·9

Endowments.

11. Last year the Committee expressed the hope that well-to-do and benevolent citizens will come forward to help the cause of primary education by means of donations and endowments. This has not yet met with the response that could be desired; but the Committee are glad to be able to state that during the year the Honorary Secretaries to the Dr. Blaney Memorial Fund forwarded a cheque for Rs. 1,118-8-8 with a request that the money be invested in Government securities, the interest accruing, from time to time, being devoted towards giving prizes or scholarships in the name of Dr. Blaney to deserving pupils in Municipal schools. The offer having been thankfully accepted, the amount was invested in four per cent. Municipal Bonds.

12. The donation last year of Rs. 500 from Mr. N. V. Mandlik, executor of the Rohatsek estate, came this year with an addition of Rs. 200 for distribution as monetary prizes among deserving students. The amount (Rs. 700) was distributed after a careful selection of pupils according to merit.

Extension of Primary Education.

13. The inquiry referred to in para. 13 of the last annual report as to the different races and castes in the seven Municipal Wards was completed during the year and has placed the Committee in possession of reliable information about the educational wants of each community in the different parts of the city. The minute and detailed information which was collected while the inquiry was in progress has been embodied in a series of statements which, it is hoped, will prove of value in guiding the Committee. The subjoined table gives a summary of the facts collected. A fuller statement is attached to this report as Appendix **A** :—

	No. of Schools.	Hindus.			Mahomedans.			Parsis.			Christians and Others.			Total.

Besides the 33,295 children in the primary schools, there are about 4,818 more, between the ages of 5 and 12, who are under instruction in the Lower, Middle and Higher stages of European and Anglo-Vernacular schools. If these were added, the total number of children of the school-going age, at present under instruction, would be 38·113, or equal to 34 per cent.

Mahomedan Education.

14. Although the percentage of Mahomedan children under instruction is shown at 32, a very large proportion of this (some 4,357) attend the Koran or Rote schools, about a hundred in number, where no secular education worth the name is given. If these schools were left out of account, the percentage will be reduced from 32 to 13·5. To help forward the Mahomedan community, two new schools were opened during the year, one at Colaba and the other at Madanpura. They are both fairly well attended. Provision has been made in the current year's budget for five more schools, four for boys and one for girls.

Education of Low Castes.

15. As a large portion of the Hindus belonging to the Low Castes go without education, the Committee opened, for the benefit of the children of these classes, a school at Kamathipura, where, in addition to education being given gratis, slates and pencils are provided free of cost. The Committee have called for a full report on the educational wants of the Low Castes in the different parts of the city, and hope soon to be able to take further practical steps towards their improvement.

Female Education.

16. The total percentage of female children between the ages of 5 and 12, who are under instruction, is only 16. The Committee opened a school for Hindu girls at Byculla and one for Mahomedan girls is provided in the current year's budget. They have under consideration the important question of how to advance female education among the Hindu and Mahomedan communities.

Aided Schools.

17. Eight schools were registered in 1894-95 for receiving grant-in-aid, while during the year under report, nine schools were added to the list, thus bringing up the total number of Aided Schools to 89. An indigenous school, known as the Parel Gujerati Boys' School, which was on the register, ceased to exist during the year. The total sum to be divided between these schools is estimated at Rs. 23,000 for 1896-97, as against Rs. 22,000 in the previous year, and Rs. 19,500 in the year before last.

Unaided Schools.

18. Last year the total number of these schools was returned as 181. They are this year reported to be 280. The marked difference in the figures for the two years is the result of the special inquiry already referred to. The statistics that were given in previous years were necessarily based upon imperfect information. The important question as to how to bring these schools in touch with the Department is engaging the serious consideration of the Committee.

During the year a private school at Null Bazar, with over 50 pupils, was, at the request of the proprietor, incorporated with the Municipal School in the locality, the proprietor agreeing to serve as assistant teacher under the Committee.

Municipal Schools.

19. As regards the Municipal Schools the Committee desire to make the following observations :—

School Buildings and Accommodation.

20. In the last report, attention was drawn to the condition and the bad sanitary provision of the buildings rented for Municipal schools. In submitting their Budget for 1896-97 the Committee "asked the Municipal Commissioner to enter in the Municipal Budget for 1896-97 an additional contribution from the Municipality of Rs. 50,000 for the provision of improved school accommodation. The amount was not entered as requested, as the Standing Committee thought it was for the Corporation to decide, later on, whether they were prepared to incur loan charges to that extent."

21. Since then the visit of His Excellency the Governor and his remarks (*vide* Appendix **B**) attracted the attention of the public. The matter being one of urgency, the Corporation, with the promptitude characteristic of them in cases where urgent public wants are brought to notice, resolved, on the motion of the Hon'ble Mr. Pherozshah M. Mehta, C.I.E.,—

> "That a fund to be called the School Building Fund be established for the purpose of providing proper buildings for primary schools, and that moneys should be drawn from it, from time to time, as proportional Government contributions are provided ; and that the contribution to the fund be fixed for the present year at Rs. 50,000. That the total grant in respect of expenditure for the year, as contribution towards the cost of education, be adopted at Rs. 1,39,795, and that of that amount a sum of Rs. 50,000 be credited to a separate fund to be called The School Building Fund, to which additions may be made from year to year, such fund to be utilized for the purpose of providing proper buildings for primary schools, and moneys wherefrom shall be drawn from time to time as the Corporation may sanction and as proportional Government contributions may be provided."

On receipt of the above resolution the Committee resolved—

"That, with reference to the Resolution of the Corporation, "No. 11914, dated 20th January 1896, the Joint Schools "Committee recommend the Corporation to sanction the "erection of a school building on the site which they under- "stand is available in Tank Street, that the building should "provide accommodation for the two schools known as the "Nagpada Marathi and Nagpada Urdoo Schools, which are "very crowded and in an unsanitary condition."

Hereupon the Corporation resolved—

"That the letter to the Municipal Secretary from the Secretary, "Joint Schools Committee, No. 1277, dated 17th February "1896, be recorded.

"That the President be requested to write to Government in- "forming them that the Corporation have started a Primary "School Building Fund to which they are prepared to add, "as far as their finances may permit, and enquire if "Government will be ready to contribute their supplemental "grants in that behalf, with as little delay as possible, to "enable the Corporation to take the work systematically in "hand at once, especially bearing in mind the increasing "value of land in the City."

Temporary Measures.

22. Seeing that some years must elapse before they can get properly built school houses in the crowded localities, as there will be difficulties in acquiring land, pulling down old buildings and providing the large funds necessary, the Committee decided not to wait, but to enter into negotiations for leasing buildings possessing sufficient accommodation, which could readily be altered as regards air and light to the requirements of their respective schools. As a first step towards this, they have asked the Municipal Solicitors to prepare a draft lease, setting forth the terms and conditions upon which the Committee are prepared to hire such houses for a period of, say, five years. When the draft is received, the Committee will proceed with the requisite negotiations, and it is hoped that they will receive the necessary support from the Corporation to carry out this object.

Change of Premises.

23. During the year the Chinchpoogli School was removed to a separate bungalow, while

Increased Accommodation

was provided for the Null Bazar and the Kamathipura Nirashrit Schools.

Furniture and Apparatus.

24. The paucity and unsuitability of furniture and apparatus is being gradually removed. But no satisfactory rules suited to the requirements of the schools can be fixed till the question of buildings is settled, as obviously any large expenditure at the present moment, would be found unsuitable for our future requirements.

Fees.

25. It was found that the scale of fees differed in different schools, and even in the same school the fees varied at the discretion of the teachers from annas 2 to 8. The Committee laid down one uniform scale for all Municipal Schools and fixed it as follows :—

Boys' Vernacular Schools.

(1.) That in the Lower Primary Stage, *i.e.*, from the infant class to the second standard, the fee in the boys' schools, attended by the higher classes, be four annas per pupil ; and that in the Upper Primary Stage it be eight annas per pupil.

(2). That the rate be two annas and four annas, respectively, in those boys' schools which are attended mostly by the backward classes.

Mahomedan Schools.

(3). That the rate for Mahomedan schools be two annas and four annas per pupil for the lower and the upper primary stages, respectively.

(4). That the percentage of free students in Mahomedan schools be fixed at 25.

Girls' Schools.

(5). That the rate in the girls' schools attended by children of the advanced classes be two annas and four annas, respectively, for the lower and the upper primary departments.

(6). That the rate for schools attended by girls of the backward classes be one and two annas per pupil.

Re-Admission Fee.

(7). That re-admission fee, equal in amount to the class fee, be charged.

The income from fees, however, will not rise on account of this revision of the scale, the object of which was uniformity, and not financial gain.

Teachers.

(*a*)—Trained.

26. Last year it was pointed out that the Committee had under consideration the question of the improvement of the status of teachers. A complete set of rules which have been carefully considered by the Committee are now before the Corporation, and it is hoped that, when passed, these will be the means of improving the condition of the trained teachers in the employment of the Committee.

(*b*)—Untrained.

27. They, however, feel that their work in this direction will not be complete until they have been able to formulate a scheme for the promotion of those teachers who are known as untrained and who cannot draw pensionable pay which is more than Rs. 10 per month. This is not an easy matter, but is having the careful consideration of the Committee, with due regard to Chapter VIII, rules 7, 8 and 9, of the Central Division Masters' Code.

Female Teachers.

28. With regard to female teachers, the Committee have all along found great difficulty in getting trained mistresses in sufficient numbers, more particularly on the Gujerati side. They have had to employ persons not possessing the Training College Certificate, but otherwise competent. As under the existing By-laws these teachers cannot draw more than Rs. 10 per month, the Committee, after carefully considering the situation, recommended the removal of certain restrictions from the by-laws. The Corporation having accepted the Committee's recommendation, an amended by-law is now before Government for their sanction.

Mahomedan Teachers, and University Men for Anglo-Vernacular Schools.

29. The difficulty denoted in the preceding paragraph having been equally felt in the case of teachers for Urdu schools and of University men for the Anglo-Vernacular classes, a similar recommendation for the modification of the by-law, as sanctioned by the Corporation, is before Government.

Teaching.

30. The gradual improvement noticed last year is steadily progressing. Some of the Municipal schools did very well at the public examinations, as will be seen from the fact that—(1) out of a total of six Mary Carpenter Scholarships, open to all the schools in Bombay, three were won by the Churney Road Girls' school; (2) out of four Middle School scholarships, open to public competition, three were obtained by pupils of Municipal schools,—two by those of the Girgaum School and the third by a boy from the Amerchandwadi school; (3) out of three boys presented by the Vithalwadi school for the Public Service examination two were successful.

31. With a few exceptions, the work of the teachers was reported as satisfactory. The Committee feel, however, that there is still much room for improvement which, it is believed, will be facilitated, when the new rules come into force, by the employment of a better class of teachers, and by the due encouragement the present teachers will get to work well and harder.

Inspectors.

32. At the commencement of the year Messrs. R. S. Taki and J. F. Madon were the Inspectors for the Marathi and Gujrati side,

respectively. It was felt that in the interests of Mahomedan education an Inspector was wanted who, besides examining and inspecting the growing Municipal Urdu schools, could, by his acquaintance with the wants of the Mahomedan community and his influence with them, promote the extension of primary education among the Mahomedans. The Committee selected Mr. Mainuddin for the post and his services were accordingly transferred by Government to the Municipality. The choice appears to have met with general approval amongst the Mahomedan community.

Assistant Inspectors.

33. It is felt that Messrs. Taki and Madon, the Inspectors, energetic and hardworking as they are, cannot cope with the work entrusted to them. Out of the 12 months, they are engaged for three months in Government work in conjunction with the Government Educational Inspector, C.D. During the remaining nine months they are expected—

(*a*) to examine 63 Municipal schools or more than 315 classes with about 6,000 children (the children in the infant classes being taken collectively, while those in the other standards are supposed to be examined individually in each of the four heads);

(*b*) to examine in a similar manner 44 aided schools, having more, than 220 classes, with upwards of 2,500 children;

(*c*) to inspect for confirmation of grants-in-aid a similar number of aided schools, *viz*, 44, having more than 220 classes, with upwards of 2,500 children;

(*d*) to pay second visits to the 151 schools examined and inspected as above;

(*e*) to pay unexpected visits to the above 151 schools, say once at least in three months or so;

(*f*) to pay visits to 280 Private or Unaided schools;

(*g*) to examine, verify and certify the numerous statistics supplied to the Committee by teachers, &c., and

(*h*) to report to the Committee on the various matters coming up before them.

It will be perceived that it is not possible for them to carry out this work in the time at their disposal, *viz.*, some 150 school days or about 900 hours for each Inspector.

It was suggested that it might be advantageous if the Corporation could be induced to sacrifice the Government contribution of Rs. 3,000 per annum and to request Government to relieve the Inspectors of their work. But on a mature consideration of the subject, the Committee are of opinion that it will be advantageous to let the Inspectors continue to work, as hitherto, and to appoint two Assistant Inspectors, the salaries of whom, according to Government regulations,

may commence with Rs. 70 as pay and rise to Rs. 100 per month, with a conveyance allowance of Rs. 25 per month. At present the expenditure out of the School Fund on the Inspectorial establishment is about Rs. 8,000. If the Government annual grant of Rs. 3,000 were given up, the cost would still be the same for two full-time Inspectors, whereas under the arrangement proposed there would be available for work—

Two Assistant Inspectors for the full twelve months in the year.

Two Deputy Inspectors for nine out of the twelve months.

Retirements.

34. Two teachers retired at the end of the year, Mr. Bal Yadneshwar Gurjar, Head Master of the Amerchandwadi Boys' School, and Bai Mariambai Joseph, Head Mistress, Dongri Girls' School. Mr. Gurjar was the oldest teacher under the Committee, having served for 36 years, and has very well earned his pension by the good work he did during his long service. Bai Mariambai retired on invalid pension on account of failing health.

Deaths.

35. The Committee regret to record the death of eight teachers during the last year, two of them being Head Masters, namely, Mr. M. N. Varde of the Dongri Boys' School, and Mr. Shivshankar Cursonji of the Bhuleshwar Boys' School. Mr. Varde was an able and conscientious teacher and was mainly instrumental in bringing the school under his charge to a high state of efficiency. Mr. Shivshankar was also a good and hardworking teacher, whose death at a time when he had completed his period of service entitling him to full pension, is particularly regrettable.

School Statistics.

36. The following statistics will be found interesting :—

(*a*)—Classification of schools.

Class of Schools.	1894-95.				1895-96.

Appendix B.

Letter from His Excellency the Governor to the Hon'ble Mr. N. N. Wadia, C.I.E.

SHADIPALLI, 24*th November* 1895.

DEAR MR. WADIA,—I was very much interested in what I saw of the Municipal schools under the direction of the Committee of which you are the Chairman.

I was much struck with the places in which the vernacular education is carried on, and I cannot say that I was very favorably impressed with what I saw. The buildings or parts of buildings where the education is carried on, I think all must admit, fall very far short of what one should reasonably expect to find in a city of the commercial importance and of such large and increasing population as Bombay finds itself to-day and governed by a Municipality which has large revenues and which is a body of considerable enlightenment. The schools I saw cannot be said to fulfil elementary conditions. The rooms were extremely crowded, their ventilation worse than insufficient ; in some places there was hardly any light, and staircases which little children could hardly be expected to mount and descend without considerable danger of accident. What the condition of these places may be in the rains it is difficult to imagine.

I should very much like to be put in possession of the facts of the situation and desire to make the following suggestion :—That you, as Chairman, and the Hon'ble Mr. Kirkham, the Educational Inspector, C.D., should meet and consult, and draw me up a joint note as to the present situation and its history with any suggestions that you feel inclined to make.

I should then be in possession of the views of yourself as Chairman of the Committee and of the Government Educational Officer. As I know you pay about Rs. 26,000 in rent, a rough estimate of the cost of new buildings might be included.—Yours truly,

SANDHURST.

Resolution of the Joint Schools Committee, No. 117, *dated 4th December* 1895.

Resolved : That the Chairman is requested to convey to His Excellency the best thanks of the Committee for the valued communication and to add that the Committee, while fully endorsing His Excellency's views regarding insufficient and insanitary accommodation in many of the primary schools of Bombay, were quite prepared to hear of his Lordship's impressions as to the unsuitability of the buildings. That the Chairman be further requested to act on the suggestion made by His Excellency and prepare, in conjunction with the Hon'ble Mr. Kirkham, the joint note asked for.

Joint note from the Hon'ble Mr. N. N. Wadia, C.I.E., and the Hon'ble Mr. T. B. Kirkham to His Excellency the Governor.

17*th January* 1896.

To J. J. HEATON, Esq., I.C.S.,

Private Secretary to His Excellency the Governor.

SIR,—As called for in His Excellency the Governor's demi-official letter, dated Shadipalli, 24th November 1895, to the Hon'ble Mr. Wadia, we have the honor to submit the following joint note as to the existing state of the buildings now in the occupation of the Joint Schools Committee for the purposes of primary education under the Bombay Municipal Act and to suggest what seems to us to be the best mode of effecting the requisite improvement.

2. In the letter above referred to, His Excellency observes as follows :—

"I was much struck with the places in which the vernacular "education is carried on, and I cannot say that I was very favorably "impressed with what I saw. The buildings or parts of buildings "where the education is carried on, I think all must admit, fall very "far short of what one should reasonably expect to find in a city of the "commercial importance and of such large and increasing population "as Bombay finds itself to-day and governed by a Municipality which "has large revenues and which is a body of considerable enlighten-"ment. The schools I saw cannot be said to fulfil elementary condi-"tions. The rooms were extremely crowded, their ventilation worse "than insufficient; in some places there was hardly any light, and stair-"cases which little children could hardly be expected to mount and "descend without considerable danger of accident. What the condi-"tion of these places may be in the rains it is difficult to imagine."

3. No one can dispute the facts so clearly pointed out by His Excellency or deny that the present state of things is in the highest degree undesirable and unworthy of the city. With the exception of two small buildings in the outlying parts of Ghodupdeo and Worli, the city possesses no buildings designed and constructed for educational purposes. The municipal primary schools are all held in hired buildings or parts of buildings originally erected for the ordinary domestic occupation of native families. The consequence is inevitable; not only are the class-rooms not suitable as regards light and ventilation for educational purposes, they are such, in a very large number of cases, as to be positively detrimental both to health and education. In numerous cases the surroundings are also unhealthy, and the atmosphere about the school building polluted. There are not a few houses where the drains and latrines are defective in construction, and

the privies are so near as to be a positive danger to health. Speaking generally, the rooms have low ceilings and are so badly ventilated that within a short time of assembling the air becomes unbearably fetid, and a visitor fresh from the open air is glad to beat a retreat. The lighting is insufficient and improperly distributed for school work and the eyes of the children are consequently subjected to strain and injury. Not a few classes are held in lofts and attics which in some instances are reached by stairs steep and narrow. Some of the lofts have no ceilings and are excessively hot. In some cases where parts only of a building are hired, the class-rooms filled with children are adjacent to rooms and passages in which domestic and other non-educational operations are going on, and the contiguity is unseemly and educationally objectionable.

4. To come to figures, there are in Bombay 56 municipal schools held in 49 buildings which provide 216 separate rooms. Out of these no less than 116 furnish a floor space of less than 8 square feet per child and would be condemned by the English Educational Department and refused recognition. According to the English regulation no new school building can be constructed, which allows less than 10 square feet of floor space for each child and

> "No school already in existence can be recognised unless it has 8 "square feet of floor space and 80 cubic feet of air space for "each child."

We regret to add that in 57 of our Bombay class-rooms not even 6 square feet per child is allowed, and that in a small number the overcrowding is worse than this. It will be seen that an examination of the figures completely bears out His Excellency's graphic description quoted above.

5. Such being the facts of the situation, it is clear that the primary school buildings of the city are not on a par with her other public buildings, and it becomes a question of first-class importance, both from the point of view of education and public health, how to bring them up to the level of our other civic institutions. This in our opinion can only be done by the provision of buildings specially designed for school purposes and to meet the requirement of the different localities of the city. Such buildings in our opinion should be plain substantial structures, no money being spent on merely architectural effects, and such as to provide a sufficient number of light and airy rooms in which the primary education of the children of the neighbourhood can be carried on with efficiency, each building also having suitable sanitary arrangements. We append a tabular statement showing the localities in which such buildings are immediately wanted, the schools which might be removed to such buildings, the number of children at present in attendance, the rent now paid, which would be saved, and an estimate, necessarily rough, of cost of land and building.

6. As regards ways and means, we think that, as the matter is now clearly proved to be one of urgency, it should no longer be treated in a piece-meal or desultory fashion. We are strongly of opinion that it should be dealt with, once for all, by a comprehensive scheme making a reasonably adequate provision for buildings for the different parts of the city, and we think the number and situation of the schools shewn in the appendix constitute such a scheme. It will be seen that the estimated cost of the proposed 10 buildings is roughly 10 lakhs, and we would recommend that, following the plan which was successfully adopted for providing the city with Fire Brigade Stations, the sum be raised by means of a loan, the replacement of which can be spread over 12 or 15 years, supplemented by a liberal grant-in-aid from Government. The advantages of this plan are that, whilst payment can be made gradually, the necessary buildings can be constructed at once or within two or three years, so that further injury to the children of the city may be prevented and the present undesirable state of things effectually removed.

We have the honor to be,

Sir,

Your most obedient servants,

NOWROSJEE N. WADIA,

Chairman, Joint Schools Committee.

T. B. KIRKHAM,

Educational Inspector, C.D.

Reply from His Excellency the Governor to the Joint Note.

5th March 1896.

DEAR MR. WADIA,—As you are the first signatory of the joint note forwarded to me by yourself and Mr. Kirkham, I write to you.

The joint note, which is evidently the result of much experience, care and practical knowledge of existing conditions, more than endorses the views I expressed in my letter to you of November 24th, 1895.

I am sorry to learn that my impressions formed after what was necessarily a hurried inspection were so well founded.

It is not my duty to advise, but perhaps I may be allowed to express a hope, that the subject of the joint note may receive the most earnest consideration of the Committee of which you are Chairman.—Yours truly,

SANDHURST.

ANNUAL REPORT

OF THE

MUNICIPAL AUDITOR

1895-96.

To

H. W. BARROW, Esq.,

Municipal Secretary,

Bombay.

SIR,

In accordance with the 137th Section of the Bombay Municipal Act III of 1888, I have the honor to forward my Report on the whole of the Municipal Accounts for the official year 1895-96 for submission to the Standing Committee.

I have the honor to be,

Sir,

Your most obedient servant,

NANABHAI RASTAMJI RANINA,

Municipal Auditor.

BOMBAY, 26*th August* 1896.

REPORT OF THE AUDITOR OF THE MUNICIPAL ACCOUNTS FOR THE YEAR 1895-96.

The Municipal Corporation at their ordinary monthly meeting, held on the 7th day of March 1895, appointed the late Mr. A. F. Moos and myself concurrent Auditors to audit the Accounts of the Municipality for the year 1895-96.

2. I regret to have to report that Mr. Moos, who has been again and again chosen by the Corporation to be my colleague in the audit work, died on 8th November 1895. On the 2nd of December 1895 the Corporation appointed Mr. Adam Smith to succeed the late Mr. Moos. He too, I regret to say, did not long survive his predecessor; and I again worked single-handed from 13th June to 8th July 1896. Under the circumstances the duty of submitting the Annual Report for the official year which ended on 31st March 1896 devolves on me.

3. During the interregnum all the vouchers and papers relating to receipts and disbursements have been compared by me with the Day-books and subsidiary Ledgers, also the Day-books with the General Ledger and the Journal with the Subsidiary and General Ledgers; during the life-time of my late colleagues this duty was performed conjointly as usual. The Bank's receipts of Investments of the different loans, of Municipal Building's Fire Insurance, Worn-out Water Mains Renewal, &c., Premia, &c., Funds, and of Contractors, Government, Port Trust and Municipal Bonds deposited with the Bank as security for the faithful performance of their contracts, and the Bank's pass-books were examined by me personally and found in order.

4. In compliance with the direction of the Corporation contained in their Resolution passed on the 19th of November 1888 and communicated to the Municipal Auditors under Municipal Secretary's letter No. 5374, dated the 30th idem, at the end of the financial year all sinking fund investments pertaining to the year were examined, and I certify that they have all been duly and properly made.

5. In addition to the concurrent audit, weekly statements of receipts and disbursements of Municipal Accounts were examined each week before their publication in the Government Gazette. The accuracy of this weekly audit was further tested at the end of each month by the preparation of a summary of all accounts directly from the General and subsidiary Ledgers and independently of the weekly statements. The summary contained totals of receipts and disbursements of each account as it stood in the subsidiary Ledgers at the end of the last week of each month, which totals were tallied with the aggregate total of each head of account given in the weekly statements of the month. By this method of scrutiny no error or omis

sion or an incorrect posting of an item in the Ledgers could have remained undetected for more than a month at the most.

6. The summary so prepared was forwarded monthly in the usual manner to the Municipal Secretary for submission to the Standing Committee.

7. The number of receipt and disbursement vouchers which have passed under scrutiny amounted to 70,650 against 66,402 in the previous year :—

	1895-96.	1894-95.
	Rs.	Rs.
Receipts	24,407	23,198
Disbursements	46,243	43,204
	70,650	66,402

8. *The total receipts* of Municipal Fund from all sources, including water tax and other miscellaneous Water Works revenue and interest and profit on investments, amounted in the aggregate to ... Rs. 67,61,710 4 5 in 1895-96.
against „ 65,39,372 12 2 „ 1894-95.

i.e. ... Rs. 2,22,337 8 3 more than in the previous year.

9. *The total disbursements* of Municipal Fund including Water Works account amounted to Rs. 67,02,515-15-5. Deducting therefrom Rs. 1,46,179-11-5, as per particulars given in the margin, the net total disbursements amounted to... Rs. 65,56,336 -4 -0 in 1895-96
against ... „ 63,29,399-13 10 „ 1894-95

INVESTMENTS.	Rs.	a.	p.
Municipal Buildings Fire Insurance Fund.	3,000	0	0
Interest realized on do. ...	965	5	5
Worn-out Mains Renewal Fund ...	25,000	0	0
Interest realised on do. ...	10,816	13	0
„ Do. Net Premia, &c., Fund...	8,648	11	11
	48,130	11	4
Net premia received on the 2nd instalment of 10¼ lacs of the 28¼ lacs Loan raised in 1895-96	97,748	13	1
	1,46,179	11	5

i.e. ...Rs. 2,26,936 -6 -2 in excess of the disbursements of the preceding year.

10. With the opening cash balance of Rs. 2,75,370-1-3 on 1st April 1895 the gross receipts of 1895-96 amounted to Rs. 1,19,78,877-6-8 against the gross disbursements of Rs. 1,19,01,071-12-5, leaving a credit balance of Rs. 74,805-10-3 on the 31st March 1896 ; being Rs. 2,00,564-7-0 less than in the previous year.

11. *General Tax* (Budget estimate Rs. 18,66,000). The total receipts under this head, comprising House, Police, Lighting and Fire Brigade * rates, and including the annual contribution from Govern

* Vide para 17

ment Rs. 98,374 and from Port Trust Rs. 1,52,482, amounted
to ... Rs. 18,77,437-12-7 in 1895-96
against „ 18,58,710-11-7 in 1894-95,

being... Rs. 18,727- 1-0 greater than the receipts in the previous year.

12. Water Tax and other miscellaneous Water Works Revenue (Budget estimate Rs. 13,35,000)
net realization Rs. 14,42,895- 4-7 in 1895-96
against ... „ 13,88,264-12-3 in 1894-95

i.e. ... Rs. 54,630- 8-4 in excess of the previous year.

13. In addition to the last-mentioned receipts a further sum of Rs. 30,387-7-3 being allotted to Water Works account on account of interest on the Worn-out Mains Renewal and Net Premia, &c., Fund investments and on account of the net premia received on the Water Works portion of Rs. 10¼ lacs of the 23¼ lacs loan raised in 1895-96, the total receipts of Water Works account for the year under review amounted to Rs. 14,73,282-11-10.

14. The total expenditure of the Water Works account, including new works, Interest and Sinking Fund on Loans, &c., amounted
to ... ... Rs. 16,55,657 6 0 in 1895-96
against ... ... „ 16,35,579 1 5 in 1894-95

showing an increase of Rs. 20,078 4 7 over the expenditure in the previous year.

15. The total expenditure of the Water Works account amounting to Rs. 16,55,657 6 0, when compared with the receipts of the same year, aggregating
to „ 14,73,282 11 10, shows an excess expenditure of

Rs. 1,82,374 10 2, which deficit was met from the Municipal General Revenue.

16. *Wheel Tax and Tolls.*—Budget Estimate Rs. 3,50,000.
Net realizations * Rs. 3,65,524 11 3 in 1895-96.
Do. „ 3,56,081 14 4 in 1894-95

being Rs. 9,442 12 11 greater than the receipts of 1894-95.

* Includes Rs. 19,528-14-0 on account of toll fees, against which the budgetted expenditure of Rs. 1,680 on account of fixed establishment charges under the Traffic Manager, Port Trust Bunders, was incurred, leaving a net profit of Rs. 17,848-14-0 under this head.

17. *Halalkhor Tax.*—Budget Estimate Rs. 6,32,100.

Net recovery for 1895-96	...	Rs.	6,57,812	2	9
Do. 1894-95	...	„	6,81,556	14	7
being		„	23,744	11	10

less than the receipts for 1894-95.

18. *Town Duties.*—Budget Estimate Rs. 7,87,000.

Gross collection	Rs.	16,87,707	2	10	in 1895-96
Do.	„	16,22,188	1	10	in 1894-95

being Rs. 65,519 1 0 greater than the gross receipts of the previous year as per particulars given below :—

	1895-96.			1894-95.			Difference.		
	Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.
Port Trust yielded	13,13,937	1	7	12,56,027	10	1	57,909	7	6
B. B. & C. I. Ry. Co. yielded... ...	1,15,811	8	0	1,03,068	7	0	12,742	12	0
G. I. P. Ry. Co. yielded	2,57,958	14	3	2,63,092	0	9	—5,133	2	6
	16,87,707	2	10	16,22,188	1	10	65,519	1	0

19. *Refund of Town Duties.*—

In 1895-96	Rs.	7,76,856	3	0
„ 1894-95	„	7,33,645	12	0
being	Rs.	43,210	7	0

more than the refunds in 1894-95.

20. *Commission, &c., Charges* for collecting Town Duties were incurred as under :—

Budget estimates		1895-96.			1894-95.			Difference.		
Rs.		Rs.	a.	p.	Rs.	a.	p.	Rs.	a.	p.
34,400	Port Trust...	32,324	3	7	38,028	13	4	—5,699	9	9
11,000	G. I. P. Ry. Co.	7,833	0	0	8,767	6	7	— 934	6	7
4,600	B. B. & C. I. Ry. Co.	3,656	4	0	3,312	4	0	344	0	0
50,000		*43,813	7	7	50,103	7	11	—6,290	0	4

In this connection it would not be out of place here to observe that the commission allowed to the Railway Companies and Port Trust authorities on the gross amount of Town Duty collected by them though calculated at the rate of 3 per cent., the actual payment comes to about 5¾ per cent. owing to the subsequent exportation of nearly 50 per cent. of the articles on the value of which Town Duty has been paid.

* *Vide* para. 46.

21. *Summary of Town Duties* —

	1895-96.	1894-95
Gross Collection ... ...Rs.	16,87,707-2-10	16,22,188-1-10
Less.—Refund, Commission, Audit, &c., Charges ... ... „	8,29,613-10-7	7,92,883-3-11
Net profit... ...Rs.	8,58,093-8-3	8,29,304-13-11

i.e., Rs. 28,788-10-4 more than in 1894-95.

22. *Licenses.*—

Budget Estimates.		Realization. 1895-96.			1894-95.		
		Rs.	a.	p.	Rs.	a.	p.
Rs. 60,000	(*a*) Dangerous and offensive trades	65,048	8	0	64,801	8	0
3,600	(*b*) Streets and Buildings ...	3,380	0	0	2,940	0	0
24,750	(*c*) Land conveyance, music, &c.	27,906	8	0	27,895	3	0
88,350		96,335	0	0	95,136	11	0

For the purposes of comparison it may be here pointed out that an expenditure of Rs. 14,527-14-2 was incurred during the year under review in respect of item marked (*a*) and of Rs. 12,069-2-10 in respect of item marked (*c*); thus leaving a net income of Rs. 50,520-9-10 and Rs. 15,837-5-2 respectively in each of the two heads.

23. *Liquor Licenses.*—The usual fixed amount of Rs. 1,43,750 was paid by Government according to Section 63, Act V of 1878.

24. *Tobacco Duty.*—Budget Estimate Rs. 1,87,000. The receipts under this head, collected through the Collector of Customs, amounted to Rs. 2,17,474-14-5* in 1895-96 against Rs. 2,05,348-4-3 in 1894-95, *i.e.*, Rs. 12,126-10-2 greater than the recovery in the previous year.

25. *Markets and Slaughter Houses.*—

Budget Estimates.		1895-96.			1894-95.		
		Rs.	a.	p.	Rs.	a.	p.
3,70,000	Receipts	3,83,543	2	4	3,76,405	15	0
†1,57,056	Expenditure	‡1,58,678	8	5	1,41,138	11	0
	Net Income	2,24,864	9	11	2,35,267	4	0

From the above figures it will be seen that the gross receipts amounted to Rs. 7,137-3-4 more than those of the previous year, and

* Exclusive of Establishment, &c, charges amounting to Rs. 28,683-8-11 recovered by the Collector direct from the gross receipts

† Revised Estimate Rs 1,66,646-11-5 ‡ *Vide* para. 53

that the expenditure was greater by Rs. 17,539-13-5 during the year under review, thus leaving a net profit of Rs. 10,402-10-1 less than the realizations of 1894-95.

26. *Miscellaneous Fees.*—Budget Estimate ... ... Rs. 45,000
Receipts in 1895-96 ... ...Rs. 54,060 10 3
Do 1894-95 ... ... „ 49,863 13 9

i.e. Rs. 4,196 12 6 greater than the receipts of the previous year.

27. *Miscellaneous Fines and Penalties.*—Budget Estimate Rs. 10,000.
Actual recovery ... ... Rs. 11,482 0 6 in 1895-96.
Do. ... ... „ 11,302 3 8 in 1894-95.

i.e. Rs. 179 12 10 more than the receipts of the previous year.

28. *Miscellaneous Receipts.*—Budget Estimate ... Rs. 1,25,000
Proceeds in 1895-96 ... Rs. 1,62,096 7 2
Do. 1894-95 ... „ 1,33,787 11 2

i.e. Rs. 28,308 9 0 more than the receipts of 1894-95.

29. *Miscellaneous Savings.*—Budget Estimate ... Rs. 3,000
In 1895-96 ... ... Rs. 3,391 13 2
„ 1894-95 ... ... „ 3,373 4 1

i.e. Rs. 18 9 1 more than the receipts of the previous year.

These savings are the unclaimed wages of Municipal employés, which sums are carried at the end of each month to Deposit Account pending adjustment.

30. *Sale Proceeds of Unserviceable Stores sold by Public Auction* realized Rs. 2,982-10-11, being Rs. 4,441-11-11 less than that in the previous year.

31. *Actual Profit on Sale of Stores to Contractors, &c.*, amounted to Rs. 10,560-3-0 against Rs. 5,441-14-0 in 1894-95, being Rs. 5,118-5-0 more than the receipts of the previous year.

32. *Public Gardens*—Budget Estimate ... ... Rs. 6,600
Receipts in 1895-96 ... Rs. 7,811 15 11
Do. 1894-95 ... „ 7,524 15 3

i.e. Rs. 287 0 8 more than the receipts of the previous year.

33. *Maintenance of Public Gardens.*—(*a*) Victoria, Budget Estimate Rs. 52,373.

Actual expenditure in 1895-96...	Rs.	*50,389	3	9
Do. 1894-95...	„	†50,642	3	8
being	Rs.	252	15	11

less during the year under review.

34. It may be here observed that the expenditure during 1895-96 of the Victoria Gardens excluding all new works exceeded the receipts for that year by Rs. 42,577-3-10.

35. *Maintenance of the remaining eight Gardens.*—Budget Estimate Rs. 8,861; Revised Estimate Rs. 12,262-12-0.

Expenditure in 1895-96 ...	Rs.	‡10,952	10	10
Do. 1894-95 ...	„	8,570	1	4
being	Rs.	2,382	9	6

more than that expended during the previous year, due principally to the cost of repairs and re-erection of the gates of the Elphinstone Circle Garden.

36. The aggregate expenditure on all the nine gardens including new works amounted to Rs. 64,028-7-4 against Rs. §65,866-8-10, being Rs. 1,838-1-6 less than the aggregate expenditure in 1894-95.

37. *Contribution from Municipal Servants towards Pension, &c., Fund.*—Budget Estimate Rs. 16,000. Under this head Rs. 3,833-15-6 were realized in excess of that of the previous year, principally, owing to such of the Municipal employés as were recently admitted to the benefit of this fund by the Standing Committee, having paid up all their back contributions.

Rs. 21,704-13-9 in 1895-96.
„ 17,870-14-3 in 1894-95.
Rs. 3,833-15-6

38. *Tramway Rent.*—Budget Estimate Rs. 42,000. An increase of Rs. 5,122-10-11 during 1895-96 over the receipts for 1894-95 is due to the Company having extended their lines and doubled the existing single lines in several places.

Rs. 43,548-10-2 in 1895-96.
„ 38,425-15-3 in 1894-95.
Rs. 5,122-10-11

---

* Exclusive of Rs 567-8-10 on account of new works.

† Exclusive of Rs. 34,766-12-4 on account of New Works, &c.

‡ Exclusive of Rs. 2,118-15-11 for constructing a rubble masonry drain at Sir Cawasjee Jehangior Mahim Gardens.

§ Exclusive of Rs. 28,102-8-6 on account of the net cost of land acquired for the improvement and extension of the Victoria Gardens.

39. *Interest on Sinking and Insurance, &c., Fund Investments—*

Budget Estimate.		1895-96.	1894-95.
		Rs. a. p.	Rs. a. p.
57,500	5 & 4 % Municipal Loans Sinking Fund Investment	57,663 12 8	43,846 10 0
990	Municipal Buildings, Fire Insurance Fund Investment	965 5 5	738 1 6
10,420	Worn-out Mains Renewal Fund Investment	10,816 13 0	7,690 8 0
8,590	Investment of net premia, &c., received on different Municipal Loans... ...	8,648 11 11	7,662 2 5
77,500		78,094 11 0	59,932 5 11

i.e. Rs. 18,162-5-1 more than the realizations of the previous year.

40. *Interest and Profit on Investments of Surplus Loan and other Balances.*—Budget Estimate Rs. 1,50,000.

	Rs. a. p.
Realization in 1895-96	1,65,613 1 6
Do. 1894-95	2,05,354 14 6
Being less than the previous year ...	39,741 13 0

41. *Workshops—*

	1895-96.	1894-95.
	Rs. a. p.	Rs. a. p.
Receipts	92,702 14 9	1,02,766 15 2
Add—Outstandings	13,061 4 3	4,523 1 3
	105,764 3 0	1,07,290 0 5

	6,990 6 3	5,272 9 8

Out of the large outstanding of over Rs. 13,000, Rs. 10,000 are against the Health Department.*

42. *Private Works—*

	1895-96.	1894-95.
	Rs. a. p.	Rs. a. p.
Receipts	22,369 11 5	37,143 1 1
Deduct—Outstandings for the previous year ...	1,028 10 10	7,955 0 1
Actual receipts for the year...	21,341 0 7	19,188 1 0
Add—Outstandings	2,540 2 6	1,028 10 10
Total Receipts for the year ...	23,781 3 1	20,216 11 10
Deduct—Expenditure	21,182 8 11	18,193 0 1
	2,598 10 2	2,023 11 9
Excess recoveries	464 15 6	1,438 8 2
Total profit during the year ...	3,063 9 8	3,462 1 11

* *Vide* para. 44.

43. *Departmental Works—*

	1895-96.			1894-95.		
	Rs.	a.	p.	Rs.	a.	p.
Receipts	1,04,383	11	9	93 653	15	0
Deduct—Outstandings for the previous year ...	5,807	5	11	1,340	6	11
	98,576	5	10	92,413	8	1
Add—Outstandings	19,187	8	2	5,807	5	11
Total receipts for the year... ...	1,17,763	14	0	98,220	14	0
Total expenditure for the year ...	1,17,763	14	0	98,220	14	0

It will be seen from the figures given above that expenditure to the amount of Rs. 98,220 was incurred on account of departmental works in 1894-95 against Rs. 1,17,763 spent in 1895-96 on account of the same works.

44. *Outstandings of the Engineer's Department for the year* 1895-96—

Workshops	Rs.	13,061	4 3
Private Works	,,	2,540	2 6
Departmental Works ...	,,	19,187	8 2

A greater portion of the Workshops and Departmental Works outstandings remained unadjusted at the end of the year for want of proper sanction to the excess expenditure. The only means by which such large outstandings can be prevented would be by the executive officers concerned watching that their expenditure under each head is not exceeded.

45. *General Superintendence—*

Budget Estimates.	Sub-heads.	1895-96.			1894-95.		
Rs.		Rs.	a.	p.	Rs.	a.	p.
56,940	Corporation and Standing Committee Establishment	54,105	11	4	54,130	13	0
65,428	Municipal Commissioner's Personal Office Establishment	54,779	13	1	67,091	10	8
32,992	General Office Establishment	32,557	13	2	32,620	2	10
*57,096	Accounts and Expenditure Audit Establishment.	57,874	2	2	57,778	5	7
2,02,456		1,99,317	7	9	2,11,631	0	1

The decrease of about Rs. 12,000 in 1895-96 as compared with the expenditure of 1894-95 under Municipal Commissioner's personal office establishment is mainly due to (*a*) the difference between the maximum salary drawn by Mr. Acworth under section 57 (3) of the Act and that paid to Mr. Snow under section 57 (1), and (*b*) to the allowance paid to Dr. Weir during the absence of Mr. Acworth on privilege leave from 18th August to 18th November 1894.

Revised estimate Rs. 58,007 0 1

46. *Assessment and Collection Department*—

Budget Estimates.	Sub-heads.	1895-96.	1894-95.
Rs.		Rs. a. p.	Rs. a. p.
1,43,954	Property and Wheel Tax Establishment	1,44,632 9 7	1,44,484 10 8
50,000	Town Duty Collection	* 43,813 7 7	* 50,103 7 11
1,680	Tolls Collection	† 1,680 0 0	1,680 0 0
27,188	Licensing Establishment.	‡26,597 1 0	26,948 8 2
24,216	Revenue and Refund Audit Office Establishment	24,266 7 3	24,554 3 11
2,47,038		2,40,989 9 5	2,47,770 11 8

The decrease of about Rs. 6,000 in Town Duty collection is due solely to large outstandings on account of commission, &c., charges having remained unpaid at the close of the year.

47. *Fire Brigade.*—Budget Estimate ... Rs. 1,23,426

Expended in 1895-96	Rs. 1,15,990 10 2	
Do. in 1894-95	„ 1,14,143 11 6	
Difference	Rs. 1,846 14 8	

The additional ½ per cent. tax for Fire Brigade charges realized a sum of Rs. 1,10,437-8-3 during the year. Deducting this amount from the amount of expenditure shown above there remains an excess expenditure of Rs. 5,553-1-11 over the receipts for 1895-96.

48. Since the levy of the Fire Brigade Tax in 1889-90 the net collection has amounted to..... Rs. 8,64,900 11 1
against the total expenditure of..... „ 7,96,011 10 1

The receipts have thus exceeded the expenditure by ... ... Rs. 68,889 1 0 as shown in the following contrasted statement :—

Tax.	Year.	Receipts.	Expenditure.	Difference.
		Rs. a. p.	Rs. a. p.	Rs. a. p.
½ %	1889-90	79,187 0 0	93,906 15 3	—14,719 15 3

‖ „ „ „ 1,01,463-12-7
¶ Revised Estimate Rs. 1,40,488-6-2
** „ „ „ 40,642-0-0

The above figures show an increased expenditure of about Rs. 48,000 under certain heads and a decrease of about Rs. 65,000 under other heads, thereby causing a net decrease of about Rs. 17,000 over the expenditure for 1894-95 as explained below.

The increase under General Supervision and Miscellaneous Duties is chiefly due to the appointment of the Assistant Engineer, Mechanical Branch, who formerly was styled First Engineer and Superintendent, Love Grove Pumping Station, and his salary then charged to that station and to the maximum salary admissible under the Act being allowed to the Executive Engineer.

The charge on account of the Pumping Station at Colaba is entirely a new one. This station, which is worked on the Shone system, partially commenced operations in May 1895 and was put in full swing in November of the same year.

The increase of Rs. 93,000 under road watering head is principally due to fixing new pattern hydrants in Clarke and Gibbs Roads and Church Gate Street and in obtaining new pattern hydrants for other roads for the purpose of watering them direct from the mains.

The decrease of Rs. 7,000 under Water Works maintenance is mainly due to a larger expenditure having been incurred in 1894-95 under the head "Materials."

The decrease of Rs. 13,000 under Public Lighting is due chiefly to the conversion of several ordinary gas lamps into incandescent ones.

The decrease of Rs. 44,000 under Road Repairs and Maintenance is principally due to heavy outstandings for 1893-94 on account of paving footpaths having been defrayed in 1894-95, and to the purchase of new steam and hand rollers, &c., in that year.

50. *Hospitals, &c.*—

Budget Estimates.	Sub-heads.	1895-96.	1894-95.
Rs.		Rs. a. p.	Rs. a. p.
36,000	Goculdas Tejpal	35,263 8 11	35,494 8 7
3,000	Jaffer Sulleman	3,000 0 0	3,250 0 0
18,000	Matunga Leper Asylum	17,997 14 5	22,711 2 10
57,000		56,260 2 4	61,455 11 5

The decrease of Rs. 5,000 in the expenditure for 1895-96 under Matunga Leper Asylum is due to the unexpended balances of the grants for 1890-91, 1891-92, 1892-93, which were originally credited to the Municipal Fund, having been paid to the credit of the Leper Asylum fund in 1894-95.

51. *Miscellaneous—*

Budget Estimates.	Heads.	1895-96.	1894-95.
Rs.		Rs. a. p.	Rs. a. p.
†45,000	Pensions, Gratuities, &c.	48,451 13 9	46,567 8 3
7,000	Discretional Contingencies	*5,442 0 1	6,631 15 0
10,000	Auditor's Allowance	9,667 8 11	10,000 0 0
1,000	Election Expenses	197 13 0	7,189 10 8

The heavy charges in 1894-95 under the last-mentioned item is solely due to the triennial general elections held in that year.

52. The charges paid under the orders of the Municipal Commissioner from his Discretional Contingencies are as under :—

		Rs. a. p.
1	Purchase of 600 carbon rods 15" long from Messrs. John Fleming and Co. in December 1894 for the electric lighting of the Arthur Crawford Markets and the Municipal Offices ...	150 0 0
2	Printing 100 copies of the Water Works' portion of the Administrative Report for 1893-94 at the Bombay Gazette Press for the use of the Water Works' Office	180 0 0
3	Telegram charges incurred by Major H. Tulloch in transmitting his opinion about catch-pits at Love Grove	219 6 10
4	Purchase of a pyrometer from Messrs. Bradbury-Brady and Co. in February 1895 for ascertaining the temperature of gases as they leave the chimney of the Garlic incinerator and of the heat developed in the different parts of the incinerator.	93 0 0
5	Charges preferred by the Collector of Bombay for surveying the land at Mughlat acquired for placing a dust-bin cart... ...	5 0 0
6	Laying gas fittings in May 1895 to the Municipal bungalow at Chinchpokly occupied by the Water Works Maintenance Superintendent	89 8 0
7	Purchase of stores required for cleaning the Municipal Office building from Messrs. Sullemanjee Mulla Abdoolally and Co. from January 1895 to February 1895	118 13 3
8	Repairing the machinery of the hydraulic lift of the Municipal Offices in February 1895	5 14 8
9	Erecting a temporary jowli shed over Garlic's incinerator in June 1895	212 9 5
10	Providing glazed windows in the south-west corner of the Commissioner's office in June 1895	91 0 8
11	Purchase of umbrellas from Messrs. Sullemanjee Mulla Abdoollally and Co. in June 1895 for naiks and watchmen doing night duty in the Municipal Office building	9 0 0
12	Printing the rules framed for house-drainage connections in accordance with the general remarks laid down by the House-connection Committee of the Corporation	159 9 7
	Carried over ...	1,362 14 5

* Vide para 52 † Revised Estimate Rs. 49,721 11 0

		Rs.	a.	p.
	Brought over ...	1,362	14	5
13	Compensation for injury sustained by Captain R. Pinvey's pony on the 18th September 1895 by reason of the noise caused by the escape of steam from steam roller No. 1 opposite the Oval and near the Church Gate Railway station	100	0	0
14	Purchase of Remington's type-writer from Messrs. Warden and Co. in November 1895 for the use of the Drainage Engineer's Office	400	0	0
15	Gratuity paid to one Bhawoo Krishnajee on account of injuries sustained while in the execution of his duties which led to the amputation of his left leg below the knee	100	0	0
16	Charges for cleaning the Stores compound and removing the weeds and cutchra in November 1895 to make arrangements for the annual auction sale...	31	14	0
17	Mr. Shivshanker Narayen's charges for taking photographs of a fallen bungalow on Nepean Sea Road in October 1895 ...	10	0	0
18	Making certain additions and alterations to the Garlic incinerator	1,220	5	7
19	Providing a special Bunsen burner for the disinfecting chamber at Frere Road in September 1895	30	0	0
20	Printing and binding the agenda paper of the Corporation on silk cloth in English leather and gold letters for being presented to His Excellency the Governor on his visit to the Corporation meeting held on the 16th January 1896	24	6	0
21	Cost of preparing the plans of the sidings, &c., and making a survey of certain plots to carry town sweepings to Chimbur by rail	37	2	8
22	Charges incurred by Vasi Mallee, cesspool cart-filler, in prosecuting Mr. McAlpine for assault while engaged on public duty	17	0	0
23	Purchase of Remington's type-writer with table, blue copying ribbon, brush and carbon papers from Messrs. Warden and Co. in February 1896 for the use of the Commissioner's Office ...	425	0	0
24	Purchase of a 5" beam scale with chains and pans from Messrs. Sullemanjee Mulla Abdoolally and Co. in February 1896 for the use of the Municipal Workshops	46	0	0
25	Cost of preparing estimates for conveying all the dirty water from the house gullies at Khetwadi directly into the street sewer and making "Jump Weir" arrangements for the storm-water	220	0	0
26	Renewal and re-erection of water trough, Warden Road, in September 1895	181	8	7
27	Providing a screen and a canvas curtain for the Chief Accountant's Office	132	9	0
28	Subscription to the daily edition of the *Times of India* from 28th November to 29th February 1896 supplied to the Municipal's Secretary Office	12	8	0
29	Constructing 25 water entrances in Fort in February 1896 ...	997	15	0
30	Providing cast iron covers to the catch-pits of the drains at Bori Bunder stables in March 1896	11	11	2
31	Repairing one Smith's bellows belonging to the Water Works Department in February 1896	26	2	5
32	Repairing a gully-flushing-engine for making two hand barrows in December 1895 and January 1896	54	15	3
	Rs. ...	5,442	0	1

As stated in some of the previous reports, it may be again observed that it would seem proper that excesses on ordinary grants should not be paid out of Discretional Contingency. If, however, it is convenient in certain cases to obtain sanctions from the Discretional Contingency, it might be arranged, it is thought, that the charges should be debited to the proper heads by a transfer.

§ Revised Estimate Rs. 1,66,546-11-5. ‖ Revised Estimate Rs. 10,507-8-1.

The above figures show an aggregate increased expenditure of Rs. 21,000 in certain heads, and a decrease of Rs. 16,000 in certain other heads, thereby causing a net increase of only Rs. 5,000 over the expenditure for 1894-95 as shown below :—

The decrease of Rs. 12,000 under Conservancy Branch is chiefly due to the cost incurred in 1894-95 in purchasing a steam pumping engine for flushing gullies and erecting 9 automatic flushers, and to the inability to procure during 1895-96 the requisite number of bullocks to make up the full strength.

The increase of Rs. 17,000 under Markets and Slaughter Houses is principally owing to (*a*) cost of lighting the new Mutton Market at the Arthur Crawford Markets and the Foras Road Market, (*b*) cost of painting the markets, which is done every alternate year, and (*c*) the rent paid to the trustees of the Pinjrapole estate for the building occupied temporarily by the stall holders of Bhuleshwar Market.

54. *Mahaluxmi Dhobiwada*—

	1895-96.	1894-95.
Receipts	Rs. 17,064 0 0	17,065 0 0
Expenditure	„ 32,981 10 1	34,067 10 5
Difference	Rs. 15,917 10 1	17,002 10 5

It will appear from the foregoing figures that the expenses incurred by the Municipality in maintaining the Dhobiwada are nearly double the amount of recovery made in the shape of rents.

55. *Milch Cattle Stables and Rooms*—

	1895-96.	1894-95.
Receipts	Rs. 16,471 7 1	16,370 2 3
Expenditure	„ 10,347 6 7	9,597 1 2
Actual Profit	Rs. 6,124 0 6	6,773 1 1

The figures clearly show that the Milch Cattle Stables and Rooms are a source of profit to the Municipality.

56. *Police Charges.*—As recommended by the Committee of the Corporation appointed to consider the important question of Police Charges, Government were paid during the year under review monthly instalments calculated on the bases of annual contribution of Rs. 5,00,000 without prejudice to the claims of the Corporation on Government for the reduction of the total charges claimed by Government. The question of the increased contribution demanded by Government since 1892-93 is still pending.

57. *Education.*—

Budget Estimates.	Sub-heads.	1895-96.	1894-95.
Rs.		Rs. a. p.	Rs. a. p.
59,135	Primary Education...	59,135 0 0	59,135 0 0
1,800	School for Deaf and Dumb Mutes ...	1,800 0 0	1,800 0 0
2,500	Veterinary College	2,500 0 0	2,500 0 0
11,200	Victoria and Albert Museum	10,255 10 8	9,058 14 6
10,000	Victoria Jubilee Technical Institute ...	10,000 0 0	10,000 0 0
4,800	Joint Schools Committee's Establishment.	4,790 11 5	4,796 1 6
89,435		88,481 6 1	87,290 0 0

The increase this year of Rs. 1,000 in Victoria and Albert Museum is solely due to the purchase of a large number of artware collections, and to the savings caused in 1894-95 owing to the Curator having then gone on leave on half pay.

58. Report on the accounts of Municipal Schools is appended in accordance with the Joint Schools Committee's Bye-law No. 15 passed by the Municipal Council.

59. *New Works (Revenue)*—

Budget Estimate Rs. 71,416 ; Revised Estimate Rs. 4,66,745.

Expended in 1895-96... Rs. 2,38,581 12 3*

„ 1894-95... „ 1,57,287 5 4*

being Rs. 81,294-6-11 in excess of that expended in the previous year.

New works summarised :—	Rs. a. p.
Drainage works...	18,343 10 2
Water „	20,004 8 5
Streets and buildings	1,53,387 12 3
Sanitary and other miscellaneous works ...	46,845 13 5
Rs.	2,38,581 12 3

* Excluding the expenditure of Rs. 567-8-10 and Rs. 6,654-3-10 respectively incurred in 1895-96 and in 1894-95 on account of Victoria Gardens.

The following are some of the chief Sanitary, &c., works :—

	Rs.	a.	p.
Latrines and urinals	21,169	5	10
New machinery, Municipal Workshops ...	3,550	0	0
Erection of a new Cemetery Office and Chawl at Haines Road...	3,972	15	3
Filling in the compound of the Small-pox Hospital at Arthur Road	3,080	9	1

Rs.	11,05,939	6	10
Roads and streets ... ...*Cr.* „	21,060	1	5
Rs.	10,84,879	5	5

61. *Debt.*—All the information regarding this head is embodied in the Municipal Commissioner's Report on page 18.

62. *Personal Accounts of Municipal officers.*—The amount of permanent advances made to Municipal officers to meet contingent, &c., expenses and that temporarily debited to the above head pending their final adjustment on the receipt of necessary sanctions, certified bills or explanation, &c., amounted on the 31st March 1896 to Rs. 6,780-6-6 against Rs. 7,281-5-1 on 31st March 1895, *i.e.*, Rs. 500-14-7 less than in the previous year.

63. *Reserve Stock* on hand on 31st March—

	1896.	1895.
	Rs. a. p.	Rs. a. p.
Engineer, Drainage	3,69,764 12 11	55,136 1 1
„ Water	4,41,239 6 4	4,43,543 9 10
General Stock	65,655 6 5	4,15,603 15 8
	8,76,659 9 8	9,14,283 10 7

64. *Income Tax.*—During the year under review the amount of Income Tax recovered by the Chief Accountant from the fees due to the members of the Standing Committee and from the salary, pay and wages of Municipal officers and servants of different grades and classes amounted to Rs. 15,303-11-6, of which Rs. 15,251-9-6 were paid into the Bank of Bombay to the credit of Government, leaving a balance of Rs. 52-2-0 due to Government on 31st March 1896, which has been paid in 1896-97. The Income Tax collected by the Assessor and Collector through the Superintendent of E Ward from the owners of public conveyances amounted to Rs. 8,699, of which Rs. 8,679 were paid to Government, leaving a balance of Rs. 20 payable during 1896-97.

65. *Assets and Liabilities*—

	1895-96.	1894-95.
	Rs. a. p.	Rs. a. p.
Assets	5,50,11,965 13 3	5,36,34,289 4 9
Liabilities ...	3,80,22,864 12 9	3,72,22,425 4 8
Difference ...	1,69,89,101 0 6	1,64,11,864 0 1

being Rs. 5,77,237-0-5 greater than the excess in the previous year.

From the above figures it will be seen that the assets exceeded the liabilities by 45 per cent. in 1895-96 against 44 per cent. in 1894-95.

66. *Scrutiny of Collections and of Outstanding Bills of Rates and Taxes for the year 1895-96 and of previous years.*—

Collections.—During the year under report there were issued by the Assessor and Collector 89,929 total demand assessment bills for Property and Wheel Tax of the value of Rs. 39,05,668-1-6 and 1,196 bills for meter hire for the same year of the value of Rs. 10,281-2-4.

The following figures give the particulars of the bills and collection :—

89,439 bills for Property and Wheel Tax were issued for 1895-96 of the value of				Rs. 38,95,004	a. p. 1 7
1,196 bills for meter hire for 1895-96				10,281	2 4

The usual Appendices marked A, B and C, showing particulars of the scrutiny of the outstanding balances for the year 1895-96 and for previous years up to 1888-89 inclusive, are herewith annexed.

68. I shall examine the adjusting and other cross entries and compare them with the books of the Municipality and Appendices Nos. 3, 4, 5, 6, 7 & 8 and certify them hereafter.

I have the honor to be,

Sir,

Your obedient servant,

NANABHAI RASTAMJI RANINA,

Municipal Auditor.

BOMBAY, *26th August* 1896.
